Synergize Your Supply Chain

E-KANBAN - ALIGN DEMAND AND INVENTORY IN REAL TIME

- DEMAND DRIVEN REFILLS
- REDUCED INVENTORY
- INSTANT SIGNALS TO SUPPLIERS
- REAL TIME STATUS
- PRINT AND SCAN KANBAN CARDS
- USE MOBILE PHONES OR SCANNERS
- CLOUD PORTAL FOR VISIBILITY
- INSTANT TRANSACTION REPORTS

Manufacturing companies are on a continuous quest to align their operations with customer demand while minimizing inventory through supplier collaboration. Unlike a forecast based MRP system, just-in-time Kanban is a pull based system that is driven by demand to reduce inventory and optimize the manufacturing process. Material is requested only when it is needed.

The E-Kanban approach ensures that suppliers are notified immediately when a bin becomes empty. Our cloud based collaboration system acts as a common gateway between suppliers and buyers to see the current status of all the Kanban bins. With one common system that is accessible to all trading partners, TPSynergy becomes a single, reliable source of truth reducing inventory and avoiding costly production bottlenecks.

NO-RISK IMPLEMENTATION IN TWO WEEKS

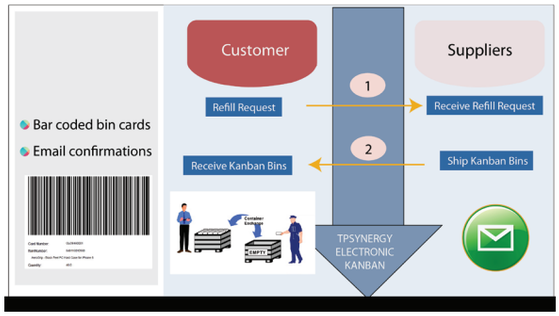
E-KANBAN

Bar Coding & Alerts

Bar coded labels are created within the TPSynergy application. Barcodes can be scanned with the mobile phone app or hand-held scanning guns to mark the bin as empty. Once the bin is marked empty, an email alert is sent immediately to the supplier. Suppliers can also print their labels directly from the cloud portal.

Electronic Kanban System



Transactional Reports

All Kanban transactions are instantly visible in the portal. They can be downloaded into an Excel format which makes it easier to track and manage transactions. Consolidated invoicing can be reconciled using these transaction reports.

Shipping Integrations

TPSynergy is integrated with FedEx, UPS and USPS systems so suppliers can print their labels directly instead of logging into other shipping software

About our company

TPSynergy.com is an Austin, Texas based software technology vendor with deep roots in manufacturing and supply chains. It provides rapid and robust business solutions for some of the toughest supply chain challenges. Its order and inventory processing software connects to customers using Electronic Data Integration (EDI) and provides a simple platform for collaboration.

Corporate Office: 11824 Jollyville Rd, Suite 500 Austin, TX 78759
