Class 23153700 Precision fastening or torque equipment

Definition (if available) Torque equipment used for precision joining and assembly of products.

Commodity	Commodity Title	Definition	Synonym
23153701	Pulse tool	A pulse tool combines the speed of an impact with the repeatability of a shut-off nutrunner. Shut-off pulse tools take speed and low torque reaction and add advanced automatic shut-off mechanisms to take the operator and the guesswork out of the fastening equation.	Outils d'impulsion, Impulzusos szerszám, パルスツール, 펄스툴, Torquímetro de impacto, Pulsverktyg
23153702	Nutrunner	A type of controlled nut driver, often with torque transducers in the head. It is used in precision fastening and assembly applications, and can be interfaced with SPC software for quality control.	Boulonneuse, Anyarögzítő, ナットランナー, 너트러너, Torquímetro, Mutteråtdragare

Class 23153800 Coating systems

Definition (if available) Various systems used to apply coatings to various types of parts

Commodity	Commodity Title	Definition	Synonym
23153801	Electrostatic fluxer	Equipment used to apply brazing flux to parts using an electostatic charge	静電気フラクサー, 정전기 살포기, Fluxer electrostático, Elektrostatisk smältningstillsats

23181509	Sorting machinery		拣选机械, 揀選機械, Sorting machinery, Sorteermachines, Machines de triage, Sortierungsmaschinen, Osztályozógépek, Macchine per la selezione, 分別機, 음식물 분류기, Sorteringsmaskiner, Máquina classificadora, Maquinaria de clasificación, Sorteringsmaskiner
23181510	Meat tyer or bagger	Device that facilitates bagging or netting of rolled meats, roasts, hams, etc.	肉类加工设备, 肉類加工設備, Meat tyers, Ficelleuses à viande, Fleischbinder, Öntvény kötözők, ミートタイアー, 음식물 결속기, Kjøttbindere, Carne de tyers, Atadoras de carne, Köttbindare
23181511	Forming machine		成型机, 成型機, Forming machine, Machine à former, Vorformungsmaschine, Formázó gép, 成型機, 음식물 성형 기, Formemaskiner, Máquinas de moldes, Conformadora, Formningsmaskin
23181512	Cooling machine		冷冻机, 冷凍機, Cooling machine, Refroidisseuse, Kühlgerät, Hűtőgép, 冷却機, 음식물 냉각기, Kjølemaskiner, Máquinas de refrigração, Enfriadora, Nedkylningsmaskin
23181513	Preduster		防尘器, 防塵器, Preduster, Paneuse, Vorentstauber, Elő-beporzás, 防じん機, 예집진기, Forstøver, Removedores de pó, Preespolvoreadora, Förpudrare
23181514	Cheese making machine	A machine that automatically produces cheese with milk.	チーズ製造機, 치즈 제조기, Máquina para elaboración de queso,
23181515	Bean curd making machine	A machine that manufactures tofu. It washes and separates beans and impure substances, the soaks them in a water tank and crushes and filters them appropriately. They are then boiled and poured into a mold.	豆腐製造機, 두부 제조기, Máquina para elaborar tofu (queso de soya),
23181516	Noodle making machine	A machine that uses wheat and other flours to make noodles.	製麺機, 제면기, Máquina para elaborar fideos,
23181517	Fermented soybean machine	A machine that produces fermented soybeans in standardized shape. After washing the beans to remove impure substances, the machines soaks them in a water tank and filters and steams them.	大豆発酵機, 메주 제조기, Máquina para elaborar frijol de soya fermentado,
23181518	Food fermentation device	A reactor that disintegrates organic compounds with microbes, such as yeasta and bacteria in order to generate alcohol, organic acid, carbon gas and others.	食品発酵機, 식품 발효기, Dispositivo para fermentar alimentos,
23181519	Pasteurizing machine	Machine employing thermal process to reduce pathogen agents performed on food.	低温殺菌装置,

Family 23240000 Metal cutting machinery and accessories

Class 23241400 Metal grinding machines

Definition (if available) Grinders and grinding machines use an abrasive that is bonded to a wheel, belt or disc to remove material and improve surface finish.

Commodity	Commodity Title	Definition	Synonym
23241401	Bench grinder	Depending on the grade of the grinding wheel it may be used for sharpening cutting tools such as lathe tools or drill bits. Alternatively it may be used to roughly shape metal prior to welding or fitting.	Meuleuse d'établi, Munkapadi csiszoló gép, 卓上グラインダー, 벤치그라인더, Rectificador de banco, Bänkslipmaskiner
23241402	Surface grinding machine	A surface grinder has a head which is lowered, and the workpiece is moved back and forth past the grinding wheel on a table that has a permanent magnet for use with magnetic stock.	Rectifieuse plane, Felületcsiszoló gép, 平面研削盤, 평면연삭기, Máquina de rectificar superficies, Ytslipmaskin
23241403	Internal grinding machine	Internal grinders use a wheel to grind the inside diameter of a workpiece as the workpiece itself rotates.	Rectifieuse d'intérieur, Belső csiszoló gép, 内面研削盤, 내면연삭기, Maquina de rectificación interna, Slipmaskin för innerdiameter
23241404	External grinding machine	External grinders grind the external surfaces of the workpiece as the workpiece itself rotates.	Rectifieuse d'extérieur, Külső csiszoló gép, 外面研削盤, 외경연삭기, Maquina de rectificación externa, Slipmaskin för ytterdiameter
23241405	Centerless grinding machine	A type of grinding machine capable of precision grinding without the use of a work piece spindle.	芯なし研削盤, 무심 연삭기, Maquina de rectificación sin centro, Centerless-slipmaskin
23241406	Ultrasonic machine	A type of metal grinding machine in which an abrasive slurry freely flows between the workpiece and a vibrating tool.	超音波加工機, 초음파 가공기, Maquina ultrasónica,
23241407	Cylindrical grinding machine	A type of cylindrical grinding machine that is used for finishing the surface with high precision after rough grinding.	円筒研削盤, 원통연삭기, Máquina de rectificación cilíndrica,
23241408	Knife grinding machine	A machine tool that grinds the edge of chisels and other woodworking tools.	ナイフ研削盤, 칼 연삭기, Máquina de rectificación de cuchillo,
23241409	Optical profile grinding machine	A type of grinding machine that precisely grinds the shape of the workpiece according to the design drawing projected on the attached screen.	オプティカルプロファイル研削盤, 투영식 연삭기, Máquina de rectificación de perfil óptico,
23241410	Worm grinding machine	A type of grinding machine that grinds the tooth profile of the worm with the twisted tooth of one line or several lines of screw shape.	ウォーム研削盤, 웜 특수연삭기, Máquina de rectificación de tornillo sinfín,
23241411	Buffing machine	A type of grinding equipment that is used when making the surface of the processed metal sleek or glossy. The buff that is loaded on the rotation axis is processed with high speed rotation by connecting it to the workpiece.	バフ盤, 버핑 기계, Máquina pulidora,

Class 23241500 Metal cutting machines

Definition (if available) Machines that either cut pieces of material into individual pieces or cut out shapes and/or contours into a piece of material.

23241502	Electrochemical machine ECM	Electrochemical machining is basically the reverse of electroplating. An electrolyte acts as current carrier, and the high rate of electrolyte movement in the tool-workpiece gap washes metal ions away from the workpiece (anode) before they have the chance to plate on the tool (cathode).	Machines pour l'usinage électrochimique, Elektrokémiai gép, ECM, 電解加工機, 전해가공기, Máquina electromecánica ecm, Elektrokemisk maskin
23241503	Flame cutting machine	A device that focuses an intense flame causing high heat and used to cut metal.	Machines pour la coupe au chalumeau, Lángvágó gép, ガス切断機, 연소절단기, Máquina de cortado con llama, Skärbrännare
23241504	Gear cutting tool		Machines à tailler à outil pignon, Fogaskerekes vágógép, 歯削り盤, 기어절삭공구, Herramienta de corte de engranajes, Kuggfräs
23241505	Laser cutting machine	Laser cutting machines use high-powered lasers to cut, scribe, or perforate a variety of materials in plate or sheet form.	Machines pour la coupe laser, Lézeres vágógép, レーザー切断機, 레이저절단기, Máquina láser para cortar, Laserskärmaskin
23241506	Plasma cutting machine	Plasma cutting machines melt an area with an arc, and then cut by a high-velocity, high-temperature ionized gas.	Machines pour la coupe au plasma, Plazmavágó gép, プラズマ切断機, 플라즈마절단기, Máquina de corte plasma, Plasmaskärmaskin
23241507	Sawing and cut-off machine	Sawing and cut-off machines are used to cut raw material to specified lengths or sizes.	Machines à tronçonner et à scier, Fűrészelő és levágó gép, 鋸盤および切断機, 톱절단기, Máquina de aserrado y corte, Kapmaskin
23241508	Water jet cutting machine	The force of a water jet acts like a saw and cuts a narrow groove into the material.	Machines pour la coupe par jet haute pression, Vízsugaras vágógép, ウォータージェット切断機, 워터제트절단기, Máquina de corte con chorro de agua, Vattenskärmaskin
23241509	Metal band sawing machine	A machine that cuts metal by winding up and rotating a striped saw with a band shaped blade around the driving pulley and the driven pulley.	金属帯のこ盤, 금속 띠톱머신, Máquina de sierra de banda para metal,
23241510	Metal shearing machine	A machine with blades, or rotary disks, for dividing plates or bars of metal.	金属せん断機, 금속 전단기, Máquina cizalladora de metal,
23241511	Threading machine	A cutter that works on making the screw shape in linear line on the round bars, such as pipe or bolt.	スレッディング機, 나사 절삭기, Máquina para hacer roscas,

23241631	Woodruff seat cutter	A type of cutter used for cutting the smaller Woodruff keyseats.	ウッドラフ・シートカッター, 우드러프 시트 커터, Cortador de asiento woodruff, Fräs för woodruffkilspår
23241632	Dovetail cutter	A type of cutter used to produce dovetail slides for machine tool tables, jigs and fixtures	ダブテール・カッター, 도브테일 커터, Cortador de cola de milano, Sinkfräs
23241633	Gear shaper cutter	A type of cutter used for chamfering, topping, protuberance, flat or fillet roots of gears.	歯車形削り盤カッター, 기어 쉐이퍼 커터, Cortador conformador de engranajes, Formfräs
23241634	Jobber length drill	The most common type of drill. The length of the flutes is ten times the diameter of the drill, that is they will drill a hole that is 10D deep.	ジョバーレングス・ドリル, 자버렝스 드릴, Taladro largo, Borr
23241635	Screw machine drill	A type of drill that excels at delivering better hole accuracy and longer tool life, even in use on difficult materials such as stainless steel or in heavy duty applications such as truck or mobile home bodies.	スクリューマシン・ドリル, 스크루 머신 드릴, Taladro de precisión, Precisionsborr
23241636	Silver and deming drill	A type of drill used extensively in maintenance departments, machine shops, and in construction environments. Silver and Deming drills are perfect for portable drilling and drill presses where the chuck capacity is 1/2.Also called Blacksmith Drills or Prentice Drills (Canada).All S&D Drills are 6 overall length with 3 flute length.	シルバー＆デミング ドリル, 실버 앤 데밍 드릴, Taladros de herrero, Korta borrar
23241637	Extra length or longboy drill	A type of drill designed for general purpose drilling in deep hole applications where a 9 to 13 flute length is required.	エクストラ・レングスまたはロングボーイ・ドリル, 엑스트라 렝스 또는 롱보이 드릴, Taladro de hoyo profundo, Extralånga borrar
23241638	Carbide tipped hole cutter	A type of cutter best for cutting sheet metal, including stainless steel up to 1/8 thick.	超硬チップ・ホールカッター, 카바이드 팁 홀 커터, Cortador de hoyos con punta de carburo, Hålborr med karbidspets
23241639	Taper shank drill	A type of drill designed for maximum performance when drilling a wide variety of materials where the driving machinery has a taper shank arbor or spindle.	テーパシャンク・ドリル, 테이퍼 쉥크 드릴, Taladro de huso, Höghållfasthetsborr
23241640	Multi step drill	A type of drill that automatically deburs the drilled hole. Non-slipping point does not require a pilot hole and drills material up to 1/8 thick accurately and cleanly.	マルチステップ・ドリル, 멀티 스텝 드릴, Taladro multi – pasos, Flerstegsborr
23241641	Mult step hex step drill	A type of drill that contains an entire drill set in one cutting tool.Especially useful for professional electricians and sheet metal contractors.	マルチステップ・ヘックスステップ・ドリル, 멀티 스텝 헥스 스텝 드릴, Taladro multi paso hex, Flerstegsborr
23241642	Speed threader	A type of ready-to-use combination die/die-stock for repairing external threads on bolts and threaded rod.	スピードスレッダー, 스피드 스레더, Roscadora de velocidad, Snabbgängare
23241643	Hex shank reamer	Short length bridge reamer seven inches long.	ヘックスシャンク・リーマー, 헥스 쉥크 리머, Escariador largo, Hexbrotsch

23241644	Carbon dioxide laser	A cutting tool that uses a continuous wave carbon dioxide laser beam.	炭酸ガスレーザー, 이산화탄소 레이저, Láser de dióxido de carbono,
23241645	Straight shank chucking reamer	A cutting tool that is used to polish drilled holes to precise dimension by biting on the chuck, and the shape of shank of reamer is straight line.	ストレートシャンク・チャッキングリーマ, 곧은자루 처킹 리머, Escariador limador de precisión de agujeros,
23241646	Adjustable reamer	A reamer that can be adjusted to desired dimension by adjusting the nut with a set of 3 to 8 cutting blades in the main body of the reamer.	アジャスタブルリーマ, 조절 리머, Escariador ajustable,
23241647	Taper shank chucking reamer	A cutting tool that is used to polish drilled holes to precise dimension by biting on the chuck, and the shape of shank of reamer is tapered.	テーパーシャンク・チャッキングリーマ, 테이퍼자루 처킹 리머, Escariador cónico de agujero de precisión,

Class 23241700 Metal deburring machines

Definition (if available): Machines that remove burrs from workpieces through mechanical means. Burrs are thin ridges that develop along the edges of a workpiece from shearing sheet materials, trimming forgings and castings, and machining.

Commodity	Commodity Title	Definition	Synonym
23241701	Shot blasting machine	Machines with abrasive materials (usually sand) are propelled by a high-velocity jet of air, or by a rotating wheel, onto the surface of the workpiece. Shot blasting is particularly useful in deburring metallic and nonmetallic materials and stripping, cleaning, and removing surface oxides.	Machines de grenaillage, Sörétfúvó gép, ショットブラストマシン, 쇼트블라스트 기기, Maquina de granallado, Blästringsmaskin
23241702	Thermal energy deburring machine	The part is placed in a chamber, which is then injected with a mixture of natural gas and oxygen. This mixture is ignited, and a heat wave is produced that heats up the burrs and melts them away.	Machines d'ébavurage à énergie thermique, Hőenergiás sorjázó gép, 熱エネルギーバリ取り機, 열에너지디버링머신, Máquina rebabadora de energía térmica, Termoslipmaskin
23241703	Vibratory or barrel finishing machine	Machines used to improve the surface finish and remove burrs from large numbers of relatively small workpieces. Specially shaped abrasive pellets or media are placed in a container along with the parts to be deburred and then the container is either vibrated or tumbled.	Machines de finissage au tonneau ou par vibroabrasion, Vibrációs ill. hordó simító gép, 振動またはバレル研磨機, 진동 또는 배럴피니싱기, Máquina de terminado vibradora o de barril, Vibratorputsm

Class 23241800 Metal drilling machines

Definition (if available): Machines that are used for drilling holes, tapping, reaming, and other general-purpose, small-diameter boring operations.

Commodity	Commodity Title	Definition	Synonym
23241801	Drill press or radial drill	The workpiece is clamped securely and the drill is lowered manually by hand wheel or by power feed at preset rates. Radial drills are larger drill presses.	Perceuse radiale ou sur colonne, Fúróprés ill. radiál fúró, ボール盤またはラジアルボール盤, 드릴프레스 또는 레이디얼드릴, Taladro radial o prensa de taladro, Radialborr
23241802	Gang drilling machine	Drilling machines with multiple spindles that are capable of drilling as many as 50 holes of varying size, depth, and location in a single step.	Groupes de perçage, Csoportos fúrógép, 組ボール盤, 다축드릴링머신, Taladro de segmentos, Multiborrmaskin

23241803	Gun drilling machine	Drilling machine used for long holes such as those found in gun bores, gun drills are used. The length of the hole requires that coolant be delivered through the shaft of the gun drill to the cutting front.	Machines de perçage de trous profonds, Pisztoly fúrógép, ガンドリル機, 건드릴링머신, Taladro de cañón, Vapenborrmaskin
23241804	Numerically controlled drilling machine	Numerically controlled drilling machines in which various drilling operations are performed automatically and in the desired sequence with the use of a turret.	Machines de perçage à commande numérique, Számvezérléses fúrógép, 数値制御ボール盤, 수치제어드릴링머신, Taladro controlado numéricamente, Numeriskt styrd borrmaskin
23241805	Rotary table drilling machine	Single or multiple drill head, multiple work station rotating platen drilling machine	回転テーブルボール盤, 로터리 테이블 드릴링 머신, Máquina de taladro de mesa rotativa, Borrmaskin med roterande bord
23241806	Multiple spindle head drilling machine	A machine comprised of multiple spindles on same head capable of multiple drilling operations.	多軸ボール盤, 다축 드릴링 머신, Máquina de taladro de múltiples cabezas de huso,
23241807	Radial arm drilling machine	A type of drilling machine with the drill head mounted on a radial arm and that can be freely rotated to allow a workpiece to be drilled at any point.	ラジアルボール盤, 레이디얼 드릴링 머신, Máquina de taladro de brazo radial,
23241808	Deep hole drilling machine	A drilling machine that drills relatively deep holes with respect to the hole diameter.	深穴ボール盤, 심공 드릴링 머신, Máquina de taladro de hoyo profundo,
23241809	Bench drilling machine	A small vertical drilling machine that is installed on work table or bench.	卓上ボール盤, 탁상 드릴링 머신, Máquina de taladro de banco,

Class 23241900 Metal boring machines

Definition (if available) Machines that cut the inside of a drilled hole to enlarge its diameter.

Commodity	Commodity Title	Definition	Synonym
23241901	Horizontal boring machine	A boring machine in which the spindle of the machine is oriented in the horizontal direction.	Machines d'alésage horizontal, Horizontál furatmegmunkáló gép, 横中ぐり盤, 수평보링머신, Máquina perforadora original, Horisontell borrmaskin
23241902	Jig boring machine	Jig boring is used to accurately enlarge existing holes and make their diameters highly accurate. Jig boring is used for holes that need to have diameter and total runout controlled to a high degree.	Machines à pointer, Koordináta fúrógép, ジグ中ぐり盤, 지그보링머신, Máquina perforadora con plantilla, Jiggborrmaskin
23241903	Metal broaching machines	Machines that shape internal and external surfaces, such as holes of circular, square or irregular sections, keyways, teeth of internal gears, multiple spline holes, and flat surfaces.	Machines de brochage des métaux, Fém húzómaró gépek, 金属ブローチ盤, 금속브로칭머신, Máquinas para dar formas al metal, Metallskärborrmaskin
23241904	Internal broaching machine	Broaching machines that enlarge or shape an existing hole by either pushing or pulling a broach through the hole. Internal broach types include hole, keyway, internal gear, and rifling.	Machine à brocher les surfaces intérieures, Belső húzómaró gépek, 内面ブローチ盤, 내면브로칭머신, Máquinas para dar formas internas al metal, Intern skärborrmaskin

Class 23242200 Gear manufacturing machines

Definition (if available) Gear cutting, forming, and finishing machines are used to cut, form, and finish gear teeth. They perform processes such as hobbing, milling, grinding, lapping, and deburring.

Commodity	Commodity Title	Definition	Synonym
23242201	Bevel gear generator	Machines used for cutting bevel gears. Bevel gear teeth may be straight, spiral or bevel.	Machines pour engrenages coniques, Kúpos fogaskerék gyártó gép, かさ歯車歯切り盤, 베벨기어절삭기, Generador de engranajes biselados, Maskin för att skapa konisk kuggväxel
23242202	Gear hobbing machine	Gear hobbing machines use a gear-cutting hob to cut the teeth of a gear. A gear-cutting hob is basically a worm or screw, made into a gear-generating tool by machining a series of longitudinal slots or gashes into it to form cutting teeth.	Machines par fraise-mère, Fogaskerék agyvágó gép, 歯車ホブ盤, 기어호빙머신, Máquina talladora de engranajes, Valsfräsmaskin
23242203	Gear honing machine	Gear honing machines use a plastic gear impregnated with fine abrasive particles. The process is faster than grinding and is used to improve the surface finish.	Machines à roder au liquide, Fogaskerék dörzsköszörű gép, 歯車ホーニング盤, 기어호닝머신, Máquina para el perfeccionamiento de engranajes, Valsputsmaskin
23242204	Gear lapping machine	Gear lapping machines further improve the surface finish from honing machines. The ground gear teeth are lapped using abrasive compounds with either a gear-shaped lapping tool or a pair of mating gears that are run together.	Machines à roder par poudre abrasive, Fogaskerék tükrösítő gép, 歯車ラップ盤, 기어래핑머신, Máquinas de volteado de engranajes, Valsfalsmaskin
23242205	Gear shaping machine	Gear shaping machines use a pinion-shaped cutter to create a gear. The cutter has an axis parallel to that of the gear blank and rotates slowly with the blank at the same pitch-circle velocity with an axial reciprocating motion.	Machines à tailler les engrenages par mortaisage, Fogaskerék gyaluló gép, 歯車形削り盤, 기어셰이핑머신, Máquina para dar forma a engranajes, Valsformningsmaskin
23242206	Gear shaving machine	Gear shaving uses a cutter in the exact shape of the finished tooth profile and removes small amounts of metal from the gear teeth.	Machines à raser les dentures, Fogaskerék pontosvágó gép, 歯車シェービング盤, 기어셰이빙머신, Máquina de cepillado, Valshyvelsmaskin
23242207	Gear grinding machine	Gear grinding machines finish the gears by grinding them with grinding wheels in the exact shape of the tooth spacing of the gears.	Rectifieuse de dentures d'engrenages, Fogcsiszoló gép, 歯車研削盤, 기어그라인딩머신, Máquina pulidora de engranajes, Valsfräsmaskin
23242208	Gear tooth chamfering machine	A machine that consistently removes the edges in accordance with the outline of the gear.	歯車面取り盤, 치형 단면 절삭기, Máquina para biselar los dientes de engranajes,

Class	23242300	Lathes and turning centers
Definition (if available)	Lathes and turning centers cut a rotating part with a stationary cutting tool. The tool moves parallel and perpendicular to the workpiece axis to provide the desired finished shape.	

Commodity	Commodity Title	Definition	Synonym
23242301	Automatic bar machine	All operations on these machines are performed automatically, with tools attached to a turret. The bar stock is fed forward automatically after each part is machined to finished dimensions and cut off. These machines may be equipped with single or multiple spindles.	Machines automatiques à barres, Automata rúdalakító gép, バータイプ自動盤, 자동봉재공급기, Máquina automática de barra, Automatisk stångmaskin
23242302	Automatic lathe or chucking machine	A type of machine that may have a horizontal or vertical spindle and does not have tailstocks; also called chucking machine. It is used for machining individual pieces of regular or irregular shapes and is available in either single or multiple spindle types.	Tours automatiques ou à mandrin, Automata eszterga, illetve tokmány gép, 自動旋盤またはチャッキングマシン, 자동선반 또는 척킹머신, Torno o máquina sujetadora automática, Automatsvarv
23242303	Horizontal turning center	A computer-controlled lathe or turning center with a horizontal spindle and several features including multiple turrets that hold a variety of tools and/or multiple spindles.	Centres de tournage horizontal, Horizontál hosszeszterga csúcs, 水平ターニングセンター, 수평형 회전 센터, Centro giratorio horizontal, Datorstyrd svarv
23242304	Tracer or duplicating or contouring lathe	Tracer lathes are machine tools with attachments that are capable of turning parts with various contours. The cutting tool follows a path that duplicates the contour of a template.	Centres de tournage par contournage, duplication ou reproduction, Követő, másoló, illetve kontúrozó eszterga, トレーサまたは倣い旋盤または輪郭研削旋盤, 트레이서모방 또는 윤곽절삭선반, Torno para duplicar co
23242305	Turret lathe	Turret lathes are capable of performing multiple cutting operations on the same workpiece, such as turning, boring, drilling, thread cutting, and facing. Several cutting tools are mounted on the main turret, which is rotated for each specific cutting operation. After the part is machined, a tool mounted on a turret, called the square turret, which moves radially into the workpiece, cuts the part off.	Tours à revolver, Revolvereszterga, タレット旋盤, 터릿선반, Torno de torreta, Revolversvarv
23242306	Vertical turning center	A computer-controlled lathe or turning center with a vertical spindle and several features including multiple turrets that hold a variety of tools and/or multiple spindles.	Centres de tournage vertical, Függőleges hosszeszterga csúcs, 垂直ターニングセンター, 수직형선삭고철센터, Centro giratorio vertical, Datorstyrd svarv med vertikal rotation
23242307	Leadscrew	A large screw used to actuate precise movements of the tool or the work when performing cutting or grinding operations on a machine tool such as a lathe.	リードスクリュー, 리드스크루, Tornillo de avance, Ledskruv
23242308	Centering machine	A machine that is designed to find the central point on one or both sides of the workpiece prior to drilling and countersinking work to be turned on a lathe.	心立て盤, 센터링 머신, Máquina centradora,

Class 23242400 Machining centers

Definition (if available): Machining centers are computer-controlled machine tools capable of performing a variety of cutting operations on different surfaces and different directions on a workpiece.

Commodity	Commodity Title	Definition	Synonym
23242401	Horizontal machining center	A machining center with a horizontal spindle. Horizontal machining centers are suitable for large as well as tall workpieces requiring machining on a number of surfaces.	Centres d'usinage horizontal, Horizontál forgácsoló csúcs, 水平マシニングセンター, 수평형 기계가공 센터, Centro maquinado horizontal, Horisontell bearbetningsmaskin
23242402	Multi-tasking or universal machining center	Machining centers that are equipped with both horizontal and vertical spindles. They have a variety of features and are capable of machining all surfaces of a workpiece (vertical, horizontal, and diagonal).	Centres d'usinage universels ou multi-tâches, Többfeladatos ill. univerzális forgácsoló csúcs, マルチタスクまたは万能マシニングセンター, 멀티태스킹 또는 유니버셜머시닝센터, Centro maquinado universal o multi
23242403	Vertical machining center	A machining center with a vertical spindle. Vertical machining centers are suitable for performing various machining operations on flat surfaces with deep cavities, such as in mold and die making.	Centres d'usinage vertical, Függőleges forgácsoló csúcs, 垂直マシニングセンター, 수직형 머시닝센터, Centro maquinado vertical, Vertikal bearbetningsmaskin

Class 23242500 Metal milling machines

Definition (if available): Machinery designed for the complex shaping of metal (or possibly other materials) parts. Milling machines can perform a vast number of complex operations, such as slot cutting, planing, drilling, rebating, routing, etc.

Commodity	Commodity Title	Definition	Synonym
23242501	Bed milling machine	A type of milling machine where the table is mounted directly on the bed, which replaces the knee, and can move only longitudinally.	Machines à fraiser sur banc, Ágymaró gép, ベッド形フライス盤, 베드형밀링머신, Máquina fresadora de lecho, Bäddfräsmaskin
23242502	Bridge milling machine	Bridge milling machines have a bridge over the fixed table and the crossbeam is fixed.	Machines à fraiser à pont mobile, Hídmaró gép, 橋形フライス盤, 브리지형밀링머신, Máquina fresadora de puente, Hejarfräsmaskin
23242503	Column and knee milling machine	General purpose milling machine where the milling cutter may be horizontal for slab milling or vertical for face and end milling, boring, and drilling operations. The knee supports the saddle and gives the table vertical movement.	Machines à fraiser à colonne et console, Oszlop ill. térdmaró gép, コラム形およびひざ形フライス盤, 니칼럼형밀링머신, Máquina fresadora de columna y rodilla, Knäfräsmaskin

23242504	Gantry milling machine	Gantry milling machines have a bridge over the fixed table, but the crossbeam moves.	Machines à fraiser en portique, Ívmaró gép, ガントリ形フライス盤, 갠트리형밀링머신, Máquina fresadora de pórtico, Långfräsmaskin
23242505	Profiling and duplicating milling machine	Profile milling machines have five-axis movements, three linear and two angular movements. Duplicating milling machines reproduce parts from a master model by using tracer fingers.	Machines à fraiser de détourage et duplication, Profilírozó és másoló marógép, 輪郭および倣いフライス盤, 모방 및 복제밀링머신, Máquina fresadora de perfilado y duplicación, Profilfräsmaskin
23242506	Traveling column milling machine	Horizontal or vertical milling machines with a CNC moving column and fixed table/bed.	Machines à fraiser à colonne mobile, Mozgó oszlopmaró gép, コラム移動フライス盤, 이동칼럼형 밀링머신, Máquina fresadora de columna desplazada, Arborrverk
23242507	Universal milling machine	A type of milling machine that can be used for either vertical or horizontal milling. The spindle head articulates to allow for either of type of milling.	万能フライス盤, 만능 밀링 머신, Máquina fresadora universal,
23242508	Copy milling machine	A machine designed for milling profiles or relief contours --three dimensional milling-- on articles made of various materials by means of a cutting tool which reproduces on the article the surface or contour of a master device.	ならいフライス盤, 모방 밀링 머신, Máquina fresadora de copia,
23242509	Turret milling machine	A type of vertical milling machine that has a stationary spindle and the table is moved both perpendicular and parallel to the spindle axis to accomplish cutting.	ターレットフライス盤, 터릿 밀링 머신, Máquina fresadora de torreta,
23242510	Planer style milling machine	A type of large milling machine that is built in the same configuration as planers except with a milling spindle instead of a planing head.	プラノミラー, 플래노 밀링 머신, Máquina fresadora de estilo planeador,
23242511	Machine end mill	A bar shaped machine cutting tool used for groove cutting, side cutting, and contour cutting.	マシンエンドミル, 머신 엔드밀, Máquina fresadora de extremo,

Class 23242600 Specialized or miscellaneous metal cutting machines

Definition (if available) Specialized machines that only perform one operation or miscellaneous machines.

Commodity	Commodity Title	Definition	Synonym
23242601	Beveling machine	A machine used for producing bevels. A bevel is a slant or angle on a surface. Two adjoining surfaces, if not at right angles are beveled. Bevel also has many industry-specific uses.	Machine pour la coupe en biseau, Leélező gép, 開先加工機, 베벨링머신, Máquina biseladora, Falsmaskin
23242602	Burnishing machine	Burnishing machines improve the surface finish of parts through a cold-working broaching process. Burnishing removes no metal, instead it compresses and smoothes out fine surface irregularities and is used for soft, ductile materials.	Machines à brunir, Furatvasaló gép, バニシ仕上げ機, 버니싱머신, Máquina de bruñido, Polermaskin
23242603	Chamfering machine	A machine used for producing chamfers. A chamfer is a beveled edge connecting two surfaces. If the surfaces are at right angles, the chamfer will typically be symmetrical at 45 degrees. Chamfers may be both exterior (cutting off an external angle) and interior(filling in an internal angle).	Machines à chanfreiner, Éltompító gép, 面取り機, 챔퍼링머신, Máquina para hacer chaflanes, Fasmaskin

23242604	Lapping machine	Lapping machines improve the surface finish of parts by using a lap tool, which is typically made of cast iron, copper, leather, or cloth. Lapping machines are used on flat, curved, cylindrical or spherical surfaces to improve the surface finish.	Machines à roder, Tükrösítő gép, ラップ盤, 래핑머신, Máquina para lapeado, Falsmaskin
23242605	Metal polishing machine	Polishing machines produce a smooth, lustrous surface finish on parts. Polishing is done with disks or belts made of fabric, leather, or felt and coating with fine powders of aluminum oxide or diamond.	Machines à polir les métaux, Fémpolírozó gép, 金属研磨機, 금속광택기, Máquina pulidora de metal, Metallpolermaskin
23242606	Skiving machine	Skiving machines perform a shaving process, which removes extra material from parts using specially designed knives.	Machines à tailler au couteau-fraise, Lecsiszoló gép, スカイビングマシン, 스카이빙기, Máquina de procesamiento en capas delgadas, Skärmaskin
23242607	Super finishing machine	Super-finishing machines are used to improve surface finish of parts by applying a very light pressure and having the stone move in a motion with short strokes.	Machines de super finition, Tükörsimító gép, 超加工（仕上げ）機, 슈퍼피니싱머신, Máquina de súper - terminado, Superputsmaskin
23242608	Tool presetter	Tool measuring and inspection systems that provide tool presetting functions prior to the tool being used in a specific machine. A tool presetter may use video cameras, manage tool assemblies for jobs running on machining centers and cells, allow CAD files to be viewed on presetter, or run complex measuring routines.	Bras de mesure d'outil, Szerszám elő beállító, ツールプリセッター, 공구 사전설정기, Preseteador de herramientas, Verktygsinställare
23242609	Honing machine	A machine used to achieve very precise surface and geometry dimensions in non-gear applications by removing minute amounts of metal from the work piece.	ホーニング盤, 호닝 머신, Máquina para perfeccionado, Finslipmaskin
23242610	Diamond bore sizing machine	A machine that utilizes diamond cutting tools to precisely achieve bore (internal diameter) sizes.	ダイヤモンド・ボアサイジング機, 다이아몬드 보어 사이즈 머신, Maquina de dimensionamiento de hoyos de diamante, Diamantborrmaskin
23242611	Notching machine	A metalworking machine that cuts off the edges or corners of the workpiece according to a predetermined dimension.	ノッチングマシン, 노칭 머신, Máquina para hacer bordes,
23242612	Metal engraving machine	A machine tool that cuts or engraves a design into a metal plate for subsequent use as a template for production.	金属彫刻機, 금속 조각기계, Máquina para grabado de metales,
23242613	Tapping machine	A machine tool that cuts female screws mechanically by using the tap on the straight hole drilled.	ねじ立て機, 태핑 머신, Máquina para hacer tornillos hembra,

Class 23251500 Metal bending machines

Definition (if available) Machines that apply direct pressure to a piece of material, forcing it to change into either a curved or angular shape.

Commodity	Commodity Title	Definition	Synonym
23251501	Hydraulic press brake	Press brakes bend sheet metal or plate by utilizing long dies and a hydraulic press. Hydraulic presses operate at constant speeds and can transmit large amounts of energy to the workpiece by maintaining a constant load throughout the stroke.	Presses à plier hydrauliques, Hidraulikus prés fék, 油圧プレスブレーキ, 유압프레스브레이크, Freno de prensa hidráulica, Hydraulisk press
23251502	Manual press brake	Press brakes bend sheet metal or plate by utilizing long dies and a mechanical press. The mechanical press is either the crank or eccentric type, with speeds that vary from a maximum at the center of the stroke to zero at the bottom of the stroke.	Presses à plier manuelles, Kézi prés fék, 手動プレスブレーキ, 수동프레스브레이크, Freno de prensa manual, Manuell press
23251503	Metal folding machine	Folding machines support the material through the whole cycle and the machine gauges off of the overall width of the part, not just the flange. The tooling for folding machines is almost universal, where press brakes require different tooling for every gauge and bend. Class	23261500	Rapid prototyping machines

Definition (if available): Rapid prototyping is the name given to a host of related technologies that are used to fabricate physical objects directly from CAD data sources. These methods are unique in that they add and bond materials in layers to form objects. Objects can be formed with any geometric complexity or intricacy without the need for elaborate machine setup or final assembly.

Commodity	Commodity Title	Definition	Synonym
23261501	Fused deposition modeling machine	FDM is the second most widely used rapid prototyping technology. A plastic filament is unwound from a coil and supplies material to an extrusion nozzle. The nozzle is heated to melt the plastic and is moved over the table in the required geometry. The nozzle deposits a thin bead of extruded plastic to form each layer. The plastic hardens immediately after being squirted from the nozzle and bonds to the layer below.	Machines de modelage par dépôt de matériau fondu (FDM), Olvasztott lerakódás modellező gép, 熱融解積層モデリングマシン, 용착조형가공기, Máquina de modelado por deposición con fusible fdm, FDM
23261502	Inkjet method machine	This machine uses a single jet each for a plastic build material and a wax-like support material, which are held in a melted liquid state in reservoirs. The liquids are fed to individual jetting heads, which squirt tiny droplets of the materials as they are moved in X-Y fashion in the required pattern to form a layer of the object. The materials harden by rapidly dropping in temperature as they are deposited.	Machines de modelage par injection, Tintasugaras módszerű gép, インクジェット方式マシン, 잉크젯방식가공기, Máquina de método de chorro de tinta, Bläckstrålemaskin
23261503	Laminated object manufacturing machine	Profiles of object cross sections are cut from paper or other web material using a laser. The paper is unwound from a feed roll onto the stack and first bonded to the previous layer using a heated roller, which melts a plastic coating on the bottom side of the paper. The profiles are then traced by an optics system that is mounted to an X-Y stage.	Machines de lamination (LOM), Laminát-gyártó gép, 積層材製造機, 박판재료적층가공기, Máquina para la manufactura de objeto laminado, LOM-maskin (Laminated object manufacturing)
23261504	Laser powder forming machine	A high power laser is used to melt metal powder supplied coaxially to the focus of the laser beam through a deposition head. The X-Y table is moved in raster fashion to fabricate each layer of the object. The head is moved up vertically as each layer is completed. Metal powders are delivered and distributed around the circumference of the head either by gravity, or by using a pressurized carrier gas.	Machines de formage laser de poudre métallique, Lézeres por formázó gép, レーザー粉末成形機, 레이저분말성형기, Máquina láser para la formación de polvo, Maskin för formning med laserpulver
23261505	Selective laser sintering machine	A roller spreads Thermoplastic powder over the surface of a build cylinder. The piston in the cylinder moves down one object layer thickness to accommodate the new layer of powder. A laser beam is then traced over the surface of this tightly compacted powder to selectively melt and bond it to form a layer of the object.	Machines de frittage par laser sélectif, Szelektív lézeres porkohászati gép, 選択的レーザー焼結機, 선택적레이저 소결기, Máquina láser selectiva de sinterización, SLS-maskin (Selective laser s
23261506	Stereolithography machine	Stereolithography is the most widely used rapid prototyping technology. Stereolithography builds plastic parts or objects a layer at a time by tracing a laser beam on the surface of a vat of liquid photopolymer.	Machines de stéréolithographie, Sztereolitográfiai gép, ストレオリソグラフィーマシン, 입체모델링인쇄기, Máquina de estero – litografía, Stereolitografimaskin

23261507	Three dimensional printing machine	A type of printing machine that uses a process that starts by depositing a layer of powder object material at the top of a fabrication chamber. To accomplish this, a measured quantity of powder is first dispensed from a similar supply chamber by moving a piston upward incrementally. The roller then distributes and compresses the powder at the top of the fabrication chamber. The multi-channel jetting head subsequently deposits a liquid adhesive in a two dimensional pattern onto the layer of the powder which becomes bonded. Family 23270000 Welding and soldering and brazing machinery and accessories and supplies

Class 23271400 Welding machinery

Definition (if available) Welding machines cover devices used in a wide array of joining processes including arc welding (MIG, TIG, stick, submerged arc), resistance welding, laser welding, electron beam welding, stud welding orbital welding, wave soldering, hot dip brazing, torch brazing, induction brazing, ultrasonic and friction welding. Welding machines include complete devices as well as their power sources, monitors, and controllers.

Commodity	Commodity Title	Definition	Synonym
23271401	Submerged arc welding machine	A submerged arc-welding machine creates a thick layer of flux completely covers the molten metal and prevents spatter and sparks. The flux also acts as a thermal insulator, allowing deep penetration of heat into the workpiece.	Machine de soudage à l'arc sous flux, Poralatti ívhegesztő gép, サブマージドアーク溶接機, 잠수 아크 용접기, Máquina para soldadura arco sumergida, Pulverbågsvets
23271402	Ultrasonic welding machine	Ultrasonic welding machinery joins the contacting surfaces of two pieces by subjecting them to a static normal force and oscillating shearing (tangential) stresses. It can be used with a wide variety of metallic and nonmetallic materials, including dissimilar metals and is extensively used for joining plastics.	Machine de soudage par ultrasons, Ultrahangos hegesztő gép, 超音波溶接機, 초음파 용접기, Máquina de soldadura ultrasónica, Ultraljudsvets
23271403	Projection welding machine	One or more projections (dimples) are embossed, forged, or machined on one of the surfaces to be welded. The two pieces are then pressed together and weld nuggets are formed as the projections are compressed.	Machine de soudage par bossages, Dudorhegesztő gép, 突起溶接機, 프로젝션 용접기, Máquina de soldadura de proyección, Pressvets
23271404	Plasma arc welding machine	Plasma-arc welding machines use a concentrated stream of plasma, and ionized hot gas, composed of nearly equal numbers of electrons and ions. Plasma-arc welds create deeper and narrower welds on a variety of metals.	Machine de soudage plasma, Plazma ívhegesztő gép, プラズマアーク溶接機, 플라즈마아크 용접기, Máquina de soldadura arco plasma, Plasmabågsvets
23271405	Laser welding machine	Laser beam welding utilizes a high-power laser beam as the source of heat to produce a fusion weld.	Machine de soudage laser, Lézeres hegesztő gép, レーザー溶接機, 레이저 용접기, Máquina de soldadura láser, Lasersvets
23271406	Spot welding machine	Spot welding is the most common form of resistance welding. Spot welding is usually used on sheet metal and in applications having some type of overlapping joint design. Resistance spot welds are made from electrodes on both sides of the joint and no filler metal is used.	Machine de soudage par résistance par point, Ponthegesztő gép, スポット溶接機, 스폿 용접기, Máquina de soldadura aislada, Punktsvets

23271407	Tungsten inert gas welding machine	The TIG process lets one weld thinner material than other processes and it also provides excellent fusion. TIG also produces the best looking weld beads, which are used when cosmetic appearances are important.	Machine de soudage TIG, Inert védőgázos wolframelektródás ívhegesztő gép, タングステン不活性ガス溶接機, 불활성가스텅스텐 용접기, Máquina de soldadura de gas inerte de tungsteno, Volframinertsvets
23271408	Metal inert gas welding machine	A MIG welding machine creates an arc between the work piece and a continuously consumable electrode, the wire in these wire welding processes.	Machine de soudage MIG, Inertgázos fémelektródás ívhegesztés, 金属不活性ガス溶接機, 불활성가스금속 용접기, Máquina de soldadura de gas inerte de metal, metallinertsvets
23271409	Shielded metal arc welding or stick welding machine	Stick, the most basic of welding processes, offers the easiest option for joining steel and other metals. SMAW or stick joins metals when an arc is struck between the electrode and the work piece, creating a weld pool and depositing a consumable metal electrode into the joint.	Soudage à l'arc avec électrode fusible sous protection gazeuse, Fém védőgázos ívhegesztő vagy pálcahegesztő gép, 被覆アーク溶接機またはスティック溶接機, 피복아크용접 또는 막대 용접기, Máquina de soldadur
23271410	Welding rectifier		Moteurs électriques à CC sans brosse, Hegesztési egyenirányító, 溶接整流器, 용접용 정류기, Rectificador de soldadura, Svetslikriktare
23271411	Plastic welder	A welder designed to weld or seal pieces of thermoplastic together using any one of several techniques.	プラスチック用溶接機, 플라스틱 용접기, Soldadura plástica,
23271412	Thermite welder	A type of welding machine that uses thermite --5 parts iron oxide red powder and 3 parts aluminium powder by weight, ignited at high temperatures--to melt metal, which is poured between two workpieces to form a welded joint.	テルミット溶接機, 테르밋 용접기, Soldadura termita,
23271413	Electron beam welding EBW machine	A type of welding machine that uses an electron beam gun to produce electrons that strike the workpiece, at which point their energy is converted into heat, instantly vaporizing the metal under temperatures near 25,000 degrees C. The heat penetrates deeply, making it possible to weld much thicker workpieces than is possible with most other welding processes. However, because the electron beam is tightly focused, the total heat input is actually much lower than that of any arc welding process.	電子線溶接ＥＢＷ機, 전자빔 용접기, Máquina de soldadura de rayo electrón ebw,
23271414	Electro slag welding ESW machine	A type of welding machine employing a single pass welding process for thick --greater than 25mm up to about 300mm--materials in a vertical or close to vertical position. Welding is made by melting the basic material and wire by the heat of the current flowing into the slag.	エレクトロスラグ溶接ＥＢＷ機, 일렉트로 슬래그 용접기, Máquina de soldadura electro escoria esw,
23271415	Cold pressure or contact welding machine	A type of welding machine in which joining takes place without fusion at the interface of the two parts to be welded. Unlike in the fusion-welding processes, no liquid or molten phase is present in the joint. Pressure is applied to the workpieces through dies or rolls thus producing adhesion.	常温圧接または接触溶接機, 상온압접 용접기, Máquina de soldadura de contacto o presión fría,

© 2016 United Nations Development Programme and GS1 US

23271416	Friction welding FW machine	A welding machine that employs a solid-state welding process that generates heat through mechanical friction between a moving workpiece and a stationary component. Because no melt occurs, friction welding is not actually a welding process in the traditional sense, but a forging technique.	摩擦溶接ＦＷ機, 마찰 용접기, Máquina de soldadura de fricción fw,
23271417	Braze welding machine	A type of welding machine that uses a bronze or brass filler rod coated with flux to join steel workpieces. It is virtually identical to the equipment used in brazing, except there is no capillary action.	ブレーズ溶接機, 브레이징 용접기, Máquina de soldadura con estaño,
23271418	Flash butt welding machine	A type of butt welding machine that runs a strong electrical current through the touching ends of two unjoined pieces of rail. The ends become white hot due to electrical resistance and are then pressed together forming a strong weld.	フラッシュバット溶接機, 플래시버트 용접기, Máquina de soldadura por junta eléctrica,
23271419	Upset welder	A type of welding equipment that binds two pieces together through direct pressure, high temperature and applied electrical current sufficient to expel surface contaminants --called upset-- from the weld. No external welding material is used.	アプセット溶接機, 업셋 용접기, Soldadura con recalado,
23271420	Seam welder	A welder that is used for joint welding of relatively thin metal plate as a type of electric resistance welding.	シーム溶接機, 시임 용접기, Soldadura de cordón,
23271421	Band saw blade welder	A welder that welds band shaped metal used for band saw machinery.	バンドソーブレード溶接機, 띠톱날 용접기, Soldadura de cuchilla de sierra de banda,
23271422	Stud welder or stud arc welder	A special welding machine that joins a metal stud or nut to a metal plate.	スタッド溶接機またはアークスタッド溶接機, 스터드 용접기 또는 스터드 아크 용접기, Soldadura de montantes o soldadura arco de montantes,
23271423	Alternating current AC arc welder	An type of arc welding machine that uses alternating current.	交流ACアーク溶接機, 교류 아크 용접기, Soldadura de arco de corriente alterna ac,
23271424	Direct current DC arc welder	An arc welder that uses direct current for welding current.	直流DCアーク溶接機, 직류 아크 용접기, Soldadura de arco de corriente directa dc,

Class 23271500 Brazing machinery

Definition (if available) Brazing is a joining process in which filler metal is placed at or between the surfaces to be joined, and then heated to melting temperature (above 450°C / 800 °F). The solidification of the filler then creates a strong joint.

Commodity	Commodity Title	Definition	Synonym
23271501	Furnace brazing machine	Furnace brazing is when the parts are cleaned, loaded with brazing metal and placed into a furnace. The furnace then melts the filler metal to join the surfaces. Class 23271600 Soldering machines

Definition (if available): Soldering is a method of joining metal parts using a filler metal of low melting point (solder). Heat is applied to the metal parts, and the soft filler metal is pressed against the joint, melts, and is drawn into the joint by capillary action. After the metal cools, the resulting joints are not as strong as the base metal, but have adequate strength, electrical conductivity, and water-tightness for many uses.

Family 23280000 Metal treatment machinery

Class 23281500 Coating or plating machines

Definition (if available) Coating and plating machines apply plastic, organic, or metal finishes to a product, which improves the product's properties such as increasing durability or resisting corrosion.

Commodity	Commodity Title	Definition	Synonym
23281501	Anodizing machine	Machine wherein the workpiece is the anode in an electrolytic cell immersed in an acid bath, resulting in chemical adsorption of oxygen from the bath. Anodizing is an oxidation process in which the workpiece surfaces are converted to a hard and porous oxide layer that provides corrosion resistance and a decorative finish.	Machines pour l' anodisation, Anodizáló gép, 酸化処理機, 양극산화피막처리기, Máquina anodizdora, Anodiseringsmaskin
23281502	Electrolytic bath machine	Electrolytic bath machines plate the workpiece (cathode) with a different metal (anode), while both are suspended in a bath containing a water-base electrolyte solution. The metal ions from the anode are discharged under the potential from the external source of electricity, combine with the ions in the solution, and are deposited on the cathode.	Machines pour les bains électrolytiques, Elektrolit fürdő gép, 電解槽, 전해조, Máquina de baño electrolítico, Maskin för elektrolytiskt bad
23281503	Thermal spray machine	Coating machines that apply various metals and alloys, and ceramics by a spray gun with a stream of oxyfuel, flame, electric arc, or plasma arc. The coating material may be in the form of wire, rod, or powder.	Machines pour la pulvérisation thermique, Hőszórásos gép, 熱溶射機, 용사기, Máquina de rociado térmico, Termospraymaskin
23281504	Barrel plating machine	A type of electro plating machine that brings the workpiece into contact with an electrolyte while rotating in a perforated hardwood barrel.	バレルめっき装置, 바렐 도금기, Máquina de plateado de barril,

Class 23281600 Heat treating machines

Definition (if available) Heat treatment includes the controlled heating and cooling of materials at various rates. These treatments induce phase transformations that greatly influence mechanical properties, such as strength, hardness, ductility, toughness, and wear resistance.

Class 23281900 Metal cleaning machinery and supplies

Definition (if available): Machinery used for removal of solid, semisolid, or liquid contaminants from a surface. This is essential for more effective application of metalworking fluids, coating and painting, adhesive bonding, welding, brazing, soldering, reliable functioning of manufactured parts in machinery, food and beverage containers, storage, and assembly options.

Commodity	Commodity Title	Definition	Synonym
23281901	Electrochemical metal cleaner	A type of cleaning fluid used in conjunction with electrochemical processes to clean parts. Variations include, but are not limited to, alkaline solutions, emulsions, solvents, hot vapors, acids, salts, or organic compound mixtures.	Produit pour le nettoyage électrochimique des métaux, Elektrokémiai fémtisztító, 電気化学メタルクリーナー, 전기화학처리용 금속세척액, Limpiador electroquímico de metal, Elektrokemisk metallrengöra
23281902	Chemical metal cleaner	Type of metal cleaner employing chemicals to remove the oil and grease from surfaces. Includes one or more of the following processes: solution, saponification, emulsification, dispersion, or aggregation.	Produit pour le nettoyage chimique des métaux, Vegyi fémtisztító, 化学的金属清浄剤, 화학약품처리금속세척기, Limpiador químico de metal, Kemisk metallrengörare
23281903	Mechanical or ultrasonic metal cleaner	A type of metal cleaner that physically disturbs the contaminants, as with wire or fiber brushing, dry or wet abrasive blasting, tumbling, and steam jets. Ultrasonic cleaners use high frequency sound waves to create bubbles for loosening and removing dirt, scale, and other impurities from parts. Mechanical or ultrasonic cleaners are particularly effective in removing rust, scale, and other contaminants. 24101617	Scissor lift or lift table	A device that employs a scissors mechanism to raise or lower materials in such a way as to provide ergonomic positioning for operators. Lift tables come in a vast array of configurations and can be built to suit various highly specialized industrial processes. The most common lift table design incorporates hydraulic cylinders and an electrical motor to actuate the scissor lifting mechanism. Lift tables can also be driven by pneumatic sources or by foot pump when the load is not excessively heavy. Lift tables can be mounted in a pit for floor-level loading, can include rotating tops, tilting mechanisms, and other various features to ensure operator safety and ease of use.	杠杆式升降机, 杠杆式升降機, Sakse elevator, Schaarlift, Ascenseur à ciseaux, Scherenlift, Ollóemelő, シザーリフトまたはリフトテーブル, 가위승강기, Sakselift, Elevador tipo tesoura, Elevador de tijera, Saxlyft

24101633	Hoist drums		起重鼓, 起重鼓, Hoist drums, Tambours de halage, Hubtrommeln, Csörlődobok, ホイスト・ドラム, 호이스트드럼, Heisetromler, Tambores de carga, Tambores de elevación, Lintrummor
24101634	Chain bags		铰链袋, 鉸鏈袋, Chain bags, Sacs à chaîne, Kettensäcke, Lánc zsákok, チェーン・バッグ, 체인백, Kjedeposer, Bolsas de correntes, Sacos de cadena, Kedjepåsar
24101635	Screw jacks		Crics à vis, Csavaros emelők, スクリュー・ジャッキ, 나사잭, Gatos de tornillo, Domkrafter
24101636	Counter weight bag and counterweight	Weights attached to the counterweight cantilever or to the rotating platform to assist in counteracting the weight of the load and/or certain parts during operation.	Lests et contrepoids, Ellensúlyos zsák ill. ellensúly, カウンターウェイトバッグおよびカウンターウェイト, 평형력 봉지 및 평형력, Bolsas de contrapeso y contrapesos, Motviktssäck och motvikt
24101637	Nylon fabric sling	These slings are made up of a fabric on the top with a nylon rope inside	ナイロンファブリック・スリング, 나일론 섬유 슬링, Eslinga de material de nylon, Nylonslinga
24101638	Wire rope sling	These slings are made up of tightly woven metallic wire ropes	ワイヤーロープ・スリング, 와이어 로프 슬링, Eslinga de cuerda, Vajerslinga
24101639	Windlass	An apparatus for moving a heavy weight. It consists of a horizontal cylinder (barrel), which is rotated by the turn of a crank or belt. A winch is affixed to one or both ends, and a cable or rope is wound around the winch, pulling a weight attached to the opposite end.	ウィンドラス, 권양기, Molinete, Vinsch
24101640	Traversing gear unit	Traversing gear for a working machine comprising a drive motor, which is connected to a hydrostatic compound gear that has a hydraulic pump and two hydraulic motors.	トラバーサ・ユニット, 트래버스 기어장치, Unidad de engranaje transversal, Traversväxel
24101641	Shackle	A usually U-shaped fastening device secured by a bolt or pin through holes in the end of the two arms and or chain. Typically used during material handling.	
24101642	Floating crane	A marine lifting machine used to move or construct materials on the water.It is mainly used in harbors and other waterway commercial and construction sites.	浮クレーン, 해상크레인, Grúa flotante,
24101643	Laundry and dressing trolley	This is a type of lifting equipment used for the purpose of moving laundry and dressing.	洗濯物および医療器具運搬用台車, 세탁물 및 붕대 운반대, Trolly de lavado y secado,
24101644	Dumb waiter	A type of vertical lift equipment or elevator used to carry small cargo. It is used frequently in transportation of books at library or products at warehouse.	ダムウェーター, 덤웨이터, Ascensor de cocina,
24101645	Crawler crane	Crawler type vehicle with crane device and driver compartment, and is used mainly for pulling up and transporting heavy objects on weak foundation.	クローラークレーン, 궤도 크레인, Grúa sobre orugas,
24101646	Railway crane	A crane with track type roller equipped with hoist.	鉄道クレーン, 철도 크레인, Grúa ferroviaria,

24101647	Material lifting clamp	A clamp that is designed to pick up and hold or move an object.	リフティングクランプ, 물자 인양용 클램프, Almeja para izaje de material,
24101648	Plate lifting clamp	Clamp manufactured to transport mainly plate type objects by picking up or hanging them horizontally or vertically.	プレート・リフティングクランプ, 판재 인양용 클램프, Almeja para izaje de placas,
24101649	Winch crane	A device used to move cargo vertically up and down or horizontally by installing boom on vertical post and by using rotation of boom and wire rope of its frontal end, and has support structure on the lower portion that supports the post.	ウインチ・クレーン, 윈치 크레인, Grúa güinche,
24101650	Guy derrick	Crane with 6 or 7 units of guy line that is used mainly in transportation and assembly of steel frame and is similar to derrick with ropes.	ガイデリック, 가이데릭, Guy derrick,
24101651	Capstan	A machine used in pulling up or pulling heavy objects by rotating rope or wire wound around vertical conical body, and is used mainly in winding rope for mooring of vessels.	キャプスタン, 캡스턴, Cabrestante,
24101652	Jib crane	A crane that has the inclined jib that is also referred to as the slewing crane with many turns to make. It has a horizontal cantilever shape that extends from the vertical post.	ジブクレーン, 지브 크레인, Grúa de mástil,
24101653	Overhead crane	A crane that enables pulling up and transporting heavy objects by laying rail onto the posts of internal wall surfaces of factory and attaching hoist onto 1 to 2 units of girder and cross beam that can travel on the rail.	天井クレーン, 천장 크레인, Puentegrúa,
24101654	Gantry crane	A crane comprised of a supporting device both ends of which have legs with wheels moving on rail. Above the supporting device, a trolley moves horizontally to carry the goods.	ガントリークレーン, 갠트리 크레인, Grúa gantry o de pórtico,
24101655	Vehicle parking lift system	Mechanical three dimensional parking facility that can accommodate larger number of vehicles within limited space by parking vehicles in three dimensions.	駐車施設リフトシステム, 주차 리프트 시스템, Sistema de parqueadero vertical,
24101656	Tractor towed crane	A wheel type crane that is hauled by the connecting rod of a tractor and the power is supplied from tractor to operate through manipulation of cable.	トラクターけん引クレーン, 견인식 크레인, Grúa halada por tractor,
24101657	Tractor mounted crane	A crane mounted on the front, center or rear portion of a wheel type tractor and used primarily for railroad construction. It is hauled by the connecting rod of a tractor and the power is supplied from tractor to operate through manipulation of cable.	トラクターマウント型クレーン, 트랙터 탑재용 크레인, Grúa montada sobre tractor,
24101658	Lifting magnet	A device used for stevedoring and transporting steel plate, scrap iron, slave, iron lump, beams and other metal items by using principle of electromagnet. Eye for pulling up is attached to the upper aspect of the device.	リフティングマグネット, 리프팅 마그네트, Imán de izaje,
24101659	Vehicle movable jack or dolly	A device for moving or transporting vehicles used for changing the location of vehicle within a narrow space such as car repair shop and transportation of parked vehicle that becomes obstacle under emergency situations.	ジャッキまたはドーリー, 차량 이동잭, Gato o dolly móvil vertical,
24101660	Battery lifter	Lifting device used to raise or lower heavy batteries of electric motor vehicles or forklifts. Designed to be hung on crane or hoist by attaching sling or hook onto insulated beam.	バッテリーリフター, 배터리 리프터, Elevador de baterías,
24101661	Vehicle lift	Lifting device, usually hydraulic, used for lifting vehicles for maintenance of underbody of vehicle, alignment of wheel and maintenance of tire and others.	車両昇降機, 차량용 리프트, Elevador de vehículo,
24101662	Winch cover	A cover that is made with textile, leather or plastic product. It is used to cover all or part of winch to protect the winch from the factors of damage, such as humidity, dust and others.	ウインチカバー, 윈치덮개, Cubierta de güinche,

24101727	Vibrating conveyors		震动输送机, 震動輸送機, Vibrating conveyors, Transporteur vibrant, Rüttel-Förderband, Vibrációs szállítószalagok, 振動コンベアー, 진동 컨베이어, Vibrerende transportbånd, Transportadores vibratórios, Banda transportadora vibratoria, Skaktransportörer
24101728	Conveyor mounts		输送机底座, 輸送機底座, Conveyor mounts, Montants de convoyeur, Förderbandstützen, Szállítószalag támaszok, コンベアー・マウント, 컨베이어 마운트, Fester til transportbånd, Montes de transportador, Soportes de la banda transportadora, Transportörstativ
24101729	Elevator bucket	The bucket that is attached to a bucket elevator conveying system	Godet d'élévateur, Felvonóserleg, エレベーターバケット, 엘리베이터 버킷, Balde de elevador de cangilones, Skovel
24101730	Screw conveyor	Type of conveyor system consisting of an Archimedian screw contained within a tube and turned by a motor so as to deliver material from one end to the other.	Convoyeur à vis sans fin, Szállítócsiga, ねじコンベヤー, 스크루 컨베이어, Banda transportadora de tornillo, Skruvtransportör
24101731	Conveyor skirt board	Attachment to conveyors for holding skirt board rubber.	Plaque déflectrice pour convoyeur, Szállítómű oldalfal, コンベヤスカートボード, 컨베이어 스커트보드, Faldón de la banda transportadora, Sarger till transportband
24101732	Conveyor carrying idler bracket	Carrying idler frames are fabricated out of mild steel strips and angles and are used to hold the impact idlers and carrying idlers in position and support / guide the belt.	コンベヤー運搬アイドラーブラケット, 컨베이어 운반 아이들러 브라켓, Soporte del rodillo de la banda transportadora, Bärrullar för transportör
24101733	Conveyor return idler bracket	A return idler bracket is generally fabricated from mild steel mostly in 'L' or 'J' shape.	コンベヤー戻りアイドラーブラケット, 컨베이어 리턴 아이들러 브라켓, Soporte del rodillo de retorno de la banda transportadora, Returrullar för transportör
24101734	V plough scraper	This is a V-shaped metallic frame with a rubber strip inserted into it. The frame is mounted on the top side of a return conveyor belt.	V字型プロウスクレーパー, V형 플라우 스크레이퍼, Raspador en v, V-formad plogskrapa
24101735	Air slide	This is an enclosed conveyor which is divided into two parts. On the top side material flows; on the bottom side compressed air flows in pulses. The two parts are separated by means of a porous fabric which the compressed air passes through and fluidizes the material being conveyed.	エアースライド, 공기 활주, Deslizador de aire, Luftkana

24101736	Dense phase conveying system	This system has a top surge tank, a leak proof valve, a dispenser and conveying pipes. Dust from the system is added to the surge tank. From there it enters into the dispenser, where the material is pressurized and discharged in batches.	濃密相搬送システム, 밀집상 이송 시스템, Sistema de transporte de fase densa, Transportsystem för tätfas
24101737	Lean phase conveying system	This system has a top surge tank, a leak proof valve, a dispenser and conveying pipes. Dust from the system is added to the surge tank and from there it enters into the dispenser, where the material is driven by a continuous stream of compressed air.	薄相搬送システム, 희박상 이송 시스템, Sistema de transporte de fase liviana, Transportsystem för smalfas
24101738	Rod gate	This a type of valve used in controlling flow rate of granular bulk raw materials, mostly fitted at the bottom of bunkers/silos. It consists of a box-like frame made of a mild steel channel through which mild steel control rods are inserted from both sides. Rod removal increases material flow; rod insertion decreases material flow.	ロッドゲート, 봉문, Compuerta de barra, Stavventil
24101739	Bulk receiving unit	This equipment is similar to a belt conveyor, but the belt is wider and has side walls to hold the material. Equipment orientation is horizontal with the discharge end inclined upwards	バルク受取ユニット, 대량 입고 장치, Unidad receptora de granel, Mottagarenhet för bulkmaterial
24101740	High angle conveyor	These are also called "z" conveyors, the basic configuration is like a belt conveyor. Class 24102300 Automatic guided vehicles AGV

Definition (if available): An Automatic Guided Vehicle, or AGV consists of a computer controlled wheel based load carrier (normally battery powered) that runs on the plant floor (or if outdoors on a paved area) without the need for an onboard operator or driver. AGVs have defined paths or areas within which or over which they can navigate. Navigation is achieved by any one of several means, including following a path defined by buried inductive wires, surface mounted magnetic or optical strips.

25174807	Vehicle hinge	A part that is the supporting point for opening and closing of vehicle door, hood, trunk and others.	車両用蝶番, 차량용 힌지, Bisagra de vehículo,
25174808	Vehicle accessories storage box	A box designed for storage of food, flares, emergency goods and others inside or outside of the vehicle.	車両用付属品保管箱, 차량부속품 저장용상자, Caja de almacenamiento de accesorio para vehículos,
25174809	Vehicle ladder	A ladder that has a device for attachment to a land vehicle. It is used for getting on and off the vehicle.	車両用ラダー, 차량용 사다리, Escalera de vehículo,
25174810	Vehicle jack	A tool that uses the principle of lever and hydraulics to lift heavy objects. It is loaded on the vehicle as an emergency tool for tire changing and other uses.	車両用ジャッキ, 차량용 잭, Gato de vehículo,
25174811	Trunk claw	Supplementary tractor tool used to handle wood trunks of great length	トランククロー,

Class 25174900 Vehicle vibration dampeners and isolators

Definition (if available) Devices used in various areas and systems of vehicles to isolate and or diminish vibrations

Commodity	Commodity Title	Definition	Synonym
25174901	Molded vehicle vibration dampener and isolator	Device used in various areas and systems of the vehicle to isolate and or diminish vibrations produced by molding various materials	車両用鋳型消振ダンパおよび制振機器, 차량용 성형 진동완충장치 및 방진장치, Aislador y amortiguador moldeado para la vibración del vehículo,
25174902	Extruded vehicle vibration dampener and isolator	Device used in various areas and systems of the vehicle to isolate and or diminish vibrations produced by extruding various materials	車両用押出消振ダンパおよび制振機器, 차량용 압출성형 진동완충장치 및 방진장치, Aislador y amortiguador extruido para la vibración del vehículo,
25174903	Die cut vehicle vibration dampener and isolator	Device used in various areas and systems of the vehicle to isolate and or diminish vibrations produced by die cutting various materials.	車両用打抜き消振ダンパおよび制振機器, 차량용 다이컷 진동완충장치 또는 방진장치, Aislador y amortiguador fundido para la vibración del vehículo,mproved

Class 25175000 Electric vehicle charging systems

Definition (if available) Fixed and portable charging systems and accessories for electrically powered vehicles

Commodity	Commodity Title	Definition	Synonym
25175001	Electric vehicle portable charger	Portable charging unit that can be carried in the vehicle, used as emergency back up to recharge vehicle battery.	電気自動車用携帯充電器, 이동형 전기자동차 충전장치, Cargador portátil para vehículo eléctrico,
25175002	Electric vehicle charging station	Non-portable charging station used to recharge vehicle battery. Primarily home-based.	電気自動車用充電ステーション, 고정형 전기자동차 충전소, Estación de carga de vehículo eléctrico,
25175003	Electric vehicle charging kit	Kits and accessories used with/for charging stations and battery units. i.e. pre-wired kits, receptacles, etc.	電気自動車用充電キット, 전기자동차 충전 키트, Kit para cargar vehículo eléctrico,

Class 25175100 Transportation repair parts kits

Definition (if available) These items are kits ,sets, or groupings of repair parts which are combined together for use on various types of transportation vehicles.

Commodity	Commodity Title	Definition	Synonym
25175101	Motor vehicle repair part kit	This item is a set or grouping of repair parts for use on motor vehicles, such as passenger motor vehicles, safety and rescue vehicles, trucks, recreational vehicles, and war vehicles.	(1S,2S)-2-Methylamino-1-phenylpropanolhydrochloride; (+)-?-Ephedrinehydrochloride; d-Pseudoephedrinehydrochloride; d-Isoephedrinehydrochloride
25175102	Motorcycle repair part kit	This item is a sets or grouping of repair parts which are combined together for use on motorcycles.	(1R,2S)-(-)-2-Methylamino-1-phenyl-1-propanolhydrochloride; (1R,2S)-a-[1-(Methylamino)ethyl]benzyl alcoholhydrochloride; (1R,2S)-(-)-Ephedrinehydrochloride
25175103	Marine transport repair part kits	These items are kits ,sets, or groupings of repair parts which are combined together for use on marine transport vehicles, such as commercial water craft, safety and rescue water craft, military watercraft, and recreational watercraft.	
25175104	Railway repair part kits	These items are kits ,sets, or groupings of repair parts which are combined together for use on railway vehicles, such as locomotives, and railway and tramway cars.	
25175105	Aircraft repair part kits	These items are kits ,sets, or groupings of repair parts which are combined together for use on aircraft, such as fixed wing aircraft, recreational aircraft, and commercial aircraft.	
25175106	Non motorized cycle repair part kit	This item is a set or grouping of repair parts which are combined together for use on non motorized cycles.	
25175107	Spacecraft repair part kits	These items are kits ,sets, or groupings of repair parts which are combined together for use on spacecraft and satellites.

25191515	Ground controlled approach system	A multi device system that guides aircraft to runway by tracing the location of aircraft with radar by the ground air controller and providing aircraft with direction and altitude. Abbreviated GCA, it is structured for airport surveillance radar --ASR-- and precision approach radar --PAR.	地上誘導着陸方式, 지상관제 진입장치, Sistema de aproximación controlado por tierra,
25191516	Aircraft air start unit	A device that provides the pneumatic pressure required when starting the aircraft engine. It is usually mounted in a truck or trailer.	航空機始動装置, 항공기 공압시동장비, Unidad neumática para arranque de aeronaves,
25191517	Aircraft air conditioning and heating truck	Equipment that supplies cold air or warm air for heating and cooling of aircraft when the engine is not in operation, such as standing by for taking off. It is the air conditioner and heating device of engine operation type.	航空機空気調節および暖房トラック, 항공기 냉난방 트럭, Camión calefactor y de aire acondicionado para aeronaves,
25191518	Aeronautical sensor test equipment	Equipment that is designed for testing aircraft sensors.	航空センサーテスト機材, 항공기 센서실험장비, Equipo sensor de pruebas aeronáuticas,
25191519	Aircraft towing adapter	A part that is attached to the aircraft for towing the aircraft.	航空機牽引装置, 항공기 견인어댑터, Adaptador de remolcado de aviones,
25191520	Environmental test chamber	An device that simulates pressure and other high altitude conditions for the purpose of training and psychological testing of aircraft personnel.	環境試験チャンバー, 환경시험장치, Cámara de prueba ambiental,
25191521	Retractable hook cable support system	A device used to stop the aircraft in a short distance by way of a hook catching steel cable installed on the surface of the runway.	格納式フックケーブル支持システム, 항공기 초과저지장치, Sistema retráctil de soporte de cable gancho,
25191522	Aircraft engine maintenance set	A standard tool set designed for maintenance of aircraft engines.	航空機エンジンメンテナンスセット, 항공기 엔진정비세트, Set de mantenimiento de motor de aeronave,
25191523	Airplane baggage tug or tractor	A motorized wheeled vehicle designed for towing cargo trailers from aircraft to terminal. It is usually electrically powered.	飛行機バゲージタグまたはトラクター, 항공기 화물견인차, Tractor para remolcar contenedores de equipaje aéreo,
25191524	Airfreight conveyor truck	A vehicle equipped with a hydraulically adjustable conveyor for loading cargo onto aircraft.	航空貨物コンベヤトラック, 항공기 컨베이어트럭, Banda transportadora para cargar equipaje en el avión,
25191525	Aircraft refueling truck	A truck that is especially manufactured with the required facilities for loading, transporting and supplying fuel for aircraft.	航空機燃料補給トラック, 항공기 급유차, Camión para cargar combustible al avión,

25191704	Engine or vehicle stands		发动机和交通工具支架, 發動機和交通工具支架, Motor- eller køretøjsstandpladser, Motor of voertuig opstanden, Supports pour moteur ou véhicule, Motor oder Fahrzeug Ständer, Motor vagy jármű állványok, Portammotore o portaveicolo, エンジンおよび車両スタンド, 엔진 또는 차량스탠드, Motor- eller kjøretøybukker, Bancadas de motor ou veículo, Pedestales de vehículo o motor, Motor- eller fordonsstativ
25191705	Engine piston and rod scale	Balancing equipment to accurately measure and adjust weight of piston and rod assembly to crankshaft of engine.	エンジンピストンおよびロッドスケール, 엔진 피스톤 로드 스케일, Balanza de pistón y varilla de motor,
25191706	Railway rolling stock lifting jack	A jack that lifts up railway vehicles such as locomotives, passenger cars, etc.	鉄道車両リフティングジャッキ, 철도차량 리프팅잭, Gato para levantar material rodante férreo,
25191707	Railway lift table for engine and component	A railroad device used to remove or load engine, truck, wheel set and other components while the railway vehicle is undergoing maintenance without lifting it up.	エンジンおよび部品用鉄道リフトテーブル, 철도차량 리프트테이블, Mesa ferroviaria para levantar motor y componente,
25191708	Carburetor balancer	A balancer that synchronizes two carburetors by promptly and accurately measuring the absorption volume in the event of operating by using one engine and two carburetors.	キャブレターバランサー, 기화기 조정기, Balanceo de carburador,
25191709	Power adjuster	A device that maintains the preset power of the vehicle or makes changes in accordance with the plan previously set.	パワーアジャスター, 동력 조정기, Ajustador de potencia,
25191710	Valve lapper	Equipment that grinds the contact side between poppet valve and valve seat of the cylinder head of diesel or gasoline engines.	バルブ・ラッピング機, 밸브 래퍼, Lapeadora de válvulas,
25191711	Valve refacer	Equipment that grinds the valve face that connects with the valve seat for the poppet valve with absorption and exhaustion of reciprocating type internal combustion engine. It is comprised of motor, chuck, grind wheel, cooling water pump and others.	バルブ研削盤, 밸브 연마기, Pulidora de válvulas,
25191712	Valve seat cutter	Equipment that grinds the valve sheet of the cylinder head of reciprocating type internal combustion engine with certain angle and shape. The pilot stem is inserted to the valve guide hole to insert the T shaped handle axis and process the valve sheet by turning the handle manually.	バルブシートカッター, 밸브 시트커터, Cortador de asientos de válvulas,
25191713	Antifreeze recycling device	A device that removes impure substances from anti freezing liquid enabling the liquid to be reused.	不凍液再生装置, 부동액 회수 재생기, Dispositivo para reciclar anticongelante,
25191714	Brake drum lathe	A special lathe for vehicle maintenance that rotates and processes the brake drum from the lathe for revising the partial abrasion of the brake drum from the friction when the vehicle is stopped or decelerated during running.	ブレーキドラム旋盤, 브레이크드럼 선반, Torno para frenos de tambor,
25191715	Brake shoe grinder	A brake shoe is designed to suspend or decelerate the vehicle during running. It is special equipment for the vehicle maintenance and repairing to grind the brake shoes.	ブレーキシュー研削盤, 브레이크슈 연삭기, Pulidora de zapatas de freno,

© 2016 United Nations Development Programme and GS1 US

25191716	Brake spring pliers	A tool that inserts or take out the return spring on two brake shoes of a half-moon shape installed inside of the brake drum.	ブレーキスプリングプライヤー, 브레이크스프링 플라이어, Alicate para resortes de freno,
25191717	Vehicle body straightening machine	A machine calibrated for each part that fits a vehicle body capable of repairing those parts of the body that are bent or out of shape.	車体修正機, 차체 교정기, Máquina para enderezar carrocerías de vehículos,
25191718	Vehicle service creeper	A device used when working under the equipment body for a vehicle or construction machine. There is a pillow on the plate to lie down and it is easy to roll with the wheels attached.	車両サービスクリーパー, 서비스크리퍼, Carrito para reparar carros por debajo,
25191719	Wheel nut or lug wrench	An specialized type of wrench used to loosen or tighten lug nuts on vehicle wheels.	ホイールナットまたはラグレンチ, 휠너트 렌치, Llave para tuercas de llantas,
25191720	Spark plug wrench	An specialized type of socket wrench for removng or installing spark plugs on an internal combustion engine.	スパークプラグレンチ, 스파크플러그 렌치, Llave de bujías,
25191721	Spark plug cleaner	A device that sprays high pressure air to remove impure substances, such as lead compounds or carbon deposits attached to the spark plug.	スパークプラグクリーナー, 스파크플러그 클리너, Limpiador de bujías,
25191722	Engine tool kit	A standard tool kit that is designed for assembly and disassembly of the engine.	エンジンツールキット, 엔진 공구세트, Juego de herramientas de motor,
25191723	Piston heater	A device that heats the piston to a certain temperature in order to expand the piston pin holes when assembling the piston and connecting rod with the piston pin.	ピストンヒーター, 피스톤 히터, Calentador de pistones,
25191724	Automatic transmission rebuild kit	Equipment that is exclusively designed and manufactured for each vehicle for prompt, accurate and safe disassembly or assembly by the user in consideration of the structural characteristics of inner part of automatic transmission.	自動変速装置リビルドキット, 자동변속기 조립 공구세트, Kit para reconstruir transmisión automática,
25191725	Automotive boring machine	A type of metal cutting equipment designed for use in vehicle maintenance and repair specifically for cutting the inner part of engine cylinder or connecting rod of vehicle.	自動ボーリングマシン, 자동차 보링머신, Máquina perforadora para automóviles,
25191726	Automotive honing machine	A machine that is exclusively used for vehicle maintenance and repairing for precision grinding for inner part of cylinder and others of vehicle engine by rotational motion and reciprocating motion for honing tool in the round bar shape.	自動ホーニング盤, 자동차 호닝머신, Máquina perfeccionadora para automóviles,
25191727	Connecting rod aligner	A device that measures bending or twisting of connecting rod. It has the vertical direction of long surface plate and has a simple structure that aligns the surface plate and the pin in vertical direction.	連接棒アライナ, 커넥팅로드 얼라이너, Alineador de varillas de conexión,
25191728	Crankshaft balancer	Equipment that measures and corrects the rotational balance of crank shaft, a high speed engine component.	クランク軸バランサ, 크랭크축 평형기, Balanceador de cigüeñal,
25191729	Crankshaft grinder	A type of grinding machine that grinds the side of the pin and journal of vehicle crankshafts.	クランク軸グラインダ, 크랭크축 연마기, Pulidora de cigüeñal,
25191730	Timing light	A measuring device that checks the ignition timing of engine.	タイミング・ライト, 타이밍 라이트, Luz de toma de tiempos,
25191731	Torque converter cleaner	A specialized type of equipment that removes impure substances inside of the converter of the automatic transmission. Washing oil is penetrated through the filter in forced circulation type to inject and wash inside torque converter.	トルクコンバータ・クリーナ, 토크컨버터 클리너, Limpiador de convertidor de torque,
25191732	Piston vise	A vise used for grinding and measuring of the piston. It secures the piston with a V shape block installed on the horizontal surface.	ピストン万力, 피스톤 바이스, Perno roscado para pistón,

© 2016 United Nations Development Programme and GS1 US

25191733	Piston grinder	A type of grinding machine that grinds the finish side when the surface of the piston is worn out or corroded to be irregular.	ピストン・グラインダ, 피스톤 연마기, Pulidora de pistones,
25191734	Valve spring compressor	A tool for assembly or disassembly of the valve and spring that works by compressing the spring of exhaust vale and air intake valve of the cylinder head or cylinder block of internal combustion engine.	バルブスプリング・コンプレッサ, 밸브스프링 압축기, Compresor de resorte de válvula,
25191735	Piston ring compressor	A tool that compresses several piston rings into the ring groove at once for assembling the piston to the cylinder.	ピストンリング・コンプレッサ, 피스톤링 압축기, Compresor de anillo de pistón,
25191736	Vehicle driving simulator	A driver training device that simulates road and safety conditions likely to be encountered when driving a vehicle.	車両走行シミュレータ, 자동차 모의운전장치, Simulador de conducción de vehículo,
25191737	Automatic tire inflator	Equipment that injects air into vehicle tire automatically according to the desired pneumatic pressure.	タイヤ空気入れポンプ, 타이어 공기주입기, Inflador automático de llantas,
25191738	Tire spreader	A device that spreads open the tire in order to inspect for damage to internal wall of the tire.	タイヤスプレッダ, 타이어 확장기, Abridor de llantas,
25191739	Steering gear simulation tester	A testing device for vehicle steering gears of all types.	ステアリングギアシミュレーション試験機, 조타장치 모의 시험기, Tester de simulación de engranajes de dirección,
25191740	Vehicle washing machine	An external cleansing system that washes the exterior of auto, bus and truck vehicles.	車両洗浄機械, 차량 세차기, Máquina para lavar vehículos,
25191741	Railway washing machine	An external cleansing system that washes the exterior of railway locomotives, passenger cars and rolling stock. It is installed over the tracks and operates when trains pass under it.	鉄道洗浄機械, 철도차량 세차기, Máquina para lavar trenes,
25191742	Vehicle parts washing machine	A type of cleansing machine that washes off the rust preventive oil, waste substance, foreign substance and others attached on the surface of the vehicle part. It is mixed in water with the detergent.	車両部品洗浄機械, 차량부품 세척기, Máquina para lavar partes de vehículos,
25191743	Railway component washing machine	A type of cleansing machine that washes residue off railway component parts such as air con filters.	鉄道部品洗浄機械, 철도차량부품 세척기, Máquina para lavar componentes de ferrocarril,
25191744	Tire retreading machine	A machine to recycle worn tires, where the tire body is used and the old and worn tread is removed through scratch and application of a new tread.	タイヤ再生機,

Class 25191800 Vehicle testing and measuring equipment

Definition (if available) Specialized testing equipment for vehicles that includes detectors, gauges and test instrumentation used in the maintenance and repair of transport vehicles.

Commodity	Commodity Title	Definition	Synonym
25191801	Growler tester	A device that inspects for open circuits, short circuits and ground of engine or motor coils, alternators, armatures and stators of starter.	グロウラー試験機, 그로울러 시험기, Probador de inducidos,
25191802	Dwell tachometer	A device that measures the angle of cam and number of engine rotations.	ドウェルタコメーター, 듀엘 시험기, Tacómetro de ángulo de contacto,
25191803	Diesel smoke tester	A device that measures the smoke discharged by vehicle diesel engines using light penetration and reflection.	ディーゼル煤煙計, 디젤기관 매연 측정기, Tester de humo diesel,
25191804	Radiator tester	A device that tests the condition and performance of vehicle radiators by testing the capability of caps and leakage of core or tank of radiator by applying air pressure.	ラジエータ試験機, 라디에이터 시험기, Probador de radiador,

© 2016 United Nations Development Programme and GS1 US

25191805	Engine distributor tester	A tester that measures the condition and performance of vehicle electrical system specifically the primary current frequency for ignition, electric power distribution of secondary high voltage current, ignition timing following the rotation speed and load.	エンジンディストリビューター試験機, 배전기 시험기, Probador de distribuidor de motor,
25191806	Battery hydrometer	A type of meter that determines battery condition before recharging and discharging by measuring the specific gravity of electrolytes.	バッテリー比重計, 배터리 비중계, Hidrómetro de batería,
25191807	Bearing oil leakage detector	A type of detection device that detects and records the volume of oil leaked from the engine bearing or vehicle drive.	ベアリング油漏れ検出器, 베어링오일 누설 지시계, Detector de fugas de aceite de rodamiento,
25191808	Brake tester	A device designed to check and measure the braking capability of vehicle.	ブレーキ試験機, 브레이크 시험기, Probador de freno,
25191809	Side slip tester	A type of alignment device that checks for discrepancies in vehicle front wheel alignment such as toe in, camber and caster.	サイドスリップ試験機, 사이드슬립 시험기, Probador de ángulo de deslizamiento,
25191810	Chassis dynamometer	A device that checks and measures the density of exhaust gas against the standard allowable for the design power of the vehicle and its loaded condition as it is referred to as the chassis dynamo.	シャーシ・ダイナモメータ, 섀시 동력계, Dinamómetro de chasis,
25191811	Speedometer tester	A device that checks and measures the condition and performance of vehicle speed indicators.	スピードメーター試験機, 속도계 시험기, Probador del velocímetro,
25191812	Stall tester	A diagnostic device designed to check the condition and performance of torque converters, front and rear brake bands, front and rear clutch by measuring the maximum rotation speed of engine for each range while the brake is on from the vehicle with the automatic transmission.	失速試験機, 스톨 시험기, Probador de bloqueo,
25191813	Spark plug gap gauge	A gauge that measures the gap on engine spark plugs.	スパークプラグ・隙間ゲージ, 스파크플러그 간극 게이지, Tester de brecha de bujías,
25191814	Spark plug tester	A device that measures spark gap and ignition and determines condition and performance.	スパークプラグ試験機, 스파크플러그 시험기, Tester de bujías,
25191815	Armature tester	A diagnostic device for checking the condition and performance of armatures in vehicles.	アーマチャー試験機, 아마추어 테스터, Tester del inducido,
25191816	Compression type spring tester	A device for testing the tension or reactive force compression type coil springs on valves, clutches and cylinder heads on internal combustion engines. It tests for free height, squareness of the spring with the spring placed on the plane part of the tester.	圧縮式スプリング試験機, 압축식 스프링 시험기, Tester del resorte tipo compresión,
25191817	Compression pressure gauge	A device that measures the compression pressure when the piston reaches the top dead center of the compression stroke on reciprocating type internal combustion engines. It is used to detect damage or leakage in cylinder, piston, piston ring, valve, head gasket and others.	圧縮圧力ゲージ, 압축압력 게이지, Medidor de presión de la compresión,
25191818	Air cleaner element tester	A device that inspects the function of element or filter in the air cleaner.	空気清浄機要素試験機, 에어클리너 엘리먼트 시험기, Tester del elemento limpiador de aire,
25191819	Anti lock braking system ABS simulation tester	A diagnostic device for checking the condition and perormance of anti lock brake systems on vehicles.	アンチロック・ブレーキシステムABSシミュレーション試験機, 에이비에스장치 모의 시험기, Tester de simulación de los frenos anti bloqueo abs,

© 2016 United Nations Development Programme and GS1 US

25191820	Engine multimeter	A portable digital tester that measures the direct and alternating current, voltage and resistance, number of engine rotations, dwell angle, frequency, on vehicle engines.	エンジン・マルチメーター, 엔진 멀티미터, Multímetro de motor,
25191821	Engine simulation tester	Equipment that is used for improving the fault diagnosis capability of electronically controlled engines.	エンジン・シミュレーション試験機, 엔진 모의 시험기, Tester de simulador de motor,
25191822	Engine injector tester	A testing device designed to check the condition and performance of the vehicle fuel supply system, specifically fuel clogging, leakage, pressure. The device determines fuel supply efficiency with the measurement of injection volume per certain stroke of fuel injection device.	エンジン注入試験機, 엔진 인젝터 시험기, Tester de inyector de motor,
25191823	Engine test bed		エンジン試験ベッド, 엔진 테스트베드, Lecho de prueba de motor,
25191824	Engine tune up tester	A device that checks compression pressure, timing, vacuum condition, exhaust release volume, carbon monoxide and hydrocarbon release, number of engine rotations and others for improving the engine capability.	エンジンチューンアップ試験機, 엔진 튜업 시험기, Probador de puesta a punto del motor,
25191825	Fuel consumption meter	A device that measures the volume of fuel consumed for each unit time of internal combustion engine or combustor.	燃費表示計, 연료 소비계, Medidor de consumo de combustible,
25191826	Oil leakage tester	Equipment that inspects for oil leakage from each part of vehicle.	油漏れ試験機, 오일 누출 시험기, Tester de fugas de aceite,
25191827	Electronic control suspension ECS simulation tester	A testing device to determine condition and performance of electronically controlled suspension.	電子制御式サスペンションECSシミュレーション試験機, 이시에스장치 모의 시험기, Tester de simulación de suspensión de control electrónico ecs,
25191828	Automatic transmission tester	Equipment used to test the capability and diagnose faults in vehicle automatic transmission performance.	自動変速機試験機, 자동변속기 시험기, Tester de transmisión automática,
25191829	Electronic control inspection system	Equipment that is designed to check the vehicle electronic control part as used in the maintenance plant and others.	電子制御検査システム, 전자제어 점검장치, Sistema de inspección de control electrónico,
25191830	Headlight tester	A device designed to test the luminous intensity and angle of head lights for vehicle.	ヘッドライト試験機, 전조등 시험기, Tester de luz frontal,
25191831	Vehicle window regulator tester	A diagnostic tool used to test and adjust the operation of vehicle window regulators.	車両ウィンドウレギュレータ試験機, 차량용 윈도우레귤레이터 시험기, Tester del regulador de ventanas del vehículo,
25191832	Vacuum gauge for vehicle servicing	A gauge that is used to inspect for leakage of engine valves, delays of ignition time, leakage of head gaskets or manifold gaskets and damage to valve springs. It is comprised of a vacuum gauge, hose, adaptor, connector, case and others.	車両修理用真空計, 차량 정비용 진공 게이지, Medidor de vacío para mantenimiento de vehículo,
25191833	Camber caster gauge	A gauge that measures the tilting angle of camber, caster, and king pin when aligning the front wheels of the vehicle.	キャンバーキャスター・ゲージ, 캠버캐스터 게이지, Medidor de avance del camber,

© 2016 United Nations Development Programme and GS1 US

25191834	Coil condenser resistance or ohm tester	A diagnostic device designed test the capability of vehicle ignition systems, coils and condensers.	凝縮器コイル耐性またはOHM計, 코일콘덴서 저항 시험기, Tester de resistencia de bobina de condensación o ohm,
25191835	Tire pressure gauge	A device that measures the air pressure of vehicle tires.	タイヤ圧ゲージ, 타이어 압력 게이지, Válvula de presión de ruedas,
25191836	Toe in gauge	A type of device designed to measure the toe in condition of front side of the front wheel of a vehicle.	トーイン・ゲージ, 토인 게이지, Medidor de convergencia de las ruedas delanteras,
25191837	Turning radius gauge	A gauge consisting of a turn table for measuring the turning radius of vehicle front wheels.	回転半径ゲージ, 회전반경 게이지, Medidor de radio de giro,
25191838	Automotive vehicle inspection system	Equipment that is equipped with a comprehensive system for vehicle inspection used in motor inspection office or maintenance plant.	自動車車両検査システム, 자동차 종합검사장치, Sistema de inspección de vehículos automotores,
25191839	Odometer	A device that indicates the distance covered in a vehicle trip	オドメータ,

26101111	Pressure washer motor AC	A type of motor designed for use in pressure washers and steam cleaners.	Moteur à courant alternatif pour appareil de lavage à pression, Nagynyomású mosó motor (váltóáramú), 交流（AC)気圧ウォッシャモーター, 압력세척교류모터, Motor ac de de lavadora a presión, Motor f
26101112	General purpose motor AC	A motor having a NEMA ""B"" design, listed and offered in standard ratings, with standard operating characteristics and mechanical construction for use under usual service conditions without restriction to a particular application or type of application (NEMA).	Moteur à courant alternatif d'usage général, Általános célú motor VÁ, 汎用モーター AC, 일반교류모터, Motor ac de propósito general, Elmotor, växelström
26101113	Submersible motor AC	A motor designed to operate while submerged in liquid.	Moteur à courant alternatif submersible, Búvármotor (váltóáramú), 交流（AC)潜水装置モーター, 수중교류모터, Motor ac sumergible, Sänkbar motor, växelström
26101114	Induction motor AC	A type of electrical alternating current motor.	誘導モータ AC, 유도모터 AC, Motor ac de inducción, Induktionsmotor, växelström
26101115	Multi phase motor AC	A type of electrical alternating current motor.	多相電動機 AC, 다상 모터 AC, Motor ac multi – fase, Flerfasmotor, växelström
26101116	Single phase motor AC	A type of electrical alternating current motor.	単相電動機 AC, 단상 모터 AC, Motor ac de fase sencilla, Enfasmotor, växelström
26101117	Vertical hollowshaft motor AC	A type of definite purpose motor developed to meet the specific needs of the vertical turbine pump industry. Employs a hollow shaft through which a pump shaft is extended. Adjustments to lift the impellers and give a running clearance for the pump casing can be made by turning a nut threaded on the shaft which is accessible at the top portion of the motor. Vertical turbine pump shafts are usually composed of many lengths joined by screw thread couplings.	垂直中空軸ＡＣ, 수직 중공축 모터, Motor ac de eje motriz,

26101765	Vibration dampers		振动阻尼器, 振動阻尼器, Vibrationsdæmpere, Trilonderdrukkers, Amortisseurs de vibrations de torsion, Schwingungsdämpfer, Szulfamidok, 消振ダンパ, 진동댐퍼, Vibrasjonsdempere, Abafadores de vibração, Amortiguadores de vibración, Vibrationsdämpare
26101766	Governors		调节器, 調節器, Regulatorer, Limiteurs de régime, Regler, Glutarátok, 調速機, 조속기, Regulatorer, Restritores de motor, Reguladores, Regulatorer
26101767	Turbine stator	The stator is the very important electrical part of the turbine. It contains all the coils of wire which will have voltage induced in them as the magnets pass over them. It's defined as the 'stator' because it is the 'stationary' (it doesn't turn) part of the alternator	タービン静翼, 터빈 스테이터, Estator de turbina, Turbinrotoraxel
26101768	Turbine shaft	The turbine shaft is the very important part of the turbine.The simplest turbines have one moving part, a rotor assembly, which is a shaft with blades attached.	タービン軸車, 터빈 축, Eje de turbina, Turbinaxel
26101769	Ignition coil	A device that converts current from a battery into the high-voltage current required by spark plugs.	点火コイル, 점화 코일, Bobina de ignición, Tändspole
26101770	Electronic engine control for gasoline engines	Control system for gasoline engines	ガソリンエンジン電子式エンジン制御, 휘발유 엔진 전자 엔진 제어장치, Control electrónico de motor para motores a gasolina, Elektronisk motorstyrning för bensinmotorer
26101771	Electronic engine control for diesel engine	Control system for diesel automotive engines	ディーゼルエンジン用電子エンジン・コントロール, 디젤 엔진 전자 엔진 제어장치, Control electrónico de motor para motores diesel, Elektronisk motorstyrning för dieselmotorer
26101772	Injector cleaner	A fluid added to the fuel tank to clean fuel injecting devices	インジェクタークリーナー, 인젝터 클리너, Limpiador de inyector,
26101773	Diesel proportional metering valve	Valve that can take various configurations used to mix fuel and air in a desired ratio in an automotive diesel fuel system.	ディーゼルエンジン比例計バルブ, 디젤 연료조절 밸브, Válvula de medición proporcional diesel,
26101774	Canister purge solenoid valve	A specialized mechanism used to control release of vapors from the purge canister in automobile evaporative emissions systems	キャニスターパージ・ソレノイドバルブ, 캐니스터퍼지 솔레노이드 밸브, Válvula solenoide ara purgar lata,
26101775	Diesel high pressure valve	Specialty valve capable of withstanding extremely high pressures present during compression and combustion phases of an automotive diesel fuel system.	ディーゼルエンジン高圧バルブ, 디젤 고압 밸브, Válvula de alta presión diesel,
26101776	Immobilizer coil	A device used as a component of a theft deterrent system in an automotive ignition system such that vehicle starting is enabled only when specific codes are exchanged between the coil and the vehicle key, remote starter or other starting device.	イモビライザーコイル, 이모빌라이저 코일, Bobina del inmovilizador,

© 2016 United Nations Development Programme and GS1 US

26101777	Fuel injector coil gasoline	An electronic device that is a component of an automotive electro mechanical actuation system in an automotive gasoline injection system.	フューエルインジェクタ・コイルガソリン, 가솔린 연료 분사기 코일, Bobina del inyector de combustible gasolina,
26101778	Fuel injector coil diesel	An electronic device that is a component of an automotive electro mechanical actuation system in an automotive diesel injection system.	フューエルインジェクタ・コイルディーゼル, 디젤 연료 분사기 코일, Bobina del inyector de combustible diesel,
26101779	Wiring harness grommet	A rubber or plastic component with a through hole used to protect wiring harnesses from abrasion, pinching or other damage as they pass through holes in metal or other hard, sharp or otherwise non-compliant materials	ワイヤ・ハーネスグロネット, 와이어링하네스 그로밋, Arnés pasacables para cableado,
26101780	Oil injector or metering valve	Lubricating oil dispensing or metering device that measures and injects lubricant as required.	給油または絞り弁, 오일 주입기 또는 측정 밸브, Inyector de aceite o válvula de medición,
26101781	Piston pin	A component that plays the role of connecting link that conveys the gas pressure generated at the time of explosion of gas in the combustion chamber of internal combustion engine from the piston to the connecting rod.	ピストンピン, 피스톤핀, Pasador de pistón,
26101782	Ignition distributor	A device that distributes and regulates the high voltage generated by the ignition coil to each cylinder in an engine and controls the time of ignition in accordance with the number of revolutions of and load on the engine.	イグニション・ディストリビュータ, 점화 배전기, Distribuidor de ignición,
26101783	Hydraulic swivel joint	A component composed of a fluid conveying pipe that can swivel around a fixed shaft enabling hydraulic fluid to flow in two directions.	油圧スイベルジョイント, 유압식 스위블 조인트, Unión de husillos hidráulicos,
26101784	Differential spider	A spider with four radial shaped arms designed to form connecting section between two shafts, one of which rotates while the other shaft is stopped or rotates with different speed or in different direction.	ディファレンシャル・スパイダ, 차동 스파이더, Araña del diferencial,
26101785	Oil strainer element	A pump component that enables filtration by the strainer which is installed on the intake of an oil pump.	油こし機エレメント, 오일여과기 엘리먼트, Elemento colador de aceite,
26101786	Valve tappet	A kind of power transmission device that converts the rotational motion of the camshaft into straight line motion of pushrod.	バルブ・タペット, 밸브 태핏, Alza válvulas,
26101787	Admission valve and rack	Valve system and linkage used to moderate steam flow into a turbine and control RPM and power output	進入弁およびラック, 유입 밸브와 랙, Válvula y bastidor de admisión,
26101788	Piston rod	In a piston engine, component that joins a piston to a connecting rod.	`

26111909	Electrical clutches		电力离合器, 電力離合器, Elektriske koblinger, Electrical clutches, Elektrische Kupplungen, Elektromos tengelykapcsolók, 電気クラッチ, 전기클러치, Elektriske clutcher, Embreagens elétricas, Embragues eléctricos, Elektriska kopplingar
26111910	Hydraulic clutches		液力离合器, 液力離合器, Hydrauliske koblinger, Embrayages hydrauliques, Hydraulische Kupplungen, Hidraulikus tengelykapcsolók, 油圧クラッチ, 유압클러치, Hydrauliske clutcher, Embreagens hidraulicas, Embragues hidráulicos, Hydrauliska kopplingar
26111911	Pneumatic clutch	Pneumatically operated clutch	Embrayage pneumatique, Pneumatikus tengelykapcsoló, 空気圧クラッチ, 공압식클러치, Embrague neumático, Pneumatisk koppling
26111912	Mechanical clutch	Mechanically operated clutch.	Embrayage mécanique, Mechanikus tengelykapcsoló, メカニカル・クラッチ, 기계식클러치, Embrague mecánico, Mekanisk koppling
26111913	Clutch hold back unit	This is a type of clutch which has a ratchet and pawl mechanism inside which will allow rotation only in one direction.	クラッチ制御装置, 클러치 고정장치, Unidad de detención de embrague, Kopplingsspärr
26111914	Jaw clutch	A structure in which pole flanges attached to the driving shaft and the driven shaft are interlocked with each other. Flange on one side is inserted through feather key at the end of the shaft through the key, in order to enable it to move in parallel.	つめクラッチ, 물림 클러치, Embrague de mandíbula,
26111915	Automatic clutch	A type of equipment that automatically enables clutch conversion without separate manipulation. It does not have clutch pedal and the gear is changed automatically in accordance with the given situation only through manipulation of lever for speed change.	自動クラッチ, 자동 클러치, Embrague automático,
26111916	Semi automatic clutch	A clutch that enables speed change through clutch connection only with gear lever manipulation.	半自動クラッチ, 반자동 클러치, Embrague semi automático,
26111917	Electromagnetic clutch	A clutch that conveys torque with electromagnetic force generated by the built-in electromagnetic coil with quick response and ease of control.	電磁クラッチ, 전자 클러치, Embrague electromagnético,

26121637	Outdoor fiber optics cable	Fiber optic communications cable, which is used externally. This commodity includes products such as optical aerial telcommunication cable, direct burried fiber optic cable and underwater fiber optic cable.	Fiberoptiske kabler, udendørs, Câble d'extérieur en fibres optiques, Außen-Fiberoptik-Kabel, Szabadtéri száloptikás kábel, 屋外用光ファイバーケーブル, 옥외광섬유케이블, Utendørs fiberoptiske ka
26121638	Crimping materials	Includes various shrinking/crimping muffs	Matériel de sertissage, Crimp-Materialien, Roppantó rögzítő anyagok, 圧着材, 크림핑재료, Materiales de engaste, Krympmaterial
26121639	Combined or customized multi cables	Multi-cables are composed of various quantities of coaxial, twinaxial, pairs and singles cabled together per customer's specification, shielded and jacketed with various materials and colors.	Multi-câbles à associer ou pré-conçus, Kombinierte oder Kundenspezifische Kabel, Kombinált ill. egyedi összetett kábelek, 総合および特注マルチ・ケーブル, 복합 또는 맞춤멀티케이블, Multi – cables com
26121640	Heat resistant cables		Câbles thermo-résistants, Hitzebeständiges Kabel, Hőálló kábelek, 耐熱ケーブル, 방열케이블, Cables resistentes al calor, Värmebeständiga kablar
26121641	Installation cables	Cables used for installation purposes, in general.	Câbles d'installation, Installationskabel, Szerelési kábelek, 取り付けケーブル, 설치케이블, Cables de instalación, Installationskablar
26121642	Instrumentation Cable	Single/multi pair; shielded/non-shielded; 300/600 volts; stranded conductor; suitable for installation in trays, troughs, channels, conduit, wireway; ITC/PLTC types.	Câble d'instrumentation, Műszerezési kábel, 計装ケーブル, 계장용 케이블, Cable de instrumentación, Instrumenteringskabel
26121643	Bare steel reinforced electrical cable	Type of electrical cable used in underground mining to supply power underground	裸鋼強化電気ケーブル, 나강 보강 전기케이블, Cable eléctrico reforzado de acero desnudo, Blanka stålförstärkta elkablar
26121644	Bare aluminum electrical cable	Type of cable used to supply power in underground mining	裸アルミ電線, 경알루미늄전기케이블, Cable eléctrico de aluminio desnudo, Blank aluminumelkabel
26121645	Bare copper electrical cable	Type of cable used to supply power in underground mining applications	裸アルミ銅線, 나동전기케이블, Cable eléctrico de cobre desnudo, Blank kopparelkabel
26121646	Trailing and mining machine cable	Cable used to supply power to underground mining machinery.	垂下ケーブルまたは掘削機ケーブル, 트레일러 및 광산기계용 케이블, Cable de seguimiento y máquina de minería, Kabel för gruvdrift

26121647	Trailing and mining machine cable assembly	Cable assemblies used to supply power to mining machinery with connection plugs installed.	垂下ケーブルまたは掘削機ケーブル組立, 트레일러 및 광산기계용 케이블 조립체, Ensamble de cable de seguimiento y máquina de minería, Kablage för gruvdrift
26121648	High voltage cable termination kit	This kit consists of high temperature resistant sleeves, which are mounted on the cable at the termination ends.	高圧ケーブル終端キット, 고압 케이블 종단 키트, Kit de terminación de cable de alto voltaje, Ändsats för högspänningskabel
26121649	High voltage cable joining kit	This kit consists of high temperature resistant sleeves, which are mounted on the cable.	高圧ケーブル接続キット, 고압 케이블 이속 키트, Kit de unión de cable de alto voltaje, Skarvsats för högspänningskabel
26121650	Fiber optic cable assembly	A length of fiber optic cable that has been terminated with a connector, pigtail or other component.	光ファイバーケーブルアセンブリー, 광섬유 케이블 조립체, Conjunto de cable de fibra óptica,
26121651	Oil resistant SO cable	SO cable denotes a portable, oil-resistant cable comprised of 2 or more conductors, which can be used in both indoor and outdoor applications. This versatility allows SO cable to be utilized in a variety of environments including commercial, residential and industrial facilities.The high stranding in SO cable creates extra flexibility that further promotes its use in a wide variety of applications.	耐油性ＳＯケーブル, 방유 SO 케이블, Cable so resistente al aceite,
26121652	Electrical cord assembly	A cable for electricity that is designed for the terminal process to connect the ends of both sides or one end to the other item.	電気コードアセンブリー, 전기코드 어셈블리, Conjunto de cordón eléctrico,
26121653	Toll cable	A cable which is used in relay between toll switches or between broadcasting stations.	市外ケーブル, 시외 케이블, Cable toll,
26121654	Carrier frequency cable	A polyethylene dual insulated foam skin aluminum sheathed cable which is used on pulse code modulation line and cable used in the carrier frequency range.	搬送周波数ケーブル, 반송 케이블, Cable de frecuencia de carrier,
26121655	Simplex and duplex fiber optic cable	An optical cable that is used for interior distribution of a building, such as wall, ceiling and others. The number of insulated conductors is 1 to 2, and this is frequently applied on the jumper code, the cable for connection between the terminal devices in the interior optical distribution box and connection between the interior optical transmission equipment.	単芯および二芯光ファイバーケーブル, 코드형광 케이블, Cable de fibra óptica simplex y dúplex,
26121656	Submarine fiber optic cable	An optical cable for seabed that is coated with the jute asphalt CaCo3 with the first and second iron wire external layer by having the external part with the lead cover, galvanized steel wire and others in consideration of external impact and water pressure for the purpose of installation in shallow seas.	海底光ファイバーケーブル, 해저용 광케이블, Cable de fibra óptica submarina,
26121657	Flame retardant fiber optic cable	An optical cable that is used in communication lines exposed to fire danger.	難燃性光ファイバーケーブル, 난연 광케이블, Cable de fibra óptica retardante de fuego,
26121658	Aluminum conductor motion resistant transmission cable	Bare aluminum conductor, steel reinforced motion-resistant cable used for overhead transmission lines.	アルミニウム運動性導体通信ケーブル, 알루미늄 컨덕터 운동내성 송전 케이블, Cable de transmisión de aluminio conductor resistente al movimiento,

26121659	Aluminum conductor quadruplex service drop cable	Insulated cable with aluminum conductor, used to supply 3-phase power to service entrance.	アルミニウム導体四芯ドロップケーブル, 알루미늄 컨덕터 사중 서비스드롭 케이블, Cable de bajada de servicio cuádruple de aluminio conductor,
26121660	Aluminum conductor duplex service drop cable	Cable used primarily for 120 volt outdoor and overhead service applications.	アルミニウム導体二芯ドロップケーブル, 알루미늄 컨덕터 이중 서비스드롭 케이블, Cable de bajada de servicio dúplex de aluminio conductor,
26121661	Aluminum conductor underground service entrance cable	Cable used for 600 volt service entrance applications requiring high-heat, moisture and sunlight resistance.	アルミニウム導体地下入力ケーブル, 알루미늄 컨덕터 지중 인입 케이블, Cable de aluminio conductor subterráneo de entrada de servicio,
26121662	Aluminum conductor service entrance cable	A 600 volt aluminum conductor, polyethylene insulated service entrance cable.	アルミニウム導体入力ケーブル, 알루미늄 컨덕터 인입 케이블, Cable de aluminio conductor de entrada de servicio,
26121663	Single aluminum conductor service cable	A 600 volt high-heat and moisture-resistant cable primarily used in conduit or raceways.	一芯アルミニウム導体ケーブル, 싱글 알루미늄 컨덕터 서비스 케이블, Cable sencillo de aluminio conductor de servicio,
26121664	Aluminum conductor polyethylene covered line wire	Primarily used for overhead secondary distribution lines. Installed on insulators, treated as a bare conductor.	アルミニウム導体ポリエチレン被覆外線, 알루미늄 컨덕터 폴리에틸렌 피복 외선, Alambre de aluminio conductor recubierto de polietileno,
26121665	Aluminum triplex service drop cable	Insulated aluminum conductor cable, used to supply power to user's service head.	アルミニウム三芯ドロップケーブル, 알루미늄 삼중 서비스드롭 케이블, Cable de aluminio de bajada de servicio triple,
26121666	Communication cable assembly	A communication cable that is manufactured to connect to equipment with different each end or both ends.	通信ケーブルアセンブリー, 통신케이블 어셈블리, Conjunto de cable de comunicación,
26121667	Backplane input output cable	Electrical cable which affixes to the backplane (as opposed to the front) of an I/O modular chassis.	バックプレーン入出力ケーブル,
26121668	Cord/cable management device	A device to store, manage, control, organize, or otherwise protect cords, cables, cord sets, extension cords, audio cables.

27111728	Screwdriver set	Two or more screwdrivers of different types and sizes sold as a single unit.	Ensemble de tournevis, Csavarhúzó készlet, スクリュードライバーセット, 스크류드라이버 세트, Juego de destornilladores, Skruvmejselsats
27111729	Wrench set	Two or more wrenches of different types and/or sizes sold as an integrated unit.	Ensemble de clés plates, Dugókulcs készlet, スパナセット, 렌치세트, Juego de llaves, Skruvnyckelsats
27111730	Double ended swivel wrench	A wrench containing a flat long principal framework ended by a swivel in each extreme that articulate a socket for nuts or a driver for bolts but both being the same type.	Double clé à pivot, Kettős csuklós dugókulcs, 両ロスイベルスパナ, 양방향회전식 렌치, Llave giratoria de dos extremos, Lednyckel
27111731	Precision screwdriver	A type of screwdriver designed for very fine work characterized by accurate action tapered for quick turning and usually equipped with a rotating cap for fingertip control.	Tournevis de précision, Preciziós csavarhúzó, 精密スクリュードライバー, 정밀 스크류드라이버, Destornillador de precisión, Precisionsskruvmejsel
27111732	Non sparking screwdriver	A screwdriver made of a specific alloy, usually combinations of either beryllium and copper or bronze and aluminum, appropriate for use in environments with high explosive risk such as chemical plants, power stations, gas and oil distribution lines, etc.	Tournevis anti-étincelant, Szikramentes csavarhúzó, 防爆スクリュードライバー, 방폭형 스크류드라이버, Destornillador que no saca chispas, Icke gnistbildande skruvmejsel
27111733	Flexible rod screwdriver	A type of screwdriver with either a multiple tip or fixed tip containing a flexible rod enabling it to reach difficult access working points.	Tournevis à manche flexible, Rugalmas rúd csavarhúzó, 可動ロッドスクリュードライバー, 플렉시블로드 스크류드라이버, Destornillador de mango flexible, Böjlig skruvmejsel

27111734	Multiple tip screwdriver	A type of screwdriver that can accommodate different kinds of bits by means of a detachable head that holds the bit. Usually comes with several heads appropriate for a variety of screw sizes and types.	Tournevis porte-embout, Többfejű csavarhúzó, マルチプルチップ・スクリュードライバー, 멀티플팁 스크류드라이버, Destornillador de múltiples puntas, Skruvmejsel med utbytbara bits
27111735	Ratchet screwdriver	A type of screwdriver whereby the screwdriver rod is locked to the handle for clockwise rotation, but uncoupled for counterclockwise rotation for tightening or loosening screws. Some include accommodation within the handle for storing bits.	Tournevis à cliquet, Racsnis csavarhúzó, ラチェットスクリュードライバー, 라쳇 스크류드라이버, Destornillador de trinquete, Spärrskruvmejsel
27111736	Insulated screwdriver	A type of screwdriver for electrical use that does not allow electric current (typically 1000V in AC and 1500V in DC) to pass through it. Material of construction is usually alloyed steel (vanadium and molybdenum).	Tournevis d'électricien, Szigetelt csavarhúzó, 絶縁スクリュードライバー, 절연 스크류드라이버, Destornillador aislado, Isolerad skruvmejsel
27111737	Hand push automatic screwdriver	A type of screwdriver wherein its rod turns, either to the left or to the right, by means of an inner spring movement received from the stored energy after pushing the handle down.	Tournevis automatique, Kézi hajtású automata csavarhúzó, ハンドプッシュ自動スクリュードライバー, 핸드푸시자동 스크류드라이버, Destornillador manual automático de empujar, Pumpskruvmejsel
27111738	Voltage tester screwdriver	A type of insulated screwdriver with its tip serving as a contact point with a conductor and either a cable with a gag or just a cable ending at an electrode going out from the top of the handle to close the circuit so that it displays electric current flow.	Tournevis testeur, Fázisceruza, 電圧テスター　スクリュードライバー, 전압시험기용 스크류드라이버, Destornillador tester de voltaje, Skruvmejsel med voltmeter
27111739	Torque screwdriver	A type of screwdriver designed to measure torque while tightening, based on the elastic deformation of a calibrated spring. The torque value is shown in a display located on its handle.	Tournevis dynamométrique, Nyomaték csavarhúzó, トルク・スクリュードライバー, 토크 스크류드라이버, Destornillador de torque, Momentskruvmejsel
27111740	Telescoping screwdriver	A type of screwdriver with multiple bits containing an expandable magnetic pick up aerial that is located within the rod. Usually there is a compartment inserted in the handle to keep the interchangeable bits.	Tournevis télescopique, Teleszkópos csavarhúzó, テレスコープ・スクリュードライバー, 텔레스코핑 스크류드라이버, Destornillador telescópico, Teleskopskruvmejsel
27111741	Interchangeable rod screwdriver	A type of screwdriver which has the capability of extracting its rod by pulling it after turning by means of a muller nut located at the end of the handle.	Tournevis à tête interchangeable, Cserélhető rudas csavarhúzó, 取替え可能ロッド　スクリュードライバー, 호환성로드 스크류드라이버, Destornillador de mango intercambiable, Skruvmejsel med utbytbara skaft

27111742	Impact screwdriver	A type of screwdriver that works through the principle of impact.	インパクトスクリュードライバー, 임팩트 스크루 드라이버, Destornillador de impacto, Slagskruvmejsel
27111743	Ring wrench or spanner	A type of wrench (spanner) that has a completely enclosed head, and may have six or 12 flats. A 12 flat wrench (spanner) engages upon the corners of the nut and can engage both hexagon and square bolts.	リングレンチまたはスパナ, 링 렌치 또는 스패너, Llave de anillos, Ringnyckel
27111744	Offset ring wrench or spanner	A type of wrench (spanner) that has an offset head allowing it to connect with nuts in awkward places, and to give room for your hand to move without hitting the workpiece.	オフセット・リングレンチまたはスパナ, 오프셋 링 렌치 또는 스패너, Llave de compensación de anillos, Djupvinklad ringnyckel
27111745	Split ring wrench or spanner	A type of wrench (spanner) where a section of the ring is removed so the six or 12-point jaws can be located like an open-ended spanner.	スプリットリング・レンチまたはスパナ, 스플릿 링 렌치 또는 스패너, Llave de anillo dividido, U-nyckel
27111746	Bulldog wrench or spanner	A type of wrench (spanner) where a worm screw is located close to the opening jaw, which has a rack engaged with the screw, making the wrench (spanner) very easy to adjust with the finger and thumb of the holding hand.	ブルドッグレンチまたはスパナ, 불독 렌치 또는 스패너, Llave bulldog, Skiftnyckel
27111747	Box wrench or spanner	A type of wrench (spanner) made of tubing with flats arranged at each end.Holes through the tubing are designed to take a tommy bar set at right angles to the tubing, and this is used to apply pressure to the wrench (spanner) head.	ボックスレンチ, 박스 렌치 또는 스패너, Llave de caja, Ringnyckel
27111748	Footprint wrench	A type of wrench where the jaw opening can be adjusted by lifting the moveable handle and re- positioning the pivot so that the wrench can be used on a number of pipe sizes.Pressure is applied by squeezing the two handles together.	フットプリントレンチ, 풋프린트 렌치, Llave de huella, Polygrip
27111749	Pipe wrench or stillson wrench	An adjustable wrench used for turning soft iron pipes and fittings with a rounded surface. The design of the adjustable jaw allows it to rock in the frame, such that any forward pressure on the handle tends to pull the jaws tighter together.	パイプレンチ, 관 렌치 또는 스틸선 렌치, Llave de tubo o stillson, Rörtång
27111750	Mole wrench	A self gripping wrench which can be adjusted to grip various diameters of pipe. The width of the jaws is adjusted by the knurled screw on the rear of the main handle and the tool is just then 'squeezed' onto the pipe.	モルレンチ, 몰 렌치, Pinza de presión, Självlåsande tång
27111751	Tap spanner or basin wrench	A type of wrench designed to tighten basin and bath tap backnuts in the often restricted space under the basin/bath where an ordinary spanner would have insufficient turning space.	タップスパナまたはベイスンレンチ, 탭 스패너 또는 베이슨 렌치, Llave de grifos, Kranmutternyckel
27111752	Obstruction wrench	An open-end wrench designed with large offset angles for work in cramped spaces.	オブストラクションレンチ, 오브스트럭션 렌치, Llave de obstrucción, Startmotor- och blocknyckel
27111753	Ratchet wrench	A type of wrench that has a ratchet mechanism at the end that allows tightening or loosening in confined spaces.	ラチェットレンチ, 래칫 렌치, Llave de trinquete, Spärrnyckel
27111754	S wrench	A type of wrench that has different sockets at the both ends.	Sレンチ, S 렌치, Llave en s, S-formad skruvnyckel
27111755	Y wrench	A type of wrench having three different sockets at its three ends.	Yレンチ, Y 렌치, Llave en y, Y-nyckel
27111756	Crows foot wrench	A type of wrench that has detachable end sockets to the handle.	クローフットレンチ, 까마귀발 렌치, Llave de pata de cuervo, Kråkfotsnyckel

© 2016 United Nations Development Programme and GS1 US

27111757	Slugging wrench	A type of wrench designed for use with hammers where impact or shock is required for loosening of frozen and rusty nuts and bolts.	スラグレンチ, 슬러깅 렌치, Llave de golpe especial o slugging, Ringnyckel
27111758	Cam over wrench	A type of wrench that utilizes a ball and lobe design that allows the tool to slip free when torque is reached, thus preventing over-torquing.	カムオーバー・レンチ, 캠 오버 렌치, Llave dinamométrica de disparo automático, Spärrnyckel
27111759	Blade wrench	A type of wrench with an adjustable interconnection between the tool body and the blade portion which permits selective angular positioning of the blade portion.	ブレードレンチ, 블레이드 렌치, Llave de cuchilla, U-nyckel
27111760	Wheel nut wrench or lug nut wrench	A type of wrench for loosening or tightening a wheel nut of a vehicle.	ホイールナットレンチ, 휠넛 렌치 또는 러그넛 렌치, Llave de tuercas de llantas, Fälgkors
27111761	Water pump wrench	A type of wrench that has an unusual stepped opening.	ウォーターポンプレンチ, 물펌프 렌치, Llave de bomba de agua, Vattenpumpnyckel
27111762	Flexible head gear wrench	A type of wrench that has a flexible, adjustable head at the end.It is a variety of ratchet wrench.	フレキシブルヘッドギアレンチ, 플렉서블 헤드기어 렌치, Llave de trinquete de cabeza flexible, Skruvnyckel med ledat huvud
27111763	Allen wrench	A six-sided wrench that fits into the hex socket of a cap screw or set screw.	六角レンチ, 앨런 렌치, Llave allen, Sexkantsnyckel
27111764	Drill drift	A device used to pull out the taper shank drill attached to drill sleeve or drill socket of various drilling equipment.	ドリルドリフト, 드릴 뽑게, Guías de broca,
27111765	Drum plug wrench	A non adjustable tool used in opening and closing the screw cap of oil drum.	ドラムプラグ・レンチ, 드럼 플러그 렌치, Llave para destapar tambores,
27111766	Cross rim wrench	A tool with socket wrench with different configurations or dimensions on the end of each of 4 cross shaped bars that can be turned by rotatory force.	クロスリム・レンチ, 크로스림 렌치, Llave de rin cruzado,
27111767	Offset screw driver	A screw driver with the driver bit and the handle bent in the shape of an L.	オフセットスクリュードライバー, 옵셋 스크루 드라이버, Destornillador de compensación o en “l”,
27111768	Point socket	Type of socket that enables the rotation of the bolt or nut continuously without the need to reposition the die. The turning force is transmitted through the recess, where it engages the die

27111812	Long tape ruler	A measuring device consisting of a tape measure rolled up either in a box or a disc and used to measure longer distances than a regular tape measure.	Ruban de mesure, Hosszú mérőszalag, 長巻尺, 긴 줄자, Regla larga, Långt måttband
27111813	Plumb bob line	A specialized line usually made of nylon to avoid damage when suspended with a weight at the bottom (plumb bob).	Fil à plomb, Függőón zsinór, 鉛直線, 측량추 줄, Línea de plomada, Lodlina
27111814	Inspection mirror	A tool used to assess work or equipment status where direct physical access is difficult. Consists of a mirror at the end of a rod.	監視ミラー, 검사용 거울, Espejo de inspección,
27111815	Combination square	A ruler with composite functions including drawing lines, drawing parallel lines, measuring of depth of groove, finding the center and measuring right angle on timber or steel materials.	組み合わせ物差し, 콤비네이션 스퀘어, Escuadra de combinación,
27111816	Gage ball set	A collection of various measurement balls with different diameters.	ゲージボールセット, 게이지볼 세트, Juego de bola indicadora,
27111817	Shrink or shrinkage rule	A type of ruler used in wooden pattern factories and cast iron factories. It has scale that is at greater interval in order to account for the contraction of molten metal which contracts during solidification.	延び尺, 주물자, Regla de encogimiento,
27111818	Dial gauge stand	An auxiliary tool that supports measurement devices such as dial gauge and dial test indicator, etc.	ダイヤルゲージスタンド, 다이얼 게이지 스탠드, Soporte del indicador del,
27111819	Roughness comparison specimen	A standard specimen for comparison of surface roughness that is used as a standard in comparing and measuring the surface roughness of various machine processed surfaces through tactile and visual senses.	粗度比較見本, 표면 거칠기 표준 시편, Espécimen de comparación de rugosidad,
27111820	Square master	A device enabling measurement of squareness and straightness by moving a lever. Also enables assessment of the parallelism of a surface through measurement of straightness.	四直角マスター, 스퀘어 마스터, Escuadra maestra,
27111821	Cylindrical square	A measurement tool used to measure the squareness of attachment of jigs and products as squareness measurement master.	円筒直角定規, 원통 스퀘어, Escuadra cilíndrica,
27111822	Angle measuring instrument	A type of angle measuring device. In general, it is equipped with a rotating component and circumference scale, and is used widely in automatic controllers.	角度測定器, 각폭 측정기, Instrumento de medición de ángulos,
27111823	Center gauge	An instrument used in installation and adjustment of shelves and screw bite, and testing of angle of tools. One side is used to measure angle while the other side has scales.	センターゲージ, 센터 게이지, Calibrador de centro,
27111824	Angle gauge	An instrument that is standard for measurement of angle or testing. It is possible to obtain arbitrary standard angle by pairing from polygonal angle gauges with diverse range of vertical angle.	角度ゲージ, 각도 게이지, Calibrador de ángulo,
27111825	Sine plate	A surface plate with a sturdy metallic block or table with smoothly finished plane used to set accurate angle.	サインプレート, 사인 정반, Placa de seno,
27111826	Precision surface plate	A solid flat plate made of cast iron or stone with its surface accurately and smoothly finished in order to perform centering, line drawing, assembly and measurement by placing work piece on its top.	精密定盤, 정밀 정반, Placa de superficie de precisión,
27111827	Adjustable angle plate	A foundation plate used to fix the work piece on the upper plate, and is capable of precision adjustment and angle adjustment.	調整横定盤, 조정앵글 플레이트, Placa de ángulo ajustable,
27111828	Fixed angle plate	A cast iron tool used in performing drawing points or line, or machine processing by fixing the work piece into the groove by means of bolt, etc.	固定横定盤, 고정앵글 플레이트, Placa de ángulo fijo,
27111829	Optical parallel	A plate with optical glass on the both side with highly precise level of parallelism. Used in measuring the level of flatness and parallelism of the micrometer measurement surface by using light wave interference.	光線定盤, 옵티컬 패럴럴, Paralelo óptico,

27111918	Hand sander	A manual tool that contains abrasive on one side and has a handle on the other side.	Ponceuse à main, ハンドサンダー, 수동연마기, Lija manual, Handslip
27111919	Bastard cut file	A type of file based on tooth configuration. A file's teeth can range from rough, coarse and bastard (meaning intermediate) to second-cut, smooth and dead smooth.	荒目やすり, 거친 줄, Lima bastarda, Grovfil
27111920	Second cut file	A type of file based on tooth configuration. A file's teeth can range from rough, coarse and bastard (meaning intermediate) to second-cut, smooth and dead smooth.	中目やすり, 중간 줄, Lima de segundo corte, Mellangrov fil
27111921	Smooth cut file	A type of file based on tooth configuration. A file's teeth can range from rough, coarse and bastard (meaning intermediate) to second-cut, smooth and dead smooth.	細目やすり, 다듬질 줄, Lima de corte liso, Finslipad fil
27111922	Cross cut file	A type of file based on tooth configuration. A file's teeth can range from rough, coarse and bastard (meaning intermediate) to second-cut, smooth and dead smooth. A cross-cut file has two sets of teeth crossing obliquely.	両丸やすり, 동가리 줄, Lima de corte en cruz, Dubbelhuggen fil
27111923	Chain saw file	A type of file based on tooth configuration. A file's teeth can range from rough, coarse and bastard (meaning intermediate) to second-cut, smooth and dead smooth. Chain saw files are round files with various cuts.	チェーンソーやすり, 기계톱 줄, Lima de sierra de cadena, Kedjesågsfil
27111924	Rasp cut file	A type of file based on tooth configuration. A file's teeth can range from rough, coarse and bastard (meaning intermediate) to second-cut, smooth and dead smooth. Rasp files have furrows made by straight cuts of a chisel, either single or crossed and have coarse, single teeth, raised by the pyramidal end of a triangular punch with various cuts.	石目やすり, 라스프 절단 줄, Lima de corte raspa, Rasp
27111925	Needle file	A large family of specially shaped small, narrow files ranging from about 3" to 8" in length.	精密やすりセット, 바늘 줄, Lima de aguja, Nålfil
27111926	Aluminum flat file	Type of file designed with a special tooth construction for filing aluminum and other soft metals with a minimum of clogging.	アルミニウム用平型やすり, 알루미늄 플랫 파일, Lima plana de aluminio, Flat aluminiumfil
27111927	Aluminum half round file	Type of file designed with a special tooth construction for filing both flat and curved surfaces in aluminum and other soft metals.	アルミニウム用半丸やすり, 알루미늄 하프 라운드 파일, Lima de aluminio semicircular, Halvrund aluminiumfil
27111928	Cheesegrater file	Type of file designed for rapid work on all soft materials - wood, aluminum, fiberglass, and laminated countertops.	チーズおろし型やすり, 치즈그레이터 줄, Lima rallo de queso, Surformrasp
27111929	Flat hand file	Type of file designed for safe filing of internal corners and where metal must be removed rapidly.One edge is uncut or safe for filing one surface without damaging an adjoining one.	平やすり, 플랫 핸드 줄, Lima de mano plana, Flatfil

27112717	Heat guns		热风器, 熱風器, Heat guns, Warmtepistolen, Pistolets thermiques, Heißluftpistolen, Melegfúvók, Pistole da calore, 熱線銃, 전열건, Varmluftpistol, Pistolas de aquecimento, Pistolas de calor, Varmluftspistoler
27112718	Engravers		雕刻机, 雕刻機, Engravers, Grafeerders, Graveurs, Graviermaschinen, Gravírozógépek, Incisori, エングレイバー, 각인기, Rissenåler, Gravadores, Grabadores, Gravyrmaskiner
27112719	Glue guns		喷胶器, 噴膠器, Glue guns, Lijmpistolen, Pistolets à colle, Klebepistolen, Ragasztópisztolyok, Pistole per colla, グルーガン, 글루건, Limpistoler, Pistolas de cola, Pistolas para engomar, Limpistoler
27112720	Torque tools		扭矩工具, 扭矩工具, Torque tools, Torsie gereedschappen, Outils dynamométriques, Drehmomentwerkzeuge, Torziós nyomaték gépek, Utensili di coppia di reazione, トルク工具, 토크도구, Momentverktøy, Ferramentas de torque, Herramientas de par de torsión, Momentverktyg
27112721	Biscuit jointers		金属块接合器, 金屬塊接合器, Biscuit jointers, Lassers voor onverglaasd porcelein, Fraiseuse à lamelles, Biscuit-Verbinder, Korongos illesztőszerszám, ビスケット・ジョインター, 비스킷접속공, Lamellfreser, Ligadores de massa, Juntador de capas de material, Keramikfogare
27112722	Beveling tool	Power tool used in high speed weld preparation of milled steel, stainless steel, and aluminum plate.	Chanfreineuse, Leélező szerszám, ベベリングツール, 베벨링공구, Biseladora, Fasningsverktyg
27112723	Power shears	A small power tool used to make a very precise cut in copper or steel plate.	Cisaille électrique, Ollós vágógép, 電動刈り取りばさみ, 전동가위, Cizallas eléctricas, Skärmaskin

© 2016 United Nations Development Programme and GS1 US

27112724	Power nibbler	A tool for cutting sheet metal with minimal distortion with a blade that moves in a linear fashion against a fixed die. Similar to shears.	Grignoteuse électrique, Lemezkivágó gép, 電動ニブラー, 전동 니블러, Pellizcadoras eléctricas, Nibbler
27112725	Power riveter	An electrical tool for driving rivets usually in the form of a gun. Power supply can be power cable or battery.	Riveteuse électrique, Szegecselőgép, 電動リベッター, 전동 리베터, Ribeteadora eléctrica, Nitmaskin
27112726	Power rod cutter	Power tool for cutting rods of several materials (usually steel). It works by placing a rod at one end, and at the other a handle with a button. By pressing it, the machine cuts the rod in a precise way.	Coupe tige électrique, Rúddaraboló gép, 電動ロッドカッター, 전동 봉절단기, Cortador de varillas eléctrico, Kraftavbitare
27112727	Mortar gun	A gun-shaped tool to make cement mortar penetrate and fill fissures or cracks. This tool is electrically powered via AC power or battery.	Pistolet pour mortier, Vakológép, モルタルガン, 본타일건, Pistola de mortero, Cementpistol
27112728	Power flaring tool	A portable unit that enables rapid and precise flaring of suitable tubes and the pre-installation of cutting rings.	Dudgeonnière électrique, Csővégtágító gép, 電動フレアリングツール, 전동 플레어링공구, Soplete eléctrico, Eldrivet koningsverktyg
27112729	Tube crimper	A gun shaped pressing tool that makes the correct connection between two tubes. Power source can be either AC or battery.	Sertisseur de tubes, Csőperem lekerekítő, チューブクリンパー, 튜브압착기, Conector de tubos, Rörkrympare
27112730	Power grease gun	A common power tool used for lubrication. Applies lubricant through an aperture to a specific point, usually a grease nipple, which carries the lubricant to the place needed. Power source is either AC or battery.	Pistolet de graissage électrique, Kenőzsírszóró pisztoly, 電動グリースガン, 전동 윤활유주입기, Pistola de grasa eléctrica, Smörjpistol
27112731	Power scissors	A type of scissors that move automatically, powered by AC or battery.	Ciseaux électriques, Motoros olló, 電動ばさみ, 전동 가위, Tijeras eléctricas, Eldriven sax
27112732	Power pipe bender	A power tool commonly used to make the elbows of pipes and also other forms.	Cintreuse électrique, パワーパイプベンダー, 전기파이프밴더, Doblador de tubos eléctrico, Rörböjningsmaskin
27112733	Angle cutter	A tool with the cutting face angled with respect to the axis of rotation formed by a manual saw and a basis upon which the material is placed by elevating the saw until the material stands still and fixed ready to obtain strips or wood marks in angle, generally to 45 degrees.	Gabarit de coupe, アングルカッター, 각도절단기, Cortador de ángulos, Vinkelslip
27112734	Jigsaw	A tool used for cutting arbitrary curves, such as stenciled designs or other custom shapes, into a piece of wood or similar material.It is usually used in a more artistic fashion than other saws, which only cut in straight lines and exist mainly to cut pieces of wood to length for building structures.In this way, it is similar to the rasp and the chisel.	ジグソー, 실톱, Sierra de vaivén, Figursåg

© 2016 United Nations Development Programme and GS1 US

27112735	Scroll saw	A small electric or pedal operated saw useful for cutting intricate curves where a jigsaw or coping saw is not appropriate.It is capable of creating curves with edges. It is somewhat similar to a band saw, but unlike band saws, in which the saw blade is a continuous loop, scroll saws use saw blades similar to those used by coping saws and operate through a quick reciprocating up and down motion.	糸のこ, 원형톱, Sierra de espiral, Kontursåg
27112736	Wall chaser	A specialised power tool generally used for cutting a groove into a wall. It is comprised of a motor that drives two abrasive discs like those found in an angle grinder.The abrasive discs are placed closely together.	ウォール・チェーザ, 콘크리트 홈 파는 기기, Cortador de muros, Skårskärare
27112737	Orbital sander	The most common type of electrical sander available. It comes with rectangular, square or round base plates.When using an orbital sander, there is no need to worry about the direction of wood grain	オービタル・サンダー, 오비털 샌더, Lija orbital, Excenterslip
27112738	Detail sander	A type of orbital sander with small, usually triangular, base plates which can fit into awkward areas such as window frames, small items or furniture etc.	ディテイルサンダー, 디테일 샌더, Lija de detalle, Detaljslip
27112739	Belt sander	A type of sander that can remove material quicker than an orbital sander, but does not produce as good a finish as can be achieved with an orbital sander.	ベルトサンダー, 벨트 샌더, Lija de banda, Bandslip
27112740	Bench sander	A type of sander used not just for sanding but for shaping as well.These machines are powerful and make easy work of rapid removal of material from the work piece.	ベンチサンダー, 벤치 샌더, Lija de banca, Bänkslipmaskin
27112741	File sander or finger sander	A type of sander with a very narrow (in the order of 12.5mm) sanding belt which can get into narrow areas.	ファイルサンダーもしくはフィンガーサンダー, 줄 샌더 또는 손가락 샌더, Lima lija o lija dedo, Fingerslip
27112742	Disc sander	An accessory for a power drill or fitted as a bench mounted sanding tool.	ディスクサンダー, 디스크 샌더, Lija de disco, Skivslip
27112743	Radial arm saw	A woodworking power tool that allows for vertical movement of the saw, which is housed in the saw carriage and supported by an arm.The yoke houses the motor and the blade and allows for beveled cuts from 0 to 90 degrees.	電動丸のこ, 래디얼 암 톱, Sierra de brazo elástico, Radialarmsåg
27112744	Pneumatic saw	A type of power saw driven by pressurized air.	空気圧のこ, 공압톱, Sierra neumática, Tryckluftssåg
27112745	Concrete saw	A powered saw (often known as a consaw or road saw) used for cutting concrete, masonry, brick, asphalt and other solid materials.Concrete saws are powered by gasoline, hydraulic or pneumatic pressure, or electric motors. The significant friction generated in cutting hard substances like concrete usually requires the blades to be cooled to prolong their life and reduce dust.Blades are either abrasive or diamond tipped.	コンクリート・ソー, 콘크리트톱, Sierra de concreto, Betongsåg
27112746	Chain saw	A portable mechanical, motorized saw.It is used in logging activities such as felling, limbing, and bucking; by tree surgeons to fell trees and remove branches and foliage; to fell snags and assist in cutting firebreaks in wildland fire suppression, and to harvest firewood.Chainsaws with specially designed blades have been developed as tools for use in chain saw art.	チェーンソー, 기계톱, Sierra de cadena, Kedjesåg
27112747	Reciprocating saw	A type of saw in which the cutting action is achieved through a push and pull reciprocating motion of the blade. The typical style of this saw has a foot at the base of the blade, also similar to a jigsaw. The user rests this foot against the surface being cut so that the tendency of the blade to push away from or pull towards the cut as the blade travels through its cycle can be countered.	往復のこぎり, 절골톱, Sierra recíproca, Tigersåg

27112748	Miter saw	A motorized saw (also called a chop saw or drop saw) used to make a quick, accurate crosscut in a workpiece.Common uses include framing operations and the cutting of molding.Most miter saws are relatively small and portable.	マイター・ソー, 각도톱, Sierra ingleteadora, Geringssåg
27112749	Angle grinder	A handheld power tool used for cutting, grinding and polishing. The motor drives a geared head at a right-angle on which is mounted an abrasive disc that can be replaced when worn.Angle grinders typically have an adjustable guard and a side-handle for two-handed operation.	アングルグラインダー, 각도 연삭기, Pulidora de ángulo, Vinkelslip
27112750	Battery powered crimping tool	Die or dieless compression tool powered by a battery.	電池式クリンプツール, 배터리 작동식 크림핑기, Herramienta compresora a batería,
27112751	Power cable cutter accessories	Accessories for cable cutter that is battery operated or powered by electicity.	電動ケーブルカッター付属品,

Class 27112800 Tool attachments and accessories

Definition (if available) The comodities in this family are intended to enhance the use of a tool, and are include items such as: specialty bits and blades, as well as items used with tools like template sets, guards and drive guides

Commodity	Commodity Title	Definition	Synonym
27112802	Saw blades		锯片, 鋸片, Saw blades, Zaagbladen, Lames de scie, Sägeblätter, Fűrészlapok, Lame per seghe, のこぎり刃, 톱날, Sagblader, Lâminas de serra, Hojas de sierra, Sågblad
27112803	End mills		端面铣刀, 端面銑刀, End mills, Afwerkmolens, Fraises d'extrémité, Schaftfräser, Szármarók, Frese frontali, エンドミル, 엔드밀, Endefresere, Brocas de ponta, Fresadoras con mango, Ändfräsar
27112804	Stamping dies or punches		冲模, 沖模, Stamping dies or punches, Stamp stempels of ponsers, Matrices à estamper et à poinçonner, Stanzwerkzeuge oder Stanzstempel, Sajtolószerszámok vagy lyukasztók, Matrici o punzoni da stampaggio, 抜き打ち型およびパンチ, 스탬핑다이 또는 펀치, Stanseverktøy eller hulleverktøy, Cunhos ou barriletes de estampagem, Troqueles o punzones de estampar, Präglingsverktyg och stansar

27112822	Hub adapters		轮毂适配器, 輪轂適配器, Hub adapters, Adaptateur de moyeu, Nabenadapter, Agy adapterek, ハブ・アダプター, 허브어댑터, Navadaptere, Adaptadores de cubo, Adaptadores de cubo, Navadaptrar
27112823	Cutting chains	Chain saw attachments used for cutting	割链, 割鏈, Cutting chains, Chaînes de dégarnissage, Fräsketten, Vágóláncok, カット・チェーン, 커팅체인, Kjeder til kjedesager, Correntes de corte, Cadenas de corte, Sågkedjor
27112824	Chuck sleeves		卡盘套筒, 卡盤套筒, Chuck sleeves, Douilles port pince, Spannfutterhüllen, Tokmány perselyek, チャック・スリーブ, 척슬리브, Chuckhylser, Camisas de mandril, Portabrocas, Chuckhylsor
27112825	Tool template sets		工具模板, 工具範本, Tool template sets, Ensembles de gabarit, Hilfsmittelschablonensets, Szerszám sablonlemez készlet, ツール・テンプレート・セット, 공구템플릿세트, Verktøymalsett, Jogos de gabaritos de ferramentas, Juegos de plantillas de herramienta, Verktygsmallsatser
27112826	Hole saws	Combination drill and saw bit used to cut holes in various material.	孔锯, 孔鋸, Hole saws, Gatenzagers, Scies cloches, Lochsägen, Lyukfűrész, ホールソー, 홀소, Hullsager, Serras de buraco, Caladora, Hålsågar
27112827	Magnetizer demagnetizer devices		Magnétiseurs démagnétiseurs, Mágnesező/lemágnesező készülék, 磁化・脱磁装置, 착탈자기, Dispositivos para imantar y viceversa, Magnetiserings-/avmagnetiseringsenheter
27112828	Impact socket	A tool very similar to a regular socket but they are rather used with a power or pneumatic tool instead a manual wrench because of its major resistance to the effort.	Douille à choc, Ütőkulcs, インパクトソケット, 임팩트소켓, Enchufes de impacto, Slaghylsa

© 2016 United Nations Development Programme and GS1 US

27112829	Impact wrench attachments and accessories	Commodities intended to enhance the use of impact sockets such as increaser adapters, reducer adapters, extensions, fastening rings, fastening rods, joints, etc.	Extensions et accessoires pour clés à choc, Ütőkulcs toldalékok és tartozékok, インパクトレンチ取り付け具および付属品, 임팩트 렌치부속물 및 액세서리, Anexos de llave de impacto y sus accesorios, Tillbehör
27112830	Screwdriver accessories and supplies	Accessories and spare items related to screwdrivers such as handles, rods and magnetizer tips, adapters.	Fournitures et accessoires pour tournevis, Csavarhúzó tartozékok és anyagok, スクリュードライバ付属品用品, 스크류드라이버 액세서리 및 용품, Accesorios y suministros de destornillador, Tillbehör och ma
27112831	Wrench accessories and supplies	A set of accessories and spare items which is related to wrenches such as extensions to double offset ring wrenches, pins and telescopic levers to tubular wrenches, etc.	Fournitures et accessoires pour clés plates, Kulcs tartozékok és anyagok, スパナ付属品用品, 렌치액세서리 및 용품, Accesorios y suministros de llave, Tillbehör och materiel för skruvnycklar
27112832	Socket attachments and accessories	These commodities are intended to enhance the use of manual sockets such as: adapters, extensions, security rings, joints, handles, springs, security pins, etc.	Extensions et accessoires pour clés à douille, Dugókulcs toldalékok és tartozékok, ソケット取り付け具および付属品, 소켓부속물 및 액세서리, Anexos t accesorios de enchufe, Hylstillbehör och materiel
27112833	Drill bit case	An empty container or wrapping usually made of metal, plastic, wood or other material that is used to protect and organize drill bits	Coffre à trépans, Fúrófej tartódoboz, ドリル用ビットケース, 드릴 비트 상자, Estuche de brocas, Borrbitsfodral
27112834	Hand pipe threader case	An empty container or wrapping usually made of metal, plastic, wood or other material that is used to protect and order the pipe threaders.	Caisse à taraudeuse à main, Kézi csőmenet-vágó doboz, ハンドパイプスレッダーケース, 도관 나사절삭기 상자, Estuche de roscador manual de tubos, Låda för rörgängare
27112835	Machine reamer	A tool designed to create or modify a very round and accurately sized hole.	Alésoir machine, Gépi dörzsár, マシン・リーマ, 기계리머, Escariador de máquina, Maskinbrotsch
27112836	Screwdriver bit set	A group of screwdriver bits of several kinds that are sold as an unit.	Jeu d'embouts de tournevis, Csavarhúzó fej készlet, スクリュードライバビットセット, 스크루드라이버 추정세트, Juego de brocas de destornillador, Skrumejselbitsats

© 2016 United Nations Development Programme and GS1 US

27112837	Hand reamer	A tool for enlarging or shaping a hole, for use on all materials where a hand operation and accuracy are desired, the tool is often larger and thinner than machine reamers.	Alésoir à main, Kézi dörzsár, ハンド・リーマ, 핸드리머, Escariador manual, Handbrotsch
27112838	Cutting disc	A circular tool attachment made of steel that is inserted into a rotating power tool. The attachment is a type of blade used for scorching and cutting ceramic, asphalt, marble or other materials.	Disque à meuler, Vágókorong, カッティングディスク, 절삭디스크, Disco de corte, Skärskiva
27112839	Chisel bit	Edge tool bit with a flat steel blade with a cutting edge, attachment to power tools like chippers	チゼルビット, 타격 시추용 비트, Broca de cincel, Mejselbit
27112840	Guide drill bit	A drill bit with a guide included for a better and more precise perforation.	ガイドドリルビット, 가이드 드릴 비트, Broca guía, Borriktare
27112841	Hand drill bit for metal	High speed drill bit for accurate drilling in metal using hand drill	金属用ハンドドリルビット, 금속용 핸드드릴날, Broca manual para metal,
27112842	Hand drill bit for wood	Drill bit designed specifically for drilling in wood reducing the chipping, tear out, and burning caused by high-speed metal drill bits	木材用ハンドドリルビット, 목재용 핸드드릴날, Broca manual para madera,
27112843	Hand drill bit for stone	Drill bit designed specifically for drilling in stone and concrete. There are three different classifications of drill bits used for drilling into stone-soft, medium, and hard	石材用ハンドドリルビット, 석재용 핸드드릴날, Broca manual para piedra,
27112844	Lapping plate	A device that can be circular shape, rectangular shape or square shape made of various metallic materials. It enables easy abrasive actions with numerous narrow V shaped grooves or vertical grooves on the grinding surface.	ラップ板, 래핑 플레이트, Placa de lapeado,
27112845	Drill bit set	A standard collection or kit of different bits used in a drill	ドリルビット・セット, 드릴날 세트, Juego de brocas,
27112846	Heat gun adapter	Accessory piece that attaches to the nose of the heat gun.	ヒートガンアダプター, 히트건 어댑터, Adaptador de pistola de calor,
27112847	Die case	Carrying case for hydraulic compression dies.	金型, 다이 케이스, Estuche de troqueles,

27121807	Hydraulic puller	Hydraulic pullers are used for efficient removal of gears, bearings, wheels, pulleys and other pressed fit parts. Hydraulic power offers a controlled means of applying force without the need for hammering or heating.	Appareil de tirage hydraulique, 油圧式プーラー, 유압식 풀러, Halador hidráulico, Hydrauldragare
27121808	Hydraulic chain cutter	A hydraulic tool designed to cut metallic chains in a secure way.	Coupe chaine hydraulique, 油圧式チェーンカッター, 유압식 체인절단기, Cortador de cadenas hidráulico, Hydraulisk kedjeskärare
27121809	Hydraulic nut breaking tool	A nut cutting tool in which a cutting head includes a yoke for embracing a nut to be cut and for supporting a fixed blade as close as possible to the nut.	油圧式くるみ割り器, 유압 너트 분쇄 공구, Herramienta hidráulica para romper tuercas, Hydraulisk mutterskärare
27121810	Hydraulic hand crimp tool	A hydraulic tool designed to crimp connectors onto a cable.	油圧ハンドクリンプツール, 유압식 핸드크림프, Herramienta engastadora hidráulica manual,
27121811	Hydraulic crimp tool accessory	Accessories used with hydraulic tools. Examples include test slugs, fluids	油圧クリンプツール・アクセサリー, 유압식 크림프 보조품, Accesorio de herramienta engastadora hidráulica,
27121812	Hydraulic remote	A die or dieless remote power tool designed to crimp connectors onto a cable.	油圧リモート, 유압식 리모트, Remoto hidráulico,
27121813	Hydraulic classifier	Particle separator in two or more granulometric fractions regarding the settlement velocity inside a fluid.	油圧式分類器,
27121814	Compression die adaptor	Adaptor used in compression tools to allow different styles of dies to be inserted in jaw of tool.	圧縮式ダイアダプター,
27121815	Hydraulic wrench	Portable wrench to fasten bolt or nut by spinning movement which controls fluid pressure

27131514	Pneumatic pliers	A pneumatic tool having a pair of pivoted jaws, used for holding, bending or cutting.	Pince pneumatique, Pneumatikus csipesz, 空気圧プライヤー, 공압식 펜치, Alicates neumáticos, Tryckluftstång
27131515	Pneumatic wrench non impact	A non impact wrench available in three types: dynamometric, angular or with head. Used to drive nuts or other fasteners.	Clé pneumatique sans choc, Pneumatikus kulcs (nem ütőműves), 空気圧式ノンインパクトレンチ, 공압식 비충격렌치, Llave neumática de no – impacto, Tryckluftsdriven skruvnyckel
27131516	Pneumatic pen	A pen-shaped tool used to engrave in hard surfaces by means of heat.	Crayon a graver pneumatique, Pneumatikus toll, 空気圧ペン, 공압식 펜, Lápiz grabador neumático, Tryckluftspenna
27131517	Industrial pneumatic stapler	A pneumatic device used to bind material together by means of staples with a professional result.	Agrafeuse pneumatique industrielle, Pneumatikus ipari tűzőgép, 産業用空気圧ステープラー, 공압식 스테이플러, Grapadora neumática industrial, Tryckluftsdriven klammerpistol
27131518	Pneumatic auto glass removal tool	A pneumatic tool cylinder-shaped and ended in a blade, used to separate the glass from the place where it is inserted, above all is used in cars, where it can be cut through quickly, safely and without damage to the glass or the car body.	Couteau à pare-brise électrique, Pneumatikus gépkocsiüveg-eltávolító eszköz, 空気圧自動ガラス除去器具, 공압식 차량유리제거공구, Herramienta neumática para remover vidrios de autos, Tryckluftsdriv
27131519	Pneumatic or air punch	A gun-shaped tool used to convert circular holes into hexagonal holes to allow rivet nuts to be attached. Works with multiple materials and commonly includes a safety pressure valve.	Poinçonneuse pneumatique, Pneumatikus vagy levegős lyukasztó, 空気圧式あるいはエアパンチ, 공압식 또는 공기펀치, Punzón neumático o de aire, Tryckluftsdriven stans
27131520	Pneumatic rod cutter	Pneumatic tool for cutting rods of several materials, usually steel.	Coupe tige pneumatique, Pneumatikus rúddaraboló, 空気圧ロッドカッター, 공압식 봉절단기, Cortador neumático de varillas, Tryckluftsdriven kraftavbitare
27131521	Pneumatic riveter	A gun-shaped or straight tool used to drive rivets. Such pneumatic or oleo pneumatic (with oil) tools are able to invert the spin and set free the rivet to make the job easier. Can be used with riveted screws and nuts. 27131522	Miniature pneumatic sander	A small pneumatic tool used for sanding. Sanding disc has a diameter between 30-150 mm. Operates at a slower speed than normal sanders. Used for sanding on surfaces with difficult access, requiring high precision.	Ponceuse pneumatique miniature, Kisméretű pneumatikus csiszoló, 空気圧式ミニサンダー, 공압식 소형연마기, Lija neumática miniatura, Lufttrycksdriven minislip
27131523	Pneumatic rammer	A pneumatic tool thin and large with interchangeable rubber or metal cleats used to roll flat sand, concrete and other materials. Capable of delivering 600 to 1800 impacts per minute.	Pilon pneumatique, Pneumatikus döngölő, 空気圧式ランマー, 공압식 래머, Martillo neumático, Tryckluftsdriven packare
27131524	Pneumatic countersink	A pneumatic tool for making a hole. There are two variations: gun or straight.	Fraiseuse pneumatique, 空気圧式カウンターシンク, 공압식 카운터싱크, Avellanadora neumática, Tryckluftsdriven försänkare
27131525	Pneumatic shears	A small pneumatic tool used to make a very precise cut in copper or steel plates.	Cisailles pneumatiques, エアーはさみ, 공압식 전단기, Cizallas neumáticas, Tryckluftsdriven sax
27131526	Pneumatic press	A press that uses compressed air to flatten, mark, punch or otherwise shape a workpiece.	Presse pneumatique, 空気圧プレス, 공압식 프레스, Prensa neumática, Tryckluftspress
27131527	Pneumatic tool set	An assortment of small pneumatic tools sold together as a kit or set.	Ensemble d'outils pneumatiques, 空気圧工具セット, 공압식 공구세트, Juego de herramientas neumáticas, Tryckluftsverktygssats
27131528	Pneumatic nail puller	A tool in which the piston is operated with pneumatic force and causes the nail head to pop up by hitting the end of embedded nail.	空気圧くぎ抜き, 공기압식 못박기, Sacador de puntillas neumático,

30103607	Wood joists		木托梁, 木托梁, Wood joists, Houten dwarsbalken, Solives en bois, Holzdeckenträger, Fa illesztések, Travetti di legno, 木ジョイスト, 목재장선목재들보, Gulv- og loftsbjelker av tre, Vigas de madeira, Viguetas de madera, Bjälklag av trä
30103608	Wooden poles or telephone poles	Long thin stick of wood, often used standing straight up in the ground to support things such as wiring. Examples include telegraph or electricity poles	木杆和木质电话杆, 木杆和木質電話杆, Wooden poles or telephone poles, Poteaux en bois ou poteaux téléphoniques, Holzpfähle oder Telefonpfähle, Fa oszlopok ill. telefonoszlopok, 木柱または電柱, 목재폴 또는 전화선용 전신주, Trestolper eller telefonstolper, Postes de madeira ou postes de telefone, Postes de madera o postes telefónicos, Trästolpar och telefonstolpar
30103609	Brattice board	Board used in underground mining when installing brattice for ventilation.	張出し板, 칸막이 판, Tabla de tabique de ventilación, Gruvpartition (brattice)
30103610	Crib block	Treated wood blocks used in underground mining for supporting roof and equipment.	木積ブロック, 크립 벽돌, Bloque de soporte en minas, Stödstolpar för gruvor
30103611	Shovel mat	Log mats used to move large equipment over soft or uneven surfaces.	シャベル・マット, 셔블 매트, Esteras de troncos, Dragmattor
30103612	Railway tie	Treated wood ties used for railroad track and support of roof.	枕木, 철도 침목, Vínculos de ferrocarril, Bindbjälke
30103613	Precast haydite element		プレキャスト・ヘイダイトエレメント, 사전성형 헤이다이트 요소, Elemento prefabricado de hyadita, Förgjutet Haydite-element
30103614	Steel plate joist		スチール製ジョイスト, 강판 들보, Vigueta de placa de acero, Bjälklag av stålplåt
30103615	Plate girder	A riveted or welded steel girder having a deep vertical web plate with a pair of angles along each edge to act as compression and tension flanges.	プレートガーダー, 플레이트 거더, Viga de placa, Bärbjälke av stålplåt
30103616	Composite framework	A structure made of composite materials that gives shape or support	合成構造, 복합 구조, Marco compuesto, Kompositram
30103617	Wooden framework	A structure made of wood that gives shape or support	木製構造, 나무 구조, Marco de madera, Träram
30103618	Steel framework	A structure made of steel that gives shape or support	鉄骨構造, 강철 구조, Marco de acero, Stålram

30103619	Precast concrete element		プレキャストコンクリートエレメント, 사전성형 콘크리트 요소, Elemento de concreto prefabricado, Förgjutet betongelement
30103620	Crib block treated	Crib block treated with preservative to prevent rotting.	処理木積ブロック, 처리 크립블록, Bloque de soporte en minas tratado,
30103621	Railway tie untreated	Railway tie not treated with preservative.	素材枕木, 미처리 철도 타이, Vínculo de ferrocarril no tratado,
30103622	Square timber	A piece of timber made out of long logs that are log cut for square or rectangular shape.	角材, 각재, Troncos cuadrados,
30103623	Reinforcing bar or rebar or mesh		鉄筋またはメッシュ, 철근 또는 강철봉, Barra o malla de refuerzo,
30103624	Preformed dike or dam element	Preformed barriers or blocking which can be used to prevent water infiltration of an area or control waves along a shore line.	

Class 30103700 Braid

Definition (if available)

Commodity	Commodity Title	Definition	Synonym
30103701	Stainless steel braid		不锈钢编织物, 不銹鋼編織物, Stainless steel braid, Roestvrij stalen vlecht, Tresse en acier inoxydable, Rostfrei Stahl Litze, Rozsdamentes acél huzalok, Treccia a acciaio inossidabile, ステンレスブレード, 스테인리스쇠끈, Flettverk i rustfritt stål, Trança de aço inoxidável, Trenza de acero inoxidable, Fläta av rostfritt stål

Class 30103800 Metallic fibers and filaments

Definition (if available) A type of manufactured fibers composed of metal, plastic-coated metal, metal-coated plastic, or a core completely covered by metal. Fibers can be drawn from ductile metals such as copper, gold or silver and extruded or deposited from more brittle ones such as nickel, aluminum or iron.

Commodity	Commodity Title	Definition	Synonym
30103801	Steel fiber		Fibre d'acier, 鋼繊維, 강철섬유, Fibra de acero, Stålfiber
30103802	Tin fiber		Fibre d'étain, スズ繊維, 양철섬유, Fibra de estaño, Tennfiber
30103803	Aluminum fiber		Fibre d'aluminium, アルミニウム繊維, 알루미늄섬유, Fibra de aluminio, Aluminiumfiber
30103804	Alloy fiber	Type of metallic fiber derived from two or more ductile metals such as copper, gold or silver and extruded or deposited from more brittle ones such as nickel, aluminum or iron.	Fibre en alliage, 合金繊維, 합금섬유, Fibra de aleación, Legeringsfiber

Commodity	Commodity Title	Definition	Synonym
30103901	Headed shafts		ヘッドシャフト, 헤드 샤프트, Socavón con cabeza,

Class 30104000 Hollow structural sections HSS

Definition (if available) Rectangular, square and round structural steel tubing sections that perform a structural function in the engineering concept. They are sometimes used in mechanical applications, however such use is not recommended for the conveyance of liquids or gases under pressure. This new nomenclature replaces older terms such as “structural tubing” and “structural pipe”.

Commodity	Commodity Title	Definition	Synonym
30104001	Round hollow structural section HSS	A circular hollow metal profile used in structural engineering	
30104002	Square hollow structural section HSS	A square hollow metal profile used in structural engineering	
30104003	Rectangular hollow structural section HSS	A rectangular hollow metal profile used in structural engineering.

30111504	Mortars		灰浆, 灰漿, Mortars, Metselkalk soorten, Mortiers, Mörtele, Habarcsok, Malta, モルタル, 모르타르, Mørtel, Argamassas, Morteros, Murbruk
30111505	Ready mix concrete		Béton prêt à l'emploi, Transzportbeton, 生コンクリート, 레미콘, Concreto premezclado, Cementpulver
30111506	Grout		Coulis, Habarcs, グラウト, 그라우트, Lechada, Puts
30111507	Soil cured concrete	Concrete cured by mixing a cement hardening agent and a special mineral admixture and mixing water with soil and aggregate as the main ingredient.	処理土コンクリート, 흙 콘크리트, Concreto curado en suelo,
30111508	Water permeable concrete	Concrete for which the extent of infiltration of water has been elevated by forming continuous apertures by mixing cement, crushed aggregate, water and mineral admixture.	透水性コンクリート, 투수 콘크리트, Concreto permeable al agua,
30111509	Asphalt based concrete	A mixed material comprised of asphalt, coarse aggregate, fine aggregate or filler for package by applying heat or ambient temperature.	アスファルトベースコンクリート, 아스팔트 콘크리트, Concreto basado en asfalto,

Class 30111600 Cement and lime

Definition (if available)

Commodity	Commodity Title	Definition	Synonym
30111601	Cement		水泥, 水泥, Cement, Cement, Ciment, Zement, Cement, Cemento, セメント, 시멘트, Sement, Cimento, Cemento, Cement
30111602	Chlorinated lime		氯化石灰, 氯化石灰, Chlorinated lime, Gechloorde kalk, Chlorure de chaux, Chloren Kalk, Klórmész, Cloruro di calce, さらし粉, 염화석회, Klorert kalk, Cal clorada, Cal clorada, Klorkalk
30111603	Hydraulic lime		水硬石灰, 水硬石灰, Hydraulic lime, Hydraulische kalk, Chaux hydraulique, Hydraulik Kalk, Vízben kötő mész, Calce idraulica, 水硬石灰, 수경성석회, Vannkalk, Cal hidráulica, Cal hidráulica, Hydraulisk kalk
30111604	Hydrated lime		熟石灰, 熟石灰, Hydrated lime, Gehydrateerde kalk, Chaux hydratée, Hydratisierte Kalk, Oltott mész, Calce idrata, 消石灰, 수화석회, Vannholdig kalk, Cal hidratada, Cal apagada, Släckt kalk

30111605	Lean lime		貧石灰, 貧石灰, Lean lime, Schrale kalk, Chaux maigre, Mager Kalk, Sovány mész, Calce idraulica magra, 低純度石灰, 건석회, Finkalk, Cal magra, Cal magra, Mager kalk
30111607	Unslaked lime		生石灰, 生石灰, Unslaked lime, Chaux vive, Gebrannter Kalk, Oltatlan mész, 生石灰, 생석회, Ulesket kalk, Cal não caldeada, Cal viva, Osläckt kalk

Class 30111700 Plasters

Definition (if available)

Commodity	Commodity Title	Definition	Synonym
30111701	Gypsum plaster		石膏胶凝材料, 石膏膠凝材料, Gypsum plaster, Pleistergips, Plâtre de construction, Gipspflaster, Gipszvakolatok, Malta per intonaco di gesso idrato, 石こうプラスター, 석고플라스터, Stukkatur, Gesso, Enlucido de yeso, Gipsputsbruk

Class 30111800 Aggregates

Definition (if available) Inert granular materials that are combined and solidified with cement and water to make mortar or concrete. Composed of sand, gravel, crushed stone and others.

Commodity	Commodity Title	Definition	Synonym
30111801	Natural aggregate	A natural aggregate without the need of crushing requiring only washing and selection of gradation.	天然骨材, 천연 골재, Agregado natural,
30111802	Artificial aggregate	An aggregate made artificially by crushing rocks.	人工骨材, 인공 골재, Agregado artificial,
30111803	Recycled aggregate	Recycled aggregate made through physical or chemical processing	

Class 30111900 Concrete reinforcement hardware

Definition (if available) Ironware used as reinforcement for piling and plastering in steel reinforced concrete structures.

Commodity	Commodity Title	Definition	Synonym
30111901	Concrete reinforcing fiber	Steel, chemical fiber or carbon fiber in thin fibrous shapes with strong tensile strength that are mixed with aggregate in order to reinforce the relatively weak tensile strength of concrete.	コンクリート強化用繊維, 콘크리트 보강섬유, Fibra para reforzar concreto,
30111902	Construction expansion joint	A material that can be compressed or expanded according to the displacement of concrete due to expansion, contraction and vibration by being filled into the gap in the new structural joint of concrete.	構造伸縮継手, 건축토목용 신축이음재, Junta de expansión de construcción,
30111903	Wire mesh sheet	A lattice type metal sheet held together by electric resistance welding at the cross points formed by arranging vertical and horizontal lengths of cold rolled or high strength iron wire.	ワイヤーメッシュシート, 용접철망(와이어 메시), Lámina de malla de alambre,

Class 30121900 Soil stabilizers and reinforcing materials

Definition (if available): Materials to improve the physical and or chemical properties of soil by changing the coupling of soil particles or volume of void between the particles, and reinforcement material used to reinforce support capacity at the time of establishment of weak foundation or inclined surface and at the time of establishment of retaining wall with reinforced earth.

Commodity	Commodity Title	Definition	Synonym
30121901	Soil stabilizer	A material that improves the physical and or chemical properties of soil. Applied as an organic powder to stabilize in combination of soil particles.	土質安定剤, 토양 안정제, Estabilizador de suelo,

Class 30122000 Specialized external flooring and paving materials

Definition (if available): Paving materials for flooring outside of buildings. They include urethane flooring, painted flooring, elastic flooring, non skid paving materials, etc.

Commodity	Commodity Title	Definition	Synonym
30122001	Elastic sheet exterior paving material	Elastic paving material produced as a roll of sheet. Material is rubber, synthetic rubber, urethane, etc.	
30122002	Exterior permeable aggregate flooring material	Floor paving material in porous structure, which is made with a mix of aggregate and binding material to enhance permeability. Permeable concrete using cement is classified seperately.	
30122003	Painted or coated exterior flooring	Flooring that is painted or coated with various chemical materials for chemical resistance, wear resistance, shock resistance, etc. depending on its purpose. Urethane and epoxy are commonly used. They are commonly used in underground parking lot or as external fragmental painting flooring. Painting flooring for stadium's track is excluded.	
30122004	Non skid exterior paving material	Used on areas with high slope or on a sharp curve to prevent skidding. It is made with a mix of epoxy, non-skid aggregate(steel slag, silica, etc)

30191607	Scaffolding counterweight	An accessory used in scaffolding to balance the weigh and avoid the fall of suspended scaffolds, it is heavy and usually cubic.	Contrepoids d'échafaudage, Állvány ellensúly, 足場対重, 발판평형추, Contrapeso del andamio, Motvikt för byggnadsställning
30191608	Scaffolding corbel	A triangular scaffolding accessory that is placed in angles that support weigh adding more stability to the structure, in this way we can keep the distance to the facade and continue the assembly in spite of possible irregularities.	Encorbellement d'échafaudage, Állványzat párkánykonzol, 足場持送り, 발판받침대, Ménsula del andamio, Konsol för byggnadsställning
30191609	Scaffolding trestle	A device normally consisting of a ridge plank fixed edgeways to two pair of legs, each pair with the legs converging to meet at the plank; it is, inter alia, used as a solitary scaffold or as a support for duckboards.	Portique d'échafaudage, Állvány bak, 足場トレッスル（架台）, 발판가대, Plataforma del andamio, Bock för byggnadsställning
30191610	Scaffolding davit	An accessory of direct fixation in the scaffold structure for taking up and down little loads, it is specially useful to assemble and disassemble the structure.	Potence d'échafaudage, Állványzat csónakdaru, 足場ダビット（つり柱）, 발판대빗, Pescante del andamio, Dävert för byggnadsställning
30191611	Scaffolding fixation device	A fixation accessory that consists of a ring where other scaffolding accessories can be hung on one side, and on the other a tab enabling fixation to be screwed to the structure.	Raccords d'échafaudage, Állványzat rögzítőeszköz, 足場固定装置, 발판고정장치, Dispositivo de fijación del andamio, Fästenhet för byggnadsställning
30191612	Scaffolding wire rope	A special kind of large diameter (8 to 10 mm) wire made of a very resistant steel used in scaffolding.	Câble métallique pour échafaudage, 足場用ワイヤーロープ, 비계와이어로프, Cuerda de alambre del andamio, Vajer för byggnadsställning
30191613	Ladder platform	Device that clips onto a ladder rung to provide a convenient area for tools and materials at the top of the ladder.	はしご用プラットフォーム, 발판사다리, Plataforma de la escalera, Stegplattform
30191614	Ladder tray	Ladder attachment that holds bucket and tools in a high position.	はしご用トレー, 사다리 트레이, Bandeja de la escalera, Stegbricka
30191615	Ladder stay	A device that locks onto the top two rungs of the ladder with one end and at the other end rests against a wall so the ladder is held off a small distance from the wall.It allows the underside of the eaves and guttering to be worked on without having to lean back.	はしご取り付け具, 사다리 스테이, Descanso de la escalera, Toppstöd för stege
30191616	Construction safety net	A safety net installed around structures in order to prevent injuries caused by falling material and tools or falling accidents of people during work.	建設安全ネット, 낙하물 안전망, Red de seguridad de construcción,
30191617	Construction safety shelf	A wooden protective shelf installed on the exterior and interior of construction scaffolding to reduce risk of injury due to falling objects or tools during high elevation work.	建設安全棚, 낙하물 안전선반, Cerramiento de seguridad de la construcción,

Class 30191800 Temporary construction and maintenance support equipment and materials

Definition (if available): Various prefabricated moulds, accessories and materials designed for temporary use in civil work and construction of structures.

Commodity	Commodity Title	Definition	Synonym
30191801	Structural formwork	A temporary structure of wood or steel designed to contain and give structure to poured concrete.	構造骨組, 건설용 거푸집, Formaleta estructural,
30191802	Structural formwork accessory	Wood or steel accessory used for the mould installed to pour concrete.	構造骨組アクセサリー, 건설용 거푸집 보조용품, Accesorio de formaleta estructural,
30191803	Structural spacer	A material which provides support to an iron reinforcing rod by adjusting the interval of the iron reinforcing bar accurately for concrete pillar, wall, precast structure and others.	構造用スペーサー, 건설용 스페이서, Espaciador estructural,
30191804	Temporary roadway lining plate	Rectangular metal plate used to provide temporary roadway for ordinary and construction vehicles during public works, building, bridge and road construction. Comprised of thick plate and two types of rolled steel materials, surface of the plate is welded and processed. Lining plates are widely used in underground construction projects including subways, underground drain pipes, etc. They are also used in the construction of bridges.	
30191805	Structural deck plate	Metal panel used alternatively for floor material or molding, including zinc-galvanizing plate combined with wire and rebar and others	

Family 30240000 Portable Structure Building Components

Class 30241500 Portable Structure Consolidating Components

Definition (if available): Units generic to portable structures, such as gin poles, stakes and pegs, tube frame connectors, or others, that are designed either to support loads or to transmit loads to other units or components of the portable structure, such as a tent, grandstand, or stage, etc, or to fix them to the ground.

Commodity	Commodity Title	Definition	Synonym
30241501	Tube frame connector	Multiple way connector linking a pole to either ridges or purlins. It links all perimeter pieces and comes in different shapes and angles (T, U, two way corner, crowns, etc.).	Raccords tube structure, Csőkeret csatlakozó, チューブフレームコネクタ, 튜브프레임연결기, Conector de marcos de tubos, Rörramskoppling
30241502	Anchor plate	Metal plate through which anchors (pegs or mechanical) are driven, used either as a base plate or as part of an anchorage system to which a guy wire is hooked up to in order to hold tension.	Plaques d'ancrage, Lehorgonyzó lemez, 錨板, 앵커플레이트, Placa de anclaje, Ankarplatta

© 2016 United Nations Development Programme and GS1 US

30241503	Bail ring	Ring moving up and down the mast attached to the higher end of the canvas and part of a center pole. Its purpose is to lift the fabric to its peak and hold it in place at the top of the pole by means of ropes or cables.	Anneaux de verrou, Abroncsgyűrű, ベイルリング, 베일링, Anillo de soporte, Kabelring
30241504	Base plate	A device used at the base of a column to provide firm footing and sometimes act as a pivot to bring the pole up into position during installation and down when dismantling.	Plaques de pied, Talplemez, ベースプレート, 베이스플레이트, Placa base, Basplatta
30241505	Cupola	A rigid structure on which the rooftop canvas sections of a tent can be laced or attached. It is mainly used for lifting and acts as an anchor point for the tent's roof canvas.	Coupoles, Kupola, キュポラ, 큐폴라, Cúpula, Kupol
30241506	Funicular bell	Element fixed on a guy by a pulley, between the masts and the side poles, which replaces the function of interior quarter poles by supporting the canvas, giving the tent roof a particular shape and more interior space.	Cloches funiculaires, Kötélcsengő, 索状ベル, 푸니쿨라벨, Campana funicular, Repklocka
30241507	Gable	Part of the end wall of a temporary self-standing tents roof structure. It is usually triangular in shape.	Pignons, Oromzat, 切妻, 박공, Aguilón, Gavel
30241508	Gin pole and accessories	A simple hoisting and loading device consisting of block and tackle suspended from near the top of a single pole or multiple poles, termed a mast, held vertically or obliquely (when also a boom) by guys. Its purpose is to change the angle or direction of a cable.	Mâts de charge et accessoires, Csörlőoszlop és tartozékok, ジンポールと付属品, 진폴 및 액세서리, Poste grúa y accesorios, Hjälpmast och tillbehör
30241509	Mast section and king pole	A column or truss, that can be divided into sections, rising vertically in the middle of a tent or on the sides of a center piece structure. Rigged to stand or lift the roof canvas of a tent, it is the highest pole of the tent and main support of the roof canvas.	Sections de mât et poinçon, Árbóc rész és fő oszlop, マストセクションとキングポール, 마스트섹션 및 킹폴, Sección de mástil y poste rey, Mastsektion och huvudstolpe
30241510	Side pole	Pole that supports the perimeter of the tents roof.	Poteaux périphériques, Oldaloszlop, サイドポール, 사이드폴, Poste lateral, (Inga förslag)
30241511	Stake or peg	Pieces of material that are driven into the ground and are part of an anchoring system that holds the guy cables or the anchor plates of a structure.	Pieux ou taquets, Karó ill. cövek, 支柱またはくい, 말뚝 또는 못, Estaca o clavija, Påle eller pinne
30241512	Transom	A horizontal member which is placed on top of upright poles and generally used to make an entrance to a tent.	Traverses, Keresztgerenda, 横材, 트랜섬, Travesaño, Tvärbjälke
30241513	Steel A-frame	Triangular shaped structure composed of square steel tubing with a stirrup welded at the top in which the stringer or support beam sits. Acts as a structural support. In some cases, the stirrup can be mounted on a threaded rod or screw-jack which makes it adjustable.	Structure en A en acier, Acél "A" keret, Aフレーム（架構）, 형스틸프레임, Marco en a de acero, A-ram av stål
30241514	Structural brace	A device (such as a bar or an angle bracket) placed between two other pieces, used as a tie or strut to bear transverse strains and prevent distortion.	Entretoise structurelle, Szerkezeti merevítés, 構造ブレース, 건축용 버팀대, Sujetador estructural, Strukturstag

30241515	Structural alignment tool	In portable structures, non-structural tubing or devices installed between two or more structural parts, used to set and regulate the spacing between those parts.	Outil d'alignement structurel, Szerkezeti beállító (egytengelyűsítő) szerszám, 位置合わせツール, 건축용 정렬장치, Herramienta de alineación estructural, Inpassningsverktyg

Class 30241600 Grandstand bleacher and stair structural components

Definition (if available): Units specific to grandstands and bleachers found in temporary structures, such as seat stringers, footboards, and risers, that are designed either to support loads or to transmit loads to other units of the structure.

Commodity	Commodity Title	Definition	Synonym
30241601	Grandstand footboard and accessories	Floor panels specially built for grandstands which, once set up, become part of the structure.	Garde-pieds et accessoires, Tribün padlódeszka és tartozékok, 観覧席踏み板および付属品, 그랜드스탠드발판 및 액세서리, Tarima y accesorios de la tribuna, Läktargolv och tillbehör
30241602	Stair step	In portable structures such as grandstands, the horizontal surface on which people walk to go up or down stairways.	Marches d'escalier, Lépcsőfok, 階段の段, 계단디딤판, Escalón, Trappsteg
30241603	Stringer	Tiered or stepped metal structures which act as the main support of a grandstand's structure on which one installs the seats, the footboards, etc.	Tirants, Tartógerenda, 階段梁, 계단옆판, Durmiente, Vangstycke
30241604	Stair riser	Vertical structural element covering the space between two steps in a staircase.	Contremarches, Lépcső fellépő, 階段の蹴上げ板, 계단챌면, Elevador de escalones, Sättsteg

Class 30241700 Tent and membrane structure framing and covering components

Definition (if available): Components of tent or membrane structures, such as masts, side poles, struts, or others, that are designed either to support loads or to transmit loads to other parts of the tent or membrane structure. These components are designed to be installed and dismantled repeatedly and to be resistant to weather hazards.

Commodity	Commodity Title	Definition	Synonym
30241701	Framing beam or rail or tubing	Parts of framed tent structures that contribute to the final framing and consolidate the roof, walls, or other parts of the structure. They include purlins and eaves, rafters, ridge poles, side wall rails, uprights, etc.	Tubes, lisses ou poutres de charpente, Keretgerenda ill. sín vagy cső, 枠組梁材または横木または管材料, 조립용 빔레일 또는 튜브, Viga o riel o tubería de marco, Rambjälke eller räcke
30241702	Portable structure canvas section	Section of technical textile that is cut, glued, welded and equipped with ropes, ties, grommets etc. according to an engineering design in order to be assembled onto a tent or membrane structure.	Sections de toile de structures transportables, Hordozható szerkezet vászon rész, 簡易構造物帆布セクション, 이동식구조물 캔버스섹션, Sección de lienzo de estructura portátil, Kanvassektion för bä

Definition (if available) Ingots, strips, billets and coil of various sizes produced from bronze

Commodity	Commodity Title	Definition	Synonym
30262701	Bronze coil	Coil of various sizes produced from bronze	青銅コイル, 청동 코일, Rollo de alambre de bronce,
30262702	Bronze strip	Strip of various sizes produced from bronze	青銅ストリップ, 청동 세편, Banda de bronce,
30262703	Bronze billet	Billet of various sizes produced from bronze	青銅ビレット, 청동 빌레트, Palanquilla de bronce,
30262704	Bronze ingot	Ingot of various sizes produced from bronze	青銅インゴット, 청동 주괴, Lingote de bronce,

Class 30262800 Zinc bars and sheets

Definition (if available) Bars and sheets of various cross sections produced from zinc

Commodity	Commodity Title	Definition	Synonym
30262801	Hot rolled zinc bar	Hot rolled bar of various cross sections produced from zinc	熱間圧延亜鉛棒, 열간압연 아연봉, Barra de zinc enrollada en caliente,
30262802	Hot rolled zinc sheet	Hot rolled sheet of various thicknesses produced from zinc	熱間圧延亜鉛板, 열간압연 아연판, Lámina de zinc enrollada en caliente,

Class 30262900 Zinc ingots strips billets and coil

Definition (if available) Ingots, strips, billets and coil of various sizes produced from zink

Commodity	Commodity Title	Definition	Synonym
30262901	Zinc coil	Coil of various sizes produced from zinc	亜鉛コイル, 아연 코일, Alambre de zinc,
30262902	Zinc strip	Strip of various sizes produced from zink	亜鉛ストリップ, 아연 세편, Banda de zinc,
30262903	Zinc billet	Billet of various sizes produced from zink	亜鉛ビレット, 아연 빌레트, Palanquilla de zinc,
30262904	Zinc ingot	Ingot of various sizes produced from zink	亜鉛インゴット, 아연 주괴, Lingote de zinc,

Class 30263000 Tin bars

Definition (if available) Bars of various cross sections produced from tin

Commodity	Commodity Title	Definition	Synonym
30263001	Tin cold drawn bar	Cold drawn bar of various cross sections produced from tin	冷間引抜錫棒, 냉간인발 주석봉, Barra de estaño estirada en frío,
30263002	Tin hot rolled bar	Hot rolled bar of various cross sections produced from tin	熱間圧延錫棒, 열간압연 주석봉, Barra de estaño enrollada en caliente,

Class 30263100 Tin sheet

Definition (if available) Sheet of various cross sections produced from tin

Commodity	Commodity Title	Definition	Synonym
30263101	Tin hot rolled sheet	Hot rolled sheet of various thicknesses produced from tin	熱間圧延錫板, 열간압연 주석판, Lámina de estaño enrollada en caliente,

© 2016 United Nations Development Programme and GS1 US

30263102	Tin cold rolled sheet	Cold rolled sheet of various thicknesses produced from tin	冷間圧延錫板, 냉간압연 주석판, Lámina de estaño enrollada en frío,

Class 30263200 Tin ingots strip and coil

Definition (if available) Ingots, strips and coil of various sizes produced from tin

Commodity	Commodity Title	Definition	Synonym
30263201	Tin coil	Coil of various sizes produced from tin	錫コイル, 주석 코일, Alambre de estaño,
30263202	Tin strip	Strip of various sizes produced from tin	錫ストリップ, 주석 세편, Banda de estaño,
30263203	Tin ingot	Ingot of various sizes produced from tin	錫インゴット, 주석 주괴, Lingote de estaño,

Class 30263300 Lead bars

Definition (if available) Bars of various cross sections produced from lead

Commodity	Commodity Title	Definition	Synonym
30263301	Lead extruded bar	Extruded bar of various cross sections produced from lead	押出鉛棒, 압출 납봉, Barra de plomo extruido,
30263302	Lead hot rolled bar	Hot rolled bar of various cross sections produced from lead	熱間圧延鉛棒, 열간압연 납봉, Barra de plomo enrollada en caliente,
30263303	Lead cold drawn bar	Cold drawn bar of various cross sections produced from lead	冷間引抜鉛棒, 냉간인발 납봉, Barra de plomo estirada en frío,

Class 30263400 Lead sheets

Definition (if available) Sheets of various cross sections produced from lead

Commodity	Commodity Title	Definition	Synonym
30263401	Lead hot rolled sheet	Hot rolled sheet of various thicknesses produced from lead	熱間圧延鉛板, 열간압연 납판, Lámina de plomo enrollada en caliente,
30263402	Lead cold rolled sheet	Cold rolled sheet of various thicknesses produced from lead	冷間圧延鉛板, 냉간압연 납판, Lámina de plomo enrollada en frío,

Class 30263500 Lead ingots strips billets and coil

Definition (if available) Ingots, strips, billets and coil of various sizes produced from lead

Commodity	Commodity Title	Definition	Synonym
30263501	Lead coil	Coil of various sizes produced from lead	鉛コイル, 납 코일, Alambre de plomo,
30263502	Lead strip	Strip of various sizes produced from lead	鉛ストリップ, 납 세편, Banda de plomo,
30263503	Lead billet	Billet of various sizes produced from lead	鉛ビレット, 납 빌레트, Palanquilla de plomo,
30263504	Lead ingot	Ingot of various sizes produced from lead	鉛インゴット, 납 주괴, Lingote de plomo,

Class 30263600 Carbon steel bars

Definition (if available) Bars of various cross sections produced from various formulations of carbon steel

Commodity	Commodity Title	Definition	Synonym

30263601	Carbon steel SAE 1000 series cold drawn bar	Cold drawn bar of various cross sections produced from SAE 1000 series carbon steels	炭素鋼SAE1000シリーズ冷間引抜棒, 냉간인발 SAE 1000 탄소강봉, Barra de acero al carbón serie sae 1000 estirada en frío,
30263602	Carbon steel SAE 1100 series cold drawn bar	Cold drawn bar of various cross sections produced from SAE 1100 series carbon steels	炭素鋼SAE1000シリーズ冷間引抜棒, 냉간인발 SAE 1100 탄소강봉, Barra de acero al carbón serie sae 1100 estirada en frío,
30263603	Carbon steel SAE 1200 series cold drawn bar	Cold drawn bar of various cross sections produced from SAE 1200 series carbon steels	炭素鋼SAE1200シリーズ冷間引抜棒, 냉간인발 SAE 1200 탄소강봉, Barra de acero al carbón serie sae 1200 estirada en frío,
30263604	Carbon steel SAE 1500 series cold drawn bar	Cold drawn bar of various cross sections produced from SAE 1500 series carbon steels	炭素鋼SAE1500シリーズ冷間引抜棒, 냉간인발 SAE 1500 탄소강봉, Barra de acero al carbón serie sae 1500 estirada en frío,
30263605	Carbon steel SAE 1000 series hot rolled bar	Hot rolled bar of various cross sections produced from SAE 1000 series carbon steels	炭素鋼SAE1000シリーズ熱間圧延棒, 열간압연 SAE 1000 탄소강봉, Barra de acero al carbón serie sae 1000 enrollada en caliente,
30263606	Carbon steel SAE 1100 series hot rolled bar	Hot rolled bar of various cross sections produced from SAE 1100 series carbon steels	炭素鋼SAE1100シリーズ熱間圧延棒, 열간압연 SAE 1100 탄소강봉, Barra de acero al carbón serie sae 1100 enrollada en caliente,
30263607	Carbon steel SAE 1200 series hot rolled bar	Hot rolled bar of various cross sections produced from SAE 1200 series carbon steels	炭素鋼SAE1200シリーズ熱間圧延棒, 열간압연 SAE 1200 탄소강봉, Barra de acero al carbón serie sae 1200 enrollada en caliente,
30263608	Carbon steel SAE 1500 series hot rolled bar	Hot rolled bar of various cross sections produced from SAE 1500 series carbon steels	炭素鋼SAE1500シリーズ熱間圧延棒, 열간압연 SAE 1500 탄소강봉, Barra de acero al carbón serie sae 1500 enrollada en caliente,

Class 30263700 Steel alloy bars

Definition (if available) Bars of various cross sections produced from various formulations of steel alloy

Commodity	Commodity Title	Definition	Synonym
30263701	Steel alloy SAE 4000 series cold drawn bar	Cold drawn bar of various cross sections produced from SAE 4000 steel alloy	合金SAE4000シリーズ冷間引抜棒, 냉간인발 SAE 4000 합금강봉, Barra de aleación de acero serie sae 4000 estirada en frío,

© 2016 United Nations Development Programme and GS1 US

30263702	Steel alloy SAE 5000 series cold drawn bar	Cold drawn bar of various cross sections produced from SAE 5000 steel alloy	合金SAE5000シリーズ冷間引抜棒, 냉간인발 SAE 5000 합금강봉, Barra de aleación de acero serie sae 5000 estirada en frío,
30263703	Steel alloy SAE 6000 series cold drawn bar	Cold drawn bar of various cross sections produced from SAE 6000 steel alloy	合金SAE6000シリーズ冷間引抜棒, 냉간인발 SAE 6000 합금강봉, Barra de aleación de acero serie sae 6000 estirada en frío,
30263704	Steel alloy SAE 8000 series cold drawn bar	Cold drawn bar of various cross sections produced from SAE 8000 steel alloy	合金SAE8000シリーズ冷間引抜棒, 냉간인발 SAE 8000 합금강봉, Barra de aleación de acero serie sae 8000 estirada en frío,
30263705	Steel alloy SAE 9000 series cold drawn bar	Cold drawn bar of various cross sections produced from SAE 9000 steel alloy	合金SAE9000シリーズ冷間引抜棒, 냉간인발 SAE 9000 합금강봉, Barra de aleación de acero serie sae 9000 estirada en frío,
30263706	Steel alloy SAE 4000 series hot rolled bar	Hot rolled bar of various cross sections produced from SAE 4000 steel alloy	合金SAE4000シリーズ熱間圧延棒, 열간압연 SAE 4000 합금강봉, Barra de aleación de acero serie sae 4000 enrollada en caliente,
30263707	Steel alloy SAE 5000 series hot rolled bar	Hot rolled bar of various cross sections produced from SAE 5000 steel alloy	合金SAE5000シリーズ熱間圧延棒, 열간압연 SAE 5000 합금강봉, Barra de aleación de acero serie sae 5000 enrollada en caliente,
30263708	Steel alloy SAE 6000 series hot rolled bar	Hot rolled bar of various cross sections produced from SAE 6000 steel alloy	合金SAE6000シリーズ熱間圧延棒, 열간압연 SAE 6000 합금강봉, Barra de aleación de acero serie sae 6000 enrollada en caliente,
30263709	Steel alloy SAE 8000 series hot rolled bar	Hot rolled bar of various cross sections produced from SAE 8000 steel alloy	合金SAE8000シリーズ熱間圧延棒, 열간압연 SAE 8000 합금강봉, Barra de aleación de acero serie sae 8000 enrollada en caliente,
30263710	Steel alloy SAE 9000 series hot rolled bar	Hot rolled bar of various cross sections produced from SAE 9000 steel alloy	合金SAE9000シリーズ熱間圧延棒, 열간압연 SAE 9000 합금강봉, Barra de aleación de acero serie sae 9000 enrollada en caliente,

Class 30263800 Tool steel bars

Definition (if available) Bars of various cross sections produced from various formulations of tool steel

Commodity	Commodity Title	Definition	Synonym
30263801	Tool steel cold drawn bar	Cold drawn bar of various cross sections produced from a variety of tool steels	工具鋼冷間引抜棒, 냉간인발 공구강봉, Barra de acero de herramienta estirada en frío,

© 2016 United Nations Development Programme and GS1 US

30263802	Tool steel hot rolled bar	Hot rolled bar of various cross sections produced from a variety of tool steels	工具鋼熱間圧延棒, 열간압연 공구강봉, Barra de acero de herramienta enrollada en caliente,

Class 30263900 Specialty steel bars

Definition (if available) Bars of various cross sections produced from various formulations of specialized Steel alloy SAEs

Commodity	Commodity Title	Definition	Synonym
30263901	High strength low alloy HSLA steel hot rolled bar	Hot rolled bar of various cross sections produced from various Steel alloy SAEs classed as high strength low alloy HSLA	高張力鋼HSLA熱間圧延棒, 열간압연 HSLA강봉, Barra de acero de alta resistencia baja aleación hsla enrollada en caliente,

Class 30264000 Carbon steel sheets

Definition (if available) Sheets of various cross sections produced from various formulations of carbon steel

Commodity	Commodity Title	Definition	Synonym
30264001	Carbon steel SAE 1000 series hot rolled sheet	Hot rolled sheet of various thicknesses produced from SAE 1000 series carbon steels	炭素鋼SAE1000シリーズ熱間圧延板, 열간압연 SAE 1000 탄소강판, Lámina de acero al carbón serie sae 1000 enrollada en caliente,
30264002	Carbon steel SAE 1100 series hot rolled sheet	Hot rolled sheet of various thicknesses produced from SAE 1100 carbon steels	炭素鋼SAE1100シリーズ熱間圧延板, 열간압연 SAE 1100 탄소강판, Lámina de acero al carbón serie sae 1100 enrollada en caliente,
30264003	Carbon steel SAE 1200 series hot rolled sheet	Hot rolled sheet of various thicknesses produced from SAE 1200 carbon steels	炭素鋼SAE1200シリーズ熱間圧延板, 열간압연 SAE 1200 탄소강판, Lámina de acero al carbón serie sae 1200 enrollada en caliente,
30264004	Carbon steel SAE 1500 series hot rolled sheet	Hot rolled sheet of various thicknesses produced from SAE 1500 carbon steels	炭素鋼SAE1500シリーズ熱間圧延板, 열간압연 SAE 1500 탄소강판, Lámina de acero al carbón serie sae 1500 enrollada en caliente,
30264005	Carbon steel SAE 1000 series electro galvanized hot rolled sheet	Hot rolled sheet of various thicknesses produced from SAE 1000 series carbon steels and to which zinc coating is applied via an electroplating process	炭素鋼SAE1000シリーズ熱間板引抜棒, 전기아연도금 열간압연 SAE 1000 탄소강판, Lámina de acero al carbón electro galvanizada serie sae 1000 enrollada en caliente,
30264006	Carbon steel SAE 1100 series electro galvanized hot rolled sheet	Hot rolled sheet of various thicknesses produced from SAE 1100 carbon steels and to which zinc coating is applied via an electroplating process	炭素鋼SAE1100シリーズ電気亜鉛メッキ熱間圧延板, 전기아연도금 열간압연 SAE 1100 탄소강판, Lámina de acero al carbón electro galvanizada serie sae 1100 enrollada en caliente,

Class 30264100 Steel alloy sheets

Definition (if available) Sheets of various cross sections produced from various formulations of steel alloy

Commodity	Commodity Title	Definition	Synonym
30264101	Steel alloy SAE 4000 series hot rolled sheet	Hot rolled sheet of various thicknesses produced from SAE 4000 steel alloy	合金SAE4000シリーズ熱間圧延, 열간압연 SAE 4000 합금강판, Lámina de aleación de acero al carbón serie sae 4000 enrollada en caliente,
30264102	Steel alloy SAE 5000 series hot rolled sheet	Hot rolled sheet of various thicknesses produced from SAE 5000 steel alloy	合金SAE5000シリーズ熱間圧延, 열간압연 SAE 5000 합금강판, Lámina de aleación de acero al carbón serie sae 5000 enrollada en caliente,
30264103	Steel alloy SAE 6000 series hot rolled sheet	Hot rolled sheet of various thicknesses produced from SAE 6000 steel alloys	合金SAE6000シリーズ熱間圧延, 열간압연 SAE 6000 합금강판, Lámina de aleación de acero al carbón serie sae 6000 enrollada en caliente,
30264104	Steel alloy SAE 8000 series hot rolled sheet	Hot rolled sheet of various thicknesses produced from SAE 8000 steel alloys	合金SAE8000シリーズ熱間圧延, 열간압연 SAE 8000 합금강판, Lámina de aleación de acero al carbón serie sae 8000 enrollada en caliente,
30264105	Steel alloy SAE 9000 series hot rolled sheet	Hot rolled sheet of various thicknesses produced from SAE 9000 steel alloys	合金SAE9000シリーズ熱間圧延, 열간압연 SAE 9000 합금강판, Lámina de aleación de acero al carbón serie sae 9000 enrollada en caliente,
30264106	Steel alloy SAE 4000 series cold rolled sheet	Cold rolled sheet of various thicknesses produced from SAE 4000 steel alloys	合金SAE4000シリーズ冷間圧延板, 냉간압연 SAE 4000 합금강판, Lámina de aleación de acero al carbón serie sae 4000 enrollada en frío,
30264107	Steel alloy SAE 5000 series cold rolled sheet	Cold rolled sheet of various thicknesses produced from SAE 5000 steel alloys	合金SAE5000シリーズ冷間圧延板, 냉간압연 SAE 5000 합금강판, Lámina de aleación de acero al carbón serie sae 5000 enrollada en frío,

Class 30264200 Specialty steel sheets

Definition (if available) Sheets of various cross sections produced from various formulations of specialized steel alloys

Commodity	Commodity Title	Definition	Synonym
30264201	High strength low alloy HSLA steel hot rolled sheet	Hot rolled sheet of various thicknesses produced from various steel alloys classed as high strength low alloy HSLA	高張力鋼HSLA熱間圧延板, 열간압연 HSLA강판, Lámina de acero de alta resistencia baja aleación hsla enrollada en caliente,
30264202	High strength low alloy HSLA cold rolled sheet	Cold rolled sheet of various thicknesses produced from various steel alloys classed as high strength low alloy HSLA	高張力鋼HSLA冷間圧延板, 냉간압연 HSLA강판, Lámina de acero de alta resistencia baja aleación hsla enrollada en frío,
30264203	Aluminized steel sheet	Sheet of various thicknesses produced from aluminized steel	アルミ鋼板, 알루미늄도금강판, Lámina de acero aluminizado,
30264204	Corrugated steel sheet	Sheet of various thicknesses produced from corrugated steel	スチール波板, 파형강판, Lámina de acero corrugada,

Class 30264300 Specialty steel coils

Definition (if available) Coil of various cross sections produced from specialized processed steel

Commodity	Commodity Title	Definition	Synonym
30264301	Perforated steel coil	Coil of various cross sections produced from perforated steel	有孔鋼コイル, 유공강 코일, Alambre de acero perforado,
30264302	Embossed steel coil	Coil of various cross sections produced from embossed steel	エンボス鋼コイル, 엠보스강 코일, Alambre de acero embebido,
30264303	Aluminized steel coil	Coil of various cross sections produced from aluminized steel	アルミめっき鋼コイル, 알루미늄도금강 코일, Alambre de acero aluminizado,
30264304	Hot dip galvanized steel coil	Coil of various cross sections produced from hot dipped galvanized steel	溶融亜鉛メッキ鋼コイル, 용융아연도금 철강 코일, Alambre de acero inmersión en caliente galvanizado,

© 2016 United Nations Development Programme and GS1 US

30264305	Electro galvanized steel coil	Coil of various cross sections produced from electro galvanized steel	電気亜鉛メッキ鋼コイル, 전기아연도금 철강 코일, Alambre de acero electro galvanizado,

Class 30264400 Carbon steel ingots strips billets and coil

Definition (if available) Ingots, strips, billets and coil of various sizes produced from lead

Commodity	Commodity Title	Definition	Synonym
30264401	Carbon steel SAE 1100 series hot rolled coil	Coil of various sizes produced from SAE 1100 hot rolled carbon steel	炭素鋼SAE1100シリーズ熱間圧延コイル, 열간압연 SAE 1100 탄소강 코일, Alambre de acero al carbón serie sae 1100 enrollada en caliente,
30264402	Carbon steel SAE 1200 series hot rolled coil	Coil of various sizes produced from SAE 1200 hot rolled carbon steel	炭素鋼SAE1200シリーズ熱間圧延コイル, 열간압연 SAE 1200 탄소강 코일, Alambre de acero al carbón serie sae 1200 enrollada en caliente,
30264403	Carbon steel SAE 1500 series hot rolled coil	Coil of various sizes produced from SAE 1500 hot rolled carbon steel	炭素鋼SAE1500シリーズ熱間圧延コイル, 열간압연 SAE 1500 탄소강 코일, Alambre de acero al carbón serie sae 1500 enrollada en caliente,
30264404	Carbon steel SAE 1100 series cold rolled strip	Strip of various sizes produced from SAE 1100 cold rolled carbon steel	炭素鋼SAE1100シリーズ冷間圧延ストリップ, 냉간압연 SAE 1100 탄소강 세편, Banda de acero al carbón serie sae 1100 enrollada en frío,

Class 30265200 Aluminum strips and ingots

Definition (if available) Strips and ingots of various cross sections produced from aluminum

Commodity	Commodity Title	Definition	Synonym

© 2016 United Nations Development Programme and GS1 US

30265201	Aluminum strip	Strip of various cross sections produced from aluminum	アルミニウムストリップ, 알루미늄 세편, Banda de aluminio,
30265202	Aluminum ingot	Ingot of various cross sections produced from aluminum	アルミニウムインゴット, 알루미늄 주괴, Lingote de aluminio,

Class 30265300 Iron bars

Definition (if available) Bars of various cross sections produced from various types of iron

Commodity	Commodity Title	Definition	Synonym
30265301	Ductile iron cast bar	Bar of various cross sections cast from iron and nodular graphite alloys	ダクタイル鉄鋳造棒, 덕타일 주철봉, Barra fundida de hierro dúctil,
30265302	Gray iron cast bar	Bar of various cross sections cast from iron alloys containing graphite microstructure	ねずみ鋳鉄鋳造棒, 회주철봉, Barra fundida de hierro gris,
30265303	White iron cast bar	Bar of various cross sections cast from iron containing cementite carbon	白鋳鉄鋳造棒, 백주철봉, Barra fundida de hierro blanco,
30265304	Malleable iron cast bar	Bar of various cross sections cast from iron containing cementite carbon and annealed	可鍛鉄鋳造棒, 가단주철봉, Barra fundida de hierro maleable,

Class 30265400 Iron sheets

Definition (if available) Sheets of various cross sections produced from various types of iron

Commodity	Commodity Title	Definition	Synonym
30265401	Ductile iron hot rolled sheet	Hot rolled sheet of various thicknesses produced from iron and nodular graphite alloys	ダクタイル鉄熱間圧延板, 열간압연 덕타일 주철판, Lámina de hierro dúctil enrollada en caliente,
30265402	Gray iron hot rolled sheet	Hot rolled sheet of various thicknesses produced from iron alloys containing graphite microstructure	ねずみ鋳鉄熱間圧延板, 열간압연 회주철판, Lámina de hierro gris enrollada en caliente,
30265403	White iron hot rolled sheet	Hot rolled sheet of various thicknesses produced from iron cementite carbon	白鋳鉄熱間圧延板, 열간압연 백주철판, Lámina de hierro blanco enrollada en caliente,
30265404	Malleable iron hot rolled sheet	Hot rolled sheet of various thicknesses produced from iron containing cementite carbon and annealed	可鍛鉄熱間圧延板, 열간압연 가단주철판, Lámina de hierro maleable enrollada en caliente,

Class 30265500 Iron ingots strips billets and coil

Definition (if available) Ingots, strips, billets and coil of various cross sections produced from various types of iron

Commodity	Commodity Title	Definition	Synonym
30265501	Ductile iron coil	Coil of various cross sections produced from ductile iron	ダクタイル鉄コイル　, 덕타일 주철 코일, Alambre de hierro dúctil,
30265502	Ductile iron strip	Strip of various cross sections produced from ductile iron	ダクタイル鉄ストリップ, 덕타일 주철 세편, Banda de hierro dúctil,

30265504	Gray iron billet	Billet of various cross sections produced from gray iron	ねずみ鋳鉄ビレット, 회주철 빌레트, Palanquilla de hierro gris,
30265505	White iron billet	Billet of various cross sections produced from white iron	白鋳鉄ビレット, 백주철 빌레트, Palanquilla de hierro blanco,
30265506	Malleable iron billet	Billet of various cross sections produced from maleable iron	可鍛鉄ビレット, 가단주철 빌레트, Palanquilla de hierro maleable,

Class 30265600 Ferrous alloy bars and sheets

Definition (if available) Bars and sheets of various cross sections produced from ferrous alloy

Commodity	Commodity Title	Definition	Synonym
30265601	Ferrous alloy bar	Bar of various cross sections produced from ferrous alloy	鉄合金棒, 철합금봉, Barra de aleación ferrosa,
30265602	Ferrous alloy sheet	Sheet of various cross sections produced from ferrous alloy	鉄合金板, 철합금판, Lámina de aleación ferrosa,

Class 30265700 Ferrous alloy ingots strips billets and coil

Definition (if available) Ingots, strips, billets and coil of various cross sections produced from ferrous alloy

Commodity	Commodity Title	Definition	Synonym
30265701	Ferrous alloy coil	Coil of various cross sections produced from ferrous alloy	鉄合金コイル, 철합금 코일, Alambre de aleación ferrosa,
30265702	Ferrous alloy strip	Strip of various cross sections produced from ferrous alloy	鉄合金ストリップ, 철합금 세편, Banda de aleación ferrosa,
30265703	Ferrous alloy billet	Billet of various cross sections produced from ferrous alloy	鉄合金ビレット, 철합금 빌레트, Palanquilla de aleación ferrosa,
30265704	Ferrous alloy extrusion ingot	Ingot of various cross sections produced from ferrous alloy	鉄合金押出し成形インゴット, 철합금 압출 주괴, Lingote de extrusión de aleación ferrosa,

Class 30265800 Plastic bars and sheets

Definition (if available) Bars and sheets of various cross sections produced from various types of plastic

Commodity	Commodity Title	Definition	Synonym
30265801	Plastic bar	Bar of various cross sections produced from various types of plastic	プラスチック棒, 플라스틱봉, Barra de plástico,
30265802	Plastic sheet	Sheet of various cross sections produced from plastic	プラスチック板, 플라스틱판, Lámina de plástico,
30265803	Corrugated plastic sheet	Sheet of various cross sections produced from corrugated plastic	プラスチック波板, 주름진 플라스틱판, Lámina corrugada de plástico,

Class 30265900 Plastic coil and strips

Definition (if available) Coil and strips of various cross sections produced from various types of plastic

Commodity	Commodity Title	Definition	Synonym
30265901	Plastic coil	Coil of various cross sections produced from plastic	プラスチックコイル, 플라스틱 코일, Alambre de plástico,
30265902	Plastic strip	Strip of various cross sections produced from plastic	プラスチックストリップ, 플라스틱 세편, Banda de plástico,

Class 30266000 Precious metal and specialty metal bars

Definition (if available) Bars of various cross sections produced from various types of precious or specialty metals

Commodity	Commodity Title	Definition	Synonym
30266001	Precious metal bar	Bar of various cross sections produced from various types of precious metals	貴金属棒, 귀금속봉, Barra de metal precioso,
30266002	Non ferrous alloy bar	Bar of various cross sections produced from various types of non-ferrous alloys	非鉄合金棒, 비철합금봉, Barra de aleación no ferrosa,

Class 30266100 Precious metal and specialty metal sheets

Definition (if available) Sheets of various cross sections produced from various types of precious or specialty metals

Commodity	Commodity Title	Definition	Synonym
30266101	Beryllium alloy sheet	Sheet of various cross sections produced from berillyium alloy	ベリリウム合金板, 베릴륨 합금판, Lámina de aleación de berilio,
30266102	Composite metal sheet	Sheet of various cross sections produced fromr composite metal	複合金属板, 복합금속판, Lámina de metal compuesto,
30266103	Non ferrous alloy sheet	Sheet of various cross sections produced from various types of non-ferrous alloys	非鉄合金板, 비철합금판, Lámina de aleación de no ferrosa,

Class 30266200 Precious metal and specialty metal coil strips billets and ingots

Definition (if available) Ingots, strips, billets and coil of various cross sections produced from various types of precious or specialty metals

Commodity	Commodity Title	Definition	Synonym
30266201	Graphite coil	Coil made from graphite	石墨コイル, 흑연 코일, Alambre de grafito,
30266202	Non ferrous alloy coil	Coil made from non ferrous alloy	非鉄合金コイル, 비철합금 코일, Alambre de aleación no ferrosa,
30266203	Precious metal coil	Coil made from precious metal	貴金属コイル, 귀금속 코일, Alambre de metal precioso,
30266204	Non ferrous alloy strip	Strip made from non ferrous alloy	非鉄合金ストリップ, 비철합금 세편, Banda de aleación no ferrosa,
30266205	Non ferrous alloy billet	Billet made from non ferrous alloy	非鉄合金ビレット, 비철합금 빌레트, Palanquilla de aleación no ferrosa,
30266206	Precious metal billet	Billet made from precious metal	貴金属ビレット, 귀금속 빌레트, Palanquilla de metal precioso,
30266207	Precious metal ingot	Ingot made from precious metal	貴金属インゴット, 귀금속 주괴, Lingote de metal precioso,
30266208	Antimony ingot	Ingot made from antimony	アンチモンインゴット, 안티모니 주괴, Lingote de antimonio,
30266209	Cadmium ingot	Ingot made from cadmium	カドミウムインゴット, 카드뮴 주괴, Lingote de cadmio,
30266210	Zirconium ingot	Ingot made from zirconium	ジルコニウムインゴット, 지르코늄 주괴, Lingote de circonio,
30266211	Cobalt ingot	Ingot made from cobalt	コバルトインゴット, 코발트 주괴, Lingote de cobalto,

30266212	Molybdenum ingot	Ingot made from molybdenum	モリブデンインゴット, 몰리브덴 주괴, Lingote de molibdeno,
30266213	Arsenic ingot	Ingot made from arsenic	ヒ素インゴット, 비소 주괴, lingote de arsénico,
30266214	Bismuth ingot	Ingot made from bismuth	ビスマスインゴット, 비스무트 주괴, Lingote de bismuto,
30266215	Indium ingot	Ingot made from indium	インジウムインゴット, 인듐 주괴, Lingote de indio,
30266216	Non ferrous alloy extrusion ingot	Ingot made from extruded non ferrous alloy	非鉄合金押し出し成形インゴット, 비철합금 압출 주괴, Lingote de extrusión de aleación no ferrosa,

Class 30266300 Wood structural materials

Definition (if available) Structural materials of various types made of wood

Commodity	Commodity Title	Definition	Synonym
30266301	Wooden bar	Bar of various cross sections produced from wood	木製棒, 목재봉, Barra de madera,

Class 30266400 Specialty material bars and sheets

Definition (if available) Bars and sheets of various cross sections produced from specialty materials

Commodity	Commodity Title	Definition	Synonym
30266401	Rubber bar	Bar of various cross sections produced from rubber	ゴム製棒, 고무봉, Barra de caucho,
30266402	Rubber sheet	Sheet of various cross sections produced from rubber	ゴム板, 고무판, Lámina de caucho,
30266403	Foam rubber sheet	Sheet of various cross sections produced from foam rubber	気泡ゴム板, 발포고무판, Lámina de caucho espuma,
30266404	Cork and rubber sheet	Sheet of various cross sections produced from cork and rubber	コルト、ゴム板, 코르크와 고무판, Lámina de caucho y corcho,
30266405	Compressed fiber sheet	Sheet of various cross sections produced from compressed fiber	圧縮繊維板, 압축섬유판, Lámina de fibra comprimida,
30266406	Metal inserted compressed fiber sheet	Sheet of various cross sections produced from metal inserted compressed fiber	金属差込圧縮繊維板, 금속 인서트 압축섬유판, Lámina de fibra comprimida con metal insertado,
30266407	Fiber and rubber sheet	Sheet of various cross sections produced from fiber and rubber	繊維、ゴム板, 섬유와 고무 판, Lámina de fibra y caucho,
30266408	Asbestos sheet	Sheet of various cross sections produced from asbestos	アスベスト板, 석면판, Lámina de asbesto,
30266410	Tantalum bar	A rod made of Tantalum or Ta.	タンタルバー, 탄탈륨봉, Barra de tántalo,

Class 30266500 Specialty material coil strips billets and ingots

Definition (if available) Coil, strips, billets and ingots of various cross sections produced from specialty materials

Commodity	Commodity Title	Definition	Synonym
30266501	Rubber strip	Strip of various cross sections produced from rubber	ゴムストリップ, 고무 세편, Banda de caucho,
30266502	Compressed fiber coil	Coil of various cross sections produced from compressed fiber	圧縮繊維コイル, 압축섬유 코일, Alambre de fibra comprimida,

30266503	Fiber and rubber coil	Coil of various cross sections produced from fiber and rubber	繊維およびゴムコイル, 섬유와 고무 코일, Alambre de fibra y caucho,
30266504	Tantalum strip	A strip made of Tantalum or Ta and wound in the form of coil.	タンタルストリップ, 탄탈륨 세편, Banda de tántalo,

Class 30266600 Nickel sheets and ingots

Definition (if available) Sheets and ingots of various cross sections produced from nickel

Commodity	Commodity Title	Definition	Synonym
30266601	Nickel sheet	Sheet of various cross sections produced from nickel	ニッケル板, 니켈판, Lámina de níquel,
30266602	Nickel ingot	Ingot of various cross sections produced from nickel	ニッケルインゴット, 니켈 주괴, Lingote de níquel,

Class 30266700 Shafting

Definition (if available) Cylindrical stock used for the making of shafts

Commodity	Commodity Title	Definition	Synonym
30266701	Steel shafting	Cylindrical stock made of steel used for the making of shafts	スチール軸材, 철강축재, Transmisión de acero,
30266702	Stainless steel shafting	Cylindrical stock made of stainless steel used for the making of shafts	ステンレス軸材, 스테인리스축재, Transmisión de acero inoxidable,

Segment 31000000 Manufacturing Components and Supplies

Family 31100000 Castings and casting assemblies

Class 31101600 Sand castings and casting assemblies

Definition (if available) Objects and assemblies formed to or near their desired shape by introducing molten metal into sand molds.

Commodity	Commodity Title	Definition	Synonym
31101601	Non ferrous alloy sand casting	Non ferrous alloy object cast from sand molds	有色合金砂型铸件, 有色合金砂型鑄件, Non ferrous alloy sand castings, Pièces moulées en sable alliage non ferreux, Sandgussteile aus Nichteisenlegierung, Színesfém ötvözet homoköntvények, Getti in forme di sabbia non di ferrolega, 非鉄合金砂型鋳物, 비철합금사형주조주물, Sandstøpninger av legeringer uten jern, Peças fundidas em molde de areia de liga não ferrosa, Fundición en arena de aleación no ferrosa, Sandgjutet gods av icke-järnlegeringar

© 2016 United Nations Development Programme and GS1 US

31101602	Ferrous alloy sand casting	Ferrous alloy object cast from sand molds	铁合金砂型铸件, 鐵合金砂型鑄件, Ferrous alloy sand castings, Pièces moulées en sable alliage ferreux, Sandgussteile aus Eisenlegierung, Vasötvözet homoköntvények, Getti in forme di sabbia di ferrolega, 鉄合金砂型鋳物, 철합금사형주조주물, Sandstøpninger av jernlegeringer, Peças fundidas em molde de areia de liga ferrosa, Fundición en arena de aleación ferrosa, Sandgjutet gods av järnlegeringar
31101603	Steel sand casting	Steel object cast from sand molds	砂型铸造钢, 砂型鑄造鋼, Steel sand castings, Stalen zand gietstukken, Pièces coulées au sable en acier, Sandgußteile aus Stahl, Acél homoköntvények, Getti in forme di sabbia di acciaio, スチール砂型鋳物, 스틸샌드캐스팅, Sandstøpninger av stål, Peças fundidas em molde de areia de aço, Fundición en arena de acero, Sandgjutet gods av stål
31101604	Stainless steel sand casting	Stainless steel object cast from sand molds	不锈钢砂型铸件, 不銹鋼砂型鑄件, Stainless steel sand castings, Roestvrij stalen zand gietstukken, Pièces coulées au sable en acier inoxydable, Sandgußteile aus Edelstahl, Rozsdamentes acél homoköntvények, Getti in forme di sabbia di acciaio inossidabile, ステンレス砂型鋳物, 스테인리스강사형주조주물, Sandstøpninger av rustfritt stål, Peças fundidas em molde de areia de aço inoxidável, Fundición en arena de acero inoxidable, Sandgjutet gods av rostfritt stål

31101606	Aluminum sand casting	Aluminum object cast from sand molds	铝砂型铸件, 鋁砂型鑄件, Aluminum sand castings, Aluminium zand gietstukken, Pièces coulées au sable en aluminium, Sandgußteile aus Aluminium, Alumínium homoköntvények, Getti in forme di sabbia di alluminio, アルミニウム砂型鋳物, 알루미늄사형주조주물, Sandstøpninger av aluminium, Peças fundidas em molde de areia de alumínio, Fundición en arena de aluminio, Sandgjutet gods av aluminium
31101607	Magnesium sand casting	Magnesium object cast from sand molds	镁砂型铸件, 鎂砂型鑄件, Magnesium sand castings, Magnesium zand gietstukken, Pièces coulées au sable en magnésium, Sandgußteile aus Magnesium, Magnézium homoköntvények, Getti in forme di sabbia di magnesio, マグネシウム砂型鋳物, 마그네슘사형주조주물, Sandstøpninger av magnesium, Peças fundidas em molde de areia de magnésio, Fundición en arena de magnesio, Sandgjutet gods av magnesium
31101608	Titanium sand casting	Titanium object cast from sand molds	钛砂型铸件, 鈦砂型鑄件, Titanium sand castings, Titanium zand gietstukken, Pièces coulées au sable en titanium, Sandgußteile aus Titan, Titán homoköntvények, Getti in forme di sabbia titanio, チタニウム砂型鋳物, 티타늄사형주조주물, Sandstøpninger av titan, Peças fundidas em molde de areia de titânio, Fundición en arena de titanio, Sandgjutet gods av titan

© 2016 United Nations Development Programme and GS1 US

31101609	Beryllium sand casting	Beryllium object cast from sand molds	铍砂型铸件, 鈹砂型鑄件, Beryllium sand castings, Beryllium zand gietstukken, Pièces coulées au sable en béryllium, Sandgußteile aus Beryllium, Berrilium homoköntvények, Getti in forme di sabbia di berillio, ベリリウム砂型鋳物, 베릴륨사형주조주물, Sandstøpninger av beryllium, Peças fundidas em molde de areia de berílio, Fundición en arena de berilio, Sandgjutet gods av beryllium
31101610	Copper sand casting	Copper object cast from sand molds	铜砂型铸件, 銅砂型鑄件, Copper sand castings, Koperen zand gietstukken, Pièces coulées au sable en cuivre, Sandgußteile aus Kupfer, Réz homoköntvények, Getti in forme di sabbia di rame, 銅砂型鋳物, 구리사형주조주물, Sandstøpninger av kobber, Peças fundidas em molde de areia de cobre, Fundición en arena de cobre, Sandgjutet gods av koppar
31101611	Brass sand casting	Brass object cast from sand molds	黄铜砂型铸件, 黃銅砂型鑄件, Brass sand castings, Geelkoperen zand gietstukken, Pièces coulées au sable en laiton, Sandgußteile aus Messing, Sárgaréz homoköntvények, Getti in forme di sabbia di ottone, 真鍮砂型鋳物, 황동사형주조주물, Sandstøpninger av messing, Peças fundidas em molde de areia de latão, Fundición en arena de latón, Sandgjutet gods av mässing

© 2016 United Nations Development Programme and GS1 US

31101612	Bronze sand casting	Bronze object cast from sand molds	青铜砂型铸件, 青銅砂型鑄件, Bronze sand castings, Bronzen zand gietstukken, Pièces coulées au sable en bronze, Sandgußteile aus Bronze, Bronz homoköntvények, Getti in forme di sabbia di bronzo, 青銅砂型鋳物, 청동사형주조주물, Sandstøpninger av bronse, Peças fundidas em molde de areia de bronze, Fundición en arena de bronce, Sandgjutet gods av brons
31101613	Zinc sand casting	Zinc object cast from sand molds	锌砂型铸件, 鋅砂型鑄件, Zinc sand castings, Zink zand gietstukken, Pièces coulées au sable en zinc, Sandgußteile aus Zink, Cink homoköntvények, Getti in forme di sabbia di zinco, 亜鉛砂型鋳物, 아연사형주조주물, Sandstøpninger av sink, Peças fundidas em molde de areia de zinco, Fundición en arena de zinc, Sandgjutet gods av zink
31101614	Tin sand casting	Tin object cast from sand molds	锡砂型铸件, 錫砂型鑄件, Tin sand castings, Tinnen zand gietstukken, Pièces coulées au sable en étain, Sandgußteile aus Zinn, Ón homoköntvények, Getti in forme di sabbia di stagno, スズ砂型鋳物, 주석사형주조주물, Sandstøpninger av tinn, Peças fundidas em molde de areia de estanho, Fundición en arena de estaño, Sandgjutet gods av tenn
31101615	Lead sand casting	Lead object cast from sand molds	铅砂型铸件, 鉛砂型鑄件, Lead sand castings, Loden zand gietstukken, Pièces coulées au sable en plomb, Sandgußteile aus Blei, Ólom homoköntvények, Getti in forme di sabbia di piombo, 鉛砂型鋳物, 납사형주조주물, Sandstøpninger av bly, Peças fundidas em molde de areia de chumbo, Fundición en arena de plomo, Sandgjutet gods av bly

31101616	Precious metal sand casting	Precious metal object cast from sand molds	贵金属砂型铸件, 貴金屬砂型鑄件, Precious metal sand castings, Zand gietstukken van edelmetaal, Pièces coulées au sable en métal précieux, Sandgußteile aus Edelmetall, Drágafém homoköntvények, Getti in forme di sabbia di metallo prezioso, 貴金属砂型鋳物, 귀금속사형주조주물, Sandstøpninger av edelmetall, Peças fundidas em molde de areia de metal precioso, Fundición en arena de metal precioso, Sandgjutet gods av ädelmetaller
31101617	Grey iron sand casting	Grey iron object cast from sand molds	ねずみ鋳鉄砂型鋳物, 주철사형주물, Fundición en arena de hierro gris,
31101618	Ductile iron sand casting	Ductile iron object cast from sand molds	ダクタイル鉄砂型鋳物, 연철사형주물, Fundición en arena de hierro dúctil,
31101619	Malleable iron sand casting	Malleable iron object cast from sand molds	可鍛鉄砂型鋳物, 가단철사형주물, Fundición en arena de hierro maleable,

Class 31101700 Permanent mold castings and casting assemblies

Definition (if available) Objects and assemblies formed to or near their desired shape by introducing molten metal into permanent molds.

Commodity	Commodity Title	Definition	Synonym
31101701	Non ferrous alloy permanent mold casting	Non ferrous alloy object cast from permanent molds	有色合金硬模铸件, 有色合金硬模鑄件, Non ferrous alloy permanent mold castings, Coulées en moule permanent alliage non ferreux, Dauerformgussteile aus Nichteisenlegierung, Színesfém ötvözet állandó formájú öntvények, Colate in forme permanenti non di ferrolega, 非鉄合金永久鋳型鋳物, 비철합금영구주형 주물, Kokillestøp av legeringer uten jern, Peças fundidas em molde permanente de liga não ferrosa, Objetos de aleación no ferrosa fundidos en molde fijo, Gods av icke-järnlegeringar gjutet i permanenta formar

Class 31102600 High pressure die castings and casting assemblies

Definition (if available): Objects and assemblies formed to or near their desired shape by introducing molten metal into high pressure dies

Commodity	Commodity Title	Definition	Synonym
31102601	Aluminum high pressure die casting	High pressure die casting made of aluminum	アルミニウム高圧ダイ鋳物, 알루미늄 고압 압력주물, Objetos de aluminio de alta presión fundidos en molde fijo,
31102602	Zinc high pressure die casting	High pressure die casting made of zinc	亜鉛高圧ダイ鋳物, 아연 고압 압력주물, Objetos de aluminio de alta presión moldeados con troquel,
31102603	Magnesium high pressure die casting	High pressure die casting made of magnesium	マグネシウム高圧ダイ鋳物, 마그네슘 고압 압력주물, Objetos de zinc de alta presión moldeados con troquel,

Class 31102700 Squeeze castings and casting assemblies

Definition (if available): Objects and assemblies formed to or near their desired shape by introducing molten metal into squeeze molds

Commodity	Commodity Title	Definition	Synonym
31102701	Aluminum squeeze casting	Squeeze casting made of aluminum	アルミニウムスクイズ鋳物, 알루미늄 부분가압 주조, Objetos de aluminio moldeados por apriete (squeeze),

Class 31102800 Semi solid castings and casting assemblies

Definition (if available): Objects and assemblies formed to or near their desired shape by introducing molten metal into semi solid molds

Commodity	Commodity Title	Definition	Synonym
31102801	Aluminum semi solid casting	Semi solid casting made of aluminum	アルミニウム半固体鋳物, 알루미늄 반응고 주물, Objetos de aluminio de alta presión moldeados con troquel,

Class 31102900 Gravity permanent mold castings and casting assemblies

Definition (if available): Objects and assemblies formed to or near their desired shape by introducing molten metal into gravity permanent molds

Commodity	Commodity Title	Definition	Synonym
31102901	Aluminum gravity permanent mold casting	Gravity permanent mold casting made of aluminum	アルミニウム重力永久鋳型鋳物, 알루미늄 중력 영구 주조주물, Objetos de aluminio moldeados por gravedad permanente,

Commodity	Commodity Title	Definition	Synonym
31122001	Aluminum squeeze machined casting	Squeeze casting made of aluminum that has been machined	アルミニウムスクイズ鋳物（機械加工）, 기계식 알루미늄 부분가압 주물, Objetos maquinados de aluminio moldeados por apriete (squeeze),
31122002	Aluminum squeeze machined casting assembly	An assembly of squeeze castings made of aluminum that has been machined	アルミニウムスクイズ鋳物アセンブリ（機械加工）, 기계식 알루미늄 부분가압 주물 조립체, Ensamble de objetos maquinados de aluminio moldeados por apriete (squeeze),

Class 31122100 Semi solid machined castings and casting assemblies

Definition (if available): Objects and assemblies formed by introducing molten metal into semi solid molds that are then machined

Commodity	Commodity Title	Definition	Synonym
31122101	Aluminum semi solid machined casting	Semi solid casting made of aluminum that has been machined	アルミニウム半固体鋳物（機械加工）, 기계식 알루미늄 반응고 주물, Objetos maquinados de aluminio moldeados semisólidos,

31122102	Aluminum semi solid machined casting assembly	An assembly of semi solid castings made of aluminum that has been machined	アルミニウム半固体鋳物（機械加工）, 기계식 알루미늄 반응고 주물 조립체, Ensamble de objetos maquinados de aluminio moldeados semisólidos,

Class 31122200 Gravity permanent mold machined castings and casting assemblies

Definition (if available) Objects and assemblies formed by introducing molten metal into gravity permanent molds that are then machined

Commodity	Commodity Title	Definition	Synonym
31122201	Aluminum gravity permanent mold machined casting	Gravity permanent mold casting made of aluminum that has been machined	アルミニウム重力永久鋳型鋳物（機械加工）, 기계식 알루미늄 중력 영구 주형주물, Objetos maquinados de aluminio moldeados por gravedad permanente,
31122202	Aluminum gravity permanent mold machined casting assembly	An assembly of gravity permanent mold castings made of aluminum that has been machined	アルミニウム重力永久鋳型鋳物アセンブリ（機械加工）, 기계식 알루미늄 중력 영구 주형주물 조립체, Ensamble de objetos maquinados de aluminio moldeados por gravedad permanente,

Family 31130000 Forgings

Class 31132000 Powdered metal components

Definition (if available)

Commodity	Commodity Title	Definition	Synonym
31132001	Ferrous powdered metal components		黒色金属粉末件, 黑色金屬粉末件, Ferrous powdered metal components, Metaal componenten in poedervorm, Composés métalliques pulvérulents ferreux, Gepulverte Eisenmetallteile, Vastartalmú porított fémvegyületek, Componenti di metalli polverizzati a ferroso, 金属粉末冶金部品, 철금속부품, Jernholdige pulvermetallkomponenter, Componentes de metal em pó ferrosos, Componentes de metal ferroso pulverizado, Pulverkomponenter av järnmetaller

© 2016 United Nations Development Programme and GS1 US

31132002	Non ferrous powdered metal parts		有色金属粉末件, 有色金屬粉末件, Non ferrous powdered metal parts, Composés métalliques pulvérulents non ferreux, Gepulverte Nichteisenmetallteile, Színesfém tartalmú porított fémvegyületek, Componenti di metalli polverizzati a non ferroso, 非鉄金属粉末冶金部品, 비철금속부품, Ikke-jernholdige pulvermetallkomponenter, Componentes de metal em pó não ferrosos, Partes de metal no ferroso pulverizado, Pulverkomponenter av icke-järnmetaller

Class 31132100 Steel forgings

Definition (if available) Steel objects produced by the mechanical deformation of metal at various temperatures

Commodity	Commodity Title	Definition	Synonym
31132101	Cold forged machined steel forging	Forging made of steel that is forged at a cold temperature and has been machined	冷間鍛造スチール鍛造（機械加工）, 냉간 기계가공 강 단조품, Forja de acero maquinado forjado en frío,
31132102	Cold forged heat treated steel forging	Forging made of steel that is forged at a cold temperature and has been heat treated	冷間鍛造スチール鍛造（熱加工）, 냉간 열처리 강 단조품, Forja de acero tratado con calor forjado en frío,
31132103	Cold forged machined and heat treated steel forging	Forging made of steel that is forged at a cold temperature and has been machined and heat treated	冷間鍛造スチール鍛造（機械加工および熱加工）, 냉간 기계가공 및 열처리 강 단조품, Forja de acero maquinado y tratado con calor forjado en frío,
31132104	Cold forged heat treated and cold sized steel forging	Forging made of steel that is forged at a cold temperature and has been heat treated and cold sized	冷間鍛造スチール鍛造（熱加工および冷温糊付け）, 냉간 열처리 및 냉형 강 단조품, Forja de acero tratado con calor y dimensionado en frío forjado en frío,
31132105	Warm forged machined steel forging	Forging made of steel that is forged at a warm temperature and has been machined	温間鍛造スチール鍛造（機械加工）, 온간 기계가공 강 단조품, Forja de acero maquinado forjado en tibio,
31132106	Warm forged heat treated steel forging	Forging made of steel that is forged at a warm temperature and has been heat treated	温間鍛造スチール鍛造（熱加工）, 온간 열처리 강 단조품, Forja de acero tratado con calor forjado en tibio,

© 2016 United Nations Development Programme and GS1 US

31132107	Warm forged machined and heat treated steel forging	Forging made of steel that is forged at a warm temperature and has been machined and heat treated	温間鍛造スチール鍛造（機械加工および熱加工）, 온간 기계가공 및 열처리 강 단조품, Forja de acero maquinado y tratado con calor forjado en tibio,
31132108	Warm forged heat treated and cold sized steel forging	Forging made of steel that is forged at a warm temperature and has been heat treated and cold sized	温間鍛造スチール鍛造（熱加工および冷温糊付け）, 온간 열처리 및 냉형 강 단조품, Forja de acero tratado con calor y dimensionado en frío forjado en tibio,
31132109	Hot forged machined steel forging	Forging made of steel that is forged at a hot temperature and has been machined	熱間鍛造スチール鍛造（機械加工）, 열간 기계가공 강 단조품, Forja de acero maquinado forjado en caliente,
31132110	Hot forged heat treated steel forging	Forging made of steel that is forged at a hot temperature and has been heat treated	熱間鍛造スチール鍛造（熱加工）, 열간 열처리 강 단조품, Forja de acero tratado con calor forjado en caliente,
31132111	Hot forged machined and heat treated steel forging	Forging made of steel that is forged at a hot temperature and has been machined and heat treated	熱間鍛造スチール鍛造（機械加工および熱加工）, 열간 기계가공 및 열처리 강 단조품, Forja de acero maquinado y tratado con calor forjado en caliente,
31132112	Hot forged heat treated and cold sized steel forging	Forging made of steel that is forged at a hot temperature and has been heat treated and cold sized	熱間鍛造スチール鍛造（熱加工および冷温糊付け）, 열간 열처리 및 냉형 강 단조품, Forja de acero tratado con calor y dimensionado en frío forjado en caliente,

Class 31132200 Brass forgings

Definition (if available) Brass objects produced by the mechanical deformation of metal at various temperatures

Commodity	Commodity Title	Definition	Synonym
31132201	Cold forged machined brass forging	Forging made of brass that is forged at a cold temperature and has been machined	冷間黄銅鍛造（機械加工）, 냉간 기계가공 황동 단조품, Forja de latón maquinado forjado en frío,
31132202	Cold forged heat treated brass forging	Forging made of brass that is forged at a cold temperature and has been heat treated	冷間鍛造黄銅鍛造（熱加工）, 냉간 열처리 황동 단조품, Forja de latón tratado con calor forjado en frío,
31132203	Cold forged machined and heat treated brass forging	Forging made of brass that is forged at a cold temperature and has been machined and heat treated	冷間鍛造黄銅鍛造（機械加工および熱加工）, 냉간 기계가공 및 열처리 황동 단조품, Forja de latón maquinado y tratado con calor forjado en frío,
31132204	Cold forged heat treated and cold sized brass forging	Forging made of brass that is forged at a cold temperature and has been heat treated and cold sized	冷間鍛造黄銅鍛造（熱加工および冷温糊付け）, 냉간 열처리 및 냉형 황동 단조품, Forja de latón tratado con calor y dimensionado en frío forjado en frío,

© 2016 United Nations Development Programme and GS1 US

31132205	Warm forged machined brass forging	Forging made of brass that is forged at a warm temperature and has been machined	温間鍛造黄銅鍛造（機械加工）, 온간 기계가공 황동 단조품, Forja de latón maquinado forjado en tibio,
31132206	Warm forged heat treated brass forging	Forging made of brass that is forged at a warm temperature and has been heat treated	温間鍛造黄銅鍛造（熱加工）, 온간 열처리 황동 단조품, Forja de latón tratado con calor forjado en tibio,
31132207	Warm forged machined and heat treated brass forging	Forging made of brass that is forged at a warm temperature and has been machined and heat treated	温間鍛造黄銅鍛造（機械加工および熱加工）, 온간 기계가공 및 열처리 황동 단조품, Forja de latón maquinado y tratado con calor forjado en tibio,
31132208	Warm forged heat treated and cold sized brass forging	Forging made of brass that is forged at a warm temperature and has been heat treated and cold sized	温間鍛造黄銅鍛造（熱加工および冷温糊付け）, 온간 열처리 및 냉형 황동 단조품, Forja de latón tratado con calor y dimensionado en frío forjado en tibio,

Class 31132300 Aluminum forgings

Definition (if available) Aluminum objects produced by the mechanical deformation of metal at various temperatures

Commodity	Commodity Title	Definition	Synonym
31132301	Cold forged machined aluminum forging	Forging made of aluminum that is forged at a cold temperature and has been machined	冷間鍛造アルミニウム鍛造（機械加工）, 냉간 기계가공 알루미늄 단조품, Forja de aluminio maquinado forjado en frío,
31132302	Cold forged heat treated aluminum forging	Forging made of aluminum that is forged at a cold temperature and has been heat treated	冷間鍛造アルミニウム鍛造（熱加工）, 냉간 열처리 알루미늄 단조품, Forja de aluminio tratado con calor forjado en frío,
31132303	Cold forged machined and heat treated aluminum forging	Forging made of aluminum that is forged at a cold temperature and has been machined and heat treated	冷間鍛造アルミニウム鍛造（機械加工および熱加工）, 냉간 기계가공 및 열처리 알루미늄 단조품, Forja de aluminio maquinado y tratado con calor forjado en frío,
31132304	Cold forged heat treated and cold sized aluminum forging	Forging made of aluminum that is forged at a cold temperature and has been heat treated and cold sized	冷間鍛造アルミニウム鍛造（熱加工および冷温糊付け）, 냉간 열처리 및 냉형 알루미늄 단조품, Forja de aluminio tratado con calor y dimensionado en frío forjado en frío,
31132305	Warm forged machined aluminum forging	Forging made of aluminum that is forged at a warm temperature and has been machined	温間鍛造アルミニウム鍛造（機械加工）, 온간 기계가공 알루미늄 단조품, Forja de aluminio maquinado forjado en tibio,
31132306	Warm forged heat treated aluminum forging	Forging made of aluminum that is forged at a warm temperature and has been heat treated	温間鍛造アルミニウム鍛造（熱加工）, 온간 열처리 알루미늄 단조품, Forja de aluminio tratado con calor forjado en tibio,

© 2016 United Nations Development Programme and GS1 US

31132307	Warm forged machined and heat treated aluminum forging	Forging made of aluminum that is forged at a warm temperature and has been machined and heat treated	温間鍛造アルミニウム鍛造（機械加工および熱加工）, 온간 기계가공 및 열처리 알루미늄 단조품, Forja de aluminio maquinado y tratado con calor forjado en tibio,
31132308	Warm forged heat treated and cold sized aluminum forging	Forging made of aluminum that is forged at a warm temperature and has been heat treated and cold sized	温間鍛造アルミニウム鍛造（熱加工および冷温糊付け）, 온간 열처리 및 냉형 알루미늄 단조품, Forja de aluminio tratado con calor y dimensionado en frío forjado en tibio,

Class 31132400 Non ferrous alloy forgings

Definition (if available) Non ferrous alloy objects produced by the mechanical deformation of metal at various temperatures

Commodity	Commodity Title	Definition	Synonym
31132401	Cold forged machined non ferrous alloy forging	Forging made of non ferrous alloy that is forged at a cold temperature and has been machined	冷間鍛造非鉄合金鍛造（機械加工）, 냉간 기계가공 비철합금 단조품, Forja de aleación no ferrosa maquinado forjado en frío,
31132402	Cold forged heat treated non ferrous alloy forging	Forging made of non ferrous alloy that is forged at a cold temperature and has been heat treated	冷間鍛造非鉄合金鍛造（熱加工）, 냉간 열처리 비철합금 단조품, Forja de aleación no ferrosa tratado con calor forjado en frío,
31132403	Cold forged machined and heat treated non ferrous alloy forging	Forging made of non ferrous alloy that is forged at a cold temperature and has been machined and heat treated	冷間鍛造非鉄合金鍛造（機械加工および熱加工）, 냉간 기계가공 및 열처리 비철합금 단조품, Forja de aleación no ferrosa maquinado y tratado con calor forjado en frío,
31132404	Cold forged heat treated and cold sized non ferrous alloy forging	Forging made of non ferrous alloy that is forged at a cold temperature and has been heat treated and cold sized	冷間鍛造非鉄合金鍛造（熱加工および冷温糊付け）, 냉간 열처리 및 냉형 비철합금 단조품, Forja de aleación no ferrosa tratado con calor y dimensionado en frío forjado en frío,
31132405	Warm forged machined non ferrous alloy forging	Forging made of non ferrous alloy that is forged at a warm temperature and has been machined	温間鍛造非鉄合金鍛造（機械加工）, 온간 기계가공 비철합금 단조품, Forja de aleación no ferrosa maquinado forjado en tibio,
31132406	Warm forged heat treated non ferrous alloy forging	Forging made of non ferrous alloy that is forged at a warm temperature and has been heat treated	温間鍛造非鉄合金鍛造（熱加工）, 온간 열처리 비철합금 단조품, Forja de aleación no ferrosa tratado con calor forjado en tibio,
31132407	Warm forged machined and heat treated non ferrous alloy forging	Forging made of non ferrous alloy that is forged at a warm temperature and has been machined and heat treated	温間鍛造非鉄合金鍛造（機械加工および熱加工）, 온간 기계가공 및 열처리 비철합금 단조품, Forja de aleación no ferrosa maquinado y tratado con calor forjado en tibio,

31132408	Warm forged heat treated and cold sized non ferrous alloy forging	Forging made of non ferrous alloy that is forged at a warm temperature and has been heat treated and cold sized	温間鍛造非鉄合金鍛造（熱加工および冷温糊付け）, 온간 열처리 및 냉형 비철합금 단조품, Forja de aleación no ferrosa tratado con calor y dimensionado en frío forjado en tibio,
31132409	Hot forged machined non ferrous alloy forging	Forging made of non ferrous alloy that is forged at a hot temperature and has been machined	熱間鍛造非鉄合金鍛造（機械加工）, 열간 기계가공 비철합금 단조품, Forja de aleación no ferrosa maquinado forjado en caliente,
31132410	Hot forged heat treated non ferrous alloy forging	Forging made of non ferrous alloy that is forged at a hot temperature and has been heat treated	熱間鍛造非鉄合金鍛造（熱加工）, 열간 열처리 비철합금 단조품, Forja de aleación no ferrosa tratado con calor forjado en caliente,
31132411	Hot forged machined and heat treated non ferrous alloy forging	Forging made of non ferrous alloy that is forged at a hot temperature and has been machined and heat treated	熱間鍛造非鉄合金鍛造（機械加工および熱加工）, 열간 기계가공 및 열처리 비철합금 단조품, Forja de aleación no ferrosa maquinado y tratado con calor forjado en caliente,
31132412	Hot forged heat treated and cold sized non ferrous alloy forging	Forging made of non ferrous alloy that is forged at a hot temperature and has been heat treated and cold sized	熱間鍛造非鉄合金鍛造（熱加工および冷温糊付け）, 열간 열처리 및 냉형 비철합금 단조품, Forja de aleación no ferrosa tratado con calor y dimensionado en frío forjado en caliente,

Class 31132500 Ferrous alloy forgings

Definition (if available) Ferrous alloy objects produced by the mechanical deformation of metal at various temperatures

Commodity	Commodity Title	Definition	Synonym
31132501	Cold forged machined ferrous alloy forging	Forging made of ferrous alloy that is forged at a cold temperature and has been machined	冷間鍛造鉄合金鍛造（機械加工）, 냉간 기계가공 철합금 단조품, Forja de aleación ferrosa maquinado forjado en frío,
31132502	Cold forged heat treated ferrous alloy forging	Forging made of ferrous alloy that is forged at a cold temperature and has been heat treated	冷間鍛造鉄合金鍛造（熱加工）, 냉간 열처리 철합금 단조품, Forja de aleación ferrosa tratado con calor forjado en frío,
31132503	Cold forged machined and heat treated ferrous alloy forging	Forging made of ferrous alloy that is forged at a cold temperature and has been machined and heat treated	冷間鍛造鉄合金鍛造（機械加工および熱加工）, 냉간 기계가공 및 열처리 철합금 단조품, Forja de aleación ferrosa maquinado y tratado con calor forjado en frío,

31133012	Hot forged heat treated and cold sized beryllium forging	Forging made of beryllium that is forged at a hot temperature and has been heat treated and cold sized	熱間鍛造ベリリウム鍛造（熱加工および冷温糊付け）, 열간 열처리 및 냉형 베릴륨 단조품, Forja de berilio tratado con calor y dimensionado en frío forjado en caliente,

Class 31133100 Copper forgings

Definition (if available) Copper objects produced by the mechanical deformation of metal at various temperatures

Commodity	Commodity Title	Definition	Synonym
31133101	Cold forged machined copper forging	Forging made of copper that is forged at a cold temperature and has been machined	冷間鍛造銅鍛造（機械加工）, 냉간 기계가공 구리 단조품, Forja de cobre maquinado forjado en frío,
31133102	Cold forged heat treated copper forging	Forging made of copper that is forged at a cold temperature and has been heat treated	冷間鍛造銅鍛造（熱加工）, 냉간 열처리 구리 단조품, Forja de cobre tratado con calor forjado en frío,
31133103	Cold forged machined and heat treated copper forging	Forging made of copper that is forged at a cold temperature and has been machined and heat treated	冷間鍛造銅鍛造（機械加工および熱加工）, 냉간 기계가공 및 열처리 구리 단조품, Forja de cobre maquinado y tratado con calor forjado en frío,
31133104	Cold forged heat treated and cold sized copper forging	Forging made of copper that is forged at a cold temperature and has been heat treated and cold sized	冷間鍛造銅鍛造（熱加工および冷温糊付け）, 냉간 열처리 및 냉형 구리 단조품, Forja de cobre tratado con calor y dimensionado en frío forjado en frío,
31133105	Warm forged machined copper forging	Forging made of copper that is forged at a warm temperature and has been machined	温間鍛造銅鍛造（機械加工）, 온간 기계가공 구리 단조품, Forja de cobre maquinado forjado en tibio,
31133106	Warm forged heat treated copper forging	Forging made of copper that is forged at a warm temperature and has been heat treated	温間鍛造銅鍛造（熱加工）, 온간 열처리 구리 단조품, Forja de cobre tratado con calor forjado en tibio,
31133107	Warm forged machined and heat treated copper forging	Forging made of copper that is forged at a warm temperature and has been machined and heat treated	温間鍛造銅鍛造（機械加工および熱加工）, 온간 기계가공 및 열처리 구리 단조품, Forja de cobre maquinado y tratado con calor forjado en tibio,

31133108	Warm forged heat treated and cold sized copper forging	Forging made of copper that is forged at a warm temperature and has been heat treated and cold sized	温間鍛造銅鍛造（熱加工および冷温糊付け）, 온간 열처리 및 냉형 구리 단조품, Forja de cobre tratado con calor y dimensionado en frío forjado en tibio,
31133109	Hot forged machined copper forging	Forging made of copper that is forged at a hot temperature and has been machined	熱間鍛造銅鍛造（機械加工）, 열간 기계가공 구리 단조품, Forja de cobre maquinado forjado en caliente,
31133110	Hot forged heat treated copper forging	Forging made of copper that is forged at a hot temperature and has been heat treated	熱間鍛造銅鍛造（熱加工）, 열간 열처리 구리 단조품, Forja de cobre tratado con calor forjado en caliente,
31133111	Hot forged machined and heat treated copper forging	Forging made of copper that is forged at a hot temperature and has been machined and heat treated	熱間鍛造銅鍛造（機械加工および熱加工）, 열간 기계가공 및 열처리 구리 단조품, Forja de cobre maquinado y tratado con calor forjado en caliente,
31133112	Hot forged heat treated and cold sized copper forging	Forging made of copper that is forged at a hot temperature and has been heat treated and cold sized	熱間鍛造銅鍛造（熱加工および冷温糊付け）, 열간 열처리 및 냉형 구리 단조품, Forja de cobre tratado con calor y dimensionado en frío forjado en caliente,

Class 31133200 Zinc forgings

Definition (if available) Zinc objects produced by the mechanical deformation of metal at various temperatures

Commodity	Commodity Title	Definition	Synonym
31133201	Cold forged machined zinc forging	Forging made of zinc that is forged at a cold temperature and has been machined	冷間鍛造亜鉛鍛造（機械加工）, 냉간 기계가공 아연 단조품, Forja de zinc maquinado forjado en frío,
31133202	Cold forged heat treated zinc forging	Forging made of zinc that is forged at a cold temperature and has been heat treated	冷間鍛造亜鉛鍛造（熱加工）, 냉간 열처리 아연 단조품, Forja de zinc tratado con calor forjado en frío,
31133203	Cold forged machined and heat treated zinc forging	Forging made of zinc that is forged at a cold temperature and has been machined and heat treated	冷間鍛造亜鉛鍛造（機械加工および熱加工）, 냉간 기계가공 및 열처리 아연 단조품, Forja de zinc maquinado y tratado con calor forjado en frío,
31133204	Cold forged heat treated and cold sized zinc forging	Forging made of zinc that is forged at a cold temperature and has been heat treated and cold sized	冷間鍛造亜鉛鍛造（熱加工および冷温糊付け）, 냉간 열처리 및 냉형 아연 단조품, Forja de zinc tratado con calor y dimensionado en frío forjado en frío,
31133205	Warm forged machined zinc forging	Forging made of zinc that is forged at a warm temperature and has been machined	温間鍛造亜鉛鍛造（機械加工）, 온간 기계가공 아연 단조품, Forja de zinc maquinado forjado en tibio,

Class 31133700 Powdered metals and metal alloys

Definition (if available) Metals and metals based alloys in powder form used to produce various components

Commodity	Commodity Title	Definition	Synonym
31133701	Friction material powdered metal and metal alloy	Various sinterable metal powders combined with friction enhancing materials used to produce a product with high coefficients of friction	摩擦材粉末金属および合金, 마찰강화 금속 및 금속 합금 분말, Fricción material de metal en polvo y aleación de metal,
31133702	Electrical contact powdered metal and metal alloy	Various sinterable metal powders exhibiting a high degree of electical conductivity and wear resistance used in applications involving electrical circuits	電気接点粉末金属および合金, 전기접점 금속 및 금속 합금 분말, Contacto eléctrico de metal en polvo y aleación de metal,
31133703	Cemented carbide powdered metal and metal alloy	Powdered metal comprising any generally accepted cemented carbide compositions of carbide particles and metallic binders	セメントカーバイド粉末金属および合金, 초경합금 금속 및 금속 합금 분말, Carburo cementado de metal en polvo y aleación de metal,
31133704	Diamond metal matrix powdered metal and metal alloy	Powdered composite comprising diamond powder and a powdered metal or metals	ダイアモンド金属マトリックス粉末金属および合金, 다이아몬드와 금속 및 금속합금 분말, Matriz metal diamante de metal en polvo y aleación de metal,

Class 31141900 Inserted injection moldings

Definition (if available): Type of moldings that include a component placed into the mold prior to injecting the molding material.

Commodity	Commodity Title	Definition	Synonym
31141901	Plastic inserted injection molding	A type of plastic molding that includes a component placed into the mold prior to injecting the molding material.	プラスチックインサート射出成形品, 플라스틱 소형사출, Moldeado plástico con inserción previa a la inyección, Infogat formsprutgods av plast

Class 31142000 Thermoplastic molding assemblies

Definition (if available): Assemblies of thermoplastic objects that have been molded

Commodity	Commodity Title	Definition	Synonym
31142001	Thermoplastic compression molding assembly	Assembly made of thermoplastic objects that has been compression molded	熱可塑性圧縮成形品アセンブリ, 열가소성 플라스틱 압축 성형 조립체, Ensamble de moldeado termoplástico por compresión,
31142002	Thermoplastic dip molding assembly	Assembly made of thermoplastic objects that has been dip molded	熱可塑性ディップ成形品アセンブリ, 열가소성 플라스틱 침지 성형 조립체, Ensamble de moldeado termoplástico por inmersión,
31142003	Thermoplastic blown molding assembly	Assembly made of thermoplastic objects that has been blown molded	熱可塑性ブラウン成形品アセンブリ, 열가소성 플라스틱 중공 성형 조립체, Ensamble de moldeado termoplástico por aire,
31142004	Thermoplastic injection molding assembly	Assembly made of thermoplastic objects that has been injection molded	熱可塑性射出成形品アセンブリ, 열가소성 플라스틱 사출 성형 조립체, Ensamble de moldeado termoplástico por inyección,

31142704	Thermoset injection inserted molding assembly	Object insert made of thermoset that has been injection molded	熱可塑性射出インサート成形品アセンブリ, 열경화성 플라스틱 사출 인서트 성형 조립체, Ensamble de engaste termofraguado moldeado por inyección,
31142705	Thermoset gas assisted injection inserted molding assembly	Object insert made of thermoset that has been gas assisted injection molded	熱可塑性ガスアシスト射出インサート成形品アセンブリ, 열경화성 플라스틱 가스 사출 인서트 성형 조립체, Ensamble de engaste termofraguado moldeado por inyección asistida por gas,
31142706	Thermoset high precision injection inserted molding assembly	Object insert made of thermoset that has been high precision injection molded	熱可塑性高精度射出インサート成形品アセンブリ, 열경화성 플라스틱 고정밀 사출 인서트 성형 조립체, Ensamble de engaste termofraguado moldeado por inyección de alta precisión,
31142707	Thermoset transfer inserted molding assembly	Object insert made of thermoset that has been transfer molded	熱可塑性トランスファーインサート成形品アセンブリ, 열경화성 플라스틱 이송 인서트 성형 조립체, Ensamble de engaste termofraguado moldeado por transferencia,

Class 31142800 Dip moldings

Definition (if available): Parts produced by dipping a heated mold, mandrel or form into heated or ambient temperature material until desired part thickness is achieved and then, after cooling, removing the part from the mold, mandrel or form.

Commodity	Commodity Title	Definition	Synonym
31142801	Plastic or plastisol dip molding	Dip molding produced from various plastic or plasticizer compounds	プラスチックまたはプラスチゾル浸漬成形品, 플라스틱 또는 플라스티졸 딥성형품, Moldeado por inmersión de plástico o plastisol,
31142802	Latex dip molding	Dip molding produced from various latex compounds	ラテックス浸漬成形品, 라텍스 딥성형품, Moldeado por inmersión de látex,
31142803	Neoprene dip molding	Dip molding produced from various neoprene compounds	ネオプレン浸漬成形品, 네오프렌 딥성형품, Moldeado por inmersión de neopreno,
31142804	Urethane dip molding	Dip molding produced from various urethane compounds	ウレタン浸漬成形品, 우레탄 딥성형품, Moldeado por inmersión de uretano,

Class 31142900 In mold decorated injection moldings

Definition (if available): Injection molded components consisting of various plastic materials with the addition of a decorative element placed into some portion of the show surface side of the injection mold prior to injection of the plastic

31142901	In mold applique injection molding	Injection molded component consisting of various plastic materials with the addition of a decorative formed panel placed into some portion of the show surface side of the injection mold prior to injection of the plastic	インモールド・アップリケ射出成形品, 인몰드 아플리케 사출성형품, Aplique en molde para moldeado por inyección,
31142902	In mold ink transfer injection molding	Injection molded component consisting of various plastic materials with the addition of a decorative pigment contained on some carrier placed into some portion of the show surface side of the injection mold prior to injection of the plastic	インモールド・インク転移射出成形品, 인몰드 잉크전이 사출성형품, Tinta en molde para traspaso por moldeo por inyección,
31142903	Mold to color injection molding	Injection molded component consisting of various plastic materials with the addition of a pigment to achieve a specified color during molding.	カラー射出成形用成形品, 몰드투칼라 사출성형품, Molde para moldeado por inyección de color,
31142904	Multiple shot injection molding	Injection molded component consisting of various plastic materials manufactured by introducing multiple melt flows to produce the desired surface effect	マルチショット射出成形品, 다중 사출성형품, Moldeado por inyección de disparos múltiples,

Class 31143000 Gas assist moldings

Definition (if available) Parts produced by an injection molding process involving injection of high pressure nitrogen gas into the resin melt stream immediately after injection of the resin allowing the gas to displace a portion of the resin and force the resin to the walls of the mold.

Commodity	Commodity Title	Definition	Synonym
31143001	Plastic gas assist molding	Plastic part produced by an injection molding process involving injection of high pressure nitrogen gas into the resin melt stream immediately after injection of the resin allowing the gas to displace a portion of the resin and force the resin to the walls of the mold.	プラスチックガスアシスト成形品, 플라스틱 가스 사출성형품, Moldeado de plástico asistido por gas,
31143002	Structural foam gas assist molding	Structural foam part produced by an injection molding process involving injection of high pressure nitrogen gas into the resin melt stream immediately after injection of the resin allowing the gas to displace a portion of the resin and force the resin to the walls of the mold.	発泡ガスアシスト成形, 구조발포 가스 사출성형품, Moldeado de espuma estructural asistido por gas,

Class 31143100 Thermoplastic finished molding assemblies

Definition (if available) Assemblies produced from multiple molded parts manufactured from thermoplastic resins, possibly including other components, and then finished using various materials and processes such as painting, plating and the like

Commodity	Commodity Title	Definition	Synonym
31143101	Thermoplastic injection finished molding assembly	Assembly produced from multiple injection molded parts manufactured from thermoplastic resins, possibly including other components, and then finished using various materials and processes such as painting, plating and the like	熱可塑性射出仕上げ成形アセンブリ, 열가소성 사출성형 어셈블리, Ensamble de moldeado termoplástico terminado por inyección,
31143102	Thermoplastic compression finished molding assembly	Assembly produced from multiple compression molded parts manufactured from thermoplastic resins, possibly including other components, and then finished using various materials and processes such as painting, plating and the like	熱可塑性圧縮仕上げ成形品アセンブリ, 열가소성 압축 성형 어셈블리, Ensamble de moldeado termoplástico terminado por compresión,
31143103	Thermoplastic gas assisted injection finished molding assembly	Assembly produced from multiple gas assisted injection molded parts manufactured from thermoplastic resins, possibly including other components, and then finished using various materials and processes such as painting, plating and the like	熱可塑性ガスアシスト射出仕上げ成形品アセンブリ, 열가소성 가스 사출성형 어셈블리, Ensamble de moldeado termoplástico terminado por inyección asistida por gas,

Class 31143200 Post mold decorated injection moldings

Definition (if available) Injection molded components consisting of various plastic materials with the addition of a decorative element attached or applied to its show surface after molding

Commodity	Commodity Title	Definition	Synonym
31143201	Painted injection molding	Injection molded component consisting of various plastic materials with the addition paint applied to its show surface after molding	塗装済み射出成形品, 도색 사출성형품, Moldeado por inyección pintado,
31143202	Plated injection molding	Injection molded component consisting of various plastic materials with the addition decorative plating applied to its show surface after molding, using various plating processes	メッキ済み射出成形品, 도금 사출성형품, Moldeado por inyección plateado,
31143203	Metallized injection molding	Injection molded component consisting of various plastic materials with the addition decorative metallic finish applied to its show surface after molding, using an electrostatic evaporative coating process	金属化済み射出成形品, 금속화 사출성형품, Moldeado por inyección metalizado,
31143204	Lased injection molding	Injection molded component consisting of various plastic materials that is treated with laser to produce etching or other decorative effects to its show surface	レーザー加工済み射出成形品, 레이저처리 사출성형품, Moldeado por inyección tratado con láser,
31143205	Lased and painted injection molding	Injection molded component consisting of various plastic materials that is treated with laser to produce etching or other decorative effects to its show surface and is painted to highlight or accentuate the decorative effect	レーザー加工および塗装射出済み成形品, 도색, 레이저처리 사출성형품, Moldeado por inyección pintado y tratado con láser,

31151510	Rayon rope	Rayon is a material made from synthetic textile fibers produced by forcing a cellulose solution through fine spinnerets and solidifying the resulting filaments, with this material we get a silk-like texture rope but more resistant than silk, and it is good to control mite infestation.	Cordage en Rayon, Műselyem kötél, レーヨンロープ, 레이온로프, Cuerda de rayón, Rayonrep
31151511	Linen rope	Linen is a material made from the fibers of the flax plan, the linen rope is used in lots of fields like textile, footwear or others.	Cordage en lin, Vászon kötél, 麻縄, 린넨로프, Cuerda de lino, Linnerep
31151512	Polyethylene rope	Polyethylene is a thermoplastic material composed of polymers of ethylene, the polyethylene rope is very difficult to rot or mildew, it has several uses.	Cordage polyéthylène, Polietilén kötél, ポリエチレンロープ, 폴리에틸렌로프, Cuerda de polietileno, Polyetenrep
31151513	Coconut fiber rope	A rope made of coconut fiber that has high lignin content and low cellulose content, making it resilient and durable, this ropes are rough and strong.	Cordage en fibre de coco, Kókuszrost kötél, ココナッツ繊維ロープ, 코코넛섬유로프, Cuerda de fibra de coco, Kokosfiberrep
31151514	Jute rope	Jute is a long, soft, shiny vegetable fibre that can be spun into coarse, strong threads, it is produced from plants in the genus Corchorus, family Malvaceae, jute rope is very widely used in a lot of fields.	Cordage en jute, Juta kötél, ジュートロープ, 주트섬유로프, Cuerda de yute, Juterep
31151515	Esparto grass rope	A tough, wiry grass (Stipa tenacissima) of northern Africa and south Spain, yielding a fiber used in making ropes very resistants and with a long life.	Cordage de sparte, Eszparto-kötél, エスパルトグラスロープ, 에스파르토로프, Cuerda de esparto, Rep av espartogräs
31151516	Raffia rope	The fiber of the raffia is obtained from the leaves of the raffia palm that is found in South America, Africa and Madagascar, and with this raw material we get a rope very resistant and with a long life, the raffia can be also synthetic.	Cordage de raffia, Raffia kötél, ラフィアロープ, 라피아로프, Cuerda de rafia, Raffiarep
31151517	Aloe rope	A rope made of aloe vera, a material that makes this rope very resistant to deterioration.	Cordage d'aloès, アロエロープ, 합금로프, Cuerda de aloe, Aloerep
31151518	Impregnated rope	A special kind of rope that is impregnated with another substance to strengthen or improve performance under specific conditions. Examples include resin or tar-impregnated rope.	Cordage imprégné, 含浸ロープ, 함침로프, Cuerda impregnada, Impregnerat rep
31151519	Latex rope	A flexible rope made of latex that makes it exceptionally abrasion resistant and UV radiation resistant.	Cordage en latex, ラテックス・ロープ, 라텍스로프, Cuerda de látex, Latexrep
31151520	Vinylon rope	A rope made of nylon spun yarn, a synthetic fiber, with outstanding weatherability and is easy to handle for flexible and non-slippery features.	ビニロンロープ, 비닐론 로프, Cuerda de vinylon,
31151521	Asbestos rope	Rope made of yarn and long fibers of asbestos and roll brading.	アスベストロープ, 석면 로프, Cuerda de asbesto,

31152104	Silicone cord	A length of flexible material similar to rope, but thinner and shorter, made of silicone fibers braided together.	Cordon de silicone, シリコーンコード, 실리콘끈, Cordón de silicona, Silikonlina
31152105	Latex cord	A length of flexible material similar to rope, but thinner and shorter, made of cotton fibers braided together.	Cordon de latex, ラテックスコード, 라텍스끈, Cordón de látex, Latexlina
31152106	Polyester cord	A length of flexible material similar to rope, but thinner and shorter, made of polyester fibers braided together.	Cordon de polyester, ポリエステルコード, 폴리에스테르끈, Cordón de poliéster, Polyesterlina
31152107	Neoprene cord	A length of flexible material similar to rope, but thinner and shorter, made of neoprene fibers braided together.	Cordon de néoprène, ネオプレンコード, 네오프렌끈, Cordón de neopreno, Neoprenlina
31152108	Polypropylene cord	A length of flexible material similar to rope, but thinner and shorter, made of polypropylene fibers braided together.	Cordon de Polypropylène, ポリプロピレンコード, 폴리프로필렌끈, Cordón de polipropileno, Polypropenlina
31152109	Rubber cord	A type of line thinner and shorter than a rope made of twisted fibers or threads of rubber whose insulation characteristics make it suitable for electrical applications as well as other applications.	Tendeurs, ゴムひも, 고무끈, Cordón de caucho, Gummilina
31152110	Asbestos cord	A line thinner and shorter than a rope comprised of twisted fibers or threads made of asbestos. Insulating properties make it suitable for use with electrical applications.	アスベストコード, 석면 끈, Cordón de asbesto, Asbestlina
31152111	Glass fiber cord	A line thinner and shorter than a rope that is made of fiber cord, a very resistant material.	グラスファイバーコード, 유리섬유 끈, Cordón de fibra de vidrio, Glasfiberlina
31152112	Ceramic fiber cord	A line thinner and shorter than a rope made of ceramic fiber, a material very resistant to high temperatures.	セラミックファイバーコード, 세라믹 섬유 끈, Cordón de fibra cerámica, Lina av keramiska fibrer

Class 31152200 Non electric iron and steel wire

Definition (if available) Wire made of iron or steel which is designed to be used for non electrical applications.

Commodity	Commodity Title	Definition	Synonym
31152201	Low carbon steel wire	A type of wire generally referred to as iron wire. It has a carbon content ranging from of 0.06 percent to 0.25 percent and a tensile strength of 35 kilograms per square millimeter.	低炭素鋼線, 연강선, Cable de acero bajo en carbono,
31152202	Hard drawn steel wire	A wire made from metal drawn at room temperature after the thermal disposition of the hard drawn steel material is made from high carbon wire rod.	硬銅鋼線, 경강선, Cable de acero semiduro,
31152203	Stainless steel wire	A steel wire given corrosion resistance by adding 12 percent more chromium. It resists rust because of the passivity film of chromium oxide under the oxidative atmosphere.	ステンレス鋼線, 스테인리스 강선, Cable de acero inoxidable,
31152204	Stranded steel wire	A type of wire made up of a coated steel wire and two lines of copper wire. The purpose is to control the electromagnetic interference from external sources.	より鋼線, 연선, Cable de acero trenzado,
31152205	Oil tempered wire	A type of wire made by the tempering process after quenching the cold work wire and oil in consecutive passes.	オイルテンパーワイヤ, 오일템퍼선, Cable de acero templado con aceite,
31152206	Coated steel wire	A type of steel wire coated or plated with other metals, such as zinc or aluminum.	被覆鋼線, 도금 강선, Cable de acero recubierto,

31152207	Prestressed concrete steel wire	A high strength steel wire used for a compression member of pre-stressed concrete.	プレストレストコンクリート鋼線, PC강선, Cable de acero de concreto pretensado,
31152208	Prestressed concrete stranded steel wire	A steel wire with high strength used to make pre-stressed concrete that is made up of several strips.	プレストレストコンクリートより鋼線, PC강연선, Cable de acero de concreto pretensado trenzado,
31152209	Iron wire	Wire made of iron.	鉄線, 철선, Alambre de hierro,

Class 31152300 Non electric nonferrous metal wire

Definition (if available) Wire made from non ferrous metals and metal alloys that is not intended for electrical use.

Commodity	Commodity Title	Definition	Synonym
31152301	Lead or lead alloy wire	A type of wire made with the main material of lead or lead alloy.	鉛または鉛合金ワイヤ, 납 또는 납 합금선, Alambre de plomo o aleación de plomo,
31152302	Nickel or nickel alloy wire	A type of wire made with the main material of nickel or nickel alloy.	ニッケルまたはニッケル合金ワイヤ, 니켈 또는 니켈 합금선, Alambre de níquel o aleación de níquel,
31152303	Nichrome alloy wire	A type of wire made with an alloy of nickel and chrome.	ニクロム合金ワイヤ, 니크롬 합금선, Alambre de aleación nicromo,
31152304	Copper or copper alloy wire	A type of wire made with the main material of copper or copper alloy.	銅または銅合金ワイヤ, 동 또는 동 합금선, Alambre de cobre o aleación de cobre,
31152305	Aluminium or aluminium alloy wire	A type of wire made with the main material of aluminum or aluminum alloy.	アルミニウムまたはアルミニウム合金ワイヤ, 알루미늄 또는 알루미늄 합금선, Alambre de aluminio o aleación de aluminio,
31152306	Tin or tin alloy wire	A type of wire made with the main material of tin or tin alloy.	スズまたはスズ合金ワイヤ, 주석 또는 주석 합금선, Alambre de estaño o aleación de estaño,
31152307	Titanium or titanium alloy wire	A type of wire made with the main material of titanium or titanium alloy.	チタンまたはチタン合金ワイヤ, 티타늄 또는 티타늄 합금선, Alambre de titanio o aleación de titanio,

31161521	Carriage screw	A mushroom-shaped head screw with a square neck, made of steel or stainless steel, this screw is under the DIN standard number 603, it usually includes a hex nut.	Vis à tête bombée à collet carré, Kapupántcsavar, 角根スクリュー, 캐리지나사, Tornillo de carruaje, Täckt skruv
31161522	Eye screw	A screw that is characterized by the hole in the head, it accomplishes the DIN 444 standard.	Vis à œil, Szemescsavar, アイスクリュー, 아이나사, Tornillo de ojo, Skruv med ögla
31161523	Wing screw	Steels screws easy to recognize because of the flat wing head, with that head we can screw with hands, this screw is in accordance with the DIN 316 standard.	Vis à oreilles, Szárnyas csavarok, 蝶ねじ, 나비형나사, Tronillo de ala, Vingskruv
31161524	Decorative screw	A special kind of screw that has an extra function, decorate, it is available in several forms and colors.	Vis décorative, Dekoratív csavarok, 装飾チェーン, 장식나사, Tornillo decorativo, Dekorativ skruv
31161525	Screw for plastic	A specialized fastener for connecting plastic materials.	Vis pour matière plastique, プラスチック用ビス, 플라스틱용나사, Tornillo para plástico, Plastskruv
31161526	Concrete screw	A type of fastener designed for use with composite materials such as concrete.	Vis à béton, コンクリート用ビス, 콘크리트나사, Tornillo de concreto, Betongskruv
31161527	Hammerhead or T screw	A fastener with a T-shaped square neck.	Vis en T ou à tète rectangulaire et angles abattus, ハンマーヘッドまたはTスクリュー, 해머머리형 또는 형나사, Tornillo en t o cabeza de martillo, T-skruv
31161528	Self drilling screw	Externally-threaded fastener with a self-drilling point that drills, taps and fastens.	ドリルねじ, 직결나사, Tornillo auto – entrante, Självborrande skruv
31161529	Jack screw	A mechanism that uses a long threaded rod to position a matching nut at any position along its length.	ジャックスクリュー, 잭나사, Tornillo de gato, Domkraftsskruv
31161530	Grub screw	A type of set screw having no projecting head.Its top is either slotted or provided with a socket.	グラブスクリュー, 그럽나사, Tornillo grub, Stoppskruv
31161531	Lead screw or power screw	A leadscrew is a screw specialized for the purpose of translating rotational to linear motion.	主ねじまたはパワースクリュー, 리드 나사 또는 전동 나사, Tornillo especializado, Ledskruv
31161532	Allen screw	Type of screw whose head has a hexagonal socket.	アレンスクリュー, 앨런 나사, Tornillo allen, Insexskruv
31161533	Washer assembled screw	A screw that is rolled after assembling the washer onto the machine screws to secure the washer not to be loosened from the small screws.	座金組込スクリュー, 와셔 붙이나사, Tornillo con arandela ensamblada,
31161534	Trapezoidal thread screw	A screw that has a trapezoidal shape for the cross section of screw thread.	台形ねじスクリュー, 사다리꼴나사, Tornillo de rosca trapezoidal,
31161535	Acoustical lag screw	A screw with a sharp point and wood screw threads and a hole on the flat end. It can be drivern with a driver tool, or installed using an adjustable wrench or pliers. They are ideal for tie-down and tie-wire applications. Commonly found in suspended ceiling installations. They can also be used for wire guiding and hanging pipe, fixtures and more.	アコースティカル・ラグスクリュー,

31161625	Railway track bolt	Bolts used to fasten railroad track to the ties.	軌条用ボルト, 레일 트랙 볼트, Perno de carrilera, Järnvägsbult
31161626	Sems bolt	A bolt with a washer capture on the shank of the bolt between the threaded portion and the bolt head.	セムスボルト, 셈스 볼트, Perno sems de cabeza plana, Semsskruv
31161627	Bolt assembly	A mechanism consisting of a threaded bolt with various head configurations and including other components such as sleeves, expansion devices, etc.	ボルト・アセンブリ, 볼트 어셈블리, Ensamble de pernos,
31161628	Square head bolt	A bolt with square shaped head.	四角ボルト, 사각머리 볼트, Perno de cabeza cuadrada,
31161629	Round head bolt	A bolt with a round head shape.	丸頭ボルト, 둥근머리 볼트, Perno de cabeza redonda,
31161630	Blank bolt	A semi finished product that is designed to meet the special dimensions of user. If needed, the length may be extended with the outline forming, boring, threading and welding, and others.	ブランクボルト, 블랭크 볼트, Perno en blanco,
31161631	Shoulder bolt	A product having the head with a covering metal sheath that enables the bolt to move, slide, and pivot.	ショルダーボルト, 숄더 볼트, Perno de hombro,
31161632	Rock bolt	A bolt used to support and reinforce rock for mine shaft, tunnel, underground utility pipe conduit, cutting sloping side. It is placed by drilling a hole in the rock rocks around the mine shaft and tunnel and placing the bolt on the holes.	ロックボルト, 락 볼트, Perno de roca,
31161633	Stove bolt	A bolt which is supplied with the screw that is inserted with the nuts including the hexagon nuts for tightening together with the machine screw.	ストーブボルト, 스토브 볼트, Perno de estufa,
31161634	Over neck bolt	A bolt that has an elliptical neck under the head. This bolt has the head with the nominal diameter.	オーバーネックボルト, 둥근목형 볼트, Perno de sobre – cuello,
31161635	Washer assembled bolt	A machine bolt that has is assembled with the washer that cannot be separated for one or more thereof.	座金組込ボルト, 와셔 붙이 볼트, Perno con arandela ensamblada,
31161636	Welding bolt	A bolt that has an external screw. The screw part has small protrusions above and below the head for welding.	溶接ボルト, 용접 볼트, Perno de soldadura,
31161637	Socket head bolt	A bolt that has a cylindrical head with the hexagon groove on the back of the head.	穴付きボルト, 소켓헤드 볼트, Perno de cabeza de enchufe,
31161638	T bolt	A bolt that has a T shaped head.	Tボルト, 티 볼트, Perno t,
31161639	Hanger bolt	A headless bolt that is designed to connect a round bar and hanger to tie up to the ceiling.	ハンガーボルト, 행어 볼트, Perno de gancho,

31162814	Fastener assortment kit	An assortment of fasteners packaged as a kit.	Assortiment d'attaches, ファスナー組み合わせキット, 파스너세트, Kit de sujetadores varios, Fästsats
31162815	Shim	A thin and often tapered or wedged, piece of material, used to fill small gaps or spaces between objects. Shims are typically used in order to support, adjust for better fit, or provide a level surface.	Cale, シム, 쐐기, Calce, Mellanlägg
31162816	Spinneret	A small metal plate, thimble, or cap with fine holes through which a cellulose or chemical solution is forced in the spinning of man-made filaments.	スピナレット, 방적돌기, Hilera, Filamentspinnare
31162817	Wire rope socket	A type of metal device with a funnel shaped receptacle or basket made to secure the tip of the wire rope hardened by the casted metal or wedge.	ワイヤーロープソケット, 와이어로프 소켓, Soporte de cuerda de ropa,
31162818	Anti corrosion anode	An electrically charged device used in corrosion control systems to prevent corrosion of underground or underwater steel structures.	防食陽極, 부식방지용 양극, Ánodo anti corrosión,
31162819	Control lever	An elongated control device generally shaped like an arm. There are remote control levers and manual control levers.	操作レバー, 제어 레버, Palanca de control,

31162904	Wire rope clamps		钢索夹, 鋼索夾, Wire rope clamps, Ijzerdraadklemmen, Fixations pour câbles métalliques, Drahtseilklemmen, Drótkötélszorítók, Morsetti a cavo metallico, ワイヤーロープクランプ, 와이어로프클램프, Vaierklemmer, Braçadeiras de cabo de aço, Abrazadera de cable metálico, Linlås
31162905	Beam clamps		线担夹, 線擔夾, Beam clamps, Balkklemmen, Fixations de poutre, Trägerklammern, Tartószorítók, Morsetti di trave, ビームクランプ, 빔클램프, Bjelketvinger, Braçadeiras de viga, Abrazadera para viga doble t, Balkklämmor
31162906	Hose or pipe clamps		软管和导管夹, 軟管和導管夾, Hose or pipe clamps, Colliers de serrage, Schlauch- oder Rohrklemmen, Tömlő ill. cső bilincs, ホース留め金またはパイプクランプ, 호스 또는 파이프용 클램프, Slange- eller rørklemmer, braçadeiras de mangueira ou tubo, Abrazaderas de manguera o tubo, Slang- och rörklämmor
31162907	Extending clamp	A device used to join, support or compress mechanical or structural parts. One or both arms of the clamp are adjustable to accommodate the size of the workpiece.	Fixation à coulisse, 拡張クランプ, 확장클램프, Abrazadera de extensión, Förlängningsklämma
31162908	Miniature clamp	A type of clamp designed for use with small workpieces or used in small spaces.	Fixation miniature, ミニチュアクランプ, 소형클램프, Abrazadera en miniatura, Miniatyrklämma
31162909	Isophonic clamp	A type of clamp designed to be used on hoses and pipes to reduce sound vibrations.	Fixation isophonique, アイソフォニック・クランプ, 떨림방지클렘프, Abrazadera isofónica, Isofonisk klämma
31162910	Drill clamp	A type of holding device designed to keep drilling tools in place and immobile. It can include claws for better support.	Fixation d'outil de forage, ドリルクランプ, 드릴클램프, Abrazadera de taladro, Borrklämma
31162911	Hand screw clamp	A type of clamp also known as 'toolmaker's clamp' that is used mainly in metalwork.The adjustable jaws will fit angled material.	ハンドスクリュークランプ, 손나사 클램프, Abrazadera de tornillo manual, Handskruvad klämma
31162912	Sash clamp	This type of clamp has a flat bar with a fixed jaw that adjusts with a screw action and a sliding jaw that is locked in position along the bar to suit the job being undertaken.Used for big tasks such as sash windows, table tops, doors etc.	サッシュクランプ, 섀시 클램프, Abrazadera de banda, Fönsterklämma

31162913	Bench clamp	A type of clamp designed to fit workbenches with holes 18-38mm.	ベンチクランプ, 벤치 클램프, Abrazadera de banco, Bänkklämma
31162914	Web clamp	A type of clamp with a nylon band that wraps around the object and is tightened with a ratchet.Can be used with corner gripping pieces so that pressure is evenly distributed.	ウェブクランプ, 웹 클램프, Abrazadera de red, Nätklämma
31162915	Miter clamp	A type of clamp designed for gripping two pieces of material with mitered ends at right angles. There are two types: internal (upper) or external (lower).	コーナークランプ, 각도 클램프, Abrazadera de ingletes, Fogklämma
31162916	Quick action clamp	A type of hand operated clamp designed for quickly and easily clamping all kinds of workpieces. It has a single finger release.	クイックアクションクランプ, 퀵액션 클램프, Abrazadera de acción rápida, Snabbklämma
31162917	Quick grip clamp	A type of clamp designed for one-handed operation with adjustable pressure.It is best for thin pieces as the jaws do not close squarely.	クイックグリップクランプ, 퀵그립 클램프, Abrazadera de agarre rápido, Snabbgreppsklämma
31162918	Power clamp	A type of clamp that applies maximum force in a single movement.	パワークランプ, 파워 클램프, Abrazadera de potencia, Kraftklämma
31162919	Speed clamp	A type of clamp comprised of a metal bar with serrations.As clamping pressure is applied the serrations lock and secure the sliding head.	スピードクランプ, 스피드 클램프, Abrazadera de velocidad, Snabbklämma
31162920	Picture frame clamp	A type of clamp designed to hold the mitered corners of picture frames.	ピクチャーフレームクランプ, 그림틀 클램프, Abrazadera de marco de fotos, Bildramsklämma

31163006	Grid coupling	Coupling that uses a serpentine grid to connect two hubs.	Accouplement à ruban, Rácsköri csatolás, グリッドカップリング, 격자형연결기, Acoples de rejilla, Gallerkoppling
31163007	Chain coupling	Coupling that uses double roller chain to connect two hubs.	Accouplement à chaîne, Láncos csatolás, チェーンカップリング, 체인형연결기, Acoples de cadena, Kedjekoppling
31163008	Disc coupling	Coupling that uses one or more disks or disk packs to connect two hubs via staggered pins.	Accouplement à disque, Korongos csatolás, ディスクカップリング, 디스크형연결기, Acoples de disco, Skivkoppling
31163009	Rigid coupling	Solid couplings that rigidly connect two shafts together	Accouplement rigide, Merev csatolás, 固定継手, 고정형연결기, Acoples rígidos, Fast koppling
31163010	Spider coupling	A connecting device used on shafts of rotary machines to make connections. It is star or spider shaped, elastic but very resistant.	Raccord creux, スパイダーカップリング, 스파이더커플링, Acoples de araña, Spindelkoppling

© 2016 United Nations Development Programme and GS1 US

31163011	Jaw coupling	A type of coupling device that requires no lubrication and has no metal to metal contact.	Embrayage à griffes, ジョーカップリング, 죠커플링, Acoples de mordaza, Servokoppling
31163012	Coupling half	A type of coupling for interconnecting fire or other hose to a reciprocal connection mounted on another hose or on a fixed object.	カップリングハーフ, 커플링 하프, Acoples medios, Kopplingshälft
31163013	Shaft coupling	A device for providing a connection, readily broken and restored, between two adjacent rotating shafts.	シャフトカップリング, 샤프트 커플링, Acoples de ejes, Axelkoppling
31163014	Rotary coupling	A type of coupling designed to eliminate the use of seals in rotating and reciprocating machines such as seal-less pumps and pistons.	ロータリーカップリング, 로터리 커플링, Acoples giratorio, Rotationskoppling
31163015	Oldham coupling	A type of coupling consisting of a pair of disks, one flat and the other hollow, both pinned to the ends of the shafts.A third, center disk with a pair of lugs projecting from each face of the disk fits into the slots between the two end disks and enables one shaft to drive the other shaft.	オールダムカップリング, 올드햄 커플링, Acoples oldham, Oldham-koppling
31163016	Rod coupling	A double-pin-thread coupling used to connect two drill rods.	ロッドカップリング, 로드 커플링, Acoples de varilla, Stångkoppling
31163017	Coupling rod	A device that connects the drive wheels of a locomotive.	カップリングロッド, 커플링 로드, Varilla de acople, Kopplingsstång
31163018	Bellows coupling	A type of flexible coupling designed to transmit torque while permitting some radial and axial and angular misalignment.	ベローズカップリング, 벨로우즈 커플링, Acoples de fuelle, Bälgkoppling
31163019	Magnetic coupling	A type of coupling designed to transmit rotational and/or linear motion without direct contact using a magnetic field.	電磁カップリング, 마그네틱 커플링, Acoples magnéticos, Magnetkoppling
31163020	Flange coupling	A type of coupling having two separate cast iron flanges.Each flange is mounted on the shaft end and keyed to it.	フランジカップリング, 플랜지 커플링, Acoples de brida, Flänskoppling
31163021	Universal flexible coupling	A type of coupling where the angular or offset misalignment of the shaft reaches values which cannot be accommodated by flexible couplings.	ユニバーサルフレキシブルカップリング, 공통 플렉서블 커플링, Acople universal flexible, Universell flexibel koppling
31163022	Clamp coupling	A type of coupling sometimes called a compression coupling or a ribbed coupling. It is a modification and an improvement on the sleeve coupling.	クランプカップリング, 클램프 커플링, Acoples de abrazadera, Klämkoppling
31163023	Muff coupling	A type of device that has two shafts to face and fit together within a cast iron or cast steel cylinder and is bound with keys. This device is the simplest coupling to use if the axis diameter and the load for conveyance are very small.	マフカップリング, 머프 커플링, Acoples de mariposa,
31163024	Flange type flexible coupling	A coupling that drills the diameter of the bolt hole of the main body of the flange slightly large to permit the deviation of the shaft center in a way of inserting the bush and convey the power by fixing the flange with the bolt.	フランジ型フレキシブルカップリング, 플랜지형 플렉시블 커플링, Acoples de brida tipo flexible,
31163025	Split muff coupling	A coupling that holds the clamp of two semi cylindrical shapes with the bolt.	スプリットマフカップリング, 분할 원통 커플링, Acoples de mariposa partida,

31163026	Half lap coupling	A coupling that secures the common key by overlapping at both ends to make slightly larger and sloped within the muff.	ハーフラップカップリング, 반중첩 커플링, Acoples de media vuelta,
31163027	Roller chain coupling	A coupling that tightens the two lines of roller chain to fit at the end of both axes attached to the sprocket to deliver the driving force.	ローラーチェーンカップリング, 롤러체인 커플링, Acoples de cadena giratoria,
31163028	Grid type flexible coupling	A coupling that has the structure to deliver power by inserting the grid to the grooves that are paved on the hub.	グリッド型フレキシブルカップリング, 그리드형 플렉시블 커플링, Acoples de rejilla de tipo flexible,
31163029	Friction clip coupling	A coupling that is tightened by pounding at both ends of the soft steel ring. After covering the connection part of both axes has the cast iron split muff with the surrounding conical shape.	摩擦筒型カップリング, 마찰 원통 커플링, Acoples de clip de fricción,
31163030	Dura flex coupling	A coupling that is formed with two elements of urethane rubber and metal hub that may permit the eccentricity between axes. It has outstanding oil-free and chemical resistance properties.	デュラフレックスカップリング, 듀라플렉스 커플링, Acoples duraflex,
31163031	Sellers coupling	A coupling that tightens the conical shaped wedge with the slit between the two axes and uses the friction force with the shaft by the tightening of the taper the bolt.	セラーズカップリング, 셀러 커플링, Acoples de vendedores,
31163032	Electrical coupling adapter	An adaptor that is used to electrically or physically connect for equipment to equipment, or equipment and other subject.	電気カップリングアダプター, 연결용 어댑터, Adapatador eléctrico de acoples,

31163216	Cable hanger	Used as a positioning connector (hanger) on a wire rope, it allows the wire rope to be inserted into a cam from only one direction without allowing the rope to slip or pull out. It consists of a metal frame with an eye (loop) at one end and a metal cam inside the frame. Once it is slid on the span of the wire rope, it is connected from the eye end to an anchor.	Portes câbles, Kábel függesztő, ケーブルハンガー, 케이블행거, Colgador de cable, Kabelhängare
31163217	Quick disconnect shaft hub locking bushing	Tapered style shaft hub bushing	Douille de serrage arbre-moyeu à fixation rapide, Gyorslekapcsoló tengelyagy záróper sely, 急速着脱シャフトハブロッキング、ブッシング, 신속교체용 축부싱, Bujes de bloqueo de tubo de desconexión rápida
31163218	Bearing adapter sleeve	Tapered adapter sleeves used to mount tapered bore bearings.	Manchon de serrage de roulement, Csapágy szorítóhüvely, 軸受アダプタスリーブ, 베어링어댑터슬리브, Manga para adaptación de rodamiento, Kullageradapterhylsa
31163219	Cylindrical pin	A fastening device employing a shaft to connect two materials while enabling their movement.	Goupille cylindrique, 円筒ピン, 원통형핀, Pasador cilíndrico, Cylinderstift
31163220	Pin assortment set	A collection of different types of pin fasteners packaged and sold together.	Assortiment de goupilles, ピン組み合わせセット, 핀세트, Juego de pines diversos, Stiftsats
31163221	Panel pin	A small slender pin with a very small head, mainly used for attaching plywood or hardboard to supports.	Broche de panneau, パネル用くぎ, 패널핀, Llave de pasador, Panelstift
31163222	Square key	Square key is of uniform cross-section and used for power transmission.	Clavette carrée, 角キー, 사각키, Llave cuadrada, Fyrkantsnyckel
31163223	Rectangular key	Rectangular key is of rectangular cross-section and is used for power transmission.	Clavette rectangulaire, 方形キー, 장방형키, Llave rectangular, Rektangelnyckel
31163224	Taper key	Taper keys is of unifom width and height and is tapered. It is used for power transmission.	Clavette inclinée, 勾配キー, 경사키, Llave cónica, Konisk nyckel
31163225	Gib head key	A type of power transmission device similar to the square key.	Clavette à talon, 凹頭キー, 비녀키, Llave de broche de cuña, Hakkilsnyckel
31163226	Circlip	A type of spring ring, but smaller, that has a hole at either end for receiving the pins of special pliers.	サークリップ, 서클립, Anillo de seguridad, Ringklämma
31163227	Flinger	A ring which is either machined around a shaft or fixed on it.	フリンガー, 플링거, Anillo en eje (flinger), Pariklämma

31163228	Split ring	A ring with overlapped or interlocked ends which may be sprung apart so that objects, as keys, may be strung upon the ring or removed from it.	分割リング, 스플릿링, Anillo partido, Delad ring
31163229	Metal retaining clip	A fastener made of metal used to secure the parts of a chain.	金属リテーニングクリップ, 금속멈춤클립, Clip retenedor metálico, Hållarklämma i metall
31163230	Plastic retaining clip	A fastener made of plastic used to secure the parts of a chain	プラスチック・リテーニングクリップ, 플라스틱 멈춤 클립, Clip retenedor plástico, Hållarklämma i plast
31163231	Pipe retaining collar	A round plate that has the shape of flange joined with the bolt to tighten the rubber ring to maintain the air-tightness of pipe joint in the cast iron pipe and polyethylene pipe.	パイプ・リテーニングクリップ, 파이프 고정용 칼라, Collar de retención de tubos,

Class 31163300 Studs

Definition (if available) A type of fastener, often attached to a larger part, with threads at one or both ends used to join multiple parts.

Commodity	Commodity Title	Definition	Synonym
31163301	Double ended stud	A stud threaded at both ends.	填隙片, 填隙片, Shim, Shim, Beilagen, Alátétlemez, Zeppa, 双端スタッド, 양날 스터드, Mellomlegg, calços, Montante de dos extremos, Dubbelgängad bult
31163302	Weld or clinch stud	Studs designed to be welded or mechanically secured to a metal part.	溶接またはクリンチスタッド, 용접 또는 클린치 스터드, Montante para soldar, Svetsbult
31163303	Ball stud	Studs with a spherical or semi-spherical configuration at the end opposite the threads to facilitate pivoting and/or rotation.	ボール・スタッド, 볼 스터드, Montante de bola, Kulbult
31163304	Complex stud	A stud like component with other than straight shaft or other complex physical characteristics	コンプレックススタッド, 복합 스터드, Montante complejo,

Class 31163400 Metal nets and screening structures

Definition (if available) Assorted nets, baskets and other structures made of wire usually for safety and use at construction sites.

Commodity	Commodity Title	Definition	Synonym
31163401	Gabion	An iron net that is made for the net shape to fill in the stones. This product is widely used in various revetment works or watercourse works by filling the rocks.	蛇かご, 돌망태, Gavión,

31171533	Take up bearing and frame	Mounted bearing to be used in adjustable frames.	Palier coulisseaux tendeurs et corps, Csévélő csapágy és keret, テークアップ形ベアリングおよびフレーム, 테이크업 베어링 및 프레임, Rodamiento y marco ajustables, Huvudlager och hus
31171534	Tapped base bearing	Mounted bearing having tapped holes in its base for attachment.	Palier à base taraudée, Leágazásos fenekű csapágy, タップ付きベースベアリング, 텝베이스 베어링, Rodamiento de base cónica, Lager med fästhål i basen
31171535	Cartridge bearing	Bearing having the same properties as radial ball bearings except a wider width.	Roulement à cartouches, Töltényhüvelyes csapágy, カートリッジベアリング, 카트리지 베어링, Rodamiento de cartucho, Styrlager
31171536	Insert bearing	Bearing designed to be mounted into housing.	Roulement insert, Betétcsapágy, インサートベアリング, 삽입 베어링, Rodamiento de insertar, Insatslager
31171537	Combination bearing	Bearing having both ball and roller bearings, one to take thrust load while the other accepts radial load.	Roulement combiné, Kombinált csapágy, コンビネーションベアリング, 조합 베어링, Rodamiento de combinación, Kombinationslager
31171538	Four point bearing	Single row bearing designed to take radial load as well as axial load in both directions.	Roulement a quatre points, Négypontos csapágy, 4点ベアリング, 점접촉 베어링, Rodamiento de cuatro puntos, Fyrpunktslager
31171539	Bearing ball	A principal component in a bearing that enables the reduction of friction.	Bille de roulement, 軸受球, 베어링볼, Balinera, Lagerkula
31171540	Bearing needle	An important individual component of a bearing that is sold separately and serves to decrease the friction of the bearing.	Aiguille de roulement, 軸受針, 베어링니들, Aguja de rodamiento, Lagernål
31171541	Bearing roller	An important individual component of the bearing that is sold separately, and is used to reduce friction inside the bearings.	Galet de roulement, 軸受けローラー, 베어링롤러, Rodillo de rodamiento, Lagerrulle
31171542	Tensioner bearing	A friction reducing device designed to work with an axle, which it supports, while enabling another attached item to spin, absorbing the tension between the two.	Tendeur de roulement, テンショナー軸受, 텐셔너 베어링, Rodamiento tensionador, Lager för bältesspänning
31171543	Flexure bearing	A type of bearing which allows motion by bending a load element.	フレクシャーベアリング, 플렉셔 베어링, Rodamiento de flexión, Flexlager
31171544	Plummer block bearing	A mounted bearing used to provide support for a rotating shaft with the mounting surface on a parallel line with the axis of the shaft.	プランマーブロックベアリング, 플러머 블록 베어링, Bloque de rodamiento plummer, Lager för flänslagerhus

31171545	Bearing cover	A device that protects a bearing from contamination and loss of lubricant.There are two types:1/ non-removeable shields or 2/removeable seals that allow the bearing to be cleaned and re-lubricated.	ベアリングカバー, 베어링 커버, Cubierta de rodamiento, Lagerskydd
31171546	Reversible bearing	A type of bidirectional bearing having the capability of being reversible.	リバーシブルベアリング, 가역 베어링, Rodamiento reversible, Reversibelt lager
31171547	Cylindrical bearing	A type of bearing that has high radial capacity.These bearings feature low friction, which permits operation at high speed.	円筒ベアリング, 원통형 베어링, Rodamiento cilíndrico, Cylinderformat lager
31171548	Bearing withdrawal sleeve	A sleeve that is used to tighten the bearings with the inner diameter of the taper on the cylindrical shaft.	ベアリングけ取り外しスリーブ, 베어링 빼내기 슬리브, Manguito de retiro de rodamiento,
31171549	Jewel bearing	Material that is made for jewelry, like, sapphire, ruby and others, non-magnetic substance with a little loss on torque and friction of bearing for freely rotating equipment by securing the rotating shaft or axle and others of a machine on certain location.	宝石軸受, 보석 베어링, Rodamiento de joyería,
31171550	Combined ball roller bearing	A bearing that is designed for integrated use of needle roller and ball with the space saving-type by having the needle roller receive the load in the radial direction and having the ball receive the load in the shaft direction. This bearing is used for transmission engineering, machine tool and others.	結合ボールローラーベアリング, 볼롤러 복합 베어링, Rodamiento combinado de rodillo y balinera,
31171551	Oilless bearing	A bearing that is consisted of sleeves made in material of oilless metal that is contained of the firm shaft and lubricant oil which is used in the parts with less load applied. This is mainly used in the small motors, such as the cooling fan for computer.	オイルレスベアリング, 오일리스 베어링, Rodamiento sin aceite,
31171552	Thrust ball bearing	A ball bearing which is used in cases where the load is applied to the shaft direction. This is mainly used for mid- to low speed.	スラスト玉ベアリング, 스러스트 볼 베어링, Rodamiento de balinera de empuje,
31171553	Thrust roller bearing	A roller bearing which is used in the cases where the load is applied to the axis direction.	スラストローラーベアリング, 스러스트 롤러 베어링, Rodamiento de rodillo de empuje,
31171554	Guide bearing	A bearing that determines the shaft location or undertakes the role to guide the simple linear motion, not a bearing that supports the load applied to the rotating shaft.	案内軸受, 가이드 베어링, Rodamiento guía,
31171555	Roller bearing adapter assembly	An adaptor that combines the rolling bearing sleeve and the rolling bearing rock washer. This is the auxiliary part of bearing used to easily tighten the bearings with the tapering on the inside diameter on the cylindrical shaft.	ローラーベアリングアダプターアセンブリー, 롤러 베어링용 어댑터, Ensamble de adaptador de rodamiento de rodillos,
31171556	High performance insert bearing	A bearing for unit that prevents heat, vibration, noise and others which may be generated by high-speed rotation or is designed to display its capability required under the adverse environment of dust-proof, water-proof, heat-resistance, cold-resistance and others.	高性能インサートベアリング, 고성능 인서트 베어링, Rodamiento inserto de alto desempeño,
31171557	Journal bearing bushing	A bearing that supports the radial load that works vertically to the rotating shaft by forming the oil film from the sliding rotation for the bearing and journal.	ジャーナルベアリングブッシング, 저널 베어링용 부시, Buje de chumacera,
31171558	Linear and rotary motion roller	A cylindrical roller that has the hole in the central location in order to accommodate the pin or shaft to combine the push stick, inducement device, joint, rocker arm, rotation table or horizontal bar.	直線運動および回転運動ローラー, 직선 및 회전운동 롤러, Rodillo de movimiento lineal y giratorio,

31171559	Lock plate for roller bearing	A detent that is used for rolling bearing. It undertakes the roll to prevent the rotation of nuts for adaptor and shaft and it is used for the inside diameter number 44 or higher.	ローラーベアリング用ロックプレート, 롤러 베어링용 멈춤쇠, Placa de bloqueo para rodamiento de rodillo,
31171560	Locking snap ring for roller bearing	A ring that is designed to secure the shaft-direction location by loading onto the outside diameter of the rolling bearing.	ローラーベアリング用ロックスナップ, 롤러 베어링용 스냅링, Anillo de presión de bloqueo para rodamiento de rodillo,
31171561	Adapter sleeve for roller bearing	A part of an adaptor for rolling bearing that has the external diameter surface of taper and the smaller side to insert the nut. It is used to load onto the cylindrical-shaped shaft with the inner diameter of the taper.	ローラーベアリング用アダプタースリーブ, 롤러 베어링용 어댑터 슬리브, Manguito adaptador para rodamiento de rodillo,
31171562	Insert bearing with set screw locking	A bearing for unit that has the two fixed screws (grubs or set screws) on the inner collar. This device is appropriate to the device with the changing rotation direction. The inner collar is expanded on both sides and the standard product has two lubricant injection holes on the outer collar.	止めネジロック付きインサートベアリング, 고정 나사 부착 베어링, Rodamiento inserto con bloqueo de tornillo,
31171563	Insert bearing with eccentric locking collar	A bearing for unit that is used for consistent rotation direction. The inner collar is expanded in one or both sides and the standard product has two lubricant injection holes on the outer collar.	偏心固定輪付きインサートベアリング, 편심 고정륜 부착 베어링, Rodamiento de insertar con collar de bloqueo excéntrico,
31171564	Insert bearing with standard inner ring	A bearing for unit that is appropriate to the high-speed device with changing rotation direction. The width of inner collar and outer collar is the same and the standard product has two lubricant injection holes on the outer collar.	標準インナーリング付きインサートベアリング, 동심 고정륜 부착 베어링, Rodamiento de insertar con anillo interior estándar,

31181704	Stuffing box	A type of gland seal used to prevent leakage of fluid, such as water or steam, between sliding or turning parts of machine elements.	スタッフィング・ボックス, 패킹 상자, Caja de relleno, Packdosa
31181705	Seal backup ring	A type of ring having backup holding and sealing action. Back-up rings are washer-like devices that are used to prevent a seal from extruding through any gaps while under pressure. Back-up rings are not seals themselves, but are usually used in conjunction with O-rings in high-pressure applications and are installed in the downstream side of the gland.	シールバックアップリング, 밀봉 백업링, Anillo de sello de soporte,

Class 31181800 Automotive boots and covers

Definition (if available) A category of automotive parts composed of rubber, leather or other pliable materials used to shield or protect the interface of multiple moving components.

Commodity	Commodity Title	Definition	Synonym
31181801	Automotive transmission shift lever boot	Cover composed of rubber, leather or other pliable material to shield the mechanism of the transmission shift lever.	自動車トランスミッション・シャフトレバーブート, 자동차 변속기 레버 부트, Manija de palanca de cambios de transmisión automotriz, Växelspaksdamask för automatlåda

31201622	Multi purpose adhesive	A type of multi-purpose glue that can be used to bind many different types of materials together. Constituent materials vary.	Adhésif polyvalent, 万能型接着剤, 다용 도접착제, Adhesivo multi – propósito, Universallim
31201623	Contact adhesive	A type of adhesive that works only through the contact of two surfaces. It is fast drying, flammable and can be composed of different materials such as latex or rubber.	Adhésif de contact, コンタクト接着剤, 접촉형접착제, Adhesivo de contacto, Kontaktlim
31201624	Mounting adhesive	A type of adhesive used for attaching a graphic image --a photograph, print or poster, for example-- to a board substrate which may be rigid or semi-rigid.	Adhésifs de montage, 取り付け接着剤, 고정접착제, Adhesivo de montura, Fotolim
31201625	Putty primer	A first coat or layer of material given to any surface prior to application of putty.	Primaire pour mastic, パテプライマー, 퍼티프라이머, Base de masilla, Kitt-primer
31201626	Pressure sensitive adhesive PSA	A type of adhesive that forms a bond through the application of light pressure to the material to be bonded.	Adhésif sensible à la pression, 粘着材（ＰＳＡ）, 감압접착제, Adhesivo sensible a la presión psa, Tryckkänsligt lim
31201627	Anaerobic adhesive	A type of adhesive that cures in the absence of air.	Adhésif anaérobie, 嫌気性接着剤, 혐기성접착제, Adhesivo anaeróbico, Anaerobiskt lim
31201632	Silicone adhesive	A liquid adhesive containing silicone used in a variety of applications	シリコン系接着剤, 실리콘 접착제, Adhesivo de silicona,
31201633	Fluorocarbon adhesive	Adhesive substance containing a significant percentage of a fluorocarbon elastomer	フルオロカーボン系接着剤/フッ化炭素系接着剤, 불화탄소 접착제, Adhesivo de fluorocarbono,
31201634	Acrylic anerobic adhesive	Acrylic based adhesive that cures in the absence of oxygen	アクリル系嫌気性接着剤, 혐기성 아크릴 접착제, Adhesivo acrílico anaeróbico,
31201635	Polyurethane adhesive	Polyurethane polymer based liquid adhesive	ポリウレタン系接着剤, 폴리우레탄 접착제, Adhesivo de poliuretano,
31201636	Cyanoacrylate adhesive	Aggressive fast acting liquid adhesive based on various cyanoacrylate compounds	シアノアクリレート系接着剤, 시아노아크릴레이트 접착제, Adhesivo de cianoacrilato,
31201637	Foam type water stop material for communication	A product that foams and hardens when injected into empty hole in pipeline and gaps as a foaming resin.	通信用フォームタイプ止水材, 통신용 발포지수제, Material de comunicación tipo espuma para detener el agua,

Class 31201700 Sealants

Definition (if available) "A group of products used to close small openings that are difficult to shut with other materials, such as concrete, drywall, etc. Desirable properties of sealants include insolubility, corrosion resistance, and adhesion. Uses of sealants vary widely and sealants are used in many industries, for example, construction, automotive and aerospace industries. The main difference between adhesives and sealants is that sealants typically have lower strength and higher elongation than do adhesives. Since the main objective of a sealant is to seal assemblies and joints, sealants need to have sufficient adhesion to the substrates and resistance to environmental conditions to remain bonded over the required life of the assembly. Sealants fall between higher-strength adhesives at one end and extremely low-strength putties and caulks at the other. "

31211513	Marking paint	Also called inverted marking paint. Used in surveying, sports, construction and highway engineering to mark ground surfaces.	Peintures pour marquage au sol, マーキングペイント, 마킹페인트, Pintura de marcado invertido, Markeringsfärg
31211514	Cold galvanizing compound	A compound applied to bare clean steel for excellent corrosion protection. This coating was originally developed to prevent bare steel structures from rusting when exposed to the elements.	常温亜鉛めっき部品, 냉간 아연도금제, Compuesto de galvanización en frío, Kallgalvanisering
31211515	Solvent based paint	Paint containing a volatile solvent carrier	溶媒系塗料, 솔벤트성 페인트, Pintura basada en disolvente,
31211516	Baked finish paint	A paint that is made to form the paint coat by heating after applying the painting. This paint is mainly used for industrial use as home appliance and others.	焼付塗料, 소부 페인트, Pintura de terminado al horno,
31211517	Pattern finish paint	A type of paint that has the special denatured alkyd as the main ingredient. It forms the paint film with the beautiful dimensional pattern, and it is appropriate for finishing coat for plastering of various metal parts.	模様塗料, 무늬 페인트, Pintura de terminado patrón,
31211518	Anti rust paint	A type of paint that is made with the raw materials of rust resisting pigment and synthetic resin. This is used with the primer for rust-proofing and repairing of construction iron materials and steel structures.	防錆塗料, 방청 페인트, Pintura antióxido,
31211519	Aluminum paint	A type of paint that has the main ingredients of petroleum type synthetic resin and aluminum pigment. The product has strong adhesion, durability and anti-corrosion, outstanding weatherability and moisture resistance, and it is the paint appropriate to the steel-material facilities for the purpose of reflection of hot wire, prevention of moisture penetration and others.	アルミ塗料, 알루미늄 페인트, Pintura de aluminio,
31211520	Antifouling paint	A paint for final application on the surface exposed to the body of a ship and sea water.	防汚塗料, 오염방지 페인트, Pintura anti – incrustante,
31211521	Ready mixed paint	A dry oil paint that is used in the wooden material surface, metal surface, plywood, steel frame and others. The main ingredients are coloring pigments, body pigments, dry oil, alkyd resin varnish and others, and this paint liquefied them with sufficient mixed dispersion.	調合済塗料, 조합 페인트, Pintura premezclada,
31211522	Heavy duty coating	A paint that is used for the long-term conservation of steel structures, such as bridge, marine structure, power plant, various plants, ships and others which has special environment of the plant area and the coastal area that inflict severe corrosion to the steel structure, unlike general structures.	重防食塗装, 중방식 페인트, Pintura de trabajo pesado,
31211523	High temperature paint	Type of paint specially formulated for resisting high temperatures, such as: heaters, furnaces, chimneys, reactors, heat ducts, etc.	高温ペイント,

31301111	Brass open die machined forgings		加工的黄铜开模锻件, 加工的黃銅開模鍛件, Brass open die machined forgings, Geelkoperen open stempel machinale smeedstukken, Pièces de forge libre en laiton et usinées, Maschinell bearbeitete Freiformschmiedeteile aus Messing, Sárgaréz, megmunkált, szabadon alakító kovácsolt anyagok, Fucinature a stampo aperto lavorato di macchina in ottone, 黃銅殼自由鍛造品（機械加工）, 황동가공 자유단조품, Smigods i messing tilvirket maskinelt i åpne former, forjados de matriz aberta usinados de latão, Forjas de latón maquinadas con troquel abierto, Bearbetat friformssmide av mässing
31301112	Bronze open die machined forgings		加工的青铜开模锻件, 加工的青銅開模鍛件, Bronze open die machined forgings, Bronzen open stempel machinale smeedstukken, Pièces de forge libre en bronze et usinées, Maschinell bearbeitete Freiformschmiedeteile aus Bronze, Bronz, megmunkált, szabadon alakító kovácsolt anyagok, Fucinature a stampo aperto lavorato di macchina in bronzo, 青銅殼自由鍛造品（機械加工）, 청동가공 자유단조품, Smigods i bronse tilvirket maskinelt i åpne former, forjados de matriz aberta usinados de bronze, Forjas de bronce maquinadas con troquel abierto, Bearbetat friformssmide av brons

© 2016 United Nations Development Programme and GS1 US

31301113	Zinc open die machined forgings		加工的锌制开模锻件, 加工的鋅製開模鍛件, Zinc open die machined forgings, Zink open stempel machinale smeedstukken, Pièces de forge libre en zinc et usinées, Maschinell bearbeitete Freiformschmiedeteile aus Zink, Cink, megmunkált, szabadon alakító kovácsolt anyagok, Fucinature a stampo aperto lavorato di macchina in zinco, 亜鉛殻自由鍛造品（機械加工）, 아연가공 자유단조품, Smigods i sink tilvirket maskinelt i åpne former, forjados de matriz aberta usinados de zinco, Forjas de zinc maquinadas con troquel abierto, Bearbetat friformssmide av zink
31301114	Tin open die machined forgings		加工的锡制开模锻件, 加工的錫製開模鍛件, Tin open die machined forgings, Tinnen open stempel machinale smeedstukken, Pièces de forge libre en étain et usinées, Maschinell bearbeitete Freiformschmiedeteile aus Zinn, Ón, megmunkált, szabadon alakító kovácsolt anyagok, Fucinature a stampo aperto lavorato di macchina in lattina, すず殻自由鍛造品（機械加工）, 주석가공 자유단조품, Smigods i tinn tilvirket maskinelt i åpne former, forjados de matriz aberta usinados de estanho, Forjas de estaño maquinadas con troquel abierto, Bearbetat friformssmide av tenn

© 2016 United Nations Development Programme and GS1 US

31301115	Lead open die machined forgings		加工的铅制开模锻件, 加工的鉛製開模鍛件, Lead open die machined forgings, Loden open stempel machinale smeedstukken, Pièces de forge libre en plomb et usinées, Maschinell bearbeitete Freiformschmiedeteile aus Blei, Ólom, megmunkált, szabadon alakító kovácsolt anyagok, Fucinature a stampo aperto lavorato di macchina in piombo, 鉛殻自由鍛造品（機械加工）, 납가공 자유단조품, Smigods i bly tilvirket maskinelt i åpne former, forjados de matriz aberta usinados de chumbo, Forjas de plomo maquinadas con troquel abierto, Bearbetat friformssmide av bly
31301116	Precious metal open die machined forgings		加工的贵金属开模锻件, 加工的貴金屬開模鍛件, Precious metal open die machined forgings, Edelmetaal open stempel machinale smeedstukken, Pièces de forge libre en métaux précieux et usinées, Maschinell bearbeitete Freiformschmiedeteile aus Edelmetall, Nemesfém, megmunkált, szabadon alakító kovácsolt anyagok, Fucinature a stampo aperto lavorato di macchina in metallo prezioso, 貴金属殻自由鍛造品（機械加工）, 귀금속자유단조품, Smigods i edelmetall tilvirket maskinelt i åpne former, forjados de matriz aberta usinados de metais preciosos, Forjas de metales preciosos maquinadas con troquel abierto, Bearbetat friformssmide av ädelmetaller

© 2016 United Nations Development Programme and GS1 US

31301117	Composite open die machined forgings		加工的复合材料开模锻件, 加工的複合材料開模鍛件, Composite open die machined forgings, Samengestelde open stempel machinale smeedstukken, Pièces de forge libre en matériaux composites et usinées, Maschinell bearbeitete Freiformschmiedeteile aus Verbundwerkstoffen, Kettősfém, megmunkált szabadon alakító kovácsolt anyagok, Fucinature a stampo aperto lavorato di macchina in composito, 合成Ｖプロセス自由鍛造品（機械加工）, 복합재자유단조품, Smigods i kompositter tilvirket maskinelt i åpne former, forjados de matriz aberta usinados de compostos, Forjas compuestas maquinadas con troquel abierto, Bearbetat friformssmide av kompositmaterial
31301118	Nickel alloy open die machined forgings		加工的镍合金开模锻件, 加工的鎳合金開模鍛件, Nickel alloy open die machined forgings, Nikkellegering open stempel machinale smeedstukken, Pièces de forge libre en alliages de nickel et usinées, Maschinell bearbeitete Freiformschmiedeteile aus Nickellegierungen, Nikkelötvözet, megmunkált, szabadon alakító kovácsolt anyagok, Fucinature a stampo aperto lavorato di macchina in lega del nichelio, ニッケル合金自由鍛造品（機械加工）, 니켈합금가공 자유단조품, Smigods i nikkellegeringer tilvirket maskinelt i åpne former, forjados de matriz aberta usinados de liga de níquel, Forjas de aleación de níquel maquinadas con troquel abierto, Bearbetat friformssmide av nickellegeringar

© 2016 United Nations Development Programme and GS1 US

31301119	Non metallic open die machined forgings		加工的非金属开模锻件, 加工的非金屬開模鍛件, Non metallic open die machined forgings, Niet metalen open stempel machinale smeedstukken, Pièces de forge libre en matériaux non métalliques et usinées, Maschinell bearbeitete Freiformschmiedeteile aus Nichtmetallen, Nem fémes, megmunkált, szabadon alakító kovácsolt anyagok, Fucinature a stampo aperto lavorato di macchina in non metallico, 非金属自由鍛造品（機械加工）, 비금속자유단조품, Ikke-metallisk smigods tilvirket maskinelt i åpne former, forjados de matriz aberta usinados não metálicos, Forjas no metálicas maquinadas con troquel abierto, Bearbetat friformssmide av icke-metaller

31301204	Stainless steel closed die machined forgings		加工的不锈钢模锻件, 加工的不銹鋼模鍛件, Stainless steel closed die machined forgings, Roetsvrij stalen dichte stempel machinale smeedstukken, Pièces en acier inoxydable forgées en matrice fermée et usinées, Maschinell bearbeitete Schmiedeteile in geschlossenem Gesenk aus Edelstahl, Rozsdamentes acél, megmunkált, zártan alakító kovácsolt anyagok, Fucinature a stampo chiusa lavorato di macchina in acciao inossidabile (inox), ステンレス型打鍛造品（機械加工）, 단조스테인리스강비공개품, Smigods i rustfritt stål tilvirket maskinelt i lukkede former, forjados de matriz fechada usinados de aço inoxidável, Forjas de acero inoxidable maquinadas con troquel cerrado, Bearbetat sänksmide av rostfritt stål
31301205	Iron closed die machined forgings		加工的铁制模锻件, 加工的鐵制模鍛件, Iron closed die machined forgings, Ijzeren dichte stempel machinale smeedstukken, Pièces en fer forgées en matrice fermée et usinées, Maschinell bearbeitete Schmiedeteile in geschlossenem Gesenk aus Eisen, Vas, megmunkált, zártan alakító kovácsolt anyagok, Fucinature a stampo chiusa lavorato di macchina in ferro, 鉄型打鍛造品（機械加工）, 단조쇠비공개품, Smigods i jern tilvirket maskinelt i lukkede former, forjados de matriz fechada usinados de ferro, Forjas de hierro maquinadas con troquel cerrado, Bearbetat sänksmide av järn

© 2016 United Nations Development Programme and GS1 US

31301206	Aluminum closed die machined forgings		加工的铝制模锻件, 加工的鋁制模鍛件, Aluminum closed die machined forgings, Aluminium dichte stempel machinale smeedstukken, Pièces en aluminium forgées en matrice fermée et usinées, Maschinell bearbeitete Schmiedeteile in geschlossenem Gesenk aus Aluminium, Alumínium, megmunkált, zártan alakító kovácsolt anyagok, Fucinature a stampo chiusa lavorato di macchina in alluminio, アルミニウム型打鍛造品（機械加工）, 알루미늄가공 폐쇄단조품, Smigods i aluminium tilvirket maskinelt i lukkede former, forjados de matriz fechada usinados de alumínio, Forjas de aluminio maquinadas con troquel cerrado, Bearbetat sänksmide av aluminium
31301207	Magnesium closed die machined forgings		加工的镁制模锻件, 加工的鎂制模鍛件, Magnesium closed die machined forgings, Magnesium dichte stempel machinale smeedstukken, Pièces en magnésium forgées en matrice fermée et usinées, Maschinell bearbeitete Schmiedeteile in geschlossenem Gesenk aus Magnesium, Magnézium, megmunkált, zártan alakító kovácsolt anyagok, Fucinature a stampo chiusa lavorato di macchina in magnesio, マグネシウム型打鍛造品（機械加工）, 마그네슘가공 폐쇄단조품, Smigods i magnesium tilvirket maskinelt i lukkede former, forjados de matriz fechada usinados de magnésio, Forjas de magnesio maquinadas con troquel cerrado, Bearbetat sänksmide av magnesium

31301208	Titanium closed die machined forgings		加工的钛制模锻件, 加工的鈦制模鍛件, Titanium closed die machined forgings, Titanium dichte stempel machinale smeedstukken, Pièces en titane forgées en matrice fermée et usinées, Maschinell bearbeitete Schmiedeteile in geschlossenem Gesenk aus Titan, Titán, megmunkált, zártan alakító kovácsolt anyagok, Fucinature a stampo chiusa lavorato di macchina in titanio, チタニウム型打鍛造品（機械加工）, 티타늄가공 폐쇄단조품, Smigods i titan tilvirket maskinelt i lukkede former, forjados de matriz fechada usinados de titânio, Forjas de titanio maquinadas con troquel cerrado, Bearbetat sänksmide av titan
31301209	Beryllium closed die machined forgings		加工的铍制模锻件, 加工的鈹制模鍛件, Beryllium closed die machined forgings, Beryllium dichjte stempel machinale smeedstukken, Pièces en béryllium forgées en matrice fermée et usinées, Maschinell bearbeitete Schmiedeteile in geschlossenem Gesenk aus Beryllium, Berillium, megmunkált, zártan alakító kovácsolt anyagok, Fucinature a stampo chiusa lavorato di macchina in berillio, ベリリウム型打鍛造品（機械加工）, 베릴륨가공 폐쇄단조품, Smigods i beryllium tilvirket maskinelt i lukkede former, forjados de matriz fechada usinados de berílio, Forjas de berilio maquinadas con troquel cerrado, Bearbetat sänksmide av beryllium

© 2016 United Nations Development Programme and GS1 US

31301210	Copper closed die machined forgings		加工的铜制模锻件, 加工的銅制模鍛件, Copper closed die machined forgings, Koperen dichte stempel machinale smeedstukken, Pièces en cuivre forgées en matrice fermée et usinées, Maschinell bearbeitete Schmiedeteile in geschlossenem Gesenk aus Kupfer, Réz, megmunkált, zártan alakító kovácsolt anyagok, Fucinature a stampo chiusa lavorato di macchina in rame, 銅殼型打鍛造品（機械加工）, 구리가공 폐쇄단조품, Smigods i kobber tilvirket maskinelt i lukkede former, forjados de matriz fechada usinados de cobre, Forjas de cobre maquinadas con troquel cerrado, Bearbetat sänksmide av koppar
31301211	Brass closed die machined forgings		加工的黄铜模锻件, 加工的黃銅模鍛件, Brass closed die machined forgings, Geelkoperen dichte stempel machinale smeedstukken, Pièces en laiton forgées en matrice fermée et usinées, Maschinell bearbeitete Schmiedeteile in geschlossenem Gesenk aus Messing, Sárgaréz, megmunkált, zártan alakító kovácsolt anyagok, Fucinature a stampo chiusa lavorato di macchina in ottone, 黃銅殼型打鍛造品（機械加工）, 황동가공 폐쇄단조품, Smigods i messing tilvirket maskinelt i lukkede former, forjados de matriz fechada usinados de latão, Forjas de latón maquinadas con troquel cerrado, Bearbetat sänksmide av mässing

© 2016 United Nations Development Programme and GS1 US

31301212	Bronze closed die machined forgings		加工的青铜模锻件, 加工的青銅模鍛件, Bronze closed die machined forgings, Bronzen dichte stempel machinale smeedstukken, Pièces en bronze forgées en matrice fermée et usinées, Maschinell bearbeitete Schmiedeteile in geschlossenem Gesenk aus Bronze, Bronz, megmunkált, zártan alakító kovácsolt anyagok, Fucinature a stampo chiusa lavorato di macchina in bronzo, 青銅殻型打鍛造品（機械加工）, 청동가공 폐쇄단조품, Smigods i bronse tilvirket maskinelt i lukkede former, forjados de matriz fechada usinados de bronze, Forjas de bronce maquinadas con troquel cerrado, Bearbetat sänksmide av brons
31301213	Zinc closed die machined forgings		加工的锌制模锻件, 加工的鋅制模鍛件, Zinc closed die machined forgings, Zink dichte stempel machinale smeedstukken, Pièces en zinc forgées en matrice fermée et usinées, Maschinell bearbeitete Schmiedeteile in geschlossenem Gesenk aus Zink, Cink, megmunkált, zártan alakító kovácsolt anyagok, Fucinature a stampo chiusa lavorato di macchina in zinco, 亜鉛殻型打鍛造品（機械加工）, 아연가공 폐쇄단조품, Smigods i sink tilvirket maskinelt i lukkede former, forjados de matriz fechada usinados de zinco, Forjas de zinc maquinadas con troquel cerrado, Bearbetat sänksmide av zink
