REPORTING ANALYSIS

You can analyze reported data for various logistics indicators including

- Month of Stock
- Average Monthly Consumption
- Month and Year Filters

DATA REPORTS

Improved data reporting for informed decision making. Federal, Provincial, Divisional, and District Warehouses can:

- Add issues and received stock details
- Specify stock adjustments
- Manage batches in order to maintain the First Expiry First Out distribution of vaccines

EPI Users will report Service Delivery Point data on monthly basis using vLMIS for better data visibility.

COLD CHAIN

Effective cold chain asset tracking to reduce vaccine wastage

- You can add new Assets
- Search for existing Assets
- Transfer Assets to warehouses
- Updated your Asset's working status
