Subject: Intent to become an OpenLMIS Trusted Partner

Dear Tenly Snow,

SoftWorks is a private limited company registered in Bangladesh and have been in operation since 2007. SoftWorks have been developing database-centric web-based supply chain and logistics management systems since 2010, when we started as a sub-contractor of Strengthening Pharmaceutical Systems (SPS) program in Bangladesh under Management Sciences for Health (MSH) funded by USAID. We have been developing and improving the electronic supply chain management system of Ministry of Health and Family Welfare (MOHFW) of Bangladesh till now. Starting from 2012, SoftWorks have developed and implemented health logistics management system in Swaziland, Namibia, Mali, Togo, Benin, Cameroon, Sierra Leone and Liberia. We also have experience in developing regional supply chain portal covering HIV/AIDS commodities in West Africa region and for TB commodities in pilot ECSA countries.

Recently we came to know about OpenLMIS and we are showing our intent to be part of the community as a Trusted Partner. We are excited to see the OpenLMIS features and hope that our 8+ years of health logistics system knowledge would be helpful for the community. Not to mention that being part of the community will also help us to build more effective health logistics systems in the future. We confirm that we would uphold OpenLMIS community principles, share business development opportunities with other Trusted Partners whenever required and collaborate on consortium responses when appropriate. As we currently do not have programmers having strong expertise in the OpenLMIS technologies, we can contribute to the product committee and be able to assist in country implementation and rollout of OpenLMIS.

Following signatory will act as the contact person designated from SoftWorks to receive opportunities or respond to inquiries as and when required.

We hope that both SoftWorks and OpenLMIS community will be benefited from the collaboration in the long run.

Thanks & best regards.

Mahmudul Islam
