This includes the Bluetooth standard.	无线网络接口板, 無線網路介面卡, Trådløst netværksinterfacekort, Interface kaarten voor draadloos netwerk, Cartes d'interface réseau sans fil, Drahtlose Netzinterface Karten, Vezetéknélküli hálózati interfész kártyák, ワイヤレス・ネットワーク・インタフェース・カード, 무선네트워크 인터페이스카드, Grensesnittkort til trådløse nettverk, Cartões de interface de rede sem fio, Tarjetas de interface de red inalámbrica, Trådlösa nätverkskort
43201410	Switch ports or cards	A specific line into a switch, specified by shelf, slot, and port within that slot.	转接口和卡, 轉介端口或卡, Switchport eller -kort, Cartes ou ports commutateur, Switch-Anschlüsse oder -Karten, Kapcsoló portok vagy kártyák, スイッチ・ポート、カード, 스위치포트 또는 카드, Svitsjporter eller -kort, Portas ou cartões do interruptor, Tarjetas o puertos de interruptor, Switchportar eller kort
43201411	Peripheral component interconnect PCI card	A card that is connected in a PCI expansion slot or motherboard to increase the connectivity of the computer.	ペリフェラル・コンポーネント・インターコネクト（ＰＣＩ）カード, 주변 기기 연결 PCI 카드, Tarjeta de interconexión de componente periférico pci, PCI-kort (Peripheral component interconnect)
43201412	PCMCIA or PC card	A computer system card developed by a consortium of the same name: Personal Computer Memory Card International Association (PCMCIA). that is used in tablet PCs, laptop or notebook computers and other computing devices to allow WI-FI connectivity without necessity of cables.	ＰＣＭＣＩＡまたはＰＣカード, PCMCIA 또는 PC 카드, Tarjeta pcmcia o pc, PCMCIA- eller PC-kort
43201413	Magnetic stripe card	A type of card capable of storing data by modifying the magnetism of tiny iron-based magnetic particles on a band of magnetic material on the card. The magnetic stripe, sometimes called a magstripe, is read by physical contact and swiping past a reading head.	磁気カード, 자기띠 카드, Tarjeta debanda magnética, Kort med magnetremsa
43201414	Hard disk protector	An anti-modification device which protects a hard disk from modification of programs or data by other persons except for the administrator.It is designed to be installed in an ISA slot of a computer.	ハードディスク・プロテクター, 하드디스크 보호기, Protector de disco duro, Hårddiskskydd
43201415	Subscriber identity module SIM card	A smart card that stores data for cellular telephone subscribers. The SIM holds personal identity information, cell phone number, phone book, text messages and other data. It can be thought of as a mini hard disk that automatically activates the phone into which it is inserted.	加入者識別モジュール・カード/SIMカード, 가입자인식 모듈카드, Tarjeta de módulo de identidad del suscriptor sim,
43201416	Data acquisition board	A board that implements the analysis on the application software by converting the analog signal that is inputted from the sensor to the digital data.	データ取得ボード, 데이터수집 보드, Tablero de adquisición de datos,

43201503	Central processing unit CPU processors	The central unit, or "brains" in a computer that contains the logic circuitry that performs the instructions of a computer's programs.	中央处理单元CPU, 中央處理單元CPU處理器, CPU'er, Processeurs de l'unité centrale UC, Prozessoren (CPUs), Központi feldolgozó egység CPU processzorok, 中央処理装置(CPU)プロセッサ, 프로세서, Prosessorer (CPU-er), Processadores de CPU unidade de processamento central, Procesadores de unidad de procesamiento central cpu, CPU-processorer (Central processing unit)
43201507	Daughterboards	A printed circuit board that plugs into another circuit board (usually the motherboard). A daughtercard is similar to an expansion board, but it accesses the motherboard components (memory and CPU) directly instead of sending data through the slower expansion bus. Processor cards belong to this catagory. Includes processor cards.	子板, 子板, Udvidelseskort, Cartes filles, Tochterplatinen, Alaplapok, ドータ・ボード, 도터보드, Datterkort, Placa-filha, Placas secundarias, Dotterkort
43201508	Dispersion compensation fiber module DCFMs	Modules used in optical networks to compensate for the distortion in optical signals as they are transmitted through the network. During long haul transmission in optical fiber cable, signal light is attenuated and signal shape is distorted by chromatic dispersion inherent in the optical fiber. By remedying the attenuation and distortion at the optical amplifier and dispersion compensation module, a large capacity transmission becomes possible.	色散补偿光纤模块DCFMs, 色散補償光纖單件DCFMs, DCFM'er (Dispersion Compensation Fiber Module), Modules de compensation de dispersion (DCFM), DCFMs (Dispersion Compensation Fiber Module), Szórási kompenzációs optikai modul DCFM-ek, 分散補償ファイバ・モジュール, 분산보정섬유모듈, DCFM-moduler (Dispersion Compensation Fiber Module), Módulo de fibra de compensação da dispersão DCFMs, Módulo de fibra de compensación de dispersión dcfm, DCFM-moduler (Dispersion compensation fiber module

43201509	Exchange datacom modules	Modules designed to transfer data to voice and voice to data in a telephony network.	交换数据通讯模块, 交換資料通訊單件, Exchange datacom moduler, Modules d'échange datacom, Vermittlungs-Datenübertragungsmodule, Adatkommunikációs cseremodulok, エクスチェンジ・データコム・モジュール, 변환데이터통신모듈, Datakommunikasjonsmoduler til telefonsentraler, Módulos datacom de troca, Módulos de intercambio de comunicación de datos, Datakommunikationsmoduler för växlar
43201513	Motherboards	A motherboard is the physical component in a computer that contains the computer's basic circuitry and other components. On the typical motherboard, the circuitry is imprinted or affixed to the surface of a firm planar surface and usually manufactured in a single step.	母板, 母板, Bundkort, Cartes mères, Hauptplatinen, Alaplapok, マザー・ボード, 주기판마더보드, Hovedkort, Placa-mãe, Placa central de microordenador., Moderkort
43201522	Parallel port cards	Parallel port cards are used for data transmission between input output devices and the cpu.Data transmission is two way in nature at any point of time.	并行接口卡, 平行端口卡, Kort til parallelport, Parallel poortkaarten, Cartes port parallèle, Parallel Anschlusskarten, Párhuzamos port kártyák, パラレル・ポート・カード, 병렬포트카드, Kort til parallelle porter, Cartões de porta paralela, Tarjetas de puertos paralelos, Kort för parallellportar
43201531	Video capture boards	Input devices to convert raw video into a digital form that can be stored on in digital media accessible to a computer.	视频俘获板, 視頻獲取板, Video capture kort, Panelen voor opvang videobeelden, Cartes d'acquisition vidéo, Videoeroberung Anschlagtafeln, Videójel érzékelő kártyák, ビデオ・キャプチャ・ボード, 비디오 캡처보드, Videofangstkort, Placas de video captura, Tarjetas de captura de video, Kort för videoinspelning

43201544	Interface bus converter or controller	Includes converters such as GPIB converter simply translate the data from one bus type to another. For instance, a RS232 to GPIB converter, translates the serial commands generated by the RS232 interface to GPIB commands. Many converters, are also controllers.	接口总线转换器和控制器, 介面匯流排轉換器或控制器, Interfacebuskonverter eller -controller, Contrôleur ou convertisseur de bus d'interface, Schnittstellenbuswandler oder Controller, Interfész busz konverter vagy vezérlő, インタフェース・バス・コンバータ、コントローラ, 인터페이스버스변환기 또는 제어기, Bussomformer eller -kontroller for grensesnitt, Barramento de interface de conversor ou controlador, Convertidor o controlador de bus de interface, Konverterare eller controller för gränssnittsbuss
43201545	Fax boards	It is a loop-start interface, four-port fax board for medium to heavy fax traffic on a LAN. It supports modems, ECM, advanced compression (MR and MMR), and BFT. When combined with fax server software it can be used for LAN fax broadcasting.	传真卡, 傳真板, Faxkort, Cartes fax, Faxkarten, Fax kártyák, ファックス・ボード, 팩스보드, Fakskort, Placas de fax, Tarjetas de fax, Faxkort
43201546	Audio conferencing boards	Conferencing resource boards provide for building solutions that range from small party conferences for call centers, small business applications, and chat lines to large systems including collaboration servers, Internet-based audio conferencing systems, and business audio conferencing solutions.	电话会议卡, 電話會議板, Lydkort, Cartes audioconférence, Audiokonferenzkarten, Audio konferencia kártyák, オーディオ会議ボード, 오디오회의용 보드, Audiokonferansekort, Placas de áudio conferência, Tarjetas de audio conferencia, Ljudkonferenskort
43201547	Voice boards	These boards are ideal building blocks for developers building cost-effective, highly scalable, voice applications for telephone networks or the Internet.	声卡, 音效板, Talekort, Cartes vocales, Sprachkarten, Hangkártyák, 音声ボード, 음성보드, Talekort, Placas de voz, Tarjetas de voz, Röstkort
43201549	Interface bus switches	An interface bus switch enables several controllers to share one or more devices, or lets a single controller operate multiple bus systems. An example is a GPIB or general purpose interface bus.	接口总线转换器, 介面匯流排轉換器, Interfacebus-switches, Commutateurs bus d'interface, Schnittstellenbus-Switches, Interfész busz kapcsolók, インタフェース・バス・スイッチ, 인터페이스버스스위치, Svitsjer til bussgrensesnitt, Interruptores de barramento de interface, Interruptores de interface de bus, Switchar för gränssnittsbuss

43201550	Network packet data synchronization device	The syncronisation device is connected to digital links connecting network hardware. It ensures that the 2 ends of the network hardware are synchronised to avoid bit slips and loss	网络数据包同步装置, 網路資料包同步裝置, Enheder til datasynkronisering, Dispositif de synchronisation de données de paquets sur réseau, Gerät zur Synchronisation von Datenpaketen im Netzwerk, Hálózati adatcsomag szinkronizáló berendezés, ネットワーク・パケット・データ同期デバイス, 네트워크패킷데이터동기화장치, Datasynkroniseringsenhet for nettverkspakker, Dispositivos de sincronização de dados de pacote de rede, Dispositivo de sincronización de paquete de datos de red, Datasynkroniseringsenhet för nätverkspaket
43201552	Hardware or telephony adapters	Electronic adapters to physically connect two or more devices. Examples are parallel to serial or parallel to SCSI converters; gender changers; USB, mouse, keyboard or memory stick adapters. Also, telephony adapters such as handset or headset adapters.	电话适配器与附件, 硬件或電話適配器, Hardware- eller telefonidaptere, Adaptateurs téléphoniques ou composants matériels, Hardware- oder Telefonadapter, Hardver vagy telefon adapterek, ハードウェア、テレフォニ・アダプタ, 하드웨어 전화통신어댑터, Maskinvare- eller telefoniadaptere, Hardware ou adaptadores de telefonia, Adaptadores para hardware o telefonía, Hårdvaru- eller telefoniadaptrar
43201553	Transceivers and media converters		Transceivere- og medieomformere, Emetteur-récepteurs et changeurs de fréquences média, Transceiver und Medienwandler, Adó-vevők és média átalakítók, トランシーバーおよびメディアコンバータ, 송수
43201554	Personal computer television PC TV tuners	TV tuners are used to watch TV on a personal commputer. They could be plug-in cards (on PCI bus) or external (usually on USB or Hi-Speed USB bus). They are similar to video capture boards but video capture boards can not capture TV signal.	Cartes tuner TV, PC-TV-Tuner, Személyi számítógép televízió PC TV tunerek, パソコンテレビ（PC TV）チューナー, 개인용 컴퓨터튜너, Sintonizadores de televisión personal por computador pc tv, TV-mo

43201555	PC radio tuners	Radio (usually FM) tuners used to listen to FM radio on a personal computer.	Tuner radio pour PC, PC-Radio-Tuner, PC rádió tunerek, PCラジオ・チューナー, 개인용 컴퓨터라디오튜너, Sintonizadores de radio para pc, Radiomottagare för PC
43201556	Small computer system interconnect SCSI adapters	Adapters providing SCSI interface. SCSI host based adapters could reside on PCI (PCI64 etc.), USB buses.	Adaptateurs SCSI, SCSI-Adapter (Small Computer System Interconnect), Kis számítógép rendszer összekapcsoló SCSI adapterek, 小型コンピュータ用システム相互接続（SCSI）アダプタ, SCSI 어댑터, Adaptadore
43201557	Redundant array of independent disks RAID controllers	RAID controllers provide SCSI, IDE/ATA or SerialATA interfaces. The key difference from usual storage controllers that they allow to create drive arrays with variable level of redundancy.	Contrôleurs de stockage (RAID), RAID-Controller (Redundant Array of Independent Disks), Független diszkek redundáns egységei RAID vezérlők, RAIDコントローラー, RAID 제어기, Controlad
43201558	Fibre channel controller	Controllers providing Fibre Channel interface to a personal computer or server. They are usually used for construction of SANs (Storage Area Networks).	Contrôleur Fibre Channel, Fibre Channel-Controller, Optikai csatorna vezérlő, ファイバー・チャンネル・コントローラー, 섬유채널제어기, Controlador de canales de fibra, Fiberkanal-controller
43201559	Serial port cards		Cartes port série, Soros port kártyák, シリアルポート・カード, 시리얼포트카드, Tarjetas de puerto serial, Kort för serieportar
43201560	Coprocessor	A processor that is used for the purpose of assisting the central processing unit CPU from the computer system.	コプロセッサー, 보조프로세서, Coprocesador,

Class 43201600 Chassis components

Definition (if available) Components that are used to provide the casing and connections for information technology equipment.

Commodity	Commodity Title	Definition	Synonym
43201601	Computer chassis	A chassis is encloser designed to protect computer sub-assemblies or components	计算机机箱, 電腦機箱, Chassis, Boîtiers d'ordinateur, Computergehäuse, Számítógép ház, コンピュータ・シャーシ, 컴퓨터섀시, Kabinetter til datamaskiner, Chassi do computador, Carcasas de computadoras, Datorchassin

43201602	Network equipment chassis	A network chassis or rack mount is usually modular and easily scalable, designed for efficiently grouping networking equipment and wiring. For example, a network chassis sits in the wiring closet and connects each data line to the network backbone	网络设备机箱, 網路設備機箱, Netværkschassis, Boîtiers d'équipement réseau, Gehäuse für Netzwerkgeräte, Hálózati berendezés ház, ネットワーク機器のシャーシ, 네트워크장비섀시, Kabinetter til nettverksutstyr, Chassi de equipamento de rede, Carcasas de equipos de red, Nätverkschassi
43201603	Chassis stacking components	Chassis peripheral used to hold physically connect a chassis to it's components.	机箱堆积组件, 機箱堆積組件, Chassis-stablingskomponenter, Composants d'empilage pour boîtiers, Komponenten zur Gehäusestaplung, Ház szerelvény részegységek, シャーシ・スタッキング部品, 섀시스태킹부품, Stablekomponenter til kabinetter, Componentes de empilhamento de chassis, Componentes de apilamiento de carcasas, Staplingskomponenter för chassin
43201604	Electronic equipment bays or baskets	A component designed to hold a specific device within a chassis.	电子设备挡板和支架, 電子設備擋板或支架, Lagringskabinet til elektronisk udstyr, Cases ou baies d'équipement électronique, Einschübe oder Körbe für elektronische Systeme, Elektronikus berendezéseket tartalmazó rész, 電子機器ベイ、バスケット, 전자장비베이 또는 바스켓, Rom eller kurver til elektonisk utstyr, Baias ou cestas de equipamento eletrônico, Bahías o canastas para equipos electrónicos, Fack eller korgar för elektronisk utrustning
43201605	Expanders	A component of a chassis designed to provide a spacer between employ slots or spaces that a smaller component was used.	扩展槽, 擴展槽, Udvidelsesanordninger, Expandeurs, Expander, Bővítők, エクスパンダ, 확장기, Utvidere, Expansores, Expansores, Expansionskort

43201608	Removable drive frames	It is fixed in the hard disk tower in order to place and connect the removable drive tray to the computer.	可拆装式传动机架, 可拆装式的驅動機架, Flytbare drevrammer, Racks amovibles, Wechselrahmen für Laufwerke, Eltávolítható meghajtó keretek, 取り外し可能ドライブ・フレーム, 탈착가능 드라이브프레임, Uttakbare stasjonsrammer, Quadros de unidade removíveis, Marcos de drive removibles, Flyttbara hårddiskramar
43201609	Storage device trays or assemblies	These trays are used to hold the storage devices like hard drive , tape drives , tape libraries. These trays sometimes come with attachment like extension assembly or external axis assembly or Expansion assembly units ,which makes the trays more flexible to accommodate additional storage units. Expansion Unit has control over all attached modules in the storage drive or library.This expansion unit allows the creation of a multi-module virtual library in a single rack mount configuration.The multi-unit configuration can also be disassembled at any time and each module redeployed independently to meet changes in backups	存储设备槽和组件, 儲存裝置槽或組件, Lagringsenhedsbakker eller -samlinger, Éléments ou plateaux pour unités de stockage, Speichergeräteinschübe oder Baugruppen, Eszköztároló tálcák vagy összeállítások, ストレージ装置トレイ、組立部品, 저장 장치 트레이 또는 조립체, Brett eller sammenstillinger til lagringsenheter, Bandejas ou conjuntos de dispositivo de armazenamento, Bandejas o ensamblajes para almacenamiento de dispositivos, Monterade lagringsenheter
43201610	Backplane or panels or assemblies	These are the enclosures for server or its parts . They come as screw-less plastic front panels, bottom panels, top panels, bottom panel and backplanes with door, and security door locks.These panels come with the slots to aid in assembling various peripheral controls of the networking equipment, server or computer. These panels sometimes comes as the combinational of one or more panels and are sold as panel assemblies.	底板、面板和组件, 底板、面板和組件, Backplane, paneler eller samlinger, Panneau arrière ou panneaux ou éléments, Anschlussleisten, Bedienfelder oder Baugruppen, Hátsó lemez vagy panelek vagy összeállítások, バックプレーン、パネル、組立部品, 백플레인패널 또는 조립체, Bakveggsplater, -paneler eller -sammenstillinger, Backplane ou painéis ou montagens, Placas traseras o paneles o ensamblajes, Paneler eller monteringsdelar till bakplan

43201611	Computer cradles	Computer cradles are the mounting devices to the computer. Different types of mounts are used secure different types of computers.This cradle includes adapters,cables and vibration resistant isolators.For palmtops these mounts comes with the USB cable along with its adapter and comes with the power adapter.Palm computers are mounted on this cradle and this cradle enables the palm to connect to other computer for file or data or resource sharing.	计算机支架, 電腦支架, Computer-cradle, Nacelles pour ordinateur, Computeraufnahmen, Számítógép lengőállványok, コンピュータ・クレイドル, 컴퓨터크레들, Datamaskinmeier, Berços de computador, Bastidores (dispositivos de montaje) para computadores, Datorvaggor
43201612	Computer faceplates	Face plates are the protective covering for the front of the computers or its components. They are available in various colors for monitors, speakers, CPU towers.	计算机面板, 電腦面板, Computer, frontdæksler, Plaques avant d'ordinateur, Computerblenden, Számítógép előlapok, コンピュータのフェイスプレート, 컴퓨터 면판, Frontplater til datamaskiner, Placas planas de computador, Placas frontales para computadores, Frontpaneler för datorer
43201614	Console extenders	The console extender allows access to a computer system from a remote console (keyboard, monitor, and mouse). It is suitable for any kind of installations where the console needs to be kept in a conveniently accessible location, leaving the system equipment to reside in a safe place.	机座扩展板, 機座擴展板, Konsol forlængere, Raccordements de console, Konsolenerweiterungen, Konzol bővítők, コンソール用エクステンダ, 콘솔익스텐더, Konsollforlengere, Extensores de console, Extensores de consola, Förlängningsenheter för konsol
43201615	Drive bay cover kits	This commodity is used as a cover for the drive bay of the computer case	驱动器插槽挡板, 驅動器插槽裝備, Dækplade til drev bås, sæt, Kit cache pour baie, Abdeckungs-Kits für Laufwerksschächte, Meghajtó öböl fedő csomagok, ドライブ・ベイ用カバー・キット, 드라이브베이 덮개 키트, Dekselsett til stasjoner, kits de cobertura de baia de unidade, Kits de cubiertas para bahías de drives, Frontpanelsskydd till hårddiskplatser

43201616	Hard disk drive array towers	A tower for holding a group of hard disks.	硬盘阵列塔架, 硬碟驅動陣列塔, Harddisk array, Tours unités de lecteur de disque dur, Array-Tower für Festplattenlaufwerke, Merevlemez meghajtó rendezőtornyok, ハード・ディスク・ドライブ・アレイ・タワー, 하드디스크 드라이브 배열 타워, Tårn til harddiskrekker, Torres do array da unidade de disco rígido, Torres de arreglo de drives de discos duros, Hårddisktorn med plats för flera diskar
43201617	Card cages		Paniers à carte, Kártyafoglalatok, カード・ケージ, 카드케이지, Armazones para tarjetas, Kortburar
43201618	Computer rack component	Various accessories or components for computer racks (including rack shelves, panels, doors, conversion kits, etc.)	Composants pour rack d'ordinateurs, Számítógép fiók részegység, コンピュータ用ラック部品, 컴퓨터랙 부품, Componente de rack de computador, Komponenter för datorställ
43201619	Computer cooling fan	A device that ventilates the heat compulsively manually or automatically not to damage the device by the heat generated for long time of operation for the equipment on the rack.	コンピュータ冷却ファン, 컴퓨터 냉각팬, Ventilador enfriador de computador,

Class 43201800 Media storage devices

Definition (if available) A device with a read/write head for accessing magnetic or optical recorded media.

Commodity	Commodity Title	Definition	Synonym
43201801	Floppy drives	A device with a read/write head for accessing removable magnetic recording media typically encased in flexible or hard shell covers known as floppy disks.	软盘驱动器, 軟碟驅動器, Diskette, Floppy drives, Lecteurs de disquette, Diskettenlaufwerk, Hajlékony lemez meghajtók, フロッピー・ドライブ, 플로피디스크드라이브, Diskettstasjoner, Disquetes, Unidades de disco flexible, Diskettenheter
43201802	Hard disk arrays	A bundle of hard disks that are packaged together as one logical device.	硬盘阵列, 硬碟陣列, Diskette sæt, Unités de disques durs, Festplatten-Arrays, Merevlemez egységek, ハード・ディスク・アレイ, 하드디스크 어레이, Harddiskrekker, Arrays do disco rígido, Series de disco duro, Hårddiskstackar

Commodity	Commodity Title	Definition	Synonym
43202001	Compact disks CDs	A removable compact disc (CD) is a small, portable, round medium made of molded polymer for electronically recording, storing, and playing back audio, video or text in digital form. CD formats are read-only or recordable with a data storage capacity ranging from 640 - 720 MB	光盘CDs, 光碟CDs, Cd'er, Disques compacts CD, CDs (Compact Discs), CD-k, コンパクト・ディスク(CD), CD, CD-plater, CDs discos a laser, Discos compactos cd, CD
43202002	Blank tapes	A magnetically coated strip of plastic on which data can be encoded. Tapes storage capacities range from a few hundred kilobytes to several gigabytes. Tapes are sequential-access media, which means that to get to a particular point on the tape, the tape must go through all the preceding points. Because tapes are so slow, they are generally used only for long-term storage and backup or for transporting large amounts of data.	空白帯, 空白帶, Blanke databånd, Bandes vierges, Leerbänder, Üres szalagok, 空のテープ, 공테이프, Tomme bånd, Fitas em branco, Cintas en blanco, Tomma band
43202003	Digital versatile disks DVDs	A removable disk media that can be read-only or recordable. DVD or digital versatile/video disc - a type of CD-ROM that holds a minimum of 4.7GB (gigabytes), enough for a full-length movie. The DVD specification supports disks with capacities of from 4.7GB to 17GB and access rates of 600KBps to 1.3 MBps. DVD uses MPEG-2 to compress video data. Class 43211500 Computers

Definition (if available) A computer is a device that accepts information (in the form of digital data) and manipulates it for some result based on a program or sequence of instructions on how data is to be processed. Complex computers also include the means for storing data (including the program, which is also a form of data) for some necessary duration. A program may be invariable and built into the computer (and called logic circuitry as it is on microprocessors) or different programs may be provided to the computer (loaded into its storage and then started by an administrator or user). Today's computers have both kinds of programming.

Commodity	Commodity Title	Definition	Synonym
43211501	Computer servers	A computer which provides some service for other computers connected to it via a network. The most common example is a file server which has a local disk and services requests from remote clients to read and write files on that disk,often using Network File System (NFS) protocol or Netware on PCs.	计算机服务器, 電腦伺服器, Servere, Serveurs, Computerserver, Számítógép szerverek, コンピュータ・サーバ, 컴퓨터서버, Servere til datamaskiner, Servidores de computador, Servidores de computador, Datorservrar

43211503	Notebook computers	A notebook computer is a battery- or AC-powered personal computer generally smaller than a briefcase that can easily be transported and conveniently used in temporary spaces such as on airplanes, in libraries, temporary offices, and at meetings. A notebook computer, sometimes called a laptop computer, typically weighs less than 5 pounds and is 3 inches or less in thickness.	笔记本电脑, 手提電腦, Bærbare, Notebooks og tilbehør til disse, Kladblok computers, Ordinateurs bloc-notes, Notebooks, Notebook számítógépek, ノートブック型コンピュータ, 노트북컴퓨터, Bærbare datamaskiner, Computadores portáteis, Computadores notebook, Bärbara datorer
43211504	Personal digital assistant PDAs or organizers	Personal digital assistant (PDA) is a term for any small mobile hand-held device that provides computing and information storage and retrieval capabilities for personal or business use, often for keeping schedule calendars and address book information handy. Input is through a combination of pen and character recognition software.	个人数码助理PDA和个人日程安排系统, 個人數碼助理PDA或個人日程安排系統, Håndholdte PC'er samt tilbehør til disse, PDA assistants personnels ou organiseurs, PDAs oder Organizer, Digitális személyi asszisztens PDA-k vagy szervezők, パーソナル・デジタル・アシスタント(PDA)、オーガナイザ, PDA 또는 오거나이저, Personlige digitale hjelpere (PDA-er), PDAs assistentes digital pessoal ou organizadores, Asistentes personales digitales pda u organizadores, PDA:er eller fickdatorer
43211505	Point of sale POS terminal	A point-of-sale (POS) terminal is a computerized replacement for a cash register. Much more complex than the cash registers, the POS system can include the ability to record and track customer orders, process credit and debit cards, connect to other systems in a network, and manage inventory. Generally, a POS terminal has as its core a personal computer, which is provided with application-specific programs and I/O devices for the particular environment in which it will serve. A POS system for a restaurant, for example, is likely to have all menu items stored in a database. POS terminals are used in most industries that have a point of sale such as a service desk, including restaurants, lodging, entertainment, and museums. POS terminals are also Web-enabled, which makes remote training and operation possible, as well as inventory tracking across geographically-dispersed locations. 43211506	Thin client computers	A 'thin client' is a network computer without a hard disk drive, whereas a typical PC computer includes a disk drive. In client/server applications, a client designed to be especially small so that the bulk of the data processing occurs on the server. Although the term 'thin client' usually refers to software, it is increasingly used for computers, such as network computers and Net PCs, that are designed to serve as the clients for client/server architectures. Thin client is a low-cost, centrally-managed computer devoid of CD-ROM players, diskette drives, and expansion slots.	精简型电脑, 精簡型電腦, Tynde klienter, Clients légers, Thinclient Computer, Vékony kliens számítógépek, シン・クライアント・コンピュータ, 씬 클라이언트컴퓨터, Tynnklient-datamaskiner, Computadores de cliente insuficiente, Computadores de cliente ligero, Tunna klientdatorer

43211507	Desktop computers	A type of computer workstation intended for individual use that is faster and more capable than a personal computer. It is intended for business or professional use rather than home or recreational use. Workstations and applications designed for them are used by small engineering companies, architects, graphic designers, and any organization, department, or individual that requires a faster microprocessor, a large amount of random access memory (RAM), and special features such as high-speed graphics adapter	工作站, 工作間, Stationære PC'er, Workstations og tilbehør til disse, Ordinateurs de bureau, Desktop 'Computer, Asztali számítógépek, デスクトップコンピュータ, 데스크탑컴퓨터, Stasjonære datamaskiner, Estações de trabalho, Computadores de escritorio, Skrivbordsdatorer
43211508	Personal computers	A small, relatively inexpensive general purpose computer designed for an individual user. Personal Computers are all are based on microprocessor technology that enables manufacturers to put an entire CPU on one chip. Businesses use personal computers for word processing, accounting, desktop publishing, and for running spreadsheet and database management applications. They are frequently attatched to corporate networks. At home, the most popular uses for personal computers are for accessing the Internet and for playing games.	个人计算机, 個人電腦, Pc'er, Ordinateurs personnels, Personal Computer, Személyi számítógépek, パーソナル・コンピュータ, 개인컴퓨터, Personlige datamaskiner (PC-er), Computadores pessoais, Computadores personales, PC-datorer
43211509	Tablet computers	A computer in the form of a tablet designed to mimic the use of a traditional clip board. Larger and more powerful than a PDA, input is predominantly by the use of a stylus, finger touch or voice recognition. Tablet Computers usually run a specialised Tablet Computer Operating System and frequently have integrated wireless connectivity features, which enable them to communicate with corporate networks as the user moves through the building. They may or may not have an integral keyboard.	平板式计算机, 平板式電腦, Tablet PC, Ordinateurs tablettes, TablettComputer, Tábla PC-k, タブレット・コンピュータ, 타블렛컴퓨터, Tavle-PC-er, Computadores de mesa, Computadores de tableta, Tablet-datorer

43211513	Ultra mobile personal computer	A hybrid device that is a cross between a PDA and Tablet computer. What makes the ultra mobile PC (UMPC) unique is that it relies on a full operating system like Windows or Linux instead of standard PDA operating systems like Palm and Pocket PC. The UMPC can be considered an additional tool for mobile computing instead of a PDA replacement. It was developed as a joint development exercise between Microsoft, Intel, and Samsung, among others. Class 43211700 Computer data input devices

Definition (if available) Devices that enable a computer to access data inputs or feed signals from outside sources.

Commodity	Commodity Title	Definition	Synonym
43211701	Bar code reader equipment	Devices that enable a computer to access data inputs from bar codes. Bar code equipment consists of a barcode reader,code interpreter which can be a hardware or software,barcode printer and verifiers .Bar code equipment are used for identifying commercial products or parts.	条码识读器设备, 條碼識讀器設備, Stregkode udstyr, Équipement de lecture de codes à barres, Strichcodescannerausstattung, Vonalkód leolvasó berendezés, バーコード・リーダ, 바코드리더장치, Strekkodeleserutstyr, Equipamento de leitora de código de barra, Equipo de lectura de código de barras, Streckkodsläsare

43211702	Magnetic stripe readers and encoders	Magnetic card readers are designed to read the magnetic stripe data on credit cards, debit cards, drivers licenses, and I.D. cards with just a swipe and send the data to a PC. They require no software for their operation.The data sent to the PC will be the input for processing by a software which outputs the results.	磁卡片阅读器, 磁片卡閱讀器, Magnetiske kortlæsere, Magnetische kaart lezers, Lecteurs et encodeurs de bandes magnétiques, Magnetkartenleser, Mágneses csík leolvasók és kódolók, 磁気ストライプ・リーダーおよびエンコーダー, 자기띠 판독기 및 부호기, Magnetkortlesere, Leitoras de cartão magnético, Lectores y codificadores de banda magnética, Magnetkortsläsare och kodare
43211704	Currency recognition equipment	Currency verifiers are used to detect counterfeit bills, while tracking each bill. Optical scanning recognition, magnetic ink detection, and ultra-violet reading are among the most common methods for verifying the authenticity of currency, bank checks, travelers checks, credit cards, and other items of value.	当前值识别设备, 貨幣識別設備, Pengegenkendelsesudstyr, Apparatuur voor de herkenning van bankbiljeten, Équipement de reconnaissance de monnaie, Währungerkennung Datenkommunikationsgeräte, Valuta felismerő berendezés, 通貨認識裝置, 현금 인식 장치, Valutagjenkjenningsutstyr, Equipamento de reconhecimento de moeda corrente, Equipo de reconocimiento de billetes, Valutaavläsningsutrustning
43211705	Game pads or joy sticks	A device consisting of a hand held stick that pivots about one end and transmits its angle in two dimensions to a computer. Joysticks are often used to control games, and usually have one or more push-buttons whose state can also be read by the computer. Most I/O interface cards for IBM PCs have a joystick (game control) port.	游戏手柄和操作杆, 遊戲手柄或操作杆, Joysticks og Game Pads, Manettes de jeu et joysticks, Spielmatten oder Joysticks, Játék alátétek vagy botkormányok, ゲーム・パッド、ジョイ・スティック, 게임패드 또는 조이스틱, Styrespaker eller spillkontrollere, Enchimento de jogo ou joysticks, Almohadillas o joy sticks de juegos, Spelkontroller
43211706	Keyboards	The keyboard is a primary text input device typically with the same key arrangement as the typewriter . The keyboards may contain standard function keys, customizable keys or special key arrangements for ergo-dynamic consideration or for ease of use for learning such as the Dvorak system.	键盘, 鍵盤, Tastaturer, Claviers, Tastatur, Klaviatúrák, キーボード, 키보드, Tastaturer, Teclado, Teclados, Tangentbord
43211707	Light stylus	A light stylus for computers is an input device used to write text or draw lines on a surface using light. Used for graphics applications, such as CAD/CAM, where the stylus is attached to an electronically-sensitive tablet.	光笔, 感光筆, Lyspen, Crayons optiques, Leuchtstift, Könnyű hangszedő, ライトスタイラス, 광바늘 라이트 스타일러스, Lyspeker, Caneta de luz, Lápiz (stylus) para computador de luz, Ljuspenna

43211708	Computer mouse or trackballs	A mouse or trackball consists of a metal or plastic housing or casing, a ball that sticks out of the bottom or top of the casing and ,when rolled, a sensor sends impulses to the computer that causes a mouse-responsive program to reposition a visible indicator or cursor on the display screen. One or more buttons is used to select actions. This tracking device can be cabled or send infared signals to the computer.	计算机鼠标和跟踪球, 電腦滑鼠或跟蹤球, Mus og trackballs, Souris ou boules de commande, Computermaus oder Trackballs, Számítógépes egér vagy hanyattegerek, マウス、トラックボール, 컴퓨터마우스 또는 트랙볼, Mus til PC, Mouse ou trackballs do computador, Mouse o bola de seguimiento para computador, Datormus eller trackball
43211709	Pressure stylus	A stylus, aka 'pen' is an input device used to write text or draw lines by applying pressure to the input surface such as a tablet or digital display screen for a computer.	压感笔, 感壓筆, Stylus penne til bærbare computere, Stylets sensibles à la pression, Druckstift, Nyomás alapján működő hangszedő, 圧力スタイラス, 압력바늘, Trykkpeker, Caneta de pressão, Lápiz (stylus) de presión, Pennor för tryckkänsliga skärmar
43211710	Radio frequency identification devices	RFID (radio frequency identification) is a technology that incorporates the use of electromagnetic or electrostatic coupling in the radio frequency (RF) portion of the electromagnetic spectrum to uniquely identify an object, animal, or person. An RFID system consists of three components: an antenna and transceiver (often combined into one reader) and a transponder (the tag). RFID is sometimes called dedicated short range communication (DSRC).	射频识别设备, 射頻識別裝置, Udstyr til radiofrekvensidentifikation (ID), Dispositifs d'identification de fréquence radio, RFID Geräte, Rádiófrekvenciás azonosító berendezések, RF認証装置, 무선주파수식별장치, Utstyr til radiofrekvensidentifisering, Dispositivos de identificação de freqüência de rádio, Dispositivos de identificación de radio frecuencia, RF-avläsningsenheter
43211711	Scanners	A scanner captures images of photographic prints, bar codes, posters, magazine pages, and similar sources for computer editing and display. Scanners come in hand-held, feed-in, and flatbed types and for scanning black-and-white only or color. Optical character recognition software allows scanned printed documents to be converted to electronic text without having to type them in at a keyboard.	扫描仪, 掃描器, Scannere, Scanners, Scanner, Scanner, Szkennerek, スキャナ, 스캐너, Skannere, Scanners, Escáneres, Skannrar
43211712	Graphics tablets	Graphics tablets, also known as digitizers, are devices which are used to convert data in analog format into digital format.	图形输入板, 圖形輸入板, Grafiske tablets og digitizere, Tablettes graphiques, graphische Tablets, Grafikus tábla PC-k, グラフィック・タブレット, 그래픽타블렛, Grafikktavler, Mesas gráficas, Tabletas de gráficos, Grafiska tablet-datorer

43211713	Touch pads	A stationary pointing device used mainly on laptop computers. Touchpads provide a small, flat surface that you slide your finger over as an alternative to the mouse and works by sensing the user's finger movement and downward pressure. They were developed to provide a more natural or intuitive connection for the user than the mouse.	接触垫板, 接觸墊板, Touchpad, Voelkussens, Pavés tactiles, Intergrierte Berührungsfeld, Érintő alátétek, タッチ・パッド, 터치패드, Styreplater, Mesas sensíveis ao toque, Almohadillas (pads) táctil (touch), Tryckplattor
43211714	Biometric identification equipment	Devices that enable a computer to access data inputs that enable it to validate a user using visual frequencies.	生物识别设备, 生物識別設備, Udstyr til biometrisk identifikation, Équipement d'identification biométrique, Ausstattung für Biometrische Identifikation, Biometrikus azonosító berendezés, バイオメトリック認証装置, 생체인식장비, Biometrisk gjenkjenningsutstyr, Equipamento de identificação biométrica, Equipos de identificación biométrica, Biometrisk avläsningsutrustning
43211715	Portable data input terminals	Portable data terminals are small, lightweight data terminals designed for flexible, single-hand operation and built for unmatched durability. These terminals are ideal for a wide range of data tracking applications.These terminals can have the features like Small, lightweight contoured form factor which rests easily in the users hand, Configurable layout with multiple keyboards and display choices, High performance scan module with 180 degree rotation for aiming front, left or right, decodes standard range of 1D bar codes, Rechargeable battery option provides longer life for full-shift capabilities.	便携式数据输入终端, 攜帶型資料輸入終端機, Håndterminaler, Terminaux portatifs de saisie de données, tragbare Dateneingabeterminals, Hordozható adatbeviteli terminálok, ポータブル・データ入力端末, 휴대용 데이터입력터미널, Bærbare inndataterminaler, Terminais de entrada de dados portáteis, Terminales portátiles de ingreso de información, Bärbara dataterminaler

Class	43211900	Computer displays
	Definition (if available)	A display is a computer output surface or a screen and a projecting mechanism that shows text and graphic images. In some computers, the display is packaged in a separate unit called a monitor. In notebook computers, the display is integrated into a unit. Also called video display terminals VDTs, a display uses a cathode ray tube (CRT), liquid crystal display (LCD), light-emitting diode, gas plasma, or other image projection technology.

Commodity	Commodity Title	Definition	Synonym
43211901	Cathode ray tube CRT monitors	A cathode-ray tube and associated electronics connected to a computers video output. A monitor may be either monochrome (black and white) or colour (RGB). Colour monitors may show either digital colour (each of the red,green and blue signals may be either on or off, giving eight possible colours: black, white, red, green, blue, cyan,magenta and yellow) or analog colour (red, green and blue signals are continuously variable following any combination to be displayed). Digital monitors are sometimes known as TTL because the voltages on the red, green and blue inputs are compatible with TTL logic chips.	阴极射线管CRT显示器, 陰極射線管CRT顯示器, CRT skærme, Moniteurs cathodiques, CRT Monitore, Katódsugárcsöves CRT monitorok, CRTモニター, CRT 모니터, CRT-skjermer (Cathode Ray Tube), Monitores de CRT tubo de raios catódicos, Monitores para tubos de rayo catódico crt, CRT-skärmar

43211903	Touch screen monitors	A touch screen can be CRT or LCD and is a computer display screen that is sensitive to human touch, allowing a user to interact with the computer by touching pictures or words on the screen. Touch screens are used with information kiosks, computer-based training devices, and systems designed to help individuals who have difficulty manipulating a mouse or keyboard. Touch screen technology can also be used as an alternative user interface with applications that normally require a mouse, such as a Web browser. Often this uses beams of infrared light that are projected across the screen surface. Interrupting the beams generates an electronic signal identifying the location of the screen.Software interprets the signal and performs the required operation.	触摸屏监视器, 觸摸屏螢幕, Touch screen skærme, Monitors met gevoelig scherm, Moniteurs à écran tactile, Sensorbildschirm Monitor, Érintőképernyők, タッチ・スクリーン・モニタ, 터치스크린모니터, Berøringsskjermer, Monitores de tela sensível ao toque, Monitores de pantalla táctil (touch), Tryckkänsliga skärmar

43211907	Head mounted displays	Head-mounted displays are used with virtual reality systems. An HMD can be a pair of goggles or a full helmet. In front of each eye is a tiny monitor. Because there are two monitors, images appear as three-dimensional. In addition, most HMDs include a head tracker so that the system can respond to head movements. For example, if you move your head left, the images in the monitors will change to make it seem as if you're actually looking at a different part of the virtual reality. Class	43212100	Computer printers

Definition (if available): In computers, a printer is a device that accepts text and graphic output from a computer and transfers the information to paper, usually to standard size sheets of paper. Printers are sometimes sold with computers, but more frequently are purchased separately. Printers vary in size, speed, sophistication, and cost. In general, more expensive printers are used for higher-resolution color printing.

Commodity	Commodity Title	Definition	Synonym
43212101	Band printers	Band printers use an engraved band to print characters on to a sheet of paper.They can be used to print characters and not graphics.They are high speed printers which are mainly used for large greenbar reports, multi-part forms and printing labels.	带式打印机, 帶式印表機, Båndprintere, Tapeprinters, Imprimantes à bande, Banddrucker, Szalagos nyomtatók, バンド・プリンタ, 밴드 프린터, Båndskrivere, Impressoras de bandas, Impresoras de banda, Bandskrivare
43212102	Dot matrix printers	A kind of printer with a vertical column of up to 48 small closely packed needles or pins each of which can be individually forced forwards to press an ink ribbon against the paper. The print head is repeatedly scanned across the page and different combinations of needles activated at each point.	点阵打印机, 點陣印表機, Matrixprintere, Dot matrix printers, Imprimantes matricielles, Matrixdrucker, Pont mátrix nyomtatók, ドット・マトリックス・プリンタ, 도트기질 프린터, Punktmatriseskrivere, Impressoras de matriz de pontos, Impresoras de matriz de puntos, Matrisskrivare
43212103	Dye sublimination printers	Dye-Sub printers uses heat to melt wax away from a specially coated print ribbon similar to wax thermal printers, except that the heating array in the dye sublimation printer is much more precise and can heat the dyes in the transfer ribbon to one of 256 levels. Page-sized panels (8 1/2 x 11) on the ribbon consist of cyan, magenta and yellow dye. A thermal print head, consisting of thousands of heating elements, capable of precise temperature variations, moves across the transfer ribbon. Heat from the heating elements cause the color on the ribbon to vaporize and diffuse onto the surface of the specially coated paper. Precise temperature variations are responsible for the varying densities of color. The hotter the heating element, the more dye is vaporized and diffused onto the paper's surface. Dye sublimation printers are often identified with the ability to print continuous tone images. Although image quality is an advantage of dye sub printers, they are not as adept at rendering fine such lines as fonts	染料升华打印机, 染料昇華印表機, Plottere, Imprimantes à sublimation thermique, Farbsubliminationsdrucker, Festék szublimációs printerek, ダイ・サブリミネーション・プリンタ, 다이 서브리미네이션 프린터, Fargesublimeringsskrivere, Impressoras de subliminação de tintura, Impresoras de sublimación de teñido, Sublimeringsskrivare
43212104	Inkjet printers	A class of printer in which small ink droplets are sprayed electrostatically from a nozzle onto the paper. Ink-jet printers produce high-quality text and graphics.	喷墨打印机, 噴墨印表機, Blækprintere, Inkjet printers, Imprimantes à jet d'encre, Tintenstrahldrucker, Tintasugaras nyomtatók, インクジェット・プリンタ, 잉크젯 프린터, Blekkskrivere, Impressoras de jato de tinta, Impresoras de inyección de tinta, Bläckstråleskrivare

43212105	Laser printers	Uses the same technology as copy machines. A non-impact high-resolution printer which uses a rotating disk to reflect laser beams to forms an electrostatic image on an imaging [developer] drum. This attracts electrically charged toner (dry ink powder,generally a plastic heat-sensitive polymer) which is then transferred onto the paper and fused into it by heat. Laser printers produce very high quality text and graphics.	激光打印机, 雷射印表機, Laserprinter, Laser printers, Imprimantes laser, Laserdrucker, Lézer nyomtatók, レーザ・プリンタ, 레이저 프린터, Laserskrivere, Impressoras a laser, Impresoras láser, Laserskrivare
43212106	Line matrix printers	Contains a chain of characters or pins that print an entire line at one time. Line printers, also called daisy wheel printers, are used to print data line by line.They are faster than dotmatrix printers but produce low-quality print and can not print graphics.	线矩阵打印机, 線矩陣印表機, Matrixprintere, Lijn matrix printers, Imprimantes matricielles ligne, Zeilendrucker, Vonalas mátrix nyomtatók, ライン・マトリックス・プリンタ, 라인기질 프린터, Linjematriseskrivere, Impressoras de matriz de linha, Impresoras de matriz de líneas, Radmatrisskrivare
43212107	Plotter printers	A plotter is a printer that interprets commands from a computer to make line drawings on paper. Unlike a regular printer, the plotter can draw continuous point-to-point lines directly from vector graphics files or commands. It uses one or more pens that can be raised, lowered and moved over the printing media to draw graphics or text.The heart of the plotter is the printer head assembly,consisting of a horizontal bar and, attached to it, the head assembly holding the pen in use. The pen can be positioned horizontally by moving the pen assembly along the bar.Vertical positioning is achieved by either moving the bar(stationary page plotter) or the paper (rolling page plotter).Combinations of horizontal and vertical movement are used to draw arbitrary lines and curves in a single action, in contrast to printers which usually scan horizontally across the page.	绘图打印机, 繪圖印表機, Plottere, Traceurs, Plotterdrucker, Plotterek, プロッタ・プリンタ, 플로터 프린터, Grafskrivere (plottere), Impressoras plotadoras, Impresoras de plotter, Plotterskrivare
43212108	Thermal tape printers	An inexpensive printer that works by pushing heated pins against heat-sensitive paper. Thermal printers are widely used in calculators and fax machines.	热磁带打印机, 熱磁帶印表機, Termisk bon printere, Thermische tapeprinters, Imprimantes thermiques sur bande, Thermodrucker, Hőszalagos nyomtatók, 感熱テープ・プリンタ, 열전사 프린터, Skrivere med varmefølsomme skrivebånd, Impressoras de fita térmica, Impresoras de cinta térmica, Skrivare med värmekänsligt skrivarband

43221731	Underwater communication system	A complete set of communication equipments specially manufactured to enable the two-way communication under water.	水中通信システム, 수중통신장비, Sistema de comunicación bajo el agua,
43221732	Speaker control unit	A device to select or control the speaker located in an area to send to the group or region to be conveyed of broadcasting contents.	スピーカー・コントロール・ユニット, 스피커제어유닛, Unidad de control de altavoces,
43221733	Remote automatic meter reading system	A system that undertakes automatically from remote distance for the meter inspection on electricity, water, gas, hot water, heat meter and others within each individual home or business unit by using the Public Switched Telephone Network PSTN, wireless frequency, power line and others.	自動リモート・メーター読取システム, 원격자동검침시스템, Sistema de medición de lectura automática remota,

Class 43221800 Optical network devices

Definition (if available) Devices used to amplify an optical signal without converting the signal from optical to electrical and back again to optical energy.

Commodity	Commodity Title	Definition	Synonym
43221801	Optical amplifiers	An optical or IR repeater that amplifies a modulated laser beam directly, without opto-electronic and electro-optical conversion	光纤功率放大器, 光纖功率放大器, Optiske forstærkere, Amplificateurs optiques, Optische Verstärker, Optikai erősítők, 光増幅器, 광증폭기, Optiske forsterkere, amplificadores óticos, Amplificadores ópticos, Optiska förstärkare
43221802	Optical network or communication filters	A component that enables increasing or targeting the optical signal as it travels between destinations. Optical devices use to transmit a select range of light frequency, or to separate ranges of light frequencies in optical communication circuits	光纤网络和通信滤波器, 光纖網路或通信過濾器, Filtre til optiske net eller til optisk kommunikation, Filtres pour communication ou réseau optique, Optische Netzwerk oder Kommunikatioinsfilter, Optikai hálózati vagy kommunikációs szűrők, 光ネットワーク、通信フィルタ, 광네트워크 또는 광통신필터, Optiske nettverks- eller kommunikasjonsfiltre, filtros de rede ótica ou de comunicações, Filtros de redes o comunicaciones ópticas, Filter för optiska nätverk eller kommunikation
43221803	Optical adapters	Adapters that enable very high-speed data communication between servers and downstream network devices like switches and routers	光纤适配器, 光纖適配器, Optiske adaptere, Adaptateurs optiques, Optische Adapter, Optikai adapterek, 光アダプタ, 광어댑터, Optiske adaptere, adaptadores óticos, Adaptadores ópticos, Optiska adaptrar

43221810	Optical multiplexer	A type of device that converts and transmits the electric signal, such as multiplexing and demultiplexing for return signal of optical communication, detection of synchronizing signal, generation of synchronization clock, photoelectric transformation and others into optical transmission signal.	光合波器, 광다중화장치, Multiplexador óptico,
43221811	Optical switch	A type of device that is designed to switch the optical path by inserted in the optical fiber.	光スイッチ, 광스위치, Interruptor óptico,

Class 43222500 Network security equipment

Definition (if available) Equipment for securing networks.

Commodity	Commodity Title	Definition	Synonym
43222501	Firewall network security equipment	Provides a buffer between any connected public networks and a private network. A firewall router uses access lists and other methods to ensure the security of the private network.	防火墙网络安全设备, 防火牆網路安全設備, Firewall, Équipement de sécurité réseau pare-feu, Firewall Netzwerksicherheitsausstattung, Tűzfal hálózati biztonsági berendezés, ファイヤウォール・ネットワーク・セキュリティ機器, 방어벽 네트워크보안장비, Brannveggutstyr til nettverk, equipamento de segurança de rede Firewall, Equipo de seguridad de red cortafuegos (firewall), Brandväggar för nätverk
43222502	VPN network security equipment	Equipment that enable virtual private networks (VPNs) to use advanced encryption and tunneling to permit organizations to establish secure, end-to-end, private network connections over third-party networks, such as the Internet or extranets.	虚拟专用网VPN网络安全设备, 虛擬專用網VPN網路安全設備, VPN network security equipment, Équipement de sécurité réseau RPV, VPN Netzwerksicherheitsausstattung, VPN hálózatbiztonsági berendezés, VPNネットワーク・セキュリティ機器, 네트워크보안장비, VPN-utstyr til nettverk (Virtual Private Networking), equipamento de segurança de rede VPN, Equipo de seguridad de redes vpn, VPN-system för nätverk
43222503	Vulnerability Assessment Security Equipment		Vulnerability Assessment Security Equipment, Équipement de sécurité pour évaluation de la vulnérabilité, Sicherheitslückenberwertungsausstattung, Sebezhetőség elemző bizton
43222504	Radio jamming transmitter	A transmission device that interferes to mix with the different frequency without the purpose of reception when certain frequency is received.	無線通信妨害送信機, 전파방해장치, Transmisor de interferencias de radio,

Class	43222600	Network service equipment
Definition (if available)	Equipment, software, and services for transferring data in a network across standards based protocols	

Commodity	Commodity Title	Definition	Synonym
43222602	Cable head end equipment	A cable head-end is the facility at a local cable TV office that originates and communicates cable TV services and cable modem services to subscribers. In distributing cable television services, the head-end includes a satellite dish antenna for receiving incoming programming.	电缆头终端设备, 電纜頭終端設備, Udstyr til kabelendemuffe, Équipement de tête de ligne, Kabelspindelkastenausstattung, Kábelfej végberendezés, ケーブル・ヘッド・エンド機器, 케이블헤드엔드장비, Kabelhodeendeutstyr, equipamento de ponta de cabo, Equipo de centro distribuidor de cables, Utrustning för kabeländbitar
43222604	Content delivery networking equipment	Content caching networking solutions take advantage of IP infrastructure to provide enhanced scalability and help ensure high levels of content availability and security while enabling faster Web responses. Content networking equipment guarantees efficient delivery of high-bandwidth files, and decrease network congestion.	内容传输联网设备, 內容傳輸網路設備, Netværksudstyr til indholdslevering, Équipement pour réseau de diffusion de contenu, Netzwerkausstattung für die Inhaltbereitstellung, Tartalom szolgáltató hálózattechnikai berendezés, コンテンツ配信ネットワーキング機器, 콘텐츠전송 네트워킹장비, Nettverksutstyr til innholdslevering, equipamento de rede de fornecimento de conteúdo, Equipo de red de entrega de contenido, Nätverksutrustning för leverans av innehåll
43222605	Network gateway	In the IP community, an older term referring to a routing device. Today, the term router is used to describe nodes that perform this function, and gateway refers to a special-purpose device that performs an application-layer conversion of information from one protocol stack to another. Devices that perform application layer conversion from one protocol stack to another and devices used to connect voice-over-Internet Protocol (VoIP) and dial access solutions to the Public Switched Telephone Network (PSTN).	网关, 網路閘口, Netværks-gateway, Passerelle de réseau, Networkgateway, Hálózati kapu, ネットワーク・ゲートウェイ, 네트워크 게이트웨이, Nettverksgateway, gateway de rede, Puerta de acceso de redes, Nätverks-gateway

43222606	Internet service node startup kits	A bundle of equipment and documentation to provide a user the ability to get their network up and running.	英特网服务节点启始装备, 互聯網服務點基本裝備, ISN-startsæt (Internet Service Node), Kits de mise en route de nœuds de service Internet, Internetdienstknotenpunkt startup kit, Internet szolgáltatás csomópont induló csomag, インターネット・サービス・ノード・スタートアップ・キット, 인터넷서비스노드스타트업키트, Startsett for internettnode, conjuntos de partida de nó de serviço de Internet, Kit de inicio de nodo de servicio de internet, Startpaket för ISN (Internet service node)
43222607	Cache engine equipment	A network device designed to store copies of Internet pages in flash memory.	高速缓存设备, 快取記憶體設備, Udstyr til cache-processor, Équipement de moteur de cache, Suchmaschinenausstattung, Gyorsító tár motor berendezés, キャッシュ・エンジン機器, 캐시엔진장비, Cache-utstyr, equipamento de motor de Cache, Equipo de motor de caché, Utrustning för cacheminnen
43222608	Network repeaters	Device that regenerates and propagates electrical signals between two network segments - section of a network that is bounded by bridges, routers, or switches	中继器, 網路中繼器, Network repeaters, Netwerk repeaters, Répéteurs pour réseau, Netzüberträger, Hálózati ismétlők, ネットワーク・リピータ, 네트워크중계기, Nettverksrepeatere, repetidores de rede, Repetidores de red, Signalförstärkare för nätverk
43222609	Network routers	Network layer device that uses one or more metrics to determine the optimal path along which network traffic should be forwarded. Routers forward packets from one network to another based upon network layer information. Also known as a bridge.A network device that forwards packets to their destinations along an optimal path that is determined by using Layer 3 information.	网络路由器, 網路路由器, Rutere, Routeurs pour réseau, Netzrouter, Hálózati forgalomvezérlők, ネットワーク・ルータ, 네트워크라우터, Nettverksrutere, direcionadores de rede, Enrutadores (routers) de red, Nätverksroutrar

43222610	Network service concentrators or hubs	Hardware device that contains multiple independent but connected modules of network and internetwork equipment. Can be active (where they repeat signals sent through them) or passive (where they do not repeat, but merely split, signals sent through them). In Ethernet and IEEE 802.3, an Ethernet multiport repeater. Can be synonymous to a hub.	网络服务集线器和HUB, 網路服務集線器HUB, Hubs eller koncentratorer, Hubs ou concentrateurs de service réseau, Netzdienstverstärker, Hálózati szolgáltatás koncentrálók vagy elosztók, ネットワーク・サービス・コンセントレータ、ハブ, 네트워크서비스집중장치 또는 허브, Nettverkskonsentratorer eller huber, concentradores de serviço ou hubs de rede, Concentradores o hubs de servicio de red, Nätverkshubbar
43222611	Network channel or data service units	A CSU or DSU (Channel Service Unit or Data Service Unit) these are hardware devices about the size of an external modem that converts a digital data frame from the communications technology used on a local area network (LAN) into a frame appropriate to a wide-area network (WAN) and vice versa. Equipment used to connect a digital phone line (T-1 or Switched 56 line) coming in from the phone company to either a multiplexer, channel bank or directly to another device producing a digital signal.	网络通路和数据服务单元, 網路通路或資料服務單元, Enheder til etablering af en kanal i nettet eller en datatjeneste, Unités de service de canal ou de données du réseau, Netzkanal oder Datenserviceeinheiten, Hálózati csatorna vagy adatszolgáltatási egységek, ネットワーク・チャネル、データ・サービス装置, 네트워크채널 또는 데이터서비스유닛, Nettverkskanal- eller dataserviceenheter, unidades de canal de rede ou serviço de dados, Unidades de servicio de canales o información de red, Enheter för nätverkskanaler eller dataservice
43222612	Network switches	Network device that filters, forwards, and floods frames based on the destination address of each frame. The switch operates at the data link layer of the OSI model.	网络接线器, 網路接線器, Netværksswitche, Netwerkschakelaars, Commutateurs de réseau, Netzschalter, Hálózati kapcsolók, ネットワーク・スイッチ, 네트워크스위치, Nettverkssvitsjer, comutadores de rede, Interruptores de red, Nätverksomkopplare

43222615	Storage area network SAN switch	A storage area network (SAN) is a high-speed special-purpose network (or subnetwork) that interconnects different kinds of data storage devices with associated data servers on behalf of a larger network of users. Typically, a storage area network is part of the overall network of computing resources for an enterprise. A storage area network is usually clustered in close proximity to other computing resources but may also extend to remote locations for backup and archival storage, using wide area network carrier technologies.SANs support disk mirroring, backup and restore, archival and retrieval of archived data, data migration from one storage device to another, and the sharing of data among different servers in a network. SANs can incorporate subnetworks with network-attached storage (NAS) systems	存储区域网络转换开关, 儲存區域網路SAN轉換開關, Storage area network SAN switch, Commutateur de réseau de stockage, SAN Schalter, Tároló területi hálózati SAN kapcsoló, ストレージ・エリア・ネットワーク(SAN)スイッチ, SAN 스위치, SAN-svitsj (Storage Area Network), comutador de rede de área de armazenamento SAN, Interruptor de área de almacenamiento de red san, SAN-omkopplare (Storage Area Network)
43222619	Video networking equipment	Video networking equipment provides a powerful, high-performance video head-end solution that receives audio and video streams from any satellite, terrestrial, or wireless source.	视频联网设备, 視頻聯網設備, Video networking equipment, Équipement d'interconnexion vidéo, Videonetzwerkausstattung, Video hálózattechnikai berendezés, ビデオ・ネットワーキング機器, 비디오 네트워킹장비, Videonettverksutstyr, equipamento de rede de video, Equipo de video de red, Utrustning för videonätverk
43222620	Multiservice switch	A switch that provides multiple capabilities. For example, an IP+ATM multiservice switch provides advanced IP and ATM capabilities, and a multiservice WAN switch supports WAN data, voice, and video applications	多重服务交换器, 多重服務轉換器, Bredbånds-switch, Commutateur multiservice, Mehrfachdienstumschalter, Többszolgáltatású kapcsoló, マルチサービス・スイッチ, 멀티서비스스위치, Multiservicesvitsj, comutador multi serviço, Interruptor multi servicios, Multiserviceswitch
43222621	Content switch	Content switch intelligently switches and balances traffic load across multiple servers	内容交换机, 內容轉換器, Content switch, Commutateur de contenu, Inhaltsumschalter, Tartalom kapcsoló, コンテンツ・スイッチ, 콘텐트스위치, Innholdssvitsj, comutador de conteúdo, Interruptor de contenido, Innehållsomkopplare

43222622	Server load balancer	Provides balance between the multiple input requests to two or more servers to balance the load and maintain maximum system response time to the user.	服务器负载均衡器, 伺服器負載等化器, Balanceringsenhed for belastning af server, Équilibreur de charge entre serveurs, Serverbelastungsregler, Szerver terhelés kiegyenlítő, サーバ・ロード・バランサ, 서버로드밸런서, Serverbelastningsutjevner, balanceador de carga do servidor, Dispositivo para balancear la carga del servidor, Belastningsbalanserare för server
43222623	Digital cross connects DCX equipment	Connects synchronous ports at all switching levels - includes DACS in the US.	数字交叉连接DCX设备, 數碼交叉連接DCX設備, Digitalt koblingsudstyr, Équipement de brasseur numérique DCX, DCX Ausstatttung, Digitális kereszt összekapcsoló DCX berendezés, デジタル・クロス・コネクト(DCX)機器, 장비디지털 교차접속장비, Digitalt krysskoplingsutstyr, equipamento de conexão de cruzamento Digital DCX, Equipos de conexión cruzada digital dcx, DCX-utrustning
43222624	Optical cross connects equipment	Fitted to network hardware to perform cross connections bewteen all kinds of pleiochronous and sychronous port at all switching levels	光学交连设备, 光學交換連接設備, Optisk koblingsudstyr, Équipement de brasseur optique, OCX Ausstattung, Optikai kereszt összekapcsoló berendezés, 光クロス・コネクト機器, 광학 교차 연결 장비, Optisk krysskoplingsutstyr, equipamento de conexão de cruzamento ótico, Equipos de conexión cruzada óptica, OCX-utrustning
43222625	Access servers	Communications processor that connects asynchronous devices to a LAN or WAN through network and terminal emulation software. Performs both synchronous and asynchronous routing of supported protocols. Sometimes called a network access server.	接入服务器, 接入伺服器, Access servers, Serveurs d'accès, Zugangsserver, Hozzáférési szerverek, アクセス・サーバ, 접속 서버, Tilgangsservere, servidores de acesso, Servidores de acceso, Access-servrar

43222626	Cable modems	A cable modem is a device that enables you to hook up your PC to a local cable TV line and receive data at about 1.5 Mbps	线缆调制解调器, 線纜數據機, Kabelmodemer, Modems câble, Kabelmodem, Kábelmodemek, ケーブル・モデム, 케이블모뎀, Kabelmodemer, modems de cabo, Módems de cable, Kabelmodem
43222627	Integrated services digital network ISDN access devices	A client device providing ISDN digital transmission over ordinary telephone copper wire as well as over other media. ISDN requires adapters at both ends of the transmission so your access provider also needs an ISDN adapter. Equipment used to adapt Integrated Services Digital Network (ISDN) Basic Rate Interface (BRI) channels to existing terminal equipment standards such as EIA-232 and V.35. A Terminal Adaptor is typically packaged like a modem, either as a stand-alone unit or as an interface card that plugs into a computer or other communications equipment (such as a router or PBX).A Terminal Adaptor does not interoperate with a modem; it replaces it.	集成服务数字网络ISDN接入裝置, 集成服務數碼網路ISDN接入裝置, ISDN adapter, Dispositif d'accès au réseau numérique à intégration de services RNIS, ISDN-Geräte, Integrált szolgáltatási digitális hálózat ISDN hozzáférési berendezések, ISDNアクセス装置, ISDN 접속 장치, ISDN-tilgangsenheter (Integrated Services Digital Network), dispositivos de acesso de rede digital de serviços integrados ISDN, Dispositivos de acceso de redes digitales de servicios integrados isdn, ISDN-modem
43222628	Modems	A modem modulates outgoing digital signals from a computer or other digital device to analog signals for a conventional copper twisted pair telephone line and demodulates the incoming analog signal and converts it to a digital signal for the digital device. An electronic device for converting between serial data from a computer and an audio signal suitable for transmission over telephone lines. In one scheme the audio signal is composed of silence (no data) or one of two frequencies representing 0 and 1.	调制解调器, 數據機, Modem, Modems, Modems, Modem, Modemek, モデム, 모뎀, Modemer, Modems, Módems, Modem
43222629	Modem banks	Modem banks are a set of modems through which a connection to a network resource can be established through a Point to point protocol(PPP) especially by computers which are not physically connected to a network. A bundle of modems combined together for consolidated management.	调制解调器组, 數據機組, Modempulje, Modem banken, Batteries de modems, Modem Banken, Modem bankok, モデム・バンク, 모뎀뱅크, Modembanker, bancos de modems, Bancos de módems, Modembanker

43222630	Multistation access units	In a Token Ring network, a device to attach multiple network stations in a star topology, internally wired to connect the stations into a logical ring. The MAU contains relays to short out nonoperating stations. Multiple MAUs can be connected into a larger ring through their Ring In/Ring Outconnectors.	多站存取设备, 多站存取設備, MAU (Multistation access unit), Unités d'accès multistation, Multistationseinheiten, Többállomású hozzáférési egységek, マルチステーション・アクセス装置, 멀티스테이션 접속 장치, Tilgangsenheter til flere stasjoner, unidades de acesso de multi estações, Unidades de acceso multi estaciones, MAU (multistation access units)
43222631	Wireless fidelity base stations Wifi	The base station, with an Ethernet RJ-45 port, can be connected to the Internet via digital subscriber line (DSL) or cable modem. This commodity includes a base station that connects a wireless system to a wired land-based system. Wireless access points are connected to an Ethernet hub or server and transmit a radio frequency over an area of several hundred to a thousand feet which can penetrate walls and other non-metal barriers. The central radio transmitter/receiver that maintains communications with mobile radiotelephone sets within a wireless cell. 802.11, or IEEE 092.11, is a type of radio technology used for wireless local area networks (WLANS). Wi-Fi, 802.11 is composed of several standards operating in different radio frequencies.	无线网络基站Wifi, 無線網路站Wifi, Wifi-basisstationer (Wireless Fidelity), Points d'accès sans fil WiFi, Wifi-Stationen, Vezetéknélküli hű bázis állomások (wifi), WiFiベース局, 기지국, Wifi-basestasjoner (Wireless Fidelity), estações base de fidelidade sem fio Wifi, Estaciones base de fidelidad inalámbricas, WiFi-basstationer
43222632	Broadband aggregators	A high-performance, scalable service gateway that enables the selection and delivery of broadband network services, virtual private networks (VPNs), and voice- and entertainment-driven traffic over the full suite of access media	宽带协调控制器, 寬帶協調控制器, Bredbåndsaggregatorer, Agrégateur large bande, Breitbandaggregatoren, Szélessávú aggregátorok, ブロードバンド・アグリゲータ, 광대역집합체, Bredbåndsaggregatorer, agregadores de banda larga, Agregadores de banda ancha, Bredbandsaggregatorer
43222633	Remote management adapters	Remote management adapters are installed in personal computers or various network devices and allow management of PC or network devices remotely through computer network.	Adaptateurs de gestion à distance, Fernabschaltmanagementadapter, Távoli menedzselő adapterek, 遠隔管理アダプタ, 원격 관리어댑터, Adaptadores de manejo remoto, Fjärrhanteringsadaptrar
43222634	Network management or monitoring device	Devices that allow to manage and/or monitor devices in a network or perform analysis of network status.	Dispositif de contrôle ou de gestion du réseau, Netzmanagement oder Überwachungsgeräte, Hálózat menedzselő vagy megfigyelő berendezés, ネットワーク管理または監視サービス, 네트워크 관리 또는 모니터링장치

43222635	Network equipment upgrade kit	A set of components/modules/software for a network device intended for the device functionality upgrade.	Ensemble pour la mise à niveau des équipements réseau, Hálózati berendezés felújító készlet, ネットワーク機器のアップグレードキット, 네트워크장비업그레이드키트, Kit de actualización de equipo de redes, Up
43222636	Network application engine	Application engines are network appliances designed for providing customers with high-performance access to applications, storage, and content.	Moteur réseau, Hálózati applikációs motor, ネットワークアプリケーションエンジン, 네트워크 어플리케이션 엔진, Motor de aplicación de redes, Motor för nätverksprogram
43222637	Gigabyte passive optical network GPON	A network technology based on passive optical nets (PON). It makes possible data transfer rates of up to 2.5 gigabytes in both directions: downstream and upstream.	ギガバイト・パッシブ光ネットワーク（GPON), 기가바이트 통과 광학 네트워크 GPON, Red óptica pasiva de gigabytes gpon, GPON-nätverk (Gigabyte passive optical network)
43222638	Managed lease line network MLLN equipment	The MLLN is an integrated, fully managed, multi-service digital network platform through which service provider can offer a wide range of services at an optimal cost to business subscribers.	マネージドリース回線ネットワーク（MLLN）機器, 관리임대선네트워크(MLLN) 장비, Equipos de red de línea dedicada manejada mlln, MLLN-utrustning (Managed lease line network)
43222639	Internet protocol IP multimedia subsystem hardware	Hardware concerning IMS which is an integrated network for telecommunications carriers that uses the IP protocol as its foundation for packetized voice, video and data. The IP Multimedia Subsystem (IMS) is designed to interface with the PSTN and provide traditional telephony services such as 800 numbers, caller ID and local number portability.	インターネットプロトコル（IP）マルチメディアサブシステム・ハードウェア, 인터넷 프로토콜 멀티미디어 하위시스템 하드웨어, Hardware de subsistemas multimedia de protocolo de internet ip, Hårdvara för undersystem till IP-multimedia
43222640	Wireless access point	A device enabling two-way service of wireless data by connecting wired and wireless networks, which helps a user use high-speed internet and intranet services.	ワイヤレスアクセスポイント, 무선접속점, Punto de acceso inalámbrico, Trådlös åtkomstpunkt
43222641	Internet protocol sharing device	A device used to make it possible for computers to use internet at the same time by using one IP or Internet Protocol	IP 共有機, 인터넷프로토콜 공유기, Dispositivo de protocolo de internet compartido
43222642	Routing switcher	A device which sends the signal for multi channel to multi-channel and multi-channel to single channel for the multi-relay of broadcasting and communication.	経路切替装置, 라우팅 스위처, Interruptor de enrutador (router),
43222643	Cable network tester	A testing device that is manufactured for the inspection of functions or properties of the electric cable for power transmission or communication.	ケーブル・ネットワーク・テスタ, 케이블네트워크 테스터, Probador de cable de red,

43222644	Network traffic controller	Equipment that supports the limited resources to efficiently use by applying the data compression, traffic and bandwidth management technology from the network communication.	ネットワーク・トラフィック制御装置, 네트워크트래픽 제어장치, Controlador de tráfico de red,

Class 43222700 Telegraph equipment

Definition (if available) Equipment used in a system employing the interruption of, or change in, the polarity of DC current signaling to convey coded information

Commodity	Commodity Title	Definition	Synonym
43222701	Telegraph keys	A component of a telegraph system that originally consisted of two pieces of brass or copper which could be pressed together to complete the electrical circuit or allowed to spring apart using their natural "springiness" to break the circuit. As people developed the need to send messages more rapidly, the designs of keys changed and the evolution of these different designs of telegraph keys is the focus of my telegraph museum exhibits.	电报键, 電報鍵, Telegrafnøgle, Manipulateurs, Telegraphietastatur, Távirati kulcsok, テレグラフ・キー, 텔레그래프키, Telegraftaster, teclas de telégrafo, Teclas de telégrafo, Telegrafnycklar
43222702	Telegraph electromagnets	A component of a telegraph system that consisted of a coil of from 50 to several hundred turns of insulated wire wrapped around an iron core. It pulled on a piece of iron whenever an electric current was passed through it. These devices first caused marks to be made on a paper tape and then, when it was discovered that people could decipher the noises that they made by ear, they developed into the electromagnetically operated "sounders" used from the 1850s to the 1950s	电报电磁体, 電報電磁體, Elektromagneter til telegraf, Électro-aimants télégraphiques, Telegraphieelektromagneten, Távirati elekromágnesek, テレグラフ用電磁石, 전신전자자석, Telegrafelektromagneter, eletroímãs de telégrafo, Electro magnetos de telégrafo, Telegrafelektromagneter
43222703	Telegraph sounders	A component of a telegraph system that could recognize the different sounds made by the register as dots and dashes. This device used an electromagnet to pull on a piece of iron and make a clicking sound. When the electromagnet pulled on the iron, it made a more solid and heavy sounding click and when it released the iron, it made a thinner and lighter sounding click. Operators learned to discriminate between these two sounds and to use this ability to tell whether they were hearing a dot or a dash.	电报发声器, 電報發聲器, Medhør på telegrafer, Sounders, Telegraphietongeräte, Távirat megszólaltatók, テレグラフ用サウンダ, 전신음향기, Telegrafhøredeler, soadores de telégrado, Receptor acústico de telégrafo, Telegrafsounder
43222704	Telegraph switch board	The principle is the same as the general switch board, but it is designed to possess the unique service function for operating the telegraphic circuit.	テレグラフ用配電盤, 전신교환기, Conmutador de telégrafo,

43222801	Broadband or narrowband digital cross connect DCX equipment	Equipment used in a specialized type of high-speed data channel switch, that can accept specific line connect instructions that are independent of any calls that may flow over the system. These commands may be automate or manually input. Cross Connect equipment specific to Broadband, or Wideband.	宽带和窄带数字交叉连接DCX设备, 寬帶或窄帶數碼交換連接DCX設備, Digitalt koblingsudstyr til bredbånd eller smalbånd, Équipement de brasseur numérique DCX sur bande large ou étroite, Breit- oder Schmalband DCX Ausstattung, Szélessávú vagy szűksávú digitális kereszt kapcsoló DCX berendezés, ブロードバンド、ナローバンド・デジタル・クロス・コネクト(DCX)機器, 광대역 DCX 또는 장비, Digitalt krysskoplingsutstyr til bredbånd eller smalbånd, equipamento de conexão de banda larga ou estreita de conexão cruzamento digital DCX, Equipo de conexión cruzada digital dcx de banda estrecha o de banda ancha, DCX-utrustning (digital cross connect) för bredband eller smalband
43222802	Circuit switchboard equipment	Mechanical, electrical, or electronic equipment which opens or closes telephone circuits, completes or breaks an electrical path, or selects paths or circuits within the telephone system.	线路配电盘设备, 電路交換機設備, Udstyr til kredsløbskoblet omstillingsbord, Équipement de commutateur manuel de circuit, Stromkreisschaltbrettausstattung, Áramköri kapcsoló berendezés, 回路スイッチボード機器, 회로스위치보드장비, Linjesentralbordutstyr, equipamento de painel de circuito, Equipo de circuito de conmutador, Kretskortsutrustning
43222803	Digital loop carrier DLCs	Digital loop carrier (DLC) is equipment that bundles a number of individual phone line signals into a single multiplexed digital signal for local traffic between a telephone company central office and a business complex or other outlying service area. Typically, up to 24 analog voice calls are combined into a single signal and transmitted over a single copper T-carrier system or E-carrier line, an optical fiber cable, or a wireless connection. In a home, business, or other installation using digital loop carrier, the analog phone lines of individual users are connected to a local DLC box which then converts the analog signals into digital and combines (multiplexes) them into one signal that it sent to the phone company's central office on the single line. At the central office, the combined signal is separated back into the original signals. An estimated 20% of today's telephone users are being served by digital loop carriers.	数字回路载波器DLCs, 數字回路載波器DLCs, Bærebølgeudstyr til digitale kredsløb, Porteuse à boucle numérique DLC, DLCs, Digitális hurok hordozó DCL-ek, デジタル・ループ・キャリア(DLC), DLC, DLC-er (Digital Loop Carrier), portadora de circuito Digital DLCs, Cargador de circuito digital dlc, DLC-enheter (digital loop carrier)

43222805	Private branch exchange PBX equipment	A PBX (private branch exchange) is a telephone system within an enterprise that switches calls between enterprise users on local lines while allowing all users to share a certain number of external phone lines. The main purpose of a PBX is to save the cost of requiring a line for each user to the telephone company's central office. The PBX is owned and operated by the enterprise rather than the telephone company (which may be a supplier or service provider, however). Private branch exchanges used analog technology originally. Today, PBXs use digital technology (digital signals are converted to analog for outside calls on the local loop using plain old telephone service).	专用分机交换设备PBX, 専用分機交換設備PBX, PABC eller PBX -udstyr (Privat (analog) bicentral), Équipement d'autocommutateurs privés PBX, PBX Ausstattung, Magán elágazás váltó PBX berendezés, PBX機器, 구내교환장비, Hustelefonsentralutstyr (PBX), Equipamento de central de ramais privados PBX, Equipo de central telefónica privada pbx, PBX-utrustning
43222806	Punch down block	A type of electrical connection often used in telephony. It is named because the solid copper wires are "punched down" into short open-ended slots which are a type of insulation-displacement connectors. These slots, usually cut crosswise (not lengthwise) across an insulating plastic bar, contain two sharp metal blades which cut through the wire's insulation as it is punched down. These blades hold the wire in position and make the electrical contact with the wire as well.	punchdown block, punch block, punchblock, quick-connect block
43222811	Telephony equipment alarm units	A system that provides remote alarm to monitor telephony network capabilities, such as ones used to monitor air pressure cable systems.	电话设备报警装置, 電話設備報警裝置, Telephony equipment alarm units, Unités d'alarme de l'équipement de téléphonie, Telefonalarmeinheiten, Telefon berendezés riasztó egységek, テレフォニ機器用警報装置, 전신장비 경보장치, Alarmenheter til telefoniutstyr, unidades de equipamento de alarme de Telefonia, Unidades de alarma de equipos de telefonía, Larmenheter för telefoniutrustning

43222822	Time division multiplexer TDM	A device that uses time-division multiplexing (TDM). This is a method of putting multiple data streams in a single signal by separating the signal into many segments, each having a very short duration. Each individual data stream is reassembled at the receiving end based on the timing. Optical technology and equipment which manages data frames in a series of time slots	时分多路转换器TDM, 時分多路轉換器TDM, TDM multiplekser, tidsdelt multipleks, Multiplexeur temporel TDM, TDM, Idő megosztó multiplexer TDM, 時分割マルチプレクサ(TDM), 시분할다중화장치, TDM (Time Division Multiplexer), multiplexador de divisão de tempo TDM, Multiplexor de división de tiempo tdm, TDM-enheter (Time division multiplexer)
43222823	Wave division mulitplexer WDM	WDM (wavelength division multiplexing), in which several baseband-modulated channels are transmitted along a single fiber but with each channel located at a different wavelength. Each of N different wavelength lasers is operating at the slower Gbps speeds, but the aggregate system is transmitting at N times the individual laser speed, providing a significant capacity enhancement. The WDM channels are separated in wavelength to avoid cross-talk when they are (de)multiplexed by a non-ideal optical fiber. The wavelengths can be individually routed through a network or individually recovered by wavelength-selective components. WDM allows us to use much of the fiber bandwidth, although various device, system, and network issues will limit the utilization of the full fiber bandwidth. Note that each WDM channel may contain a set of even slower time-multiplexed channels. 43223321	Fiber optic connector clip	A fiber optic connector clippositions the fiber optic connectors so that the connectors can only be inserted into a corresponding number of receiving connectors in one way.	光ファイバー・コネクタクリップ, 광섬유 커넥터 클립, Clip conector de fibra óptica,
43223322	Fiber optic support grip	An device designed to reduce stress on fragile fiber optic cables in vertical or sloping runs.	光ファイバー・サポートグリップ, 광섬유 서포트 그립, Gancho de soporte de fibra óptica,
43223323	Fiber optic adapter	Fiber optic cable to cable connector.	光ファイバー・アダプタ, 광섬유 어댑터, Adaptador de fibra óptica,
43223324	Fiber optic polishing film	A film used to enhance the quality of fiber optic connections in assemblies.	光ファイバー研磨フィルム, 광섬유 광택막, Película pulidora de fibra óptica,
43223325	Fiber optic swab	A tool used for cleaning fiber optic connections.	光ファイバー綿棒, 광섬유 스왑, Hisopos para fibra óptica,
43223326	Fiber optic patch cord	A cord used for linking the equipment and components in a fiber optic network.	光ファイバー・パッチコード, 광섬유 패치 코드, Cable de conexión de fibra óptica,
43223327	Fiber optic fault locator	A hardware and software tool used to find breaks or faults in a fiber optic line.	光ファイバー視覚障害ロケーター, 광섬유 고장 추적기, Localizador de fallas de fibra óptica,
43223328	Fiber optic patch panel	A wiring device used to terminate, protect and organize the fiber optic cables and optical fibers in fiber optic communication networks.	光ファイバー・パッチパネル, 광섬유 패치 패널, Panel de conexión de fibra óptica,
43223329	Fiber optic light source	A fiber optic test equipment to measure the fiber optic loss for all types of fiber optic cables.	光ファイバー光源, 광섬유 광원, Fuente de luz de fibra óptica,
43223330	Fiber optic connector assembly tool	A tool that performs multiple operations associated with the assembly of fiber optic cables.	光ファイバー・コネクタ・アセンブリツール, 광섬유 커넥터 조립체 공구, Herramientas de ensamblaje de conector de fibra óptica,
43223331	Fiber optic insert	A dry component of a fiber optic cable that lies alongside the filament to protect it.	光ファイバー挿入, 광섬유 인서트, Inserto de fibra óptica,
43223332	Fiber optic tool kit	A set of tools used for various connection and repair operations on fiber optic cables.	光ファイバーツールキット, 광섬유 공구 키트, Kit de herramientas de fibra óptica,
43223333	Fiber optic scope eyepiece	Eyepiece containing the lense and light for a fiber optic scope.	光ファイバー・スコープ接眼レンズ, 광섬유 경 접안렌즈, Lente de alcance de fibra óptica,
43223334	Fiber optic tool and die set	A collection of tools and dies used for fiber optic cable shaping and conditioning operations.	光ファイバー・ツールおよびダイセット, 광섬유 공구 및 다이 세트, Set de herramientas y tintes de fibra óptica,
43223335	Fiber optic music wire	A length of piano or other type musical instrument wire used to save a fiber optic connector when the cable has broken inside the ferrule.	光ファイバー音楽ワイヤー, 광섬유 현, Cable de música de fibra óptica,
43223336	Fiber optic scope adapter	A portable fiber optical scope that can be attached to a camera or other electronic device.	光ファイバー・スコープアダプタ, 광섬유 경 어댑터, Adaptador de alcance de fibra óptica,
43223337	Fiber optic enclosure	A specialized container used to organize fiber optic cables	光ファイバー・エンクロージャー, 광섬유 인클로저, Cerramiento de fibra óptica,

43232705	Internet browser software	Internet browsing software is a program which allows a person to read hypertext. The browser gives some means of viewing the contents of pages and of navigating from one page to another. Netscape Navigator, NCSA Mosaic, Lynx, and W3 are examples for browsers for the World-Wide Web. They act as clients to remote web servers.	英特网浏览器软件, 互聯網流覽器軟件, Browsersoftware, Logiciels de navigation Internet, Internetbrowsersoftware, Internetes böngésző szoftver, インターネット・ブラウザ・ソフトウェア, 인터넷브라우져 소프트웨어, Programvare for nettlesere, software de navegador de Internet, Software de navegador de internet, Webbläsare

Class 43232800 Network management software

Definition (if available): A software developed to view relevant information collected from network devices and application sources through a central point of control. It is used for security purposes, control network communication and help human administrators configure and maintain a network.

Commodity	Commodity Title	Definition	Synonym
43232801	Network monitoring software	Software to monitor, analyze, and detect network systems.	网络监视软件, 網路監測軟件, Software til netværksovervågning, Logiciels de contrôle de réseau, Netzwerküberwachungssoftware, Hálózat figyelő szoftver, ネットワーク監視ソフトウェア, 네트워크감시 소프트웨어, Programvare for nettverksovervåking, software de monitoração de rede, Software de monitoreo de red, Programvara för nätverksövervakning

45111708	Broadcast domain controller	A control equipment that is used for the purpose of checking the normal operation condition of its structure elements of intercommunicating equipment in amp, microphone, timer, and others communication device for the purpose of emergency crisis of fire, earthquake, or the purpose of conference control and others.	ブロードキャスト・ドメイン・コントローラ, 브로드캐스트 도메인 컨트롤러, Controlador de dominio de transmisión,
45111709	Remote amplifier	Equipment that may control the main equipment from a specific area of the outside with remote control. This equipment selects the power ON--OFF and speaker line and adjusts as in the main equipment.	リモートアンプ, 리모트앰프, Amplificador remoto,
45111710	Chime and siren unit	A type of device that has the generation of 4 scales of chime for upward or downward level of soft sound color used to inform the beginning and ending of information broadcasting.	チャイムおよびサイレンユニット, 차임 사이렌 유닛, Unidad de timbre y sirena,
45111711	Speaker baffle	A screening structure or partition that is used to increase the practically effective delivery distance between the two points of acoustic system, such as the front point and rear point of electroacoustic transducer and others.	スピーカー・バッフル, 스피커배플, Deflector (bafle) de micrófono,
45111712	Tape duplicator	Recording equipment that is designed to make several reproduction tapes simultaneously from 1 master tape. It is the copying device to make many copies in short period of time by recording in faster speed than the original tape.	テープ用複製機, 테이프 복사기, Duplicador de cintas,
45111713	Audio distribution amplifier	A type of device that distributes the signal to the several types of equipment input terminal by amplifying and separating one audio input signal for several signals.	オーディオ信号分配増幅器, 음향분배 증폭기, Amplificador de distribución de audio,
45111714	Audio analog to digital AD converter	Equipment that converts the analog audio signal into the digital audio signal.	オーディオ・アナログ・デジタル（AD）・コンバータ, 오디오 AD 변환기, Convertidor de audio de análogo a digital ad,
45111715	Audio digital to analog DA converter	Equipment that converts the digital audio signal into the analog audio signal.	オーディオ・デジタル・アナログ（DA）・コンバータ, 오디오 DA 변환기, Convertidor de audio de digital a análogo da,
45111716	Digital audio workstation DAW	Equipment that may edit and reproduce or edit specific part while looking into the graphic screen on the monitor after storing the acoustic input signal into the digital signal on the hard disc.	デジタル・オーディオ・ワークステーション（DAW）, 디지털 오디오 편집기, Estación de audio digital daw,
45111717	Reverberator	An echoing device that is designed to add the reverberation to naturally make the sound of microphone with less reflection sound.	リヴァーブレイター, 잔향효과기, Reverberador,
45111718	Delay unit	Equipment that improves the time difference arising between the image and sound for slow propagation velocity of the sound.	遅延装置, 딜레이 유닛, Unidad de retardo,
45111719	Audio monitor	A type of device that is designed to monitor particularly or simultaneously for the sound of each channel after inputting several channels of audio signal on a number of equipment.	オーディオ・モニタ, 오디오 모니터, Monitor de audio,
45111720	Audio spectrum analyzer	Equipment that is designed to find out the size or characteristics of signal by analyzing for each frequency of the signal output through various audio devices.	音声スペクトル分析器, 오디오스펙트럼 분석기, Analizador de espectro de audio,
45111721	Reel to reel tape recorder	A tape recorder that records the audio signal in magnetic tape wound around round plastic or aluminum wheel.	オープンリール式テープ・レコーダ, 릴테잎 녹음기, Grabadora de cintas bobina a bobina,
45111722	Cassette deck	Audio equipment that may reproduce the recorded sound or records the audio by using the cassette tape.	カセットデッキ, 카세트덱, Lector de casetes,

45111820	Video processing amplifier	An image signal stabilization device that is designed to emit the clean video signal made by separating and processing the color burst, the structure element of the input television image signal.	ビデオ処理アンプ, 비디오프로세싱 앰프, Amplificador de procesamiento de videos,
45111821	Synchronizing or sync generator	Equipment that generates the synchronization signal as the standard signal to synchronize the scanning of reception side to transmission side for the complete image reproduction on the television screen.	同期発電機, 동기신호발생기, Generador de sincronización,
45111822	Television aspect ratio converter	A type of device that converts the television screen ratio of 4:3 to different screen ratio such as 16:9.	テレビ用アスペクト比コンバータ, 텔레비전 화면비율 변환기, Convertidor de tasa de aspecto de televisión,
45111823	Video standards converter	Equipment that converts the video material produced in mutually different television quality score to fit into the television quality score of its own country.	ビデオ用標準コンバータ, 비디오 표준방식 변환기, Convertidor de estándares de video,
45111824	Synchronizing or sync converter	A type of device that makes the frequency of the two oscillation signals and phases to be consistent.	シンクコンバータ, 싱크컨버터, Convertidor de sincronización,
45111825	Frame synchronizer	A synchronous conversion device that enables the two television signals to mix by making consistent synchronization of video signal transmitted from outside and basic video signal.	フレーム・シンクロナイザ, 프레임 싱크로나이저, Sincronizador de marco,
45111826	Motion picture experts group MPEG encoder	A type of device that compresses and saves by converting the video signal with the MPEG --Motion Picture Experts Group-- compression method.	エムペグ（MPEG）エンコーダ, MPEG 엔코더, Codificador de grupo de expertos de películas animadas mpeg,
45111827	Video tape checker	A type of device that erases the image recorded as well as analyzes the tape condition to classify for the grade of top, middle and bottom and displays the defective location on LED --light-emitting diode-- or output paper.	ビデオテープ・チェッカー, 비디오테이프 검사기, Verificador de video cintas,
45111828	Prompter	A type of device that indicates the contents in caption or others by enabling MC master of ceremonies to undertake the broadcasting while reading the news or script.	プロンプター, 프롬프터, Indicador (prompter),
45111829	Process camera	A camera that copies the negative or positive film used in the photolithography from the manuscript. It is structured with manuscript frame, lens frame, light source lamp, flash lamp and others.	写真製版用カメラ, 제판사진기, Cámara de proceso,

47101540	Chemical feeder	The equipment used to feed a proper amount of chemicals such as coagulant and coagulant aids according to water quality or water flow in treatment of water supply and industrial water.	化学薬品注入ポンプ, 약품 투입기, Alimentador de químicos, Kemisk matare
47101541	Ozone water treatment equipment	The equipment used to treat and remove impurities from wastewater by using oxidation of ozone.	オゾン水処理機器, 오존수 처리장치, Equipo de ozono de tratamiento de aguas, Utrustning för ozonrening av vatten
47101542	Air flotation equipment	A water treatment device or equipment used to purify waste water by releasing tiny bubbles at suspended matters to float to the surface of the water.	加圧浮上分離装置, 공기 부유장치, Equipo de flotación de aire, Luftflotationsutrustning
47101543	Surface aerator	A device used to provide air to aerated basins. Electrically powered rotors are submerged in the water to provide air to the water by stirring the water surface with rotation power.	表面曝気装置, 표면 폭기기, Aireador de superficie, Ytvattensyresättare
47101544	Air diffuser for sewage treatment	A device used to provide air to the water needed for sewage treatment process.	下水処理用散気装置, 폐수처리용 공기 분사기, Difusor de aire para tratamiento de aguas residuales, Luftspridare för rening av avloppsvatten
47101545	Rotating biological contactor RBC	A device that disintegrates and processes the impure substances in waste water by delivering the oxygen in the air when it is exposed to the atmosphere and consuming the organic material by the inorganic materials when the circular plate is rotated to wet the reaction vessel.	回転生物接触装置（RBC）, 접촉회전원판 처리장치, Contactor biológico rotatorio rbc,
47101546	Grit removal system	A type of device that gathers the sand and soil piled up on the grit chamber and releases to outside.	グリット除去システム, 침사제거장치, Sistema de remoción de arena,
47101547	Surface washing device	A type of device that gushes out the high pressure water on the surface of the filter sand in the water treatment facilities for removing the foreign substance precipitated on the surface of filter paper.	表面洗浄機, 표면세척기, Dispositivo de lavado de superficies,
47101548	Filter control console	A type of device that precisely finds out the functional condition of the filter paper and automatically controls.	ろ過装置制御器, 여과기 조작대, Consola de control de filtro,
47101549	Gravity filter	A type of equipment that is designed for fast filtering of the discharged water by the gravity not filtered on the filter paper opened.	重力式ろ過装置, 중력식 여과장치, Filtro de gravedad,
47101550	Compression filter	A type of equipment that is to filter the discharged water by penetrating the filter water by applying the water pressure by closing the filtering device.	圧力式ろ過装置, 압력식 여과장치, Filtro de compresión,
47101551	Up flow filter	A filtering device that has the natural water flowing into the lower part of the tank and filtered to upper direction, and when filtered, the foreign substance arrested is lifted up by the air to release outside. At this time, the filter sand placed upwardly together with the impure substance is washed off and it is dropped to the filter layer again by washing and its own weight.	上向流式ろ過装置, 상향류식 여과장치, Filtro de flujo ascendente,
47101552	Moving bed filter	A device that scratches out the sand filtered surface attached with the suspended solid in the waste water and it is supplied to the lower part of the filtering layer continuously after washing, or new sand is sent to the filter layer in proportion from the top. There is a method to take out the polluted sand that includes the floating substance to downside while sending new sand from the top.	移動床ろ過装置, 이동상식 여과장치, Filtro de cama movible,
47101553	Fiber filter	A device that uses the handle-shape textile as the filter media to arrest the pollutant substance to the air gap of the textile tissue to make the filtered water clearly purified and the arrested pollutant substance is released to the outside when washing reversely.	繊維ろ過装置, 섬유여과기, Filtro de fibra,

47101554	Jar tester	A type of device that is designed to test the cohesive force and others in the sample when injecting the test chemicals to the waste water at the time of disposing the waste water.	ジャーテスター, 자 테스터, Probador de jarro,
47101555	Baffle wall	A structure that maintains the balance of flow speed and protects the floc generated from the cohesive area for the improvement of the adjustment of natural water volume and the sedimentation efficiency during the water purification process.	バッフル壁, 정류벽, Tabique de interceptación,
47101556	Water trough	A type of channel-type water holder that releases the upper water with the sedimentation of suspended solid from the settling pond or releases the washing water with the backwashing of filter layer from the filter paper.	水おけ, 트러프, Bandeja de goteo de agua,
47101557	Inclined plate settler	A facility that is designed to have high sedimentation effect in short period of time by shortening the sedimentation distance in the pond of sludge by installing several sloped plate.	傾斜板沈降機, 경사판 침강장치, Plato inclinado para asentamiento,
47101558	Foam breaker	A device that sprays and ejects water with a nozzle that is installed at a certain distance from the water surface to remove the foam.	破泡剤, 거품제거기, Removedor de espuma,
47101559	Scum removal equipment	A type of device that prevents the mixture to the discharged water by removing the scum on the water surface arising from settling pond, digester or others.	スカム除去装置, 스컴제거기, Equipo de remoción de mugre,
47101560	Filter underdrain equipment	A structure that improves the equal filtering and backward flow functions in the rapid filtration.	暗渠フィルタ機器, 하부집수장치, Equipo de bajo drenaje de filtración,
47101561	Adulteration treatment equipment	A type of device that is released and removed by moving and dehydrating with the screw press after filtering and separating from the rotary drum screen for the adulteration that is included in the night soil, sewer water, waste water on livestock and others.	不純物処理装置, 협잡물처리기, Equipo de tratamiento de adulteración,
47101562	Drum screen	A facility that is made to have the pollutant water with solid matter to flow in to the drum-type rotating screen inside that has the water passes the screen to purify while the solid matter are filtered through the screen to be discharged.	ドラムスクリーン, 드럼스크린, Pantalla de tambor,
47101563	Wastewater coalescer	A type of device that separates in accordance with the specific gravity difference by assembling of finite oil particle blended in the emulsion condition in the waste water by consecutively condensed to submerge or emerge.	廃水コアレッサー, 폐수 코어레서, Separador coalescente de aguas residuales,
47101564	Waste crusher	A type of device that crushes the ones that could be crushed with the blade crusher, such as Styrofoam, wooden material, and others, from the waste product arising from the waste substance with the size fit for the processing use.	廃棄物粉砕機, 폐기물 분쇄기, Triturador de desperdicios,
47101565	Waste gas burner	A device that uses the methane gas generated from the process of water purification and waste water disposition to use for fuel in boiler and others, and this device completely combusts the surplus gas after the fuel use.	廃棄物用ガスバーナー, 잉여가스 연소기, Quemador de gas de desperdicios,
47101566	Multiple media filter	A filter that is blended two or more of filter medias like the filter sand, anthracite, zeolite, active carbon, or sand for use.	多重媒体ろ過装置, 다층여과기, Filtro de medios múltiples,
47101567	Electrodialysis machine	A device that separates the substance in waste water by electrically moving through the ion exchange membrane.	電気透析装置, 전기투석장치, Máquina de electrodiálisis,
47101568	Swimming pool cleaning unit	An integrated facility that is composed with a series of equipments used for re-supply with clean water by processing for filtering, sterilization, acidity control and others.	水泳プール・クリーニングユニット, 수영장정화설비, Unidad de limpieza de piscinas,
47101569	Wastewater plane screen	A facility that prevents the inflow or outflow of miscellaneous floating materials by installing on the entry part of the intake or grit chamber, the outflow part of the drainage pump facilities.	廃水用平面スクリーン, 폐수 평면스크린, Control plano de aguas residuales,

© 2016 United Nations Development Programme and GS1 US

47101570	Oxidation ditch	A bio-chemical reactor that disassembles the polluted substance by supplying the oxygen with the mechanical aerator to the elliptical reaction vessel.	酸化溝, 산화구식 처리기, Cuneta de oxidación,
47101571	Chlorine gas neutralization unit	A device that neutralizes the chlorine gas by operating the ventilator that absorbs the gas and the circulating pump that sprays the neutral liquid simultaneously with the warning of gas leakage when leaking the chlorine gas.	塩素ガス中和ユニット, 염소가스 중화장치, Unidad de neutralización de gas de cloro,
47101572	Disc screen	A type of device that releases the sold matter to be screened while the flowing water passes to the rotating and empty disc-type of screen to purify.	ディスクスクリーン, 디스크 스크린, Control de disco,
47101573	Flocculator	A facility that makes the slow agitation to make the sedimentation easier by growing the finite floc into the larger floc.	凝集沈殿装置, 응집기, Floculador,
47101574	Sequencing batch reactor	A device that processes the polluted substance by implementing repeatedly for the processing like the inflow and reaction within a batch reactor, release of sludge and supernatant and sedimentation of mixed liquid.	連続バッチ反応器, 연속회분식 처리기, Reactor de lotes de secuenciación,

Class	50202400	Fresh citrus juice or concentrate

Definition (if available): Citrus juice are those that contain a high proportion of citric acid giving them their characteristic astringent odour and flavour and are also good sources of vitamin c. Juices are made by extracting the liquid part of a vegetable or fruit. They may contain a mixture of vegetables or fruits and will commonly retain the taste of the primary ingredient. Concentrate is a condensed liquid form of the product which has had the majority of its base component, primarily water, removed. Generally, concentrate solids do not contain pulp, seeds or rind.

It was first discovered by Europeans in 1535 by Gonzalo Fernández de Oviedo, who reported having seen papaya plants in said region. Its subsequent spread to the Caribbean and South America was due to Spanish and Portuguese conquest and settlement . In these places, papaya is known by different names such as fruta bomba, lechosa, papaw, pawpaw among others. In Peru there are diverse species growing in tropical zones.	

Class 50305200 Passion fruit

Definition (if available): The nearly round or ovoid fruit, 1-1/2 to 3 inches wide, has a tough rind that is smooth and waxy and ranging in hue from dark purple with faint, fine white specks, to light yellow or pumpkin-color. Within is a cavity more or less filled with an aromatic mass of double walled, membranous sacs containing orange-colored, pulpy juice and as many as 250 small, hard, dark brown or black, pitted seeds. The unique flavor is appealing, musky, guava-like and sweet/tart to tart. The yellow form has generally larger fruit than the purple, but the pulp of the purple is less acid, richer in aroma and flavor, and has a higher proportion of juice

Class 50306000 Pomelos

Definition (if available): The pummelo is an exotic large citrus fruit that is an ancient ancestor of the common grapefruit. It is the largest of the citrus fruits with a shape that can be fairly round or slightly pointed at one end (the fruit ranges from nearly round to oblate or pear-shaped). They range from cantaloupe-size to as large as a 25-pound watermelon and have very thick, soft rind. The skin is green to yellow and slightly bumpy; flesh color ranges from pink to rose. They can range from almost seedless to very seedy, from juicy to dry, from sweet to sour. It is sweeter than a grapefruit and can be eaten fresh, although membranes around the segments should be peeled. Pummelos commonly have 16 to 18 segments, compared to most grapefruit that have about 12 segments.

Class	50325200	Dried passion fruit

Definition (if available): The nearly round or ovoid fruit, 1-1/2 to 3 inches wide, has a tough rind that is smooth and waxy and ranging in hue from dark purple with faint, fine white specks, to light yellow or pumpkin-color. Within is a cavity more or less filled with an aromatic mass of double walled, membranous sacs containing orange-colored, pulpy juice and as many as 250 small, hard, dark brown or black, pitted seeds. The unique flavor is appealing, musky, guava-like and sweet/tart to tart. The yellow form has generally larger fruit than the purple, but the pulp of the purple is less acid, richer in aroma and flavor, and has a higher proportion of juice It has been dried for preservation.

Class 50326000 Dried pomelos

Definition (if available): An exotic large citrus fruit that is an ancient ancestor of the common grapefruit. It is the largest of the citrus fruits with a shape that can be fairly round or slightly pointed at one end (the fruit ranges from nearly round to oblate or pear-shaped). They range from cantaloupe-size to as large as a 25-pound watermelon and have very thick, soft rind. The skin is green to yellow and slightly bumpy; flesh color ranges from pink to rose. They can range from almost seedless to very seedy, from juicy to dry, from sweet to sour. It is sweeter than a grapefruit and can be eaten fresh, although membranes around the segments should be peeled. pomelos commonly have 16 to 18 segments, compared to most grapefruit that have about 12 segments. It has been dried for preservation.

Class 50335200 Dried organic passion fruit

Definition (if available): The nearly round or ovoid fruit, 1-1/2 to 3 inches wide, has a tough rind that is smooth and waxy and ranging in hue from dark purple with faint, fine white specks, to light yellow or pumpkin-color. Within is a cavity more or less filled with an aromatic mass of double walled, membranous sacs containing orange-colored, pulpy juice and as many as 250 small, hard, dark brown or black, pitted seeds. The unique flavor is appealing, musky, guava-like and sweet/tart to tart. The yellow form has generally larger fruit than the purple, but the pulp of the purple is less acid, richer in aroma and flavor, and has a higher proportion of juice It has been dried for preservation.
